"Givin' advice," said Uncle Eben, "is often a roundabout way of blatin' to a man dat you don't think he's got as much sense as you have."

INCREASE YIELD OF GARDEN SOIL

Only Well-Rotted Manure Should Be Applied as Top Dressing in the Spring.

ADD SOME NITRATE OF SODA

Several of Salad Crops Require Plenty of Nitrogen for Leaf Growth—Application of Lime Has Decided Advantage.

(Prepared by the United States Department of Agriculture.)

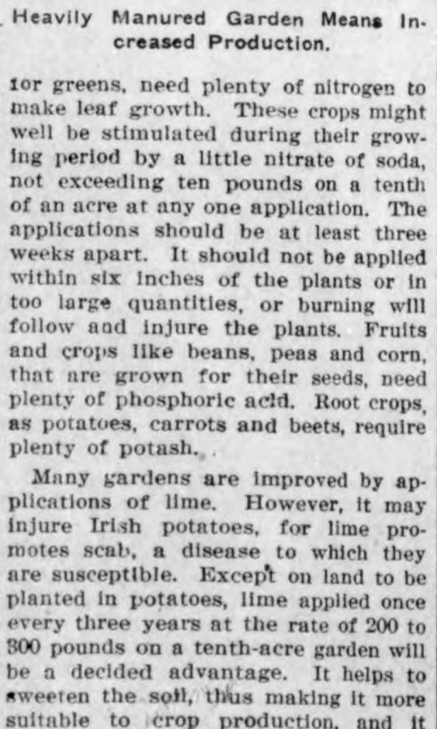
Nothing equals plenty of stable or yard manure to make a garden plot produce the best crops. Garden specialists of the United States Department of Agriculture mean by this not merely a meager scattering over the surface, but an application about two inches thick. It should be applied in the fall to form a protecting cover during the winter. If this is done, the manure should be turned under as early in the spring as possible, but any material too rough to turn under should be piled in a compost heap to rot. Only well-rotted manure should be applied in the spring as a top dressing. After the land has been plowed, scatter the rotted manure over the surface and work it in with the harrow. If the garden is spaded the manure should be worked in with a spading fork or rake.

Elements Sometimes Deficient.

Large quantities of manure should be used. On a tenth-acre garden, that is, one measuring about 43½ feet by 100 feet, apply from one to two tons—two loads—in the fall. If a truck is used for hauling one load generally will be sufficient. If a corresponding amount is piled up in the autumn with a little sod or soil mixed with it, and worked over once or twice during the winter, it will give a good supply of compost for use as a spring top dressing.

Where this amount of manure is used very little chemical fertilizer is needed. However, manure very often does not have a sufficient quantity of nitrogen, phosphoric acid and potash in it, and it may be desirable to add commercial fertilizers containing 2 or 3 per cent nitrogen, 8 or 10 per cent phosphoric acid and 3 to 6 per cent potash, at the rate of 100 pounds on a tenth-acre garden. This also can be spread broadcast and worked into the soil when the land is being pulverized ready for planting.

Several crops require special fertilizers. For instance, lettuce, cabbage, spinach, kale, and in fact all of the salad crops, and those which are grown



Heavily Manured Garden Means Increased Production.

for greens, need plenty of nitrogen to make leaf growth. These crops might well be stimulated during their growing period by a little nitrate of soda, not exceeding ten pounds on a tenth of an acre at any one application. The applications should be at least three weeks apart. It should not be applied within six inches of the plants or in too large quantities, or burning will follow and injure the plants. Fruits and crops like beans, peas and corn, that are grown for their seeds, need plenty of phosphoric acid. Root crops, as potatoes, carrots and beets, require plenty of potash.

Many gardens are improved by applications of lime. However, it may injure Irish potatoes, for lime promotes scab, a disease to which they are susceptible. Except on land to be planted in potatoes, lime applied once every three years at the rate of 200 to 300 pounds on a tenth-acre garden will be a decided advantage. It helps to sweeten the soil, thus making it more suitable to crop production, and it makes heavy clay soils lighter and easy to cultivate.

"Green-Manure" Crops.

Another way to improve garden soil is the use of "green-manure" crops, such as clovers, rye, alfalfa, barley, and, in fact, almost anything which will grow upon the land during the fall and winter. The clovers, and the other closely related plants known as legumes, which have the power of gathering the free nitrogen from the air and storing it up in the soil are the most desirable. Green-manure crops should be turned under in early spring

PLAN TO ERADICATE DISEASE OF POTATO

Intensive Warfare Being Made to Stamp Out Wart.

Ailment Usually Destroys Entire Crop When Tubers Susceptible to It Are Planted in Badly Infested Ground.

(Prepared by the United States Department of Agriculture.)

Although their efforts to eradicate the potato wart from the 100 acres or less in which it has found lodgment in the United States are as yet inconclusive, pathological experts of the United States Department of Agriculture are continuing an intensive scientific warfare to stamp out the disease. The infection, which has been found in only 17 mining villages in Pennsylvania, West Virginia and Maryland, is one of the most stubborn with which the department has ever had to cope. Potato wart was introduced by importations of foreign potatoes prior to the establishment in 1912 of the federal quarantine prohibiting the importation

A Potato Sprayer That Covers Four Rows.

of potatoes from countries where the disease was known to occur. The disease usually completely destroys the crop when potatoes susceptible to it are planted in badly infested soil.

Soil sterilization tests by means of steam and chemicals were carried out in infested gardens in Pennsylvania and West Virginia in 1919 and 1920. The methods tested were: Live steam under an inverted iron pan; a solution of formaldehyde applied to the soil, both alone and in combination with steam and the use of chemical solutions, including bordeaux mixture, mercuric chloride, and sulphuric acid. The worth of each method was tested by planting a susceptible variety of potatoes on the treated plots. None of the chemical treatments resulted in complete eradication of the disease, and steam sterilization, while it appeared to be successful in the small trial plots, involved such great expense and difficulty as to leave the practicability of eradication still in doubt.

Additional experiments will have to be carried on before specific recommendations can be made. Specialists hope, however, that some method of treating the soil by heat or chemicals can be devised which will make it possible completely to eradicate potato wart from this country.

The work will be actively carried forward until it is determined whether a satisfactory method can be found.

RAISE EGG STANDARDS

If all farmers and poultrymen would adhere strictly to the following rules in handling their poultry and eggs the quality of the eggs marketed would be much improved Poultry specialists in the United States Department of Agriculture provide the rules:

1. Keep the nests clean; provide one nest for every four hens.
2. Gather the eggs twice daily.
3. Keep the eggs in a cool, dry room or cellar.
4. Market the eggs at least twice a week.
5. Sell, kill or confine all male birds as soon as the hatching season is over.

GRAIN ALLOWANCE FOR HENS

If Scattered in Litter Fowls Are Compelled to Take Necessary Exercise to Find It.

The backyard flock should have in addition to the table scraps a light feed of grain every morning.

Four or five handfuls of grain—about one-half pint—scattered in the litter will be sufficient for a flock of 20 to 25 hens. By handful is meant as much as can be grasped in the hand. By scattering it in the litter the hens will be compelled to scratch in order to find the grain and in this way to take exercise, which is decidedly beneficial to them.

In case not enough good, sound, substantial table scraps are available to furnish full feeds, both at noon and at night, another feed of the grain mixture should be thrown into the litter at the night feeding and should consist of as much as the hens will eat up clean, poultry specialists in the United States Department of Agriculture say. In summer or during suitable weather the grain can be fed by scattering it on the ground outside the house. A good grain mixture for this purpose is composed of equal parts by weight of wheat, cracked corn, and oats. Another suitable grain mixture is composed of two parts by weight of cracked corn and one part of oats.

WANTS OWN FARM

Why One Youth Seeks the Land of Opportunity.

Beckoning Hands of Independence and Wealth Stretch Out From Western Canada to Those Who Have Faith and Courage.

Strolling around the exhibit room of the Canadian government office in St. Paul, studying the grain, and picking up an odd piece or two of literature describing farming and its results in Western Canada, a dapper, well-built, strapping six-footer said to the manager, "I've been having a grand whirl of living for the past few years. I used to work on my uncle's farm in Iowa. I heard of the big fat pay envelopes that the city chaps were getting every week. I went to the city, and I began getting them, too. I had all the excitement they would bring—theaters, dinners, swell clothes and taxis. I surely saw a lot of that life that in days gone by I had anxiously gazed upon and secretly wanted to try.

"But I'm driven to earth now. I'm still working, but the pay envelope is thinner. Not working steadily, you know, and I sort of miss those silk-shirt times. I went to Western Canada once, and I think I'll make another trip.

"I was up there five years ago. I want money, and lots of it; I want to be my own boss, but I haven't much coin to start with. I want to get into that class that don't have to worry about a 'buck' or so. I know fellows out there in Canada who went there, a few years ago, got a quarter section—some homesteaded and some bought on easy payments—and they are well off today. A number of the boys from my own state paid for their lands from a single crop. I may not be as successful as they were, but I want to try."

He wanted to talk, and the manager was a good listener. He continued: "I want to have my own home, and raise my own cattle; I want hogs and poultry, and milk and eggs to sell. Can I get a market?"

He was assured that he could, and that he could get a decent-sized crop to thrash every fall."

"You know," he said, "if the farmers on five-hundred-dollar-an-acre land can make money, my reasoning leads me to believe that I can grow as many dollars an acre from that cheaper land in Western Canada."

This period of semi-unrest is causing more thinking and planning for the future than probably at any time in the past. The desire for personal and financial independence is growing. To secure this, the first real source of wealth is the land itself. That is the solution. During the era of high prices, doubtless there was some inflation of land values. So the new man—the young man wishing to make a start on a farm—was confronted with the problem of the land he wanted having gone beyond his limited capital. He must seek elsewhere. Two decades ago, and less, good farming land could be bought in Canada at four dollars an acre, but as the demand increased and its productivity was proven, prices advanced. There has been no undue inflation, though, and prices today are very reasonable. Some day, when the country is settled, land will bring a much higher price in Western Canada. Today land prices range for unimproved, $18 to $25 an acre; improved, at $30 up.

The productive value is almost beyond estimate. The reports of those who have been farming these lands, making money and enjoying every personal freedom, are available and can be secured on application.

It is apparent that this last big available farming area of Western Canada will tend, to no small extent, to dispel some of the unrest that is so prevalent today among the younger men, who have had a taste of better things and who intend to have them in the future.—Advertisement.

A Business Man.

"He is a wonderful man for business, my boy—he even trained his little girl to put her pennies in the gas meter, and she thought it was her money box."

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Organizing just for the sake of doing it won't get us very far.

What we need is to apply our courage to the small things in life.

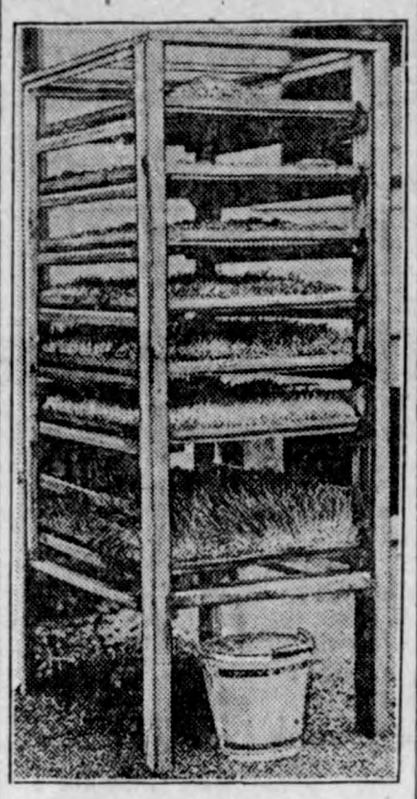
POULTRY FLOCKS

FEEDS FOR GROWING CHICKS

In Addition to Furnishing Right Amount of Feed, Fresh Water and Shade Are Necessary.

(Prepared by the United States Department of Agriculture.)

In addition to furnishing a sufficient quantity and the right kind of feed to make flesh, muscle and bone, and supply energy for the growing chicks, clean dry quarters, green feed, fresh water and shade should be provided. The coop should be kept clean, which can be facilitated by keeping sand on the floor and raking of the droppings at least twice a week, and oftener if possible. The roof should be tight so



Sprouted Oats Help Materially in Furnishing Fowls With Needed Green Feed.

that the house will always be dry. Green feed is very essential for the growing chickens, the ideal condition being to allow them free range on good grass land. Alfalfa makes an ideal range. Where the chickens have to be confined to small yards it is very essential to supply green feed daily. Freshly cut lawn clippings and short pieces of any growing grain crop, such as oats, wheat or any quick-growing crop, such as rape, make splendid green feed. Where these growing feeds are not available, sprouted oats may be used and will help materially. Where a hen is kept with a brood of chickens and the chickens confined to a small covered pen, move this coop and pen every two or three days to fresh grass and never let the grass be killed or eaten down where the run is placed. Provide fresh, clean water daily and see that the receptacles are thoroughly cleaned and the chickens never without water. The water should be kept in the shade in as cool a place as possible. Using a stone crock for watering fountains will help to keep the water cool. Where the chickens are confined to yards or have free range, shade should be provided. Trees and low shrubs make ideal shade, but if not available a corn patch or rows of sunflowers will help materially. Where no growing crop or trees of any kind are available it will pay to put up an artificial shade, making a framework two or three feet high and covering this with the branches of trees, weeds, straw or any waste material that will furnish shade.

BUILD UP PROFITABLE FLOCK

Possible Only by Continuous Selection for Health and Vigor to Get Egg Producers.

Only by continuous selection for health nad vigor is it possible to build up a flock which will produce fertile eggs, strong chicks capable of making quick growth, and pullets with sufficient stamina to withstand the strain of heavy egg production. The appearance of a bird is not always a sure indication of its vigor, but appearance and action taken together are a fairly reliable guide for picking out vigorous birds.

CAPONIZED TURKEY IS QUIET

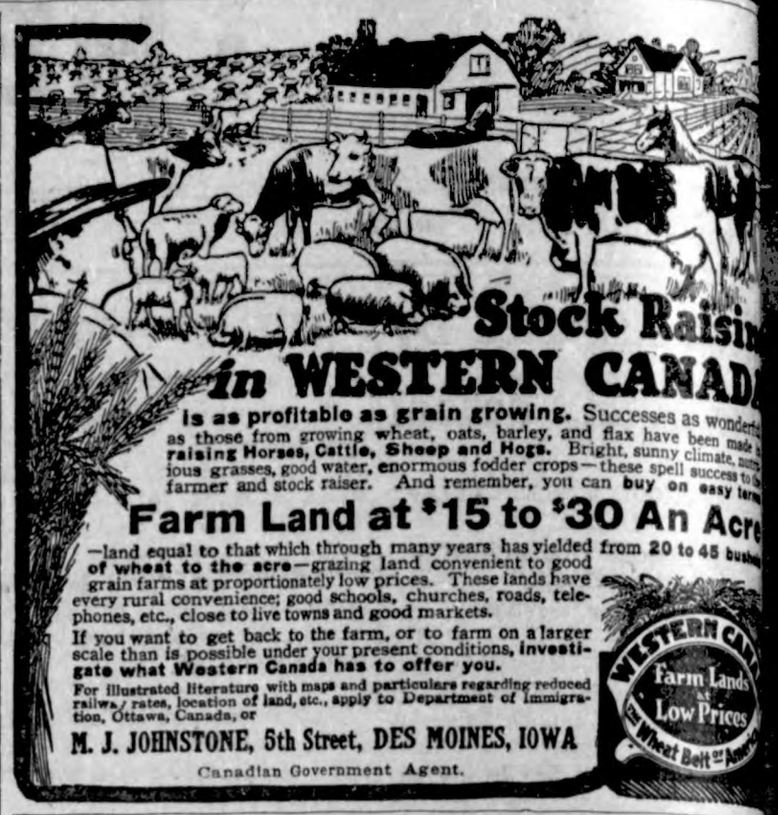
Of Considerable Advantage in Getting Them in Excellent Condition for Marketing.

Very little has ever been done in the way of caponizing turkeys, but when it has been tried the capons were found to be much quieter in disposition and less likely to range over a wide area than the toms, and this character should be of considerable advantage in getting them in condition for the market.

SUPERIOR GRAIN FOR CHICKS

Kaffir Corn Is Smaller Than Wheat and Is Excellent for Young as Well as Old Fowls.

The grain of kaffir corn is smaller than wheat and it is good for the little chicks as well as the full-grown ones. The brood will begin to eat it before they are a week old and those who have tried it say that it makes fine feed.



Fashionable.

"As far as your new enterprise is concerned," said Colonel Clinchpenny, "I can at least admit it is fashionable."

"I don't believe I get your drift," replied Umson.

"Better say 'you don't get my draft.'"

"You call my scheme fashionable?"

"In that it resembles the latest gown from Paris."

"How?"

"It has absolutely no backing."—Youngstown Telegram.

Catarrh Can Be Cured

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work.

HIS "HUNCH" WAS CORRECT

Actor's Assertion That Someone in the Audience Had a Bottle Quickly Proved True.

A peculiar incident happened in a local theater, which provided enough comedy to make the performance very amusing.. In one of the acts, prohibition was made the butt of all the actor's jokes, and he happened to be one of those fellows who makes reference to the audience.

"Where is that bottle?" he shouted at the audience. "Someone in the house has a bottle, with the cork off." Hardly had the laughter subsided when there was a "plunk," as a bottle dropped accidentally from the grasp of someone down in front. It happened just at the opportune moment and the house went into roars of laughter. Whoever dropped it made no attempt to reclaim it, even though the bottle might have contained anything from milk to medicine. But the M. A. T. has been told by someone who was close to the sound that some time after he saw a woman slowly making an attempt to reach for the fallen wet goods.—Lawrence (Mass.) Telegram.

Disappointment.

"You said you would be home at eleven, and here I have been keeping awake this last two hours waiting for you to come in!" said an angry wife.

The delinquent leaned against the wall and prepared to remove his boots.

"And I," he said softly and sorrowfully, "have been waiting outside for this last two hours so's you'd go to sleep!"—Pearson's Weekly.

Whoever does less than his share makes it necessary for some one to do more than his.

Real success depends upon the right thing in the right place the right time.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid —Adv.

PRESSING DAD PRETTY FA

Youth's Last Question Certainly Might Have Been Called Pointed and Personal.

A most promising youth recently sought information from his father touching family affairs:

"Dad," said he, "do you like mother?"

"Why, what a question! Of course I do!"

"And she likes you?"

"I am certain she does."

"Did she ever say so?"

"Thousands of times, my son."

"Did she marry you because she loved you?"

Whereupon dad became angry, and said:

"See here, young man, you're getting entirely too personal. But I don't mind telling you that she did."

The boy scrutinized his parent closely, and after a pause added:

"Tell me this, dad; Was ma as near-sighted then as she is now?"

Doubtful Transaction.

"I understand the Crimson Gulch posse took some bootleggers into custody."

"Yes, sir," replied Cactus Joe. "And it cost us citizens quite a sum of money, paid in advance, to persuade them rum runners to map their route in this direction and get their stuff confiscated."

TAXI

An Adventure Romance

By George Agnew Chamberlain

Copyright, The Bobbs-Merrill Company

MADGE.

Synopsis.—Robert Hervey Randolph, young New York man-about-town, leaves the home of his sweetheart, Madge Van Tellier, chagrined because of her refusal of his proposal of marriage. His income, $10,000 a year, which he must surrender if a certain Miss Imogen Pamela Thornton (whom he has seen only as a small girl ten years before) is found, is not considered by the girl of his heart adequate to modern needs. In a "don't care" mood Randolph enters a taxi, unseen by the driver, and is driven to the stage door of a theater. A man he knows, Duke Beamer, induces a girl to enter the cab. Beamer, attempting to follow, is pushed back by Randolph and the cab moves on. His new acquaintance tells Randolph she is a chorus girl, and has lost her position. She is in distress, even hungry, and he takes her to his apartment. There, after lunch, a chance remark convinces him the girl is the missing Pamela Thornton. He does not tell her of her good fortune, but secures her promise to stay in the flat until the morning and leaves her. Realizing that the girl's reappearance has left him practically penniless, he bribes the taxi driver to let him take his job, and leaving word with the legal representative of the Thornton estate where he can find Pamela, takes up his new duties under the name of "Slim Hervey."

PART II—Continued.

—5—

"Sounds kind-a phony to me," said the captain grimly, "considerin' you took this same gent home a week ago come Friday."

"Did I?" said Slim, and with feigned surprise managed finally to recognize the mess of evening clothes that was huddled on a near-by bench. "You're right, Captain. He's drunker than I ever saw him before and besides, he's wearin' a new set of shirt-studs. Kind of changed his looks."

Slim lingered. "Look here," he murmured to the captain confidentially. "You're on to me, but just let me whisper. I'm getting to be the delivery wagon for all the high-spot soaks in town. The first one of 'em that loses his jewelry between the curb and his own front door, just tell me where I get off, will you? I'm honest; I got a reputation, an' I tell you, Captain, I'm willin' to bill 'em through for you when you ask for the home port, but it's nix on me handlin' all the high-explosive freight north of Forty-second street. Get me?"

"Sure, Slim," said the captain, appreciatively. "I'll pass the word, lad."

Thus did Mr. Randolph make good his new front name and a little capital besides, working on the stalwart old motto: Every knock is a boost. Instead of becoming a mystery and consequently anathema to the Force, an impression was created that Slim was a hustler, but clean white goods ready to sacrifice a fare or two that he might sit high up alongside Caesar's wife. By stopping at two or three strategically placed police stations during the wind before the dawn to ticket such drunks as were of his acquaintance, he was able to give the glad hand of farewell to a job not to his taste.

About this time a series of coincidences befell the young and fevered Fair of the city of New York which would have given pause to the persons involved had they been able to get together and compare the dope. Take what happened to Miss Georgiette Hattone. Her people had played in hard luck and died. Georgie had secured a job and was doing pretty well at it until young Doctor Bones met her and gradually persuaded her that she was threatened with galloping consumption. Once he had frightened her, the rest looked easy; he would take her out of bad ventilation into his run-about and the open-air—out of the goodness of his heart and the fullness of his purse, he would take care of her.

He began by leading her to a Netherlimb Show and supper afterward. They danced a little and for the first time in her life, but under medical advice, she took something in the way of stimulant after the initial pretty cocktail. They issued from supper and it was when Mr. Chauffeur Slim Hervey heard the whispered address that the game became a threesome.

Counting upon the abstraction, or rather, the concentration of his fares on interior fittings, Driver Hervey soon switched his cab from the chartered route and made for down-town through silent back streets. In just ten minutes he drew up at an old-fashioned house in a very quiet square, shut off his engine to the idle and waited. Not for long. Out of the cab came a blasphemous exclamation in medical tones and with it a cry of awakening from Georgie. Through one window she looked upon the home of her childhood; through the other upon that happy railed garden-square, which was the umbrageous garner-close of all her dearest, purest and dreamiest memories.

"Oh!" she gasped. "No, you mustn't scold him. This is just where I want to get out and walk. It's—it's extraordinary." Then from the curb. "I may be going to die of consumption, doctor, but, after all, I'd rather—rather die that way."

Twist things around a little and you'll get what happened to Miss Terry de Guest with the difference that that beautiful and hungry young woman who had all but turned her back on Settlement work and her face to the Great White Way, suddenly awoke not in the moonlit embrace of Clairmonte, but before the accusing face of a House in Henry street.

Nor was Mr. Slim Hervey partial to sex in salvation. There was the instance of young Bertram Blossome who shame-facedly hurried into his cab a painted, wan-faced waif of the street with self-accusing eyes No case this of hunted and hunter—rather two strayed bits of weak humanity driven before the unleashed dogs of poverty and lust. How readily and unquestioningly the boy slipped from the cab at his home address, miraculously confused almost as by the meddling finger of God with one very different! How gratefully the girl took the possible fare and "something over," and how her tears brimmed when ten minutes later the blue-eyed chauffeur, a wage-earner like herself, said: "Nothing doing, Sister. The ride is on me," and promptly whirled away!

While all these incidents were engaging, each in its own way, and showed a reasonable profit to all concerned, Mr. Randolph looked upon them more or less as a means of getting in his hand during a period of initiation. Once he felt sure of himself and of his new chauffeuring point of view and attitude toward the gay world from the under side, he began to haunt the neighborhood of East Ninth street at the hour when dinners are plenty and taxis scarce.

Twice he saw Miss Madge Van Tellier carried off in Somebody's private car, but he was not discouraged, for he recognized in the very fact of that public privacy the badge of pre-

"I'm Getting to Be the Delivery Wagon for All the High-Spot Soaks in Town."

liminary outings. In due course his night and hour came. He was hailed by the arriving Mr. Beacher Tremont and ordered to stand by; twenty minutes later he was listening to that gentleman explaining to Miss Van T. that a cylinder had gone wrong on his own car at the last moment.

Miss Madge Van Tellier, upon whom Mr. Randolph had not laid eyes since the very definite parting of their ways on the rock of ready cash, was more beautiful tonight than at any other time since the evening of her coming-out party. The reason was one and the same. Tonight, as upon that other, she stood within a threshold and peered out on Life with a big L. A flame was in her cheeks and in her eyes; her lips were half-parted and thirsty, her bosom agitated. She was divinely dressed.

They were very silent on their way to dinner at the Knickerbocker, but they exuded an aura of tense expectancy that made nothing of the glass barrier between them and the car pilot, who soon felt himself lifted and carried on its wave. Something was cooking beyond a doubt and he then and there determined to stick a fist through the crust of the pie just before the smell of burning.

There is nothing more stereotyped than a night run before the fever hounds of New York. It is invariably a four-act play that starts with a single cocktail and a tasty dinner, goes on to a show peppered with double meanings, thickens at the cabaret in the close harmony of booze and dance music and finally bursts "somewhere in the country."

The first act was easy for Randolph; he went on with the villain and the leading lady, but once the revolving door of the hotel had clucked on their backs he had to withdraw to the wings and dope out a means of evolving from a super into a star of the first magnitude. He decided that it didn't much matter who wafted the couple from dinner to the show, but that the next entr'act would hold the crux of the night's entertainment, for the cab that secured the freight for the cabaret would stand a good chance of nailing it after the ball.

Consequently he was content to pick up a gutter-snipe and then trail his prey to the theater. "Them is the two," he said to his ally, suborned with the promise of two bits, cash on delivery, "the John with the high hat and the dream-dame in smoke-colored chiffon."

"That's some name for a skirt, Cap," said the extreme youth admiringly, "an' some skirt, believe me. Nor! I won't forget 'em."

And he didn't. No sooner had Mr. Beacher Trement, bearing a thistledown burden on his arm, swelled out from the theater with the anxious look on his face of a man with three cars in the garage at home and no call number in his left hand waistcoat pocket, than the imp was at his side. "Say, mister, wanter taxi? Got one at the head of the line that I'd give up just to youse for a dime."

"Lead me to it," said Mr. Tremont.

"Say," said the snipe to Randolph as the car jumped, "I've took the boss inside on fer a friend. You watch yeself."

It was a short run to the lair of the Midnight Rollc, but Mr. Randolph was not surprised at the double wage he received nor at the murmured conversation that accompanied it. "Fill up your gas tank and wait for me at the Seventh avenue northeast corner. Get me?"

"Sure," grunted Mr. Randolph. "Where to, mister?"

"Greenwood hostelry," breathed the villain.

"I'm on," said Mr. Randolph, ran his car to the comfortably quiet nook designated, dug out a road map of Manhattan and vicinity, scrutinized it carelessly and settled down to meditate.

To a select and once affluent few the name of the G. hostelry above mentioned will bring certain vivid recollections and will also place the chronology of this yarn, for the said abode of revelry was too good to last very long; it choked to death on its own popularity and consequent publicity. From the outside, even in its hey-day, it presented a most innocuous appearance, just a renovated farmhouse standing under a clump of veiling sugar-maples on the top of a hill whence the nearest neighbor was out of sight.

But once within its modest portal, its habitues found themselves in the cleverest fake atmosphere of a pleasure-loving decade. An organizing genius, sensitive to all those cheap adjuncts which usually grate on the soul hovering at the edge of the decline to Avernus, had pandered effectively to an ignoble end and made of each small room an isle of forgetfulness; price, twenty-five bucks in advance, supper and drinks extra.

For the benefit of those who do not remember the epoch of the Greenwood hostelry and are consequently reading on and on in mortal dread of the paragraph that will introduce the War, let it be said at once, Forget it. Stake out the beginning of the international mix-up, hurl another boundary mark into November of 1918, and the time left outside of those limits will be found entirely sufficient to the needs of this chronicle. Let it further be noted that it is inconceivable that a single drop of the kind of blood which flowed in the veins of Mr. Robert Hervey Randolph could ever answer to the name of slacker, proof positive in itself that the events herein set forth happened when the War didn't.

"Oh, Oh! Take me away from here!"

(TO BE CONTINUED.)

Oysters Have Many Enemies.

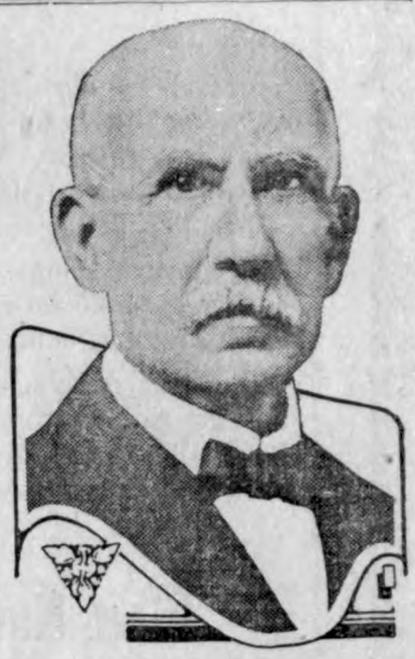
Between the planting and the harvest, an interval of from two to five years, the oyster culturist assumes many hazards. On the New England coast, after all his material is down, the fickle "set" may not appear, possibly because at the critical time some weather disturbance may have killed the baby oysters while they were yet swimming near the surface. In the Gulf of Mexico the "set" may be so heavy that there is scant room for the oysters to grow, and many die, while those that are left are half starved and misshapen from crowding. Even when the little oysters or "spat," have attached themselves in favorable numbers, their perils have just begun. They are never safe from other enemies until they fall into the hands of their arch foes.

Meaning of Feverish Dream.

To dream you have a fever signifies that you will excite the envy of your friends; also difficulties with your lover.

PROMINENT NEW YORK MAN PRAISES TANLAC

John F. Hyatt, of Albany, N. Y., Is Relieved of Severe Attack of Rheumatism of Many Years' Standing.



JOHN F. HYATT
227 Pearl St., Albany, N. Y.

"I am now seventy-two years old and am just getting rid of a fifteen-year case of rheumatism that had me so crippled up I could not walk," said John F. Hyatt, 227 Pearl St., Albany, N. Y., in relating his remarkable experience with Tanlac, recently. Mr. Hyatt was chairman of the committee in charge of building the Albany County Courthouse and was four times elected a member of the County Board of Supervisors. At present Mr. Hyatt is Assistant Superintendent of the Albany County Courthouse, with offices in the building.

"I don't believe," he continued, "anybody could have rheumatism any worse than I did, and my case was of such long standing I didn't expect to ever get over it. I was unable to walk except for a short distance, supported with a cane, and even then the pains struck me every time I took a step. My legs, hips and ankles hurt something awful and my joints were stiff and achy. I couldn't cross my leg without having to lift it up with my hands, and to turn over in bed, why, the pains nearly killed me.

"My appetite was gone and the sight of food nauseated me. My stomach was out of order, and I had a sluggish, heavy feeling all the time. I was weak, off in weight and discouraged so that it looked like I might as well quit trying to ever get well.

"I had no idea Tanlac would relieve my rheumatism when I began taking it last Spring. I took it because I saw where it would give a fellow an appetite. Well, sir, I was the most surprised I ever was in my life when the rheumatic pains began to ease up. I took seven bottles in all and, it's a fact, I didn't have an ache about me, was eating fine and simply felt like I had been made over again.

"I have been in the best of health ever since, with only a slight twinge of rheumatism at intervals. I do not need my cane now, but as I had been unable to walk without it for several years, I got into the habit of carrying it and so still take it along. I am enjoying life and health once more and can conscientiously recommend Tanlac as the greatest medicine I have ever run across in all my experience."

Tanlac is sold by leading druggists everywhere.—Adv.

Absolutely!

"Hereafter there will be absolutely no smoking in barracks at any time," bellowed a captain in Raritan arsenal, New Jersey, after a fire caused by a forgotten butt had been quelled. "Absolutely! Not at any time!"

Then he paused and added as an afterthought in a louder bellow even than before:

"Especially at night."—American Legion Weekly.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists or send 30c to The J. W. Cole Co., Rockford, Ill.—Adv.

"Wins the Wise to Praise."

Every heroic act measures itself by its contempt of some external good. But it finds its own success at last, and then the prudent also extol.—Emerson.

An ounce of help is better than a ton of hot air on the subject.

It is not all who turn their backs that flee.—Danish Proverb.

Many comedies look like tragedies from the stage manager's viewpoint.

There are a hundred successful men for one that is contented.

ALLEN'S FOOT-EASE

Gives ease and comfort to feet that are tender and sore.

Girls! Girls!! Save Your Hair With Cuticura

Soap 25c, Ointment 25 and 50c, Talcum 25c.

Are You Pale? Thin? Weak? Enrich Your Blood!

Read this carefully: If your blood were rich and wholesome, you would not be pale; if your blood were rich and nourishing, you would not be thin; if your blood were rich and vigorous, filled with red corpuscles, you would not be weak.

Poor, disordered blood is responsible for a host of ills and weaknesses. If you would attain ruddy health, a robust body, and muscular strength, you must first provide yourself with that which builds all these—a rich, wholesome, nourishing blood supply! Any doctor will tell you that.

Why suffer longer with sallowness, thinness or weakness, when thousands have remedied their conditions by taking S.S.S., the famous old blood remedy compounded of fresh herbs just as the Indians made it?

S.S.S., by driving impurities from the blood and helping to put red corpuscles in, lays the foundation for sturdy, vigorous health.

If you want this, don't wait longer, but get a bottle of S.S.S. from your druggist right now while you are thinking of it. Begin taking, and then write in detail about your condition to Chief Medical Advisor, 867 Swift Laboratory, Atlanta, Georgia. He will give you individual medical advice free.

The following letter has been received by County Treasurer Suurballe, from the Secretary of State, regarding automobiles that are to remain in storage for the year:

Commonwealth of Iowa
DEPARTMENT OF STATE
W. C. Ramsay, Secretary
Des Moines

April 16, 1921.

COUNTY TREASURERS:

We have had numerous requests for a ruling that would allow an individual who has not and will not run his motor vehicle upon the public highways during the current year, be allowed to file an affidavit, setting forth those facts with county treasurer, so that his motor vehicle would not be published as delinquent the first week in May.

We have, therefore, prepared an affidavit of that nature and are enclosing herewith a supply of same for your use.

This, you must understand, is to be used only in cases where the car has been and will remain in dead storage during the entire current year.

When such affidavit is filed you may then remove record of his motor vehicle from your delinquent file.

If, however, he does not file this affidavit with you until after publication, it will be necessary for him to pay the publication fee of fifty cents with his affidavit.

Should the individual later in the season decide to use or dispose of the motor vehicle it will be necessary for him to pay license for full year plus penalty from January 1st.

Very truly yours,
W. C. Ramsay,
Secretary of State.
By W. M. Colladay,
Supt. Motor Vehicle Dept.

We give herewith a copy of the affidavit to be used. You may get a blank copy of this affidavit by applying to the County Treasurer, or you may make up your own affidavit, using this form as a copy.

State of Iowa,
County of Hancock, ss.

This is to certify that.....
.....Motor Vehicle, model .....Engine No.....
bearing license number.....
for 192.... has not been and will not be used upon the public highways of Iowa during the year 192...

This affidavit is made to be filed with County Treasurer to be used in lieu of 192.... registration.

Public Utilities and the public

We frequently hear the statement. that while the cost of coal has declined within the past few months, and other prices generally have shown a decline, the cost of electric service remains at the same price as it was during the war and immediately after, when prices were at the peak. The conclusion arrived at is that electricity should be cheaper also.

From a superficial point of view this conclusion is a natural one, but eveu a casual investigation will disclose that it is wrong. It is true the price of coal has declined, but it is still higher than at the time the present rates were fixed, and freight rates are higher so that coal delivered at our plants is still higher than when we were granted the increased rates. If the rates were not too high then, and every one who has investigated is agreed that they were not, it follows that they are not remunerative at this time. This in fact is disclosed by our books, which are open to the inspection of the public at any time.

This condition is not peculiar to our properties, nor to the general run of Iowa utility plants, but it reflects a condition that is nation wide. We know the statement is a conservative one that no public utility plant in the country has been paying profits, taking into consideration all the elements of cost that must be reckoned within determining the cost of service. A glance at the stock quotations in the daily press will say that utility companies have been, and are losing money. Scarcly any of the stocks at par and a great many of them run down to a few cents per share.

Another thing to be considered in this connection is that while a few items of cost in the production of electric service have declined slightly, the main items are at the highest point they have yet reached. There has been no decline in labor, one of the big items of cost and money, the vital element, is at the peak. This is also true of nearly every other element of cost.

And here is the most important consideration of all: The price of electric service was never advanced in proportion to the price of other commodities. Consult your bills and you will agree with us that this is true. The last goverment statistics that are available show that the average range of prices is still 70 per-cent above the prices of 1914, the year that is used as a basis of comparison generally. Consult your bills again and you will find that your electrical rates were not advanced in anything like that proportion, and you wiil agree they should have been if the utilities companies were allowed to make the same profits as other lines of industry.

It follows that with average prices still 70 per-cent above normal, and with the prospect that they will not decline materially, present prices of electrical service are not adequate, and the reason for the deteriorated condition of properties throughout the country, and the absence of extensions is made plain.

A BEAUTIFUL DAVENPORT

and a comfortable bed

There is hardly a home where an extra bed is not needed occasionally. Friends coming unexpectedly, illness in family and sleeping quarters for the nurse needed---- emergencies of all kinds.

This picture shows a very handsome, genuine Pnllman davenport equipped with the secret bed construction. From outward appearance you would never know it contained a full-size, comfortable bed, but it does.

Used as a davenport by day, and a bed at night, you get really two pieces of furniture for the price of one. The Pullman gives twenty-four-hour service.

Wellemeyer's

KLEMME **IOWA**

WHY PICK ON US?

The woods are full of amateur economists who claim that prices of clothing, underwear, hosisry, shirts, sweaters, sleepingwear etc. will shortly return to pre-war levels! Will they?

Yes, they sure wlll---

When hard coal is back to $9.00 per ton;
When railroad fares are back to 2c per mile;
When house rent is back to $25.00 per month;
When gasoline is back to 10c per gallon;
When telephones are back at $1 per month;
When a square meal is back at a quarter
When farm labor is back at $25 per mont;h
When gas is back at 9c
When shaves are back at 10c
When the freight rate from N.Y., now $1.84 is back at 67c
When street car fares are back at a nickel;
When money is back at 5 per cent.
When cooks are back at $5.00 per week;
When hair cuts are back at a quarter;
When movies are back at a nickel;
When a car wash is back at a dollar;
When ice cream is back at a dime;
When a doctor's call is back at two bucks;
when newspaper is back at a penny;

For the love of Mike, why expect the manufacture, wholesaler and retailer of Clothing and Furnishings to go the route alone? Why expect us and no one else to go back to pre war prices?

Why pick on us?

Aren't we Americans all in on this proposition together? Haven't we got to work together? Well, then, haven't we, the manufactures, wholesalers, and retailers of clothing and furnishings gone much faster and much farther than the average in reducing prices and making readjustments? ***We'll say we have.***

We're ahead,--'way ahead of the procession. Now let the barbers and the movie houses, and the Standard Oil, and the soft drink parlors, and the landlords, and the hotels and the resturants, and the drayman, and the bankers cut their prices and catch up with us.

It's time for us to plck on somebody!
We've been the goat long enough!

1. All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2. All tile must pass the specifications for drain tile of the American Society for Testing Materials. Tile in sizes 6" to 10" inclusive must pass the specifications for Farm Drain Tile.

Tile in sizes 12" to 26" must pass the specifications for Standard Drain Tile. Concrete tile will be allowed only in size 24" to 26."

3. Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to back fil the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specifications are on file with the county auditor.

5. Work to be commenced thirty days from date of letting of Contract or as soon as an outlet is furnished. Contract will be completed by June 1, 1922.

All ditches and drains to be constructed in all respects in accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's Office subject only to such changes and alternations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1 o'clock P. M. of the 3rd day of May, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids will be received on any one or all sections, for tile alone, for construction work alone, or for both tile and construction.

The Board will, at their decision, let the work as a whole or in sections to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENT WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 7, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty four hours after demand, and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.
Dated at Garner, Iowa this 14th day of April, 1921.

Chris Jacobs,
County Auditor.

(SEAL)

UNDER THE GOLDEN DOME

Des Moines.—The Thirty-ninth general assembly which adjourned April 8, is not remarkable for the passage of any considerable volume of important new legislation.

While a total of 403 bills were passed, the large proportion of these were of minor importance, affecting only a limited field or a few specific legal propositions.

Among the measures of most vital importance enacted are:

The Whitmore-Weaver blue sky law. Requiring the licensing and bonding of stock salesmen, prohibiting the payment of more than 15 per cent promotion, and placing Iowa corporations under more stringent regulations in regard to the sale and issuance of stocks and bonds.

Senate Joint resolution number 9 providing for the appointment of a committee of four senators and four representatives to prepare a complete revision of the Iowa taxation laws to be submitted at the special session, or to the next general assembly.

Resolution fixing the state general tax levy at 9 mills for the next two years, an increase of 1.5 mills.

Passage of the Dodd bill legalizing the sale of cigarettes. Licensed dealers may now sell cigarettes to all persons more than 21 years old without violating the law. Sale to minors prohibited under penalty of fine, imprisonment and application of the injunction and abatement law. License of $50 and $100 required of dealers, and 1 cent state revenue tax required on every package sold.

Passage of a direct inheritance tax providing for a graduated tax of from one per cent up on all inheritances of more than $20,000.

The Doolittle vital statistics bill. Requires the appointment by the county boards of supervisors of registrars of vital statistics for each township to record all births and deaths. Report to be made to the state bureau of vital statistics, and a free of 25 cents each paid to the registrar for each district by the county. Permits Iowa to comply with federal bureau of census requirements for registration of vital statistics.

The O'Donnell-Horchem Sage foundation small loans bill. Prohibits charging of examination fees by small loan firms, requires all firms engaged in the business to pay state license and submit to state inspection, and permits a legal rate of 3½ per cent per month on loans of less than $300.

The Knickerbocker bill appropriating $250,000 per annum for the eradication of bovine tuberculosis. Former appropriation $100,000 per annum.

Appropriation of $25,000 per annum to continue work of state in fighting venereal disease.

Passage of the Mayne age of consent bill raising the age of consent from 15 to 16 years, and to 17 years in some cases.

Passage of the Hauge-Parker bill appropriating $20,000 to permit Iowa veterans of the civil war to invite the national encampment of the G. A. R. to Iowa.

Passage of the soldier bonus bill, granting to all veterans of the world war save members of the students army training corps a bonus of 50 cents per day for all time spent in service during the war, and submitting a $22,000,000 state bond issue to the voters at the next general election.

The soldiers preference bill, applying to veterans of the world war the provisions of the present laws granting to civil and Spanish-American war veterans preference in appointments for state, municipal and county positions.

The soldiers exemption bill, granting world war veterans $500 exemption from taxation.

Drainage

Requiring railroads and telephone companies to give drainage equipment free passage over right-of-way or through wires.

Providing for a closed season on raccoons.

Extending closed season on quail, prairie chicken and pheasant, until 1927.

County Officials

Continuation of present salaries for another two year period.

Increase of salaries which may be paid county superintendents of schools. Maximum fixed at $3,000.

Cities and Towns

The Lake bill giving to cities and towns the authority to regulate automobile bus lines.

Authorizing cities and towns to use a portion of the primary road fund for paving primary roads within city limits.

Among other legislation of importance enacted were the following measures relating to the subjects given:

Schools

Appropriation of $500,000 each for new buildings at state university and state college at Ames.

Appropriation of $50,000 per annum for aid of schools in mining camp communities.

The Whitemore bill raising the rate which may be paid on school bonds from 5 to 6 per cent.

Appropriation of $231,000 for new buildings at state teachers college at Cedar Falls.

Acceptance of federal aid for vocational training.

Increase of maximum which may be levied for support of schools from $60 to $80 per student for all schools, and permitting levy up to $90 per pupil in large towns.

Rural

Requiring county dog license on all dogs.

Permitting organization of corporations which may issue securities based upon warehouse receipts, and other farm security, and engage in a general rural credits business. Backed by farm bureau.

The Tuck bill requiring railroads to construct spur tracks when demanded by any industry.

Permitting use of primary road fund for the construction of bridges and culverts on primary roads.

Providing for local instruction in the proper use and administration of hog cholera serum, and licensing and bonding all persons and firms selling serum. Also a bill providing for the maintenance of a hog cholera serum plant and school of instruction at Ames.

Miscellaneous

The Holdoegel bill increasing the penalty for contributing to the delinquency of minors.

Making attorney general a member of the state executive council.

Prohibiting state officers from accepting compensation from other public sources during their term in office.

Prohibiting indiscriminate seizure of coal in transportation by railway companies.

Granting state insurance commissioner wider powers in regard to regulation of newly organized insurance companies, and fixing requirements to protect purchasers of stock.

Abolishing office of state document editor and creating a board of printing to be made up of the governor, secretary of state and state auditor, with two practical printers, to direct the purchase of all state printing.

Legalization of the practice of chiropractors, and creating a state board of chiropractic to license and examine persons desiring to practice in Iowa.

Granting to osteopaths of a state examination board made up entirely of osteopaths.

Providing for the licensing and examination of podiatrists, and prohibiting practice by unlicensed chiropodists.

Providing for examination of dairy herds and regulation of conditions under which milk is produced, giving city councils power to pass ordinances on these subjects.

Increasing expenses which may be legitimately incurred by building and loan associations.

Requiring authority of state executive council before state officers of employes may make trips at state expense.

Repeal of old state agent law and providing for bureau of criminal investigation under direction of attorney general.

Repeal of law exempting Liberty bonds held by banks from taxation.

Requiring inventory by all public officers in the state of all property under their control, care custody, or management on file in their own office, and to make a report to the auditor of state of such property.

Prohibiting expenditure by any candidate for public office of an amount for campaign expense greater than one-half of annual salary of the office.

Increase of the mothers' pension which may be paid from $3 to $4 per week for each child.

Continuing program of state board of conservation for purchase of state parks, and making an appropriation for same.

Prohibiting fishing from a motor boat, and also prohibiting the taking of black bass by any method other than hook and line, and prohibiting the sale of black bass in Iowa.

A very large number of important bills were acted upon, but either failed to pass. Among these are the following:

The Lake boxing bill, legalizing professional pugilism in Iowa.

The Newberry bill providing for an increase in the license fees of corporations, providing for a tax upon capital stock, and for a 1 per cent tax on net incomes.

The Springer bill for a public utilities court, granting indeterminate franchises to all public utility corporations save telephone companies. Vetoed by Governor Kendall.

The Olson bill providing for a $3 head tax for school purposes upon all men and women more than 21 years of age.

The bill proposing the collection of a tax upon amusements.

The Newberry bill for a 2 cent per ton tax upon all coal mined in Iowa, to be used for the purpose of assisting schools in mining communities.

NEWS REVIEW OF CURRENT EVENTS

Harding's International Policy Seems to Please All the Republican Groups.

OUR RIGHTS SAFEGUARDED

Modified Knox Peace Resolution Introduced—Democrats Fight Emergency Tariff Bill—Colombian Treaty Before the Senate—Strike of the British Miners is Ended.

By EDWARD W. PICKARD.

President Harding, in his program for international relations as set forth in his message to congress, has accomplished the remarkable feat of satisfying all factions in his party, if the expressions of leaders in Washington are to be taken as representing the opinions of the people. The forecast of this program, made a week ago, was not far astray. It contains, however, a plan for the acceptance of such terms of the Versailles treaty as confirm America's rights and interests; in other words, the ratification of the treaty with such reservations and modifications as will completely cut out the League of Nations covenant and secure "our absolute freedom" from entanglement in purely European affairs. Just how the covenant, so closely interwoven into the fabric of the treaty, can be eliminated, is not yet apparent. In Washington it is said a delegation might be sent to Europe, or a conference of the allies called in our national capital. It is also suggested that it may be necessary to draw up a new treaty or treaties to be signed by the United States, the allies and Germany.

Any negotiations to this end, however, are to await reconsideration by the allies of their award of the Island of Yap to Japan and their formal acknowledgment of America's rights in the disposition of all the territories taken away from the central powers. At first France replied to Secretary Hughes' note on Yap by a suggestion that the question be settled by the United States and Japan, and it is believed Great Britain will propose the same course, offering its good offices in behalf of the American claims. Japan wants the controversy to be included in the general negotiations to settle all matters at issue between this country and Japan. Neither of these suggestions is acceptable to the administration, and neither will be considered. Mr. Hughes' position is that the Yap affair concerns the allies jointly and must be settled by them jointly in negotiations with the United States.

As was foreseen, the President said he favored the adoption of the Knox resolution ending the state of war, but with modifications. Accordingly it was introduced in the senate at once with changes to suit, and plans were made to push it through as soon as the Colombian treaty is disposed of. As it stands, the resolution carefully reserves all American rights acquired by the war, the armistice and the Versailles treaty, but there is no provision for the negotiation of a separate peace treaty with Germany. The instrument also declares the state of war with Austria ended, but no one here thinks much about Austria these days, except in pity for its starving poor.

Early comment in France on the President's message indicated that the French were trying to find it satisfactory. They expected the flat rejection of the league covenant, and many of them are not wildly enthusiastic over the league, anyhow. They are elated by the expressed determination that America shall stand with the allies in holding Germany responsible for the war and in compelling her to make reparation to the extent of her ability. They still hope that America will specifically promise aid to France in case of German aggression or of Germany's failure to pay. The British are so occupied with their great strike that they have not had much to say about the message up to the time of writing.

An interesting bit of comment comes from Buenos Aires, where a leading paper sees only self-interest in the future international policy of the United States.

"The egoistic independent nationalism which is proclaimed as the law of international activity by the United States is dominant in Mr. Harding's words," the newspaper declares. "Americanism and Monroeism, notions clear and concrete, which have had their rise and fall since 1824, reappear with more vigor than ever in the directing thought of the United States."

Concerning domestic matters, which he declared of prime importance, Mr. Harding said nothing unexpected, expressing what leaders of his party called "sound Republican doctrines." He especially urged speedy relief for the ex-service men and the passage of an emergency tariff bill.

The latter is already before congress, the ways and means committee of the house having reported out a combination measure including the farmers' tariff bill which Mr. Wilson vetoed, an anti-dumping bill and a new provision for the regulation of foreign exchange. The Democrats of the house speedily organized their opposition to the measure under their leader, Representative Kitchin of North Carolina. Mr. Kitchin charged that the bill is not in the interest of the farmers of the country, "but is really for the purpose of swelling the already swollen fortunes of the trusts and speculators." He declared that it gives "to the packers' trust, the sugar trust and the woolen trust the right and privilege to take from the American people the enormous sum of over $775,000,000, increasing to that extent the present high cost of living."

Allusion is made above to the Colombian treaty. This was the first thing the senate tackled, and a fight developed at once. The pact is the old one giving to Colombia $25,000,000 for the loss of Panama and the Canal Zone. It has always been bitterly opposed as a virtual repudiation of the acts of Theodore Roosevelt when he was President, but now it has been modified by the omission of any expression of the government's regret for the part played by the United States in connection with the separation of Panama from Colombia. President Harding has told the senate he hopes it will ratify the treaty, and it probably will do so. Senator Lodge led the debate in favor of the pact, and revealed one of the strong reasons for its adoption—the existence of rich oil fields in Colombia which Americans wish to develop.

Senator Kellogg of Minnesota said the ratification of the treaty would be a pusillanimous act, and on the strength of a telegram and letters from Colonel Roosevelt, written in 1917, he declared it would make the United States liable to international blackmail running into hundreds of millions of dollars. The telegram said:

"I know, of course, that you are against this infamous Colombian treaty, but I wish you would point out that it makes precedent for some successor of Wilson to pay at least as large a sum apiece to Costa Rica, Nicaragua, Haiti and Santo Domingo for what has been done to them recently, and also to Chile for our insolent and improper treatment of her in connection with the Alsop claim."

President Harding has approved a new list of brigadier generals to be raised to major generals, and Clarence R. Edwards, whom President Wilson omitted from his list and who commanded the New England National Guard division in France, comes first of all. Among the others are Generals Haan, Bell, Allen and Menoher. A number of colonels are recommended for promotion to brigadiers.

Germany will refuse to accept the indemnity figures of the allies when they are presented on May 1, according to Dr. Julius Ruppel, chief of the German financial delegation in Paris. He says the time allowed is altogether too short for estimating the total liabilities for reparations, and that the German experts have been forced to rely on written statements that are neither accurate nor adequate. A Paris journal asserts that the sum to be demanded by the allies will be between 30 and 38 billions of dollars, and that when Germany refuses to accept the figures two classes of French reserves will be called to the colors and the Ruhr basin occupied. In that region are the most important industrial plants and the largest coal mines of western Germany.

Once more Premier Lloyd George has been able, by super-juggling, to avert economic disaster from Great Britain. The strike of the miners' federation, which threatened to involve nearly all the organized labor of the United Kingdom, was called off by the federation Friday evening. Just how this result was brought about is not known at this writing, but apparently it was due primarily to the action of the railway men and transport workers. These are the other two elements in the "triple alliance" and, having been called on for support by the miners, they had decided to quit work Friday night. But Mr. Lloyd George and other indefatigable persons worked on them to change their minds, and six hours before the hour set for striking they announced that they would not strike. The triple alliance was thus split, and the miners must have seen that their cause was hopeless.

Another reason for the change of attitude by the miners is seen in the evident intention of a large number of members of the house of commons to see that justice is done the workers in the matter of wages. After they had heard from the premier that the miners refused to reopen negotiations, they themselves conducted an inquiry into the matter.

Presumably the plan for regulation of wages on a national basis, accepted by the government some time ago, will be put into effect. The national pooling of profits, also demanded by the miners, was declared impossible by the government.

An important step toward the revival of industry in America was made last week when the United States Steel corporation announced a new price list showing lower prices for steel. The cut ranges from $1.50 to $9 a ton, and the price of tin plate also was reduced $15 a ton. The decreases are confined to certain products and, according to builders and architects, are not in themselves sufficient to revive the building industry; but the cut does remove uncertainty and establish a general stabilized price level for steel and experts in the trade say it should stimulate industry. The first concrete result was the announcement by the International Harvester company of a straight 10 per cent reduction on its products in which steel is the principal raw product used.

Secretary of Labor Davis in an address in Chicago made his first public statement of his attitude toward labor and capital. He called for a fair deal for capital, a decent living wage for labor, larger profits for farmers through lower rail-shipping rates, and the settlement of all industrial disputes through conferences between employees. He warned labor that if it is to take a share in the policies of the nation it also must share the national responsibilities, declaring it was up to labor to see that transportation conditions were such that the farmer could make a fair profit.

The federal railway labor board has issued an order that clears up the transportation situation, or should do so speedily. Briefly, it terminates the national working agreements on July 1; meanwhile conferences between the carriers and the workers are ordered, to settle the controversies over working rules as far as possible; on July 1, the board will promulgate "just and reasonable" rules for classes of employees regarding whom rules have not been reached by agreement. Both sides are urged to act as quickly as possible.

Hot Springs Water Wonderfully Successful in the Treatment of Rheumatism

THE peculiar properties of the waters of the Hot Springs of Arkansas are due to radio activity, found in them to an exceptionally marked degree, and their equal has never been known in the treatment of rheumatism and all uric acid troubles. These springs are owned and controlled by the U. S. Government.

The cost of living at Hot Springs may be regulated to suit any purse, accommodations varying from moderate priced boarding houses, up to the most fashionable hostelries.

be regretted that we were repared for war's aftermath, made ready to return to the peace, but we are not to be ed. Indeed, we must be the ly resolved to undertake our h high hope, and invite every our citizenship to join in the find our normal, onward way

American people have ap- the situation, and with that and patience which go with nding they will give to us the of deliberate public opinion timately becomes the edict of ular government. They are g some of the stern necessi- will join in the give and take the essential to firm re-es- ent.

Home Problems First.

in mind must be the solution roblems at home, even though ases of them are inseparably ith our foreign relations. The rocedure in every government t its own house in order. w of no more pressing prob- home than to restrict our na- expenditures within the limits national income, and at the me measurably lift the burdens taxation from the shoulders of erican people.

cannot be unmindful that y is a much-employed cry, requently stressed in pre-elec- peals, but it is ours to make it tstanding and ever-impelling in both legislation and ad- ation. The unrestrained tend- heedless expenditure and the ng growth of public indebted- extending from federal author- that of state and municipality, cluding the smallest political sion, constitute the most dan- phase of government today. nation cannot restrain except own activities, but it can be ar in a wholesome reversal. staggering load of war debt e cared for in orderly funding radual liquidation. We shall the solution and aid effectively ng the tax burdens if we strike ely at expenditure. It is far easily said than done.

Must Have Economy.

The fervor of war our expendi- were so little questioned, the ency was so impending, appro- on was unimpeded, that we little millions and counted the treas- nexhaustible. It will strengthen esolution if we ever keep in that a continuation of such a means inevitable disaster. current expenditures are run- at the rate of approximately ,000,000 a year, and the burden bearable. There are two agen- o be employed in correction: is rigid resistance in appropri- ation and the other is the utmost economy in administration.

Let us have both.

I already have charged department heads with this necessity. I am sure congress will agree; and both congress and the administration may safely count on the support of all right-minded citizens, because the burden is theirs. The pressure for expenditure, swelling the flow in one locality, while draining another, is sure to defeat the imposition of just burdens, and the effect of our citizenship protesting outlay will be wholesome and helpful.

Remedy in Thrift.

I wish it might find its reflex in economy and thrift among the people themselves because therein lies quicker recovery and added security for the future.

The estimates of receipts and expenditures and the statement as to the condition of the treasury which the secretary of the treasury is prepared to present to you will indicate what revenues must be provided in order to carry on the government's business and meet its current requirements and fixed-debt charges.

Unless there are striking cuts in the important fields of expenditure, receipts from internal taxes cannot safely be permitted to fall below $4,000,000,000 in the fiscal years 1922 and 1923. This would mean total internal tax collections of about one billion less than in 1920 and one-half billion less than in 1921.

Must Readjust Taxes.

The most substantial relief from the tax burden must come for the present from the readjustment of internal taxes and the revision or repeal of those taxes which have become unproductive and are so artificial and burdensome as to defeat their own purpose.

A prompt and thoroughgoing revision of the internal tax laws, made with due regard to the protection of the revenues, is in my judgment, a requisite to the revivial of business activitiy in this country. It is earnestly hoped, therefore, that the congress will be able to enact without delay a revision of the revenue laws and such emergency tariff measures as are necessary to protect American trade and industry.

It is of less concern whether internal taxation or tariff revision shall come first than has been popularly imagined because we must do both, but the practical course for earliest accomplishment will readily suggest itself to the congress. We are committed to the repeal of the excess profits tax and the abolition of inequities and unjustifiable exasperations in the present system.

The country does not expect and will not approve a shifting of burdens. It is more interested in wiping out the necessity for imposing them and eliminating confusion and cost in the collection.

The urgency for an instant tariff enactment, emergency in character and understood by our people that it is for the emergency only, cannot be too much emphasized. I believe in the protection of American industry, and it is our purpose to prosper America first. The privileges of the American market to the foreign producer are offered too cheaply today, and the effect on much of our own productivity is the destruction of our self-reliance, which is the foundation of the independence and good fortune of our people. Moreover, imports should pay their fair share of our cost of government.

One who values American prosperity and maintained American standards of wage and living can have no sympathy with the proposal that easy entry and the flood of imports will cheapen our costs of living. It is more likely to destroy our capacity to buy.

Today American agriculture is menaced, and its products are down to prewar normals yet we are endangering our fundamental industry through the high cost of transportation from farm to market and through the influx of foreign farm products, because we offer, essentially unprotected, the best market in the world. It would be better to err in protecting our basic food industry than paralyze our farm activities in the world struggle for restored exchanges.

The maturer revision of our tariff laws should be based on the policy of protection, resisting that selfishness which turns to greed, but ever concerned with that productivity at home which is the source of all abiding good fortune.

It is agreed that we cannot sell unless we buy, but ability to sell is based on home development and the fostering of home markets. There is little sentiment in the trade of the world. Trade can and ought to be honorable, but it knows no sympathy.

While the delegates of the nations at war were debating peace terms at Paris, and while we later debated our part in completing the peace, commercial agents of other nations were opening their lines and establishing their outposts, with a forward look to the morrow's trade. It was wholly proper, and has been advantageous to them. Tardy as we are, it will be safer to hold our own markets secure, and build thereon for our trade with the world.

Wants Business Basis.

A very important matter is the establishment of the government's business on a business basis. There was toleration of the easy-going, unsystematic method of handling our fiscal affairs, when indirect taxation held the public unmindful of the federal burden. But there is knowledge of the high cost of government today, and high cost of living is inseparably linked with high cost of government.

There can be no complete correction of the high living cost until government cost is notably reduced.

Let me most heartily commend the enactment of legislation providing for the national budget system. Congress already has recorded its belief in the budget. It will be a very great satisfaction to know of its early enactment so that it may be employed in establishing the economies and business methods so essential to the minimum expenditure.

I have said to the people we meant to have less of government in business as well as more business in government. It is well to have it understood that business has a right to pursue its normal, legitimate and righteous way unimpeded, and it ought have no call to meet government competition where all risk is borne by the public treasury.

Warns Crooked Business.

There is no challenge to honest and lawful business success. But government approval of fortunate, untrammeled business does not mean toleration of restraint of trade or of maintained prices by unnatural methods. It is well to have legitimate business understand that a just government, mindful of the interests of all the people, has a right to expect the co-operation of that legitimate business in stamping out the practices which add to unrest and inspire restrictive legislation. Anxious as we are to restore the onward flow of business, it is fair to combine assurance and warning in one utterance.

One condition in the business world may well receive your inquiry. Deflation has been in progress, but has failed to reach the mark where it can be proclaimed to the great mass of consumers.

Reduced cost of basic production has been recorded, but high cost of living has not yielded in like proportion. For example, the prices on grains and live stock have been deflated, but the cost of bread and meats is not adequately reflected therein. It is to be expected that nonperishable staples will be slow in yielding to lowered prices, but the maintained retail costs in perishable foods cannot be justified.

I have asked the federal trade commission for a report of its observations and it attributes, in the main, the failure to adjust consumers' cost to basic production costs to the exchange of information by "open-price associations," which operate, evidently, within the law, to the very great advantage of their members and equal disadvantage to the consuming public.

Wants Helpful Probe.

Without the spirit of hostility or haste in accusation of profiteering, some suitable inquiry by congress might speed the price readjustment to normal relationship, with helpfulness to both producer and consumer. A measuring rod of fair prices will satisfy the country and give us a business revival to end all depression and unemployment.

The great interest of both producer and consumer—indeed, all industrial and commercial life, from agriculture to finance—in the problems of transportation will find its reflex in your concern to aid re-establishment, to restore efficiency, and bring transportation cost into a helpful relationship rather than continue it as a hindrance to resumed activities.

It is little to be wondered that ill-considered legislation, the war strain, government operation in heedlesness of cost, and the conflicting programs, or the lack of them, for restoration have brought about a most difficult situation, made doubly difficult by the low tide of business. All are so intimately related that no improvement will be permanent until the railways are operated efficiently at a cost within which the traffic can bear.

If we can have it understood that congress has no sanction for government ownership, that congress does not levy taxes upon the people to cover deficits in a service which should be self-sustaining, there will be an avowed foundation on which to rebuild.

Freight-carrying charges have mounted higher and higher until commerce is halted and production discouraged.

Railway rates and cost of operation must be reduced.

Congress may well investigate and let the public understand wherein our system and the federal regulations are lacking in helpfulness or hindering in restrictions. The remaining obstacles which are the heritage of capitalistic exploitation must be removed and labor must join management in understanding that the public which pays is the public to be served, and simple justice is the right and will continue to be the right of all the people.

Transportation over the highways is little less important, but the problems relate to construction and development, and deserve your most earnest attention, because we are laying a foundation for a long time to come, and the creation is very difficult to visualize in its great possibilities.

There is begun a new era in highway construction, the outlay for which runs far into hundreds of millions of dollars. Bond issues by road districts, counties and states mount to enormous figures, and the country is facing such an outlay that it is vital that every effort shall be directed against wasted effort and unjustifiable expenditures.

I know of nothing more shocking than the millions of public funds wasted in improved highways, wasted because there is no policy of maintenance. The neglect is not universal, but it is very near to it. There is nothing that congress can do more effectively to end this shocking waste than to condition all federal aid on provisions for maintenance.

It is not necessary to say it to congress, but I have thought this to be a befitting occasion to give notice that the United States means to establish and maintain a great merchant marine. Our differences of opinion as to a policy of upbuilding have been removed by the outstanding fact of our having builded. If the intelligent and efficient administration under the existing laws makes established service impossible, the executive will promptly report to you.

It is proper to invite your attention to the importance of the question of radio communication and cables. To meet strategic, commercial and political needs, active encouragement should be given to the extension of American-owned and operated cable and radio services. Private monopolies tending to prevent the development of needed facilities should be prohibited. Government-owned facilities, wherever possible, without unduly interfering with private enterprise or government needs, should be made available for general uses. Particularly desirable is the provision of ample cable and radio services at reasonable rates for the transmission of press matter, so that the American reader may receive a wide range of news, and the foreign reader receive full accounts of American activities.

Aviation is inseparable from either the army or the navy and the government must, in the interests of national defense, encourage its development for military and civil purposes. I recommend the enactment of legislation establishing a bureau of aeronautics in the navy department to centralize the control of naval activities in aeronautics and removing the restrictions on the personnel detailed to aviation in the navy. The army air service should be continued as a co-ordinate combatant of the army, and its existing organization utilized in co-operation with other agencies of the government.

Relief for Service Men.

The American people expect congress unfailingly to voice the gratitude of the republic in a generous and practical way to its defenders in the Word war, who need the supporting arm of the government. Our very immediate concern is for the crippled soldiers and those deeply needing the helping hand of the government. Conscious of the generous intent of congress, and the public concern for the crippled and dependents, I invited the services of a volunteer committee to inquire into the administration of the bureau of war risk insurance, the federal board for vocational training, and other agencies of government in caring for the ex-soldiers, sailors and marines of the World war.

This committee has recommended, and I convey the recommendations to you with cordial approval, that all government agencies looking to the welfare of the ex-service man should be placed under one directing head, so that the welfare of these saviors of our civilization and freedom may have the most efficient direction. It may be well to make such an official the director general of service to war veterans and place under his direction all hospitalization, vocational training, war insurance, rehabilitation and all pensions.

The immediate extension and utilization of the government's hospital facilities in the army and navy will bring relief to the acute conditions most complained of, and the hospital building program may be worked out to meet the needs likely to be urgent at the time of possible completion. The whole program requires the most thoughtful attention of congress, for we are embarking on the performance of a sacred obligation which involves the expenditure of billions in the half century before us.

Congress must perfect the policy of generous gratitude, and conscientious administration must stamp out abuses in the very beginning. We must strengthen rather than weaken the moral fiber of the beneficiaries, and humanize all efforts so that rehabilitation shall be attended by respiritualization.

Public Welfare Department.

During the recent political canvass the proposal was made that a department of public welfare should be created. It was endorsed and commended so strongly that I venture to call it to your attention and to suggest favorable legislative consideration.

I assume the maternity bill, already strongly approved, will be enacted promptly, thus adding to our manifestation of human interest.

Somewhat related to the foregoing human problems is the race question. Congress ought to wipe the stain of barbaric lynching from the banners of a free and orderly, representative democracy. I am convinced that in mutual tolerance, understanding, charity, recognition of the interdependence of the races, and the maintenance of the rights of citizenship lies the road to righteous adjustment.

The Public Defense.

It is needless to call your attention to the unfinished business inherited from the preceding congress. The appropriation bills for army and navy will have your early consideration. Neither branch of the government can be unmindful of the call for reduced expenditure for these departments of our national defense. The government is in accord with the wish to eliminate the burdens of a heavy armament. The United States ever will be in harmony with such a movement toward the higher attainments of peace. But we shall not entirely discard our agencies for defense until there is removed the need to defend. We are ready to co-operate with other nations to approximate disarmament, but merest prudence forbids that we disarm alone.

The naval program which had its beginning in what seemed the highest assurance of peace can carry no threat after the proof of our national unselfishness. The reasonable limitation of personnel may become combined with economics of administration to lift the burdens of excessive outlay.

The war department is reducing the personnel of the army from the maximum provided by law in June, 1920, to the minimum directed by congress in a subsequent enactment. When further reduction is compatible with national security, it may well have the sanction of congress, so that a system of voluntary military training may offer to our young manhood the advantages of physical development, discipline and commitment to service, and constitute the army reserve in return for the training.

Will Not Enter the League.

Nearly two and a half years ago the World war came to an end, and yet we find ourselves today in the technical state of war, though actually at peace, while Europe is at technical peace, far from tranquillity and little progressed toward the hoped-for restoration. It ill becomes us to express impatience that the European belligerents are not yet in full agreement, when we ourselves have been unable to bring constituted authority into accord in our own relations to the formally proclaimed peace.

Little avails in reciting the causes of delay in Europe or our own failure to agree. But there is no longer excuse for uncertainties respecting some phases of our foreign relationship. In the existing League of Nations, world-governing with its superpowers, this republic will have no part. There can be no misinterpretation, and there will be no betrayal of the deliberate expression of the American people in the recent election; and, settled in our decision for ourselves, it is only fair to say to the world in general, and to our associates in war in particular, that the league covenant can have no sanction by us.

The aim to associate nations to prevent war, preserve peace, and promote civilization, our people most cordially applauded. We yearned for this new instrument of justice but we can have no part in a committal to an agency of force in unknown contingencies; we can recognize no super-authority.

Manifestly the highest purpose of the League of Nations is defeated in linking it with the treaty of peace and making it the enforcing agency of the victors of the war. International association for permanent peace must be conceived solely as an instrumentality of justice, unassociated with the passions of yesterday, and not so constituted as to attempt the dual functions of a political instrument of the conquerors and of an agency of peace. There can be no prosperity for the fundamental purposes sought to be achieved by any such association so long as it is an organ of any particular treaty, or committed to the attainment of the specials aims of any nation or group of nations.

Ready to Join in World Peace.

The American aspiration, indeed, the world aspiration, was an association of nations, based upon the application of justice and right, binding us in conference and co-operation for the prevention of war and pointing the way to a higher civilization and international fraternity in which all the world might share. In rejecting the league covenant and uttering that rejection to our own people, and to the world, we make no surrender of our hope and aim for an association to promote peace in which we would most heartily join. We wish it to be conceived in peace and dedicated to peace, and will relinquish no effort to bring the nations of the world to such fellowship, not in the surrender of national sovereignty, but rejoicing in a nobler exercise of it in the advancement of human activities, amid the compensations of peaceful achievement.

In the national referendum to which I have adverted, we pledged our efforts toward such association, and the pledge will be faithfully kept. In the plight of policy and performance, we told the American people we meant to seek an early establishment of peace. The United States alone among the allied and associated powers continues in a technical state of war against the central powers of Europe. This anomalous condition ought not to be permitted to continue.

To establish the state of technical peace without further delay, I should approve a declaratory resolution by congress to that effect, with the qualifications essential to protect all our rights. Such action would be the simplest keeping of faith with ourselves and could in no sense be construed as a desertion of those with whom we shared our sacrifices in war, for those powers are already at peace.

Such a resolution should undertake to do no more than this, to declare the state of peace, which all America craves. It must add no difficulty in effecting, with just reparations, the restoration for which all Europe yearns, and upon which the world's recovery must be founded. Neither former enemy nor ally can mistake America's position, because our attitude as to responsibility for the war and the necessity for just reparations already has had formal and very earnest expression.

It would be unwise to undertake to make a statement of future policy with respect to European affairs in such a declaration of a state of peace. In correcting the failure of the executive in negotiating the most important treaty in the history of the nation, to recognize the constitutional powers of the senate, we would go to the other extreme, equally objectionable, if congress or the senate should assume the function of the executive. Our highest duty is the preservation of the constitutional powers of each, and the promotion of the spirit of co-operation so essential to our common welfare.

Separate Treaties Not Adequate.

It would be idle to declare for separate treaties of peace with the central powers on the assumption that these alone would be adequate, because the situation is so involved that our peace engagements cannot ignore the old world relationship and the settlement already effected, nor is it desirable to do so in preserving our rights and contracting our future relationships.

The wiser course would seem to be the acceptance of the confirmation of our rights and interests as already provided and to engage under the existing treaty, assuming, of course, that this can be satisfactorily accomplished by such explicit reservations and modifications as will secure our absolute freedom from inadvisable commitments and safeguard all our essential interests.

Neither congress nor the people needs my assurance that a request to negotiate needed treaties of peace would be as superfluous and unnecessary as technically ineffective, and I know in my own heart that there is none who would wish to embarrass the chief executive in the performance of his duty when we are all so eager to turn disappointment and delay into gratifying accomplishment.

Problems relating to our foreign relations bear upon the present and the future, and are of such a nature that the all-important future must be deliberately considered, with greater concern than more immediate relief from unhappy conditions. We have witnessed, yea, we have participated in the supremely tragic episode of war, but our deeper concern is the continuing life of nations and the development of civilization.

We must not allow our vision to be impaired by the conflict among ourselves. The weariness at home and the disappointment to the world have been compensated in the proof that this republic will surrender none of the heritage of nationality, but our rights in international relationship have to be asserted; they require establishment in compacts of unity; our part in readjustment and restoration cannot be ignored and must be defined.

Help Without Entanglements.

With the super-governing league definitely rejected and with the world so informed, and with the status of peace proclaimed at home, we may proceed to negotiate the covenanted relationships so essential to the recognition of all the rights everywhere of our nation and play our full part in joining the peoples of the world in the pursuits of peace once more. Our obligations in effecting European tranquility, because of war's involvements, are not less impelling than our part in the war itself. This restoration must be wrought before the human procession can go onward again. We can be helpful because we are moved by no hatreds and harbor no fears. Helpfulness does not mean entanglement and participation in economic adjustments does not mean sponsorship for treaty commitments which do not concern us, and in which we will have no part.

In an all-impelling wish to do the most and best for our own republic and maintain its high place among nations and at the same time make the fullest offering of justice to them, I shall invite in the most practical way the advice of the senate, after acquainting it with all the conditions to be met and obligations to be discharged, along with our own rights to be safeguarded. Prudence in making the program and confident co-operation in making it effective cannot lead us far astray. We can render no effective service to humanity until we prove our own capacity for co-operation in the co-ordination of powers contemplated in the constitution, and no covenants which ignore our associations in the war can be made for the future. More, no helpful society of nations can be founded on justice and committed to peace until the covenants re-establishing peace are sealed by the nations which were at war. To such accomplishment—to the complete re-establishment of peace and its contracted relationships, to the realization of our inspiration for nations associated for world helpfulness without world government, for world stability on which humanity's hopes are founded, we shall address ourselves, fully mindful of the high privilege and the paramount duty of the United States in this critical period of the world.

NEW "PEONAGE" INDICTMENT

Jury Acts Against Farmer, Three Sons and Farm Boss in Negro Killings.

Monticello, Ga., April 13.—Indictments have been returned by the Jasper county grand jury against John S. Williams, his three sons—Huland, Marvin and Leroy—and Clyde Manning, his negro farm boss, charging murder in connection with the deaths of 14 negroes on the Williams plantation Eight indictments were found against John S. Williams, charging murder of eight farm hands whose bodies were recently found buried in pastures on h's farm or were dragged from near-by rivers. Eight indictments also were returned against Clyde Manning for the same killings. Huland Williams was indictetd for the killing of a negro named "Black Strap."

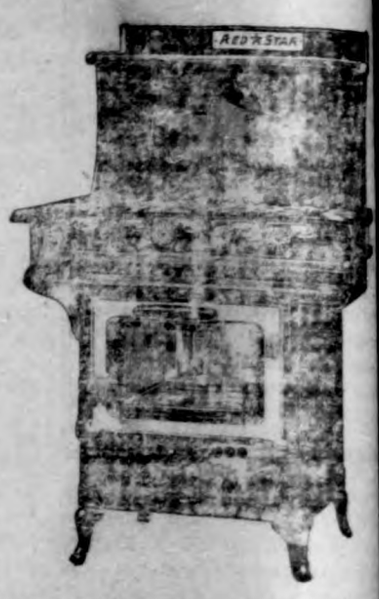
Looks, Operates and Cooks Like a Fine Gas Range

Expert domestic scientists have proven in critical tests that this oil stove will anything that can be done on a city gas range.

Because of it every woman, no matter where she lives, can now enjoy cooking methods that were never possible before.

RED STAR

Detroit Vapor Oil Stove



The wonderful Red Star burner has made this possible. It is made of grey annealed iron, weighs 8½ lbs and burns gas like a gas range. Only it generates its oun gas from kerosene, gasoline or distillate. It requires no wicks or wick substitutes.

This marvelous burner produces T W O rings of hot gas flame, instead of one. The burner becomes red hot, adding this steady even heat. Practically no heat escapes into the room and absolutely no smoke or oder. The Red Star saves at least 25 per-cent of the fuel expense because each burner gives 19 hours of of ideal heat from one gallon of fuel.

This stove is so different and so much more efficient that you surely want to know about it. Come in and see a surprising demonstration.

FARMERS ELEVATOR WILL BE A REALITY MONDAY MORNING

Herman Miller Will Manage Business

The farmers have purchased the elevator business of M. O. Hocum, an item of news which appeared in the Times a few months ago, and on Monday they will take over the business under the new name of "The Klemme Co-Operative Grain Company."

Herman Miller, who has been with Mr. Hocum for the past year or so, has been hired to manage the elevator for the farmers. Herman is an experienced man in the grain busiess nad thoroughly understands all the points of the business, a better man for this responsible position would be hard to find.

William Stille has been hired to assist Mr. Miller with the work at the elevator.

Many prominent farmers of the community are stck holders in the new cocer ad so the project is of much interest to all farmers of the community. An able board of directors have been elected to look after the business and under their supervision we can see nothing but a successful career for the new farmers elevator.

ELEVEN CARS LIVE STOCK SHIPPED FROM HERE SATURDAY

The stock shipping from the yards here continue to be heavy as was shown by the shipment which left the yards Saturday night. In all eleven car loads of live stock were sent on ther way to the Chicago market. They were divided as follows: Eight car loads of cattle and three car loads of hogs.

Farmers from over as far as Duncan, near Britt. Garner, Ventura and Goodell haul their stuff to Klemme as the market price is always much better here and they make money by hauling their stock here.

PROF. HARRY WILSON TO COME BACK TO KLEMME AGAIN NEXT YEAR

We made an error in the Times of last week when we stated that Mr. Wilson had accepted a position wtth the Ossian, Iowa, schools and would not be here next year. Since then we have been informed by him that the board re-elected him for ext year and that he had accepted the position.

We are indeed glad to have him at the head of our schools for the coming year for his work here has been very satisfactory and the school has progressed under his supervision.

At this time we are unable to state which teachers will return on the stff next year. We hope that they will all be on the teaching staff again as their work has been the very best.

FIRST METHODIST EPISCOPAL CHURCH

Preachng services Sunday morning at 10:00 o'clock. Sunday school at the close of preaching service at 11:00 o'clock. No services in the evening. Liberty Township Sunday school meets at 10:15 o'clock.Prechching service at 11:30 o'clock.

Epworth League in Liberty Twp. Sunday night at 7:30. Pdeaching service at 8:00 o'clock.

The Kings Heralds and Little Light Bearer will meet on the lawn of the First Methodist church next Sunday during preaching services.

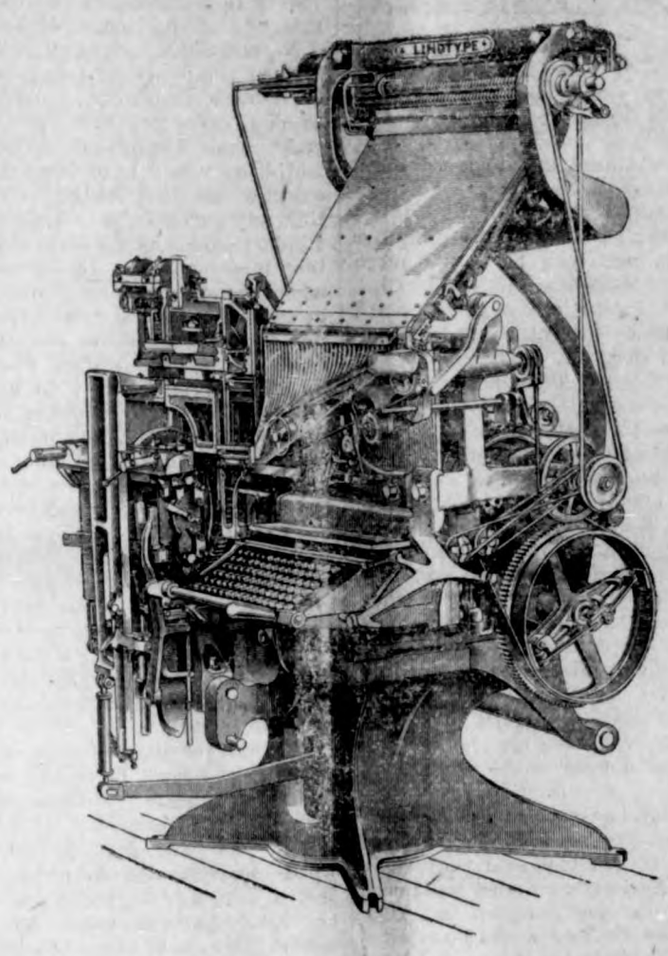
A. H. Meyer, Pastor.

CAMP MEETING DATE IS SET FOR JUNE 21 TO JUNE 26

Rev. Meyer informed us that the Camp Meeting date had been set and that the annual Camp Meeting would be held at the camp grouds at Garner from June 21st to June 26th. Bear these dates in mind and arrage accordingly so you can attend and enjoy the meeting, which is an annual affair looked forward to by a great many here.

The neighbors of mother Friedow gathered at her place Tuesday evening and planted her potatoes for her as she has been quite sick of late and was unable to do the work her. self. It was a kind deed that will be remembered.

The Times Office Installs New Machine--A Linotype



TIMES OFFICE INSTAALS NEW MACHINE

With a good deal of satisfaction the Editor of the Klemme Times announces the installation of a new Liotype. This mechanical marvel qualifies us to serve efficiently the large number of persons who look to our publiciation for enlightment and entertainmet, ad who patronize our job printing departmet.

The rapidly icreasing circulaton of the Times, together with our desire to place at the command of our edvertisers and others the highest grade of typography, induced us to secure a fine composing machine for quick and accurate and pleasing presetation of the news of the day, and the production of superior job work.

Our new Linotype enables us to set by machine many forms of composition that previously necessitated tedious work by hand. Our plant is now capable of turning out composition consisting of correct type faces in many different sizes, and the change from one size to aother is made very quickly. At a high rate of speed the versatile operator —whose hand is made famous by the Merganthaler Linotype Company as "The hand that keeps the world informed"—produces line after line of the sort of composition desired.

This installation is a testimonial to the prosperity of Klemme and vicinity. And that the good people of the community are duly appreciative of our efforts to serve them in all departments of the printing business is manifested by the many complimets received from individual patrons since the arrival of our new machne.

The accompanying illustration will give our readers some idea of the marvelous mechanism of the Linotype, which is a machine on which are assembled matrices (or little brass molds) and lines of type cast—lines such as you are now read ing.

Besides enabling the operator to set varioous faces and sizes of type, our new machine makes it possible for him to produce the rules and dashes and borders which are used in various advertisements in each issue of our publication. When employed in the composing of advertisements, newspaper headings, book lets, catalogues, and various other kinds of printed matter, our new machine enables one operator to set i the same time more type than ordinarily could be produced by five or six men or women doing the work by hand—and the composition is incomparably better.

While for a long time we have received the patronage of a host of subscribers, advertsers, and buyers of printing in general, we look forward to the handling of an even greater volume of business now that we are so well qualified to render the sort of service most desired.

It has been our aim to present the news of the day without favod, and to reflect faithfully the ideals and ambitions of our constituents; and we shall continue to devote our talets and resources to the fulfilling of this aim. Aand of great help to us in the carrying out of our purpose will be our new Linotype.

Besides installing this latest machine in our printing office, we have also, sice we came to Klemme, installed a new newspaper press, lots of new job and advertising display type, new press motors, and a great many labor and time saving mechanical devices. The Times Office is clectrically equipped through out and is one of the gest plants in this part of the state, and especially for the size of the town. Of course we are "tooting our own horn" but Mr. Bert S. Stafford, of the Linotype Co. who came to set up the new machine was most favorably impressed with our printing plant and said that he knew of noe better in a town of the size of Klemme as very few were Linotype equipped shops. He was also much impressed wth the appearance of our little city.

We invite you to come in and see the new machine in operation; there are perhaps many who have never seen a machine of this kind annd we will be glad to expain it to you.

..WASHINGTON NEWS ITEMS..

In a straight forward manne, President Harding spots were: down."

"Wages must come down."

No Foreign Entanglements."

"No unneccessary interference by the Government with private business."

"NO assumpion by the Executive, of Legislative authority and also no interference by the legislative branch with Executive authority."

Two of the important bills ntroduced in the House thhis session by Iowa members were: One by Congressman Sweet of the Third District to consolidate all Bureaus affecting Federal Aid for disabled soldiers under one head, thereby cutting some of the red tape which now delays settlement of the claims. The other by Congressman Dickinson of our own district to regulate future sales of grain on the board of trade. This bill will be especially interesting to the farmers of Iowa and Md. Dckinson solicits comment or criticism thereon.

Mr. J. R. White, Road Engineer of the Iowa State Highway Commission, was in Washington this week calling on various members of the House wth a view of creating an interest in Federal Legislation for the aid of Highway Construction. It is the purpose of those interetsed to have two bills introduced; one for the appropriation and the other to define the poucy of thr Federal aid to Highways.

Rev. A. H. Meyer drove to Garner yesterday afternoon to meet Rev. John Clause who came over from Charles City on the afternoon trin to confer with Rev. Meyer and Rev. Gauger in regard to the Camp Meating. Rev. Clause is Superintendant of the Charles City conference.

Mrs. Clarence Larsen and her father were at Mason City Saturday on business.

TWO YOUNG KLEMME MEN GO INTO BUSINESS—BUY GARAGE

Chris Gram and Walt Schultz Now New Proprietors of the Former Beir Auto Company

Another change in business took place Tuesday when Chris Gram and Walt Schultz bought out the garage business from John Terhufen, who had purchased the business only last week from Carl Beier.

Chris and Walt are both well acquainted with the people of this vicinity and the people also know them to be both skilled auto mechanics, and as good in that line as any to be found anywhere. They are running an ad i this issue of the paper tellig of the business change and otheritems. We welcome the fellows into the business circle of Klemme and wish them success.

Mr. Haxton, of Britt, was seen in Avery Township wth a truck load of hounds looking for wolves. the other day.

LIBERTY TOWNSHIP NEWS

Lester Stille and Clarence Tanner went to Chicago with stock last Saturday night.

The Red ad Blue Contest which has been going on between the two chosen sides of the Sunday School at the Liberty township church came to a close a couple of weeks ago. The Blues winning out. A big banquet was planned for this Wedesday evening to be put on by the Reds in honor of the Blues.

"Bub" Ulrich and "Jimmie" Wade apparently have been having a considerable amount of enjoyment the past week or so racing up and down the roads in an old Ford chassis.

chool No. 7 ended last Friday with a picnic.

School No. 8 will close this week Friday. We presume the scholars will be glad that they can again have four months of freedom.

AVERY CENTER NEWS ....

Nr. C. A. Beilefeldt returned from the Hampton hospital Sunday.

The Haxton brothers of Britt were hunting in the neighborhood last week. They also visited at the Fred Bachman home.

Mr. and Mrs. George Porter entertained relatives Sunday.

Miss Mable Fuller Spent the week end at home.

Wilbur, the little son of Mr. and Mrs. Roscoe Wiles, while playing last Friday. fell from a straw pile and broke his leg. Drs. Snearly and Missman set the limb and the little fellow is getting along as well as could be expected, although he is suffering considerable pain.

The members of the First Methodist church met last Friday evening to consider consolidation of the two Methodist churches. They appointed a committee to draw up the necessary resolutons and will meet later with a like committee from the other chuch, who held their meeting on Tuesday evening and appoited their committee. The cosolidation movement is watched with eagerness by the community and all agree that a merger of the two churches is the proper thing. If the conference is going to hold up the movement if they ca come to no agreement on that, the we suggest they throw it to the winds and star a new church of anoher denomiation, which also is the opiion of many others.

The other day when John Lemke was driving in from Liberty township his team became frightened at a pile of sand near the road just west of the tracks near the stock yards. They started to run and tipped over the wagon when they hit the tracks. John and a case of eggs were spilled all over the road: the eggs were seriously injured but our friend John escaped with a number of small bruises and a good scare. The horses escaped down the road into town and when caught all they wore was a part of a collar and a garter strap. John says it wasn't very funny, and we agree with him on that as it might have been much worse.

NOTICE OF APPOINTMENT OF ADMINISTRATOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Administrator of the Estate of G. I. Schaper, late of Hancock County, State of Iowa, deceased.

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated April 14th, A. D., 1921.

An Adventure Romance

By

GEORGE AGNEW CHAMBERLAIN

COPYRIGHT THE·BOBBS-MERRILL·COMPANY

GREENWOOD CEMETERY.

Synopsis.—Robert Hervey Randolph, young New York man-about-town, leaves the home of his sweetheart, Madge Van Tellier, chagrined because of her refusal of his proposal of marriage. His income, $10,000 a year, which he must surrender if a certain Miss Imogen Pamela Thornton (whom he has seen only as a small girl ten years before) is found, is not considered by the girl of his heart adequate to modern needs. In a "don't care" mood Randolph enters a taxi, unseen by the driver, and is driven to the stage door of a theater. A man he knows, Duke Beamer, induces a girl to enter the cab. Beamer, attempting to follow, is pushed back by Randolph and the cab moves on. His new acquaintance tells Randolph she is a chorus girl, and has lost her position. She is in distress, even hungry, and he takes her to his apartment. There, after lunch, a chance remark convinces him the girl is the missing Pamela Thornton. He does not tell her of her good fortune, but secures her promise to stay in the flat until the morning and leaves her. Realizing that the girl's reappearance has left him practically penniless, he bribes the taxi driver to let him take his job, and leaving word with the legal representative of the Thornton estate where he can find Pamela, takes up his new duties under the name of Slim Hervey." One evening he is engaged by Beacher Tremont, notorious profligate, to drive him and Madge to a hostelry known as "Greenwood."

PART II—Continued.

—6—

Mr. Slim Hervey, chauffeur, was still plunged in reverie when his senses were assailed by a whiff of lilac, a mere nuance of perfume, that proclaimed the approach of Miss Madge Van Tellier. He jumped out just in time to throw open the door of his cab for the couple and take the murmured order of Mr. Beacher Tremont. "All right. Hit it up for Greenwood."

Luckily for the cabman's entertainment, his engine was working in silent perfection that night. The late hour gave him almost undisputed right of way so that driving became an automatic adjustment of his course in line with the curb and released his attention to gorge itself at leisure with eaves-dropping. By squirming his shoulders he managed to cock one ear over the top of his high overcoat collar; it was the ear next to the open speaking-slot.

"What a dream of a night," said the clear voice of Miss Van Tellier. "Shall I be a traitor to my sex and betray one of its secrets to you?"

"Please do," murmured Mr. Tremont. From the very tone of his voice one could divine that he had slipped an arm around her and was holding her close.

"Well, it's this," she continued. "Women are not conquered by man alone, but by man and atmosphere. We never rush at the precipice; we flutter toward it with many stops and pauses. The silliest breezes of impulse may carry us on or a puff of unkind aid hold us back. It all really depends on the man imposing his atmosphere so steadily that the drifting soul of woman forgets its inborn title to vagrancy and sleepily assumes its enemy's goal."

"Madge," said Mr. Tremont almost earnestly, "you frighten me. I never knew you could talk like that. You frighten me because I have a terror of analyzed personal relations."

Randolph could hear a faint rustling of her robe as though she had nestled closer to her escort. "I never meant to startle you, Beacher," her voice continued, not quite so clear. Into its tone had crept, hesitatingly, a trace of unaccustomed emotion. "I was only warning you. Every man can make a world of his arms for one woman; not all can hold the illusion to beyond possession."

"I can, if you will only help me," whispered Tremont, and paused as though his own earnestness were taking him by surprise.

"I wonder," said Miss Van Tellier. "You have played the right game. You have never said a vulgar thing to me or stooped to the usual hypocrisies; those are compliments by inference that have flattered the best that is in me. You have set the play in a high plane that winning, wins all of me; but—"

"But what?" asked Tremont.

"But there is danger in the high flight," finished Miss Van Tellier. "An air-pocket in your atmosphere and, pouf! all is lost—the good in me that you will have missed as well as the bad that you could have won by a baser effort."

"What do you mean?" asked Tremont, no longer making the slightest effort to hide his awakened interest.

"I was thinking," said Miss Van Tellier, dreamily, "that every woman is a group of three individuals. Shall I tell you their names?"

"Yes," said Tremont.

"The first," continued the girl, her voice floating from her as though carried on the bosom of her dream, "is called Flesh; the second, Spirit, and the third—the third I shall name the Veiled God."

"Madge!" cried Tremont, and Randolph, listening with all his ears, could almost feel the clutch on his own arms with which the man had seized the girl's, as though to drag her back from her mind's far distance.

"People wonder," she continued, her mood unbroken, "at the wreck of apparently perfect marriages and yet it's so simple to any woman that it's amazing that I should be the first to display our open secret. Only the complete lover can be secure of his beloved, Beacher. He who wins her flesh alone leaves her spirit to betray him, and he who wins the spirit alone is in mortal danger of the woman of the flesh."

"The explanation," said Tremont, whimsically, "is so feminine that it confuses. If you had said that each woman is a trinity and must be thrice won before a man's honor can feel secure, understanding would be a simple matter. Did you leave out the Veiled God purposely or just to be different and avoid the obvious?"

"To avoid the obvious is an instinct of breeding," said Miss Van Tellier, "and I would never blush for doing it; but where would your thoughts be now if I had said just what you expected, if I had treated the Veiled God as a matter of fact! Oh, no! One can clip with words the wings of flesh and spirit, but not of the Veiled God in woman, for its very essence is a deferred possession."

She paused, but as Tremont clung to the silence, she presently continued. "The complete lover is the man who having conquered all the heights of flesh and spirit in his mistress, dwells consciously in the presence of an undiscovered god and gazes out upon a broad land eternally promised, never materially seized. Few are the men—few are the men—" Her voice trailed off as though her thoughts had run ahead of words and reached finality without the use of the spoken phrase.

"Few are the men who attain to that serene security," Tremont finished for her, only half conscious of what he was saying.

Randolph could her the rustle of her turning to her companion. "How wonderful," she said. "That is what I thought, but didn't say."

"Madge," said Tremont, "what have you done? It's true that I have never stooped to hypocrisies with you and that I have never while with you spoken a vulgar word. Did you think that I have been knowingly wise? Well, I haven't. I didn't know until this moment why I chose a rare and high atmosphere to reach you. Now I know. It was because you were there. I chose only to come to you rather than drag you down to the drab of the usual. What you have done is to carry me higher than I ever meant to go. You have taken me off the beaten path and showed me an unexpected treasure. I'm no longer myself. I am cold and afraid."

Randolph could feel that the speaker was drawing away from the girl and a moment later his senses were to surpass themselves in additional divination. "You are afraid of that woman in me?" asked Miss Van Tellier softly. "What about this one?" And then it was that Randolph's deductive antennae quivered under their burden of intelligence. He knew as certainly as though he had faced about that an adorable Madge, tender and wide-eyed, had slipped her bare arms around Beacher Tremont's neck and kissed him on the mouth.

There was a long silence; then came Tremont's voice, thick and strange to the ear. "A moment ago," it said, "I was afraid for you; now I'm afraid for myself. I am like a man who has carelessly dropped a lighted match and finds himself within the ring of a prairie fire. I can only wonder at my stupidity in thinking of you in connection with a casual possession and not as a consuming flame. You see? Already you have burned through the thin crust of lies that guards man from definite seizure by woman—any woman."

"Kiss me, Beacher," murmured the girl's voice as though his words had swirled around and by her, leaving her purpose untouched. "Take me and hold me carefully where no unkind air can drive me from you. Take all the women in me—one by one if you must."

At that moment Mr. Robert H. Randolph, in the person of Slim Hervey, chauffeur, very nearly wrecked his four-cylinder argosy with its burden of three fates, still individually and collectively indispensable to the continuity of this yarn. He missed the ditch by a hair's breath, caught his own with a gasp, returned to the middle of the broad highway and fixed his attention on a certain very definite matter with which it had been more or less constantly concerned ever since he had been directed to hit it up for Greenwood.

The road to that well-known hostelry was usefully devious and fares were seldom worried as to how any particular driver set out to find this choicest of needles in the hay-stack of the country inns that dot the landscape of Westchester and adjacent counties as long as he brought the search to a successful end somewhere this side of the pangs of hunger.

Nevertheless, had not Mr. Tremont, himself a motorist of no mean experience, been completely absorbed by the sudden discovery that he had his right arm around an entirely new world, he would have been struck inevitably by two things. First, that this was certainly not any one of the climbing roads to the Greenwood hostelry; second, that the man at the wheel knew more about losing his way in the vicinity of Manhattan and finding it again than did the combined roadmaps of the United States and its allies—supposing it to have had allies at the time. However, Mr. Tremont's absorption was not only absolute but continuous so that it held him in its inexorable grip right up to the moment of ghastly awakening and even over the edge. He was just saying, "My darling, never fear. I'm taking you to a place so quiet and so guarded that this dream which you have dressed in an unexpected glory can flow on unbroken as long as we are true to it and to ourselves," when the cab drew up at a solemn and impressive portal.

Without leaving his seat, the cabman reached back, unlatched the door and threw it open. "Greenwood cemetery, sir," he barked.

The girl was first to grasp the words, the time and the place. "Oh!" she gasped, and in the sound of her cry Mr. Randolph could divine her whole body suddenly stiffening to a tense awakening and to the stabbing memory of the last time she had come to this still place, her heart bursting with its long farewell to all that was left of her mother.

Then came Mr. Beacher Tremont's voice in oldtime familiar tones. "Greenwood cemetery! Why, you tri-

"Greenwood Cemetery, Sir," He Barked

plicate blockhead, I said Greenwood hostelry. Of all the d—n fools! What the devil— What the h—ll— What the— What—"

He choked himself into a gulping inarticulate silence as he climbed from the cab to look in the face the sum total of all human stupidity. No sooner had he alighted than Miss Van Tellier found herself in voice again. "Oh! oh!" she moaned, pressing her hands to her eyes, achingly open, "take me away from here."

"Sure, miss," said Mr. Randolph promptly, threw in his clutch and was off.

"Hi, you! D—n you! Hey! You! Driver! Confound your d—d impertinence! Hey! How am I going to get home?" The first of these cries was very plainly, the last very faintly heard by Mr. Randolph. After them came down the wind something that sounded very much like the ghost of a wail of despair, but the driver paid no heed. His attention was absorbed by something quite different; the dry sobs of a little heap of smoke-colored chiffon.

Detours, subterfuges and the finesse of the road-faker were swept from Randolph's mind; he made straight for the bridge and home, but long before they reached the river all sound had ceased to issue from the cab and in its stead reigned a purposeful, almost menacing silence. What was she thinking in there? What could she think? Why didn't she go right on crying and keep her mind fully occupied with that?

As they swept down the incline from the bridge into City Hall park he suddenly realized that he had been on the verge of giving himself away. He half turned his head and shouted through the speaking-slot, "What address, miss?"

"Bobby, I hate you."

Captain Recognized Prospective Marine Engineer as a Man After His Own Heart.

They are so close in some parts of Scotland that the lakes can't get enough water, and have to go dry.

A visitor tells the story of a Scotsman, a prospective marine engineer, who was being examined by the captain.

The skipper asked a number of difficult questions in order to confess the applicant, but the latter was always ready with an answer.

Finally, in a tone of deepest concern, the captain asked:

"Now, suppose the water in your injector was working properly, your boiler check was not stuck, or your pipes clogged, but you were not getting any water in your boilers, what would you do?"

The engineer looked puzzled for a moment, unable fully to grasp the situation; then, with a knowing smile on his face, he answered:

"I'd go up on deck and see whether there was any water in the lake."

"You'll do," said the captain.—Chicago Daily News.

A Student Indeed.

"I want to be procrastinated at de nex' corner," said the negro passenger to the tramcar conductor.

"You want to be what?" demanded the conductor.

"Don't lose your temper. I had to look in the dictionary myself befo' I found out dat 'procrastinate' means 'put off.'"—Dallas News.

Like a Letter.

Absentmindedly the young woman yawned. "Pardon me!" she said. "I didn't mean to do that."

"I see," returned Mr. Staylate. "'Opened by mistake.'"

CO-OPERATIVE NEWS

What Is Co-Operative?

Perhaps no other word has been so much abused in recent years as "co-operative." Although it has become a popular word, there still exists much confusion in the minds of many as to what t means with reference to the organization and operaton of co-operatve companies. An effective farmers' organization must be truly co-operative sothat there will be no possible chance of a member being controlled by interests hostile to the farmer.

In connection with the grain marketig plan, the Committee of of 17 of the American Farm Bureau Federation adopted a set of requirements, which an elevator company must meet in ordr to be truly co-operative, insofar as it can do so under the laws of the state in which it is incorporated. They are as follows: (1) Each stockholder can have one vote; (2) Eash stockholder can only own a limited amount of stock; (3) Dividends on stock must be lmited to areasonable rate; (4) The balance of the earnings above cost and surplus funds must be distributed as patronage dividends; (5) No proxy voting may be allowed; (6) Ownership of common stock must be limited to grain growers; (7) Stock must be available for sale to any grain grower n the community who wishes to become a stockholder. Co-operative elevators may also be organized as non-stock, non-profit associations.

COMMITTEE OF 15 REQUESTS ..SUGGESTIONS

A discussion of the tentative outlines of work presented by its various sub-committees constituted the main work of the Farmers' Live Stock Marketing Committe of 15 in its meeting at Chicago on April 7th and 8th. The Commttee wishes sockmen everywhere to know that the members feel deeply the responsibilities which have been placed upon them and that it invites and welcomes any suggestions or informato which ay lve stock producer believes will be of assistace to the Committee in its work. It asks that such information be placed n tht hands of any member of the Committee. Producers of the North west may send heir suggesions o J. M. Anderson, president of the Equity Co-Operative Exchange, St. Paul, Minnesota, who is a member of this Committee.

DAIRY CONFERENCE IN MAY

A national dairy marketing conference will be held at Chicago on May 3rd, devoted chiefly to the distribution of milk and milk products. The two most important subjects on the program will be the unifodm organization of co-operative milk marketing companies and methods of increasing consumption of dairy products. There s every indication that the dairy conference will prove one of the most far reaching in effect of all the co-operative marketing meetings held of late.

FARMERS SHOULD PATRONIZE OWN SELLING AGENCIES

That ramers can overcome many of the obstacles now in the path of economical marketing by handling their live stock co-operatively on the terminal markets is suggested in Bulletin 314 of the Wisconsn Agricultural Experiment Station, on co-operative shipping associations, which cloes with the followng paragraph

"It is hardly worth whle to try and appreciate how far the co-operative handling of live stock may finally go. That will soon include packing plantspacking plants seems improboble. That t will reach to the packing plants seems likely. Whatever other savings may beposssible, those within reach of the co-operative shipping associations are important and relatively easy to make. Moreover, with asolidly odganized federation embracing the shipping interests of a whole state or several states, it will be much esier to make heahway against other obstacles after the most immediate ones have becen overcome, than it would be to attack the more distant ones without first taking cade of those near at hand. The mere fact of unity of action is important be yond measure.

As supplementary to the above, E. R. McIntyre, editor of the Wisconsn Farmer says, "No Farmers' Company can succeed in the terminal markef game by claiming to be able to get a 11-cent price on a 10-cent market. Until farmers are strong enough to make the Equity Co-operative Exchange and other farmers' own companies can promise, however is to effect a greater net saving and protect theh country buyer and seller fro mthe horde of speculators awaiting the ncoming 'human lambs' that pour into the big live stock markets every day."

PRODUCTION, MARKETING AND MANUFACTURING THROUGH CO-OPERATION

A group of wool growers of Beverhead county, Montana, realizing that they must find a means of disposing of their clip other than thru the regular trade channels, have entered the business of manufacturing and thereby doubled the value of thheir product.

The wool was pooled last fall after establishing a handling agency at Chicago, which now receives the wool at its leased warehouse. From the warehouse the graded wool is sent to an eastern mill and manufactured into cloth and blankets. Much of the cloth is being manufactured into men's suits and sold to the wearer at from $36 to $38. The growers are thus able to make a fair profit on their wool, which was, until disposed of in this manner, a dead loss at present market prices. This is an example of co-operation, and shows that the field of true co-operation can be extended beyond pooling and marketing with decided success.

TRAGEDY IN STRIKE'S WAKE

Brooklyn Man's Sortie on Roller Skates Came to End in Sudden and Dire Disaster.

This is another of those stories in which the hero has to go by a "nom de modesty." So he will be known as John K. Bings—J. K. for short. He is one of the several people, aside from Mayor Hylan, who live in Brooklyn, and one of those, including Hizzoner, who do not ride on the B. R. T.

J. K.'s boss was one of those unreasonable people who did not consider the strike a good and sufficient reason for being absent or even unusually late for work. So it was up to him to get to the office in some manner. The first and second days of the tieup he managed to get jammed on a truck. It would have been all right if he hadn't seen on the third day that three girls had roller skated across the bridge.

J. K. remembered his youth distinctly and he was pretty sure that roller skating was easy. Certainly he should be able to manipulate the simple straight-forward steps after the complex patterns of his youth. And so it was that he borrowed his small daughter's skates, pulled them out to the limit of extension and set forth across the bridge of many sighs.

J. K. found that he managed pretty well until he got to the bridge. When the pavement was level it was quite easy and despite his modesty he found that the surprised and appreciative glances of the less fortunate Brooklynites were very pleasant. It gave him a fine feeling of returned youth to be roller skating along with the best of the youngsters.

But he had reckoned without the slope at the New York end of the bridge. Here the structure begins to descend slightly to meet the roadway. And J. K. lost control of his pedal traction arrangements. He grew pale as he saw a great mass of people ahead of him. Yelling did no good, for the traffic was too great. So he hit the mass of humanity with a thud, which jolted the chewing gum clear down the throats of two stenographers. J. K. found himself seated on the pavement. His straw hat was gone and there was a bad rip in his coat. Slowly he got up, apologized profusely and looked for his hat. He found it where he had been sitting. But it was quite useless.—New York Sun.

Refused to "Slide."

She was one of these fussy little old women, all primped and with her hair in a curl.

When she got aboard the street car several men—yes, there are some who still respect gray hairs on a street car—got up and offered a seat. She accepted one gentlemanly proffer, but didn't keep the seat long. When she had finally found repose, a woman next to her said:

"Would you mind sliding over just a bit, please? Then another lady can have a seat."

Her gray-haired majesty rose to lofty heights.

"Slide? Slide?" she sputtered. "I will not slide. I will arise and take my body elsewhere."

And, suiting her actions to her words, she arose and took her body up to the front of the car, where her dignity would not be assaulted by a request to slide.—Indianapolis Star.

Boom in Spanish Capital.

An effort to solve the housing problem of the Spanish capital caused by the inrush of thousands of country folk to Madrid, is in progress in the northern section adjacent to the suburb of Cuatro Caminos. A private concern has acquired an enormous tract of land, and has begun building what for Madrid are skyscrapers of ten stories. Each of these buildings is to contain 400 flats and 40 stores. The new model suburb is to be in all respects modern. Engineers are now engaged in laying out a boulevard running through its center, more than half a mile long and 130 feet in width, with two carriage ways and a central promenade lined with trees.

Ingenious "Hatroom Pirates."

Two hatroom pirates in a Broadway dansant had a battle over a spool of thread the other night. When they were pulled apart it was learned that they use white thread to loosen change from tightwads. They cut the thread in little strips. When a person refuses to tip for being brushed off, the boys wait until he reaches the front door, then rush after him and begin apparently to pull a number of white ravelings off his back. Then they show them to the tightwad. It is always good for a dime.—New York Times.

Watered Stock.

Jimmie (visiting his uncle in the country)—"Oh, Uncle George, your hired man is not honest. He let th' cows drink a whole lot of water just before he milked them."

HEROISM SHOWN BY AMERICAN WORKERS OF NEAR EAST RELIEF

Cables Reveal Appalling Armenian Need—Hundreds of Thousands Starving.

By CHARLES V. VICKREY
General Secretary, Near East Relief

Charles V. Vickrey

Approximately 300 American men and women are standing loyally and heroically at their posts in Armenia, Turkey and the Near East. Many of them during the long winter of isolation are undergoing what we in America call "hardship." But these, our fellow citizens in the Near East, are volunteers serving with a high purpose, and they do not recognize hardship when they meet it.

They have had their opportunity to withdraw with honor from the field of famine and desolation. They have refused to leave, because they know that their departure would mean death to tens of thousands of women and children whom their efforts have kept alive and whom they are determined to save for a better future.

A dozen cables are on my desk from various centers in Armenia, Anatolia, Cilicia and Syria pleading piteously for the lives of hundreds of thousands who are homeless: "Sixty-five thousand refugees Constantinople alone." "Refugees flocking into Aleppo." "Twenty thousand refugees at Ismid." "One hundred thousand people in Alexandropol will starve unless relief is provided;" "Refugees arriving from Caucasus, escaping persecution, naked, destitute! Urgent need to save many of them from death;" "Two hundred thousand starving between Kars and Alexandropol! Severe winter added to distress."

Above all towers the mute appeal of the more than 100,000 little children orphaned, homeless, whom these American relief workers have saved and whom we here at home must sustain not only through the winter and spring, but through the summer and autumn as well. If we do not provide they perish! And with them dies the hope of a New Near East.

The Easter season is here—the season that commemorates the Great Sacrifice for mankind. America is known as a Christian nation. She is also the wealthiest nation that history has ever known.

Can we really enjoy our wealth and claim the name of Christian if we turn a deaf ear to the appeal which General Leonard Wood, in behalf of the Near East Relief, has sent forth broadcast for a Lenten Sacrifice Offering to save these little children in Bible Lands?

ASK AID FOR THE SUFFERING ARMENIANS

Distinguished Names on Lenten Sacrifice Appeal.

Major General Leonard Wood, U. S. Army, is head of a nation-wide committee making an appeal for a lenten sacrifice offering for the relief of the starving Christian populations of the Near East, in behalf of the Near East Relief, 1 Madison avenue, New York City.

Among those who join General Wood in asking support of the work of the Near East Relief are: Andrew W. Mellon, of Pittsburgh, secretary of the treasury; ex-President William H. Taft; Frank A. Munsey; W. W. Atterbury of the Pennsylvania Railroad; President John Grier Hibben, of Princeton University; Dr. Alexis Carrel, of the Rockefeller Institute; Mrs. Carrie Champman Catt, the suffrage leader; Mrs. Corinne Roosevelt Robinson, sister of the late President Roosevelt; Newcomb Carlton, president of the Western Union Telegraph Company; John C. Shaffer, owner of the Chicago Post and other newspapers; Dr. Henry van Dyke; Miss H. H. Ried; Miss Elizabeth Marbury; Samuel Gompers and Warren S. Stone, labor leaders; John G. Milburn and Moorfield Storey, of the American Bar Association; Mary Garden; David Belasco; Mrs. Medill McCormick; Mrs. Thomas G. Winter, president of the General Federation of Women's Clubs; Mrs. George Maynard Minot, head of the D. A. R.; Miss Anna Gordon, head of the W. C. T. U.; Mrs. Percy V. Pennybacker, of the League of Women Voters; Mrs. Philip North Moore, president of the National Council of Women; Miss Alice Stone Blackwell; Mrs. George Horace Lorimer, of Philadelphia; Mrs. Mary Roberts Rinehart, the well known novelist; Rupert Hughes and Emerson Hough, authors; Senator Reed Smoot, of Utah; Governor John M. Parker, of Louisiana; Dr. Frank M. McMurry, of Teachers' College, New York City; William Bobbs, of Indianapolis; J. Thomas Willing, the artist; Mrs. Cleveland H. Dodge; Mrs. Henry Morgenthau; Mrs. Edwin M. Bulkley; Bishop-elect William T. Manning, of New York; Mrs. Stanley White; Mrs. William Nathan Read, of Montgomery, Ala.; Arthur Brisbane; John S. Drum, San Francisco; John McParland, Labor leader.

UNDER GOVERNMENT SUPERVISION

A NATURAL QUESTION

"Ruthton--A defective chimney caused a fire at the residence of G. A. Hill, farmer, southeast of here, wich completely destroyed the building. The members of the family escaped."

Have you ever read a news item like this without wondering whether the loss was covered by insurance.

The price of protection is so small it is hard to understand why anyone should even think of taking the risk himself. If you are not fully protected in every way, we shall be glad to provide you with adequate insurance.

Advertise in the Times for results

The following letter has been received by County Treasurer Suurballe, from the Secretary of State, regarding automobiles that are to remain in storage for the year:

Commonwealth of Iowa
DEPARTMENT OF STATE
W. C. Ramsay, Secretary
Des Moines

April 16, 1921.

COUNTY TREASURERS:

We have had numerous requests for a ruling that would allow an individual who has not and will not run his motor vehicle upon the public highways during the current year, be allowed to file an affidavit, setting forth those facts with county treasurer, so that his motor vehicle would not be published as delinquent the first week in May.

We have, therefore, prepared an affidavit of that nature and are enclosing herewith a supply of same for your use.

This, you must understand, is to be used only in cases where the car has been and will remain in dead storage during the entire current year.

When such affidavit is filed you may then remove record of his motor vehicle from your delinquent file.

If, however, he does not file this affidavit with you until after publication, it will be necessary for him to pay the publication fee of fifty cents with his affidavit.

Should the individual later in the season decide to use or dispose of the motor vehicle it will be necessary for him to pay license for full year plus penalty from January 1st.

Very truly yours,
W. C. Ramsay,
Secretary of State.
By W. M. Colladay,
Supt. Motor Vehicle Dept.

We give herewith a copy of the affidavit to be used. You may get a blank copy of this affidavit by applying to the County Treasurer, or you may make up your own affidavit, using this form as a copy.

State of Iowa,
County of Hancock, ss.

This is to certify that.....
.....Motor Vehicle, model
.....Engine No.....
bearing license number.....
for 192.... has not been and will not be used upon the public highways of Iowa during the year 192...

This affidavit is made to be filed with County Treasurer to be used in lieu of 192.... registration.

"CHINA WEEK" IS SUPREME EFFORT OF FUND WORKERS

As a practical and popular demonstration of the sympathy of the nation for a sister republic, a "China Famine Week," to be observed throughout the United States, has been set for the eight days from Sunday, May 1, to Sunday, May 8, inclusive.

In this week it is hoped that the churches and civic, commercial and professional bodies will take an active part. The success of this week will determine largely the amount of relief which can be sent through personal sacrifice to 5,000,000 starving people still dependent on outside aid.

SEND What You SPEND ONE DAY To China

5,000,000 Chinese Famine Victims Still Need American Help Before June.

$1 will save one life one month.

PICK A PAL IN CHINA FOR A DAY

To hasten the work of relief, this newspaper will forward contributions to the local Treasurer, or to the National Treasurer, China Famine Fund, Bible House, New York City.

Boys Get After Our Pumpkin Prizes!

Send for or come in and get a package of pumpkin seeds. Plant them-bring your largest pumpkin to us in the fall. We offer the following prizes

The first prize is a **$20.00** Suit for the largest ripe pumpkin.

The second largest a **$10.00** Sweater.

The third largest a **$5.00** Sweater.

The fourth and fifth prize **$2.50** cap each.

In the fall we will notify you at what time to bring your biggest one in. Call at our Store for the seeds or we will send them to you on request.

"Where a Dollar Does Its Duty"

Mason City, Iowa **Manly, Iowa**

Public Utilities and the public

A fair deal

All that any public utility should ask from the public, and we submit to the record that all we are asking, is a fair deal. It isnot too much to ask that the people shoul d treat the public service corporations withthe same fairness that they accord to the individual. The individual who asks morethan a fair deal is not a good citizen, and t he same way with equal force be said of thecorporation.

Most men would not ask their neighbor to render them a service or deliver goods to them without giving that neighbor a fair equivalent for the service or the goods, but there is no disguising the fact that the citizen who is scrupously exact in his deal ing with an individual, willing to give him his exact due, is sometimes inclined to reason that all that he can get out of the corporations, by hook or crook, is legitimate and represents so much clear gain to him. Men who would steal a penny from an individual will steal a ride on a railroad train that represents many dollars. It isn't universally true, but the opinion is quite general that corporations have no rights that the public is bound to respect.

Of course is all wrong. The public, for its own protection, cannot afford to treat tpnblic ntility corporations any other way bnt with exact jnstice. There shonld be no hostility between the people and the corporations. Quite to the contrary. They are mutually dependent the on upon the other. It has been frequently poined out that the progress of America depends in the largest measure upon her ability to secure cheap light, heat and power, not to mention the matter of transportaian. These are he things we must have and the companies producing them are not enemies, but the public's friends, and should be treted as friends.

There is no question but the most unwelcome bill the average householder receives is the one for gas or electricity, it being practically taken for granted that it is too high. In this connection it is well to remember that electricity was the commodity that remained low, during the war, and that at the present time it is still very muc h lower than any other commodity.

We want to suggest that if the people will consider when they pay their bills what the money outlay represents to them in service and convenience they will be much less inclined to complain. And if in addition they will take some pains to investigate the cost of this service to the utility company furnishing it we are very certain their innate fairness will cause them to praise rather than censure.

Iowa Falls Electric Company

(A. Huntington, Engineer, Dept. of Public Relations.)

FINE HAT MAKING A PHILIPPINE ART

This Filipina is making a Philippine hat, which is becoming quite popular with both men and women in the United States, and is usually a source of great pride to the wearer.

FILIPINO INDEPENDENCE, BUT NO GUARANTY

(Chicago Tribune.)

We do not blame the Filipino people for wanting their complete freedom. It s the natural aspiration of mankind

Students Compete With Profiteers.

Charcoal, salmon, codfish and other commodities will be sold at several points in Tokio by students of Waseda university who have organized to raise funds for their studies on social problems and at the same time to cut into the trade of retail shops which ask unreasonable prices. The goods are to be sold at a 40 per cent discount from the ordinary price.—Japan Advertiser.

Dominant Policy.

"I can't quite decide whether our distinguished colleague is for protection or free trade."

"He is still sounding out his constituency," replied Senator Sorghum. "The only policy on which he is absolutely consistent is self-preservation."

No Women in U. S. Mines.

There is one industry which women have not attempted to invade. It is that of coal mining, in which not a single female person in this country is employed.

MONEY TALKS

How often have you heard the lament: "Now, if I had a little money to put into that thing, I'd soon be rich, but I haven't the money"

And the golden opportunities—some of them perhaps the best that would ever come—had to be passed by while other people profited by them.

Prepare for just such opportunities by having a fund in the bank.

OF SUNNY SPAIN

Titbits That Have Won Popularity in America.

"Turron," a Christmas Delicacy, Is Declared to Be Unsurpassed in the Line of Sweetmeats.

"Sea sleeves, each in his ink," reads the quaint label on the little cans that bring us one of the queer harvests of the Mediterranean. The ink is the protective fluid of the calamare, but the chef turns it to use as a sauce. Pen-and-ink fish is another name for this small squid, because his inner shell looks like a quill pen. Sea sleeves are a delicacy that one would have to get used to, like snails, white bait, and crawfish, but those who are fond of them rather pride themselves upon it. They can be found in all Spanish delicatessen shops, says a writer in the New York Evening Post.

But Spain's masterpiece, many think, is turron—a nougat incomparably delicate and rich, made from nuts, fruits, and honey, its sweetness varying somewhat with each of the places which are celebrated for its manufacture: Alicante, Valencia and Murcia. Turrones are in famous demand at the holidays, and Spanish groceries in New York are seldom able to fill all their orders, for this is a Christmas sweet par excellence. An epicure has called turrones "a sweetmeat delicious beyond words." The most popular of the several kinds is probably Turron Alicante. Others are Turron Jijona, Turron Yema, and Turron Mazapan.

Hearts of palm might be thought a tragic delicacy by the lover of trees, for every salad made of this asparagus-like edible means the death of a mountain palm. They come from Algiers, as well as from Spain, and the supply seems to hold out, but conservation does not concern those lands as yet.

The true globe artichoke, alcachofas al natural, keeps its unique flavor, though it journeys from Spain in cans. It is a portion of the immature, thistle-like flower, violet or white, and in no way resembles the more prosaic Jerusalem artichoke which looks like a potato. Artichokes grow wild in the south of Europe, but they never have been cultivated here except by wealthy epicures, and though purchasable in season at the finer markets, our public treats them rather formally—for a dish so appetizing.

Down on Pearl street there is a large Spanish grocery where all these Spanish allurements and many others may be bought, and where you will notice in particular the very aristocratic meats that do not disdain the tin can—partridges with truffles and mushrooms, stuffed hare, Catalonian sausages, "Galician dinner," fowls prepared with sweet red peppers. And then the quince paste, apricot paste, dried Malaga figs, almond cheese, and Spanish wafers.

Reclaiming Lost Paradise.

Efforts are being made to reclaim and plant parts of the vast tract of land which stretches for several miles around Rome and goes by the name of the Campagna Romana. It has been allowed to remain idle and uncultivated ever since the fall of the Roman empire. Before that time it was a sort of terrestrial paradise.

When Rome, however, was obliged to resign her position as "the mistress of the world" the campagna was abandoned and gradually became a marshy, malaria-infected desert, inhabited only by a few hardy shepherds.

Prince Aldobrandini has engaged a company to reclaim a huge estate of several thousands of acres which he owns in the campagna.

So happy have the results at the experimental station been that it is hoped that soon work may be begun for the total reclaiming of the whole of the campagna.

Paper Francs Until 1924.

According to latest reports, it will be some time before the metal tokens to be issued by the French mint to replace the notes of the smaller denominations in use in Paris and other cities will be in full circulation, says the Continental Edition of the London Mail.

No less than 300,000,000 of the jetons (or counters) are required, and, as the mint can only manufacture about 8,000,000 or 10,000,000 a month, it is likely to be 1924 before the total issue necessary is made. The department is also hampered by the lack of the requisite metal.

Claim Cure for Rabies.

A vaccine has just been discovered by two doctors of the Pasteur institute in Paris which, it is declared, provides a certain cure for rabies. The vaccine discovery, Professors Marie and Remlinger declare, has already been tried successfully on dogs afflicted with the disease and has effected speedy cures in every case.

The treatment can also be employed as a preventive, and any one taking it becomes immune to hydrophobia.

His "Home Brew."

"Have you moved it yet?" asked an excited householder as he rushed up to a group of husky men who were throwing his possessions into a van.

"I guess you mean the piano, sir. We just chucked it in a minute ago."

"Piano, nothing! I expected you to drop that. I'm talking about a big hamper that was in the basement."—Birmingham Age-Herald.

PLEASE NOTICE

I have sold my elevator and coal business in Klemme. All those who owe me on account will please call at my office and settle for the same. All accounts must be settled before May 1st, at which date I give possession to the new firm.

"ARMENIAN NATION LOOKS TO U. S. FOR SUCCOR FROM DEATH"

Edwin M. Bulkley, Financier and Philanthropist, Defines Near East Relief Work.

New York.—"There is no spot on the globe today where there is more desperate and hopeless suffering than in Armenia," Edwin M. Bulkley, the well known New York banker, who has just been elected chairman of the board of trustees of Near East Relief, declared today. Mr. Bulkley succeeds the late Alexander J. Hemphill as head of the American relief work in Armenia, Turkey, Palestine, Syria, Mesopotamia and Persia. He has long been connected with the banking house of Spencer Trask & Co., and is thoroughly conversant with the Near Eastern situation.

"Elsewhere," Mr. Bulkley continued, "there is famine that tears at our heart-strings and evokes our pity and our help. But in Armenia it is not starvation alone that the people face—but starvation coming after six years'

EDWIN M. BULKLEY

destruction, wrought by a war that has never ended and that today is not even ended. It is starvation following pestilence, and stalking hand in hand with death from exposure, from violence or from disease.

"In the mountains between Kars and Alexandropol there are 263,000 human beings without clothing, food or shelter in the bitter winter, who are wandering from place to place like people in a nightmare. Unless they are succored before the end of another month, they will all be dead. In southern Persia, the remnant of the ancient family of Chaldean Christians have been forced to renounce forever all hope of ever returning to the homeland where they have dwelt and flourished for 1,600 years, and to become pitiful fugitives, dependent upon the generosity of strangers for life itself. In Cilicia, 15,000 Armenian refugees have crowded into the coast regions seeking safety from the anarchy which reigns in the interior, in terror for their lives. They live from day to day on the food which is given them in the soup kitchens established by the Near East Relief. Scattered throughout the Near East, there are some 7,790,490 Armenians, the remainder of a nation of 4,000,000, who have neither government, country, homeland, shelter or hope of regeneration, save that which lies in the great heart of America.

"It is a tragedy so stupendous that it is difficult for us to grasp its meaning. A whole nation, a living, Christian people, face to face with extermination today, unless we help. We shall see an entire nation disappear from the face of the earth before our eyes if we withhold our hand now, when the call comes to us to save by giving, or by inaction to condemn to death.

Save the Children!

"Perhaps we cannot save all the grown peopde of this oldest Christian nation in the world. But at least we can save the little children who hold the future in their hands. They have wronged no one. They have harmed no one. And they have suffered through the precious years of childhood a calvary of agony and wretchedness. For three years the Near East Relief, an American organization, incorporated by Congress, has built up the nucleus of a new generation in the Near East, with the little children that it has taken in from the roadside and barren places, and nursed back to health, fed, clothed, housed and educated, in the name of the American people who have furnished the funds for this great work.

"This has been our signal contribution to the world's future peace—that tens of thousands of these little ones shall all their lives look to us with gratitude and faith. It is a seed of world brotherhood that we have sown. Shall we let it die now?

"The Near East Relief is appealing to the American people for the money to go on with this work—to keep these little ones alive and to save this martyred Christian people. Sixty dollars per year—$10 per month—feeds a child. We have taken this great responsibility upon us. A whole nation looks to us in faith and trust.

"We cannot betray them now."

Contributions may be sent to Cleveland H. Dodge, Treasurer, 1 Madison Avenue, New York City.

America's Gift to Europe.

As a gift from the American people, the American Forestry association the other day started a shipment of 12,000,000 tree seeds to Europe to reforest the war-devastated areas. The seeds were shipped through the embassies of Great Britain, France and Belgium. For this shipment the association collected Douglas fir from the west coast, a species which grows rapidly in those three countries, and is in much demand by foresters there.

Limitations.

Cooper—It took Blobson five hours to drive three pigs out of his front garden last night.

Davies—Surely even Blobson could move quicker than the pigs?

Cooper—Oh, he found he could move faster than three pigs all right, but not in as many directions.—London Answers.

For Launching Lifeboats Safely.

The hurried launching of lifeboats from disabled vessels is usually attended by confusion and danger. A Eastern shipyard worker has devised a new method of lowering the boats that carries them forty feet away from the ship's side, lays them on an even keel, and gives them a forward impulse. The small boat, instead of hanging in davits, rests in a cradle supported by three parallel inclined arms, which are pivoted near the water line and guyed by cables attached above.

CAVE OF WONDERS

Lewis and Clark Cavern Never Fully Explored.

To Insure Its Preservation From Destruction by Vandals It Has Been Made a National Monument.

Overlooking for a distance of over fifty miles the trail by which Lewis and Clark traversed the great Northwest is a wonderful limestone cavern which rivals the well-known Luray caves in Virginia.

This location was designated as a national monument in 1908 so as to protect the wonderfully colorful stalactite and stalagmite formations from the destruction of vandals.

The cavern contains innumerable vaulted chambers, but up to the present has only been explored for a distance of 700 feet horizontally and 350 feet vertically.

The cave is in the deposit known as Madison limestone, which inclines steeply at this spot toward the southwest, the cavern following closely the direction of the dip.

So far only two small entrances have been found, both of these being on the same side of a steep canyon, about 500 feet below the rim and 125 feet apart.

Only one of these can be used without ropes. From the main entrance a stairway descends for about 175 feet to the main portion of the cavern, which is nearly horizontal.

Ladders have been built at places in order to reach still lower levels. A very narrow passage about 100 feet long is followed to reach the lowest points.

Due to the fact that there is no custodian in charge, it is necessary to keep the door of the main entrance locked, so that it is not accessible to visitors at all times. The monument has been placed in charge of the superintendent of Yellowstone National park.

It is expected that a permanent custodian will be appointed shortly so that the cavern can remain open. The location is about forty-five miles southwest of Butte on the Northern Pacific railway, and about three-quarters of a mile northeast from the

TOAD BECAME PET

Lived for Thirty-Six Years With French Family.

Little Creature Soon Lost All Fear of Mankind and Furnished Amusement to Its Protectors.

There was a wise old toad that lived for more than thirty-six years in a hole beneath the doorstep of a French farmhouse. How old it was when first noticed no one could say, but it had probably lived for a long time before familiarity with the sight of man emboldened it to rest tranquilly on the doorstep over which persons were constantly passing.

The step became the batrachian's hunting ground, where, with little trouble, it might capture the ants which persisted in crossing and recrossing it. The toad, hunting for its supper, came to be regarded as one of the sights of the neighborhood, and certainly the skilful manner in which it used its wonderfully formed tongue entitled it to be ranked as an expert among hunters.

For one thing, it showed wonderful skill in judging distance; the tongue was never darted out until the insect came within a certain range. The accuracy of the creature's aim was another matter for surprise. The insects were generally in motion when the tongue was darted against them, but the arrow never failed to hit its mark.

The rapidity with which the tongue was shot forth excited much wonder. The operation is a complex one. The tongue is doubled or rolled up when in the mouth; therefore, a twofold action is required, an uncoiling of the weapon, and then the darting of it forth.

The withdrawing of the tongue, with the captured insect on the top, was not less remarkable. Notwithstanding the rapid motion, the fineness of the tongue tip and the struggles of the prey the victim was never dropped.

The toad was so tame that it might rightly be called domesticated. It would remain quietly in one hand and take its food from the other, provided a leaf was placed on the hand which held it. Without this precaution the warmth of the human hand was evidently annoying and uncomfortable to the chilly little fellow.

Few things seemed to please it more than to be placed on a table in the evening when the lamp was lighted. It would look around with the greatest confidence in its gleaming eye and when insects were placed on the table it snapped them up with even greater rapidity than in its day huntings.

In this way the toad lived for thirty-six years, the pet of the neighborhood. It might have lived many years more had not a tame but spiteful raven pecked out one of its eyes.

Thumb Prints for Brides.

The newest slogan of English social life is to fight bigamy with Bertillon methods. There the war has brought on an unprecedented wave of bigamy. Soldiers with two and sometimes three wives are still being daily charged in the courts. Australians with wives at the other end of the earth and brides in England were said to be the worst offenders, their special plural marriage system becoming one of the jokes of the music halls.

It has been suggested that couples seeking marriage licenses should furnish their photographs, which shall be affixed to their marriage "lines." The certificate bearing the thumb prints of both bride and bridegroom shall then be photographed and the proof filed with the statistical records at Somerset house. By adopting this system it is believed that no question can ever remain unsettled as to the actual identity of the contracting parties in case any such question should ever arise.

Corn Products Widely Used.

The products of corn go around the world to a degree beyond all guessing. Two products widely diffused are glucose corn sirup and grape sugar. In 1919 corn sirup was distributed to nearly seventy-five different countries, in weight amounting to 220,380,761 pounds and of the value of $13,169,051. To more than twenty countries corn sugar was sent to the amount of 35,236,948 pounds and of the value of $1,970,893. Corn sirup is a distinctively American product. Its greatest purchaser was the United Kingdom, and France was next. The same distinction is true in the foreign purchases of corn sugar. Glucose was discovered about 1800.

Synthetic Camphor.

Camphor is now being manufactured synthetically from turpentine. This step has been made in order to supply the American market with the aromatic substance. The majority of camphor is imported from Japan. It is used in medicine, in the making of celluloid, which is a combination of camphor and guncotton. The Department of Agriculture had established a camphor farm in Florida and is producing a very good grade of the substance.

Many Hiccough "Cures."

After hiccoughing for 15 days, John P. Wallace, thirty-three years old, of Camden, N. J., was relieved by physicians at Cooper hospital, that city. Wallace, who is a shipyard worker, was taken ill with stomach trouble. Physicians treating him received numerous letters suggesting "sure cures," which ranged from the use of ice cream without sugar to the smoking of a "big black cigar."

Now is the time to paint up. We have a full line of Outside White Trim, and all colors house paint Also Flat Wall Paint, Varnish, and Linoleum Varnish, and all inside stairs

If you want good barn paint come here, we have red and gray colors.

Lots of Brushes, Linseed Oil, Turpentine, Etc

JACOBS & SON

AND SALAD PS IN FAVOR

Cultivated With Hand nd Take Up Compara- ely Small Space.

THINGS ALL SUMMER

Suggest That Plantings e a Week or So Apart to n Succession of Various inds of Vegetables.

by the United States Depart- ment of Agriculture)

garden space is limited plant salad crops. No garden, large is complete without them, are particularly adapted to k-yard gardens. Among the s are radishes, beets, carrots, salsify or vegetable oyster, ips. Salad crops include let- mon or wild cress, dandelion, ce or romaine, Chinese cab- d others. They require little ecause they can be planted in n 10 to 18 inches apart, and d with hand tools. Many gar- ake only one planting of these ut the garden specialists of ed States Department of Agri- uggest that several plantings be made a week or so apart, to have a succession of those es.

es are one of the first and etables that come from the in spring. They should be as early as possible, whether et or home use. For the home mall amounts should be plant- at least two or three plantings ith varieties that mature at times.

Food Value of Beets.

are one of the most important r the home garden. Seed can ed just as soon as the soil is tion to work. When the plants one another in the row, thin ut when they are young, and em as greens. Later, when

Plants Can Often Be Grown In mall Space Where Some Other Has Been Gathered.

are about an inch in diameter, leaf stems and young beets can oked together. When the beets rger the leaf-stems become tough oody. As a rule two plantings d be made, one extremely early another in about four weeks. rots should be planted just a lit- ter than beets, and as soon as plants are up they should be ed. A second thinning will leave plants one and one-half to two s apart in the row and give a y of small carrots, known as baby ts, for use on the table. The of the carrots cannot be used for s.

rsnips and salsify are more in nature of winter crops; that is, are grown during the summer kept for winter use. A section of 20 to 30 feet long generally will ce all the parsnips or salsify that verage family will want.

hile it is true that too much lettuce is planted at one time, not gh attention is given to keeping a inuous supply. Lettuce plants n in the hotbed or cold frame, or box in the house, can be planted e open ground just as soon as the er of the last frost is past.

Fresh Things All Year.

making a study of the different s of salad crops offered in seed logues one can easily have a con- ous supply from the earliest ngtime until the late autumn, and into the winter. Water cress, for ance, is grown commercially in ds or spring-fed streams in sec- s where the water naturally con- s large amounts of lime. By start- water cress from seeds sown in a in the house or by getting a bunch ress in the market and using the ns for plants, it is easy to grow a of water cress without the aid of tream or pond.

hickory, or endive, is one of the st of the winter salads. The roots grown during the summer, and n dug in the fall and packed in the ar in boxes of moist sand, the roots ng placed rather close together in box with the crowns or tops near surface. A covering of straw is ced over the box, and the soil ound the roots kept moderately wa- ed. Fresh, young leaves will be med beneath the straw, and as they grown in comparative darkness, are white, crisp and tender.

NICOTINE SULPHATE IS LESS EXPENSIVE

Dusting Found Effective in Controlling Pests.

Insects Hard to Reach With Ordinary Sprays Caught by Floating Dust Settling on Under Side of the Leaves.

(Prepared by the United States Department of Agriculture)

To the sorrow of some of the insect pests which feed on the under side of plant leaves and so escape the effect of poison sprays, the bureau of entomology, United States Department of Agriculture, has been conducting experiments with nicotine sulphate applied in dust form. Mixed with kaolin to give the poison bulk, 40 per cent strength nicotine sulphate did remarkable work in controlling melon, cabbage and pea aphis, onion thrips and western cucumber beetles. All these

Hand Dust-Guns Are Effective on Small Areas.

insect pests are hard to reach with ordinary sprays, but the floating dust settles upon the under side of the leaves as well as on the surface. The experiments show that much larger areas can be treated in less time than is required by spraying. Moreover, the equipment necessary to apply the dust is much less expensive than a spray outfit and its cost of application is less than by the older method. It weighs less than spray and is more conveniently handled. It can be mixed with arsenate of lead or sulphur for use against insects and fungous diseases.

FRUIT FOR AVERAGE FAMILY

Everbearing Strawberries Should Find Place in Every Garden Where There Is Space.

Plenty of vegetables for the table should be the first consideration of every home gardener, but fruit trees and some bush fruit should be planted, say specialists of the United States Department of Agriculture. It does not take a very large space for growing enough fruit and berries of the different kinds to supply the average family.

Everbearing strawberries, which were a novelty a few years ago, are now being planted by thousands of gardeners, and they should find a place in every garden of the temperate region where space will permit. Strawberries, however, can be grown under a very wide range of climatic and soil conditions. The same is true of the blackberry and the dewberry.

Raspberries are more limited as to distribution, and will not withstand the heat of summer in the South or the extreme cold of the North. Their planting is confined almost entirely to the temperate regions, the Central and Eastern states and the Pacific Northwest. Certain varieties of the red raspberry that are practically everbearing, or that at least produce both a summer and fall crop of fruit, are now being developed. Raspberries, blackberries, and dewberries do well when planted along a fence.

SETTING OUT NUT TREES

Nut trees, such as walnut, hickory and oak, develop a deep taproot and few lateral feeding roots during their first year. They cannot ordinarily be transplanted to the field so successfully as other trees, so that planting the nuts or acorns on the permanent site usually is considered preferable.

GROWING MUSCADINE GRAPES

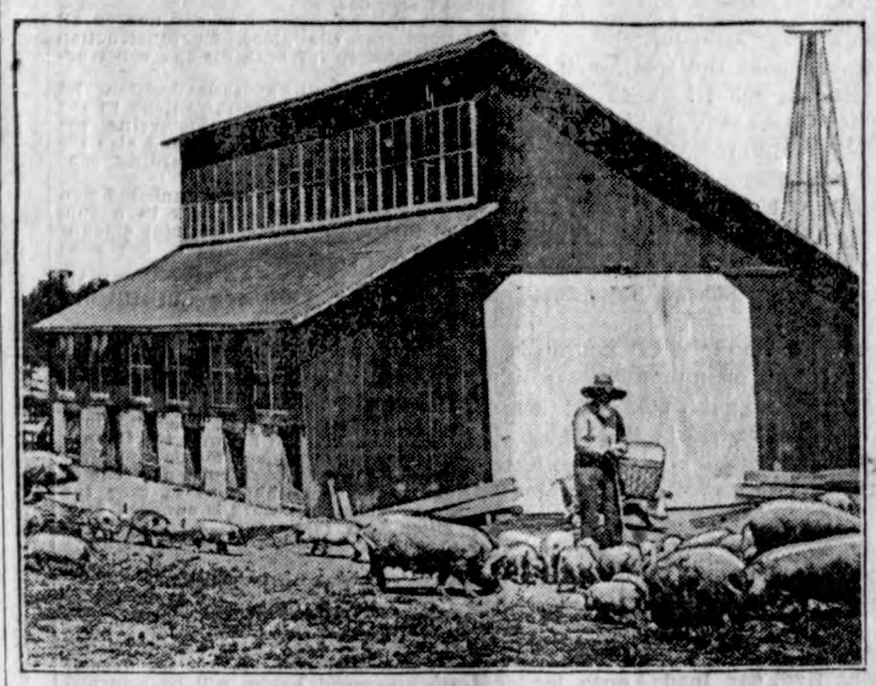
Best Results Obtained by Training to Trellis, Using Three Wires Instead of Two.

The muscadine grape will produce the best results when trained to a trellis, using three wires instead of two as in training the "bunch" varieties. Posts should be at least eight to nine feet in length, and set two to three feet in the ground. The wire should be two feet apart on the posts, which should be sixteen feet apart. The vines should be set at least twenty-five feet apart in the row.

Excellent Sow Ration.

A ration which is excellent for sows with pigs is corn, grain and alfalfa. The hay can either be self-fed in a rack or ground at a small cost and mixed with grain feed.

NOVEL AND SATISFACTORY PLAN BETWEEN LANDLORD AND TENANT



Fixed Wages Plus a Share in Profits Give Zest to Farm Work.

(Prepared by the United States Department of Agriculture)

"I took the same interest in my work as a tenant as I take in my own farm. I began work without a dollar and with very little knowledge of farming, but while I was on the farm I learned a good deal. I had ample opportunity to study the principles controlling crop growth, soil improvement, stock management, etc. The inspiration I received was valuable indeed, and during my period of service I earned enough money to buy the small farm on which I now live."

This extract from a statement made by a former farm tenant employee, now a farm owner, reviews a relationship between owner and tenant that a great many persons on both sides of the farm-landlord situation may well envy. There is possibly no subject connected with the business of farming which leads to as many misunderstandings, dissatisfactions and mutual losses as the management of a farm by a nonowner. Somebody has said that nothing short of application of the golden rule would ever bring about satisfactory arrangements between the owner and occupant of a farm, and yet, in this case, there was nothing eleemosynary in the arrangement.

Tested by Fifteen Years' Trial.

The man who made the statement quoted above was for a number of years the manager of one of two ordinary-sized hog farms owned by a man in Illinois, and the plan under which he was engaged as farm manager has been followed by the owner with almost unfailing success for more than fifteen years. Briefly, the plan was nothing more or less than a straight annual salary which included tenant house and the usual garden and poultry perquisites, and, as a bonus, a share of the net profits.

The profit-sharing plan has served to stimulate the efforts of the employee and has greatly lessened the supervision necessary on the part of the owner. By the use of the telephone and occasional visits he is able to keep in touch with the farm problems and to co-operate effectively with the manager. Since the owner was farming himself it was important that the management of his other two farms take as little of his time as possible. Thus far the managers have been selected from the men employed on the home farm, which serves as a training school.

How Net Income Is Determined.

The managers are given a regular monthly wage and a bonus consisting of one-third of the net farm income. In determining the net income 5 per cent interest on the valuation of the property is first taken out, as due return for capital, after which all expenses are deducted, such as for thrashing, the manager's wage, extra labor, machinery repairs, depreciation, and the cost of fertilizers and seeds.

Each of the two managed farms has a house for the manager, who also can use the work horses to drive for personal use, has a garden, and a cow or two for supplying the family with milk and butter. Fifty chickens are furnished, and the family is permitted to raise as many as possible to supply the needs of the farm table, but on December 1 all the chickens above the original number must be sold, and the landlord gets one-half the receipts. The purpose of this limit on chickens is to enable the manager to have his own poultry supply without taking undue advantage of his opportunity.

In order to calculate the amount of money which the manager is to receive on this plan it is necessary to do a certain amount of bookkeeping. This is left to the owner, who keeps a set of farm accounts, and on March 1 a complete inventory is taken and a yearly summary of the farm business is completed. In cases of disease, poor crops, or a partial failure which is unavoidable, thus cutting down the income of the manager, the owner makes some allowance and gives the manager, in addition to the wages he has received, what he thinks is due him for the work he has done, and the responsibility he has assumed.

In the period before war inflation the managers made from $41 to $49 per month the year round, in addition to having their rent, garden, milk, butter and eggs. The manager of the smaller farm, comprising 96 acres, received $35 a month straight wages for four years up to 1918, and his bonus averaged $168 a year. The manager of the other farm, comprising 160 acres, formerly received $30 per month and was increased to $35.

Manager Well Paid.

When the fact is taken into consideration that the managers employed under this system are provided with houses in which to live and are given the privilege of raising their home supplies of vegetables, milk, poultry and eggs, it will be seen that their necessary expenses are inconsiderable, and it must be conceded that they are well paid for their services, in view of the fact that they have no investment risk. The length of time which the men remain on the farms shows that this method of employment must have been satisfactory both to employee and landlord in these cases. It should be pointed out, however, that the tenant should have absolute confidence in his landlord before he would be justified in working under this system.

TOMATOES ARE BEST IF RIGHTLY PRUNED

Fruit Is Larger, Cleaner and Superior in Flavor.

Grown in Home Garden Staking and Pruning Require Little Trouble and Will Fully Repay Trouble, Say Specialists.

(Prepared by the United States Department of Agriculture)

A thrifty tomato plant left to itself will spread over a space from 4 to 6 feet in diameter and will produce a peck or more of tomatoes. If staked and pruned it will yield about the same quantity of fruit, the tomatoes will be larger, cleaner, better flavored, and superior in every respect, and enough space can be conserved to accommodate five other plants cared for in a similar manner, say garden specialists of the United States Department of Agriculture. The staked and pruned plants are easily sprayed, and will continue to produce fruit later in the fall than plants which are allowed to spread naturally. As a rule, also, the pruned tomatoes will mature earlier. On the scale on which tomatoes are grown in the home garden, staking and pruning require little trouble, and will fully repay the effort.

When the plants begin making a vigorous growth, shoots will appear in the little pockets where each leaf joins the stem. Later the blossoms appear on the opposite side of the stem. In pruning the plant, remove all these side shoots and those around the base of the plant, being careful not to disturb the blossom clusters. The shoots, sometimes called suckers, should be pinched off shortly after they appear. The main stem can be carried to the full height of the stake, then allowed to hang over. By this time six or seven blossom clusters, on which the fruit is developing, should be set on the stem.

WOODLOT LIKE BANK

A woodlot should be treated as the principal in a savings bank. The annual growth of wood corresponds to compound interest. When you cut out more than the equivalent of the growth, you are drawing upon your principal.

SILO OF GREAT IMPORTANCE

Never Discarded When Properly Built and Filled With Corn at the Right Stage.

No silo which was properly built and filled with corn at the right stage of maturity has ever been discarded. Neither is there any farmer who has had a silo on his farm and used its succulent, nutritious feed that is willing to do without one.

CHEAP SEEDS ARE EXPENSIVE

Success of Garden May Be Jeopardized by Unwisely Trying to Save on This Item.

Cheap garden seeds are likely to prove expensive at any price. The cost of good seeds is relatively small and the success of the garden may be jeopardized by unwisely trying to save a few cents on this item.

POULTRY

BACK-YARD FOWLS WILL PAY

St. Louis Woman Writes Department of Agriculture of Her Success With Hen Flock.

(Prepared by the United States Department of Agriculture.)

During the war and since the United States Department of Agriculture has encouraged the keeping of a poultry flock in the city back-yard as one of the best means of cutting the high cost of living.

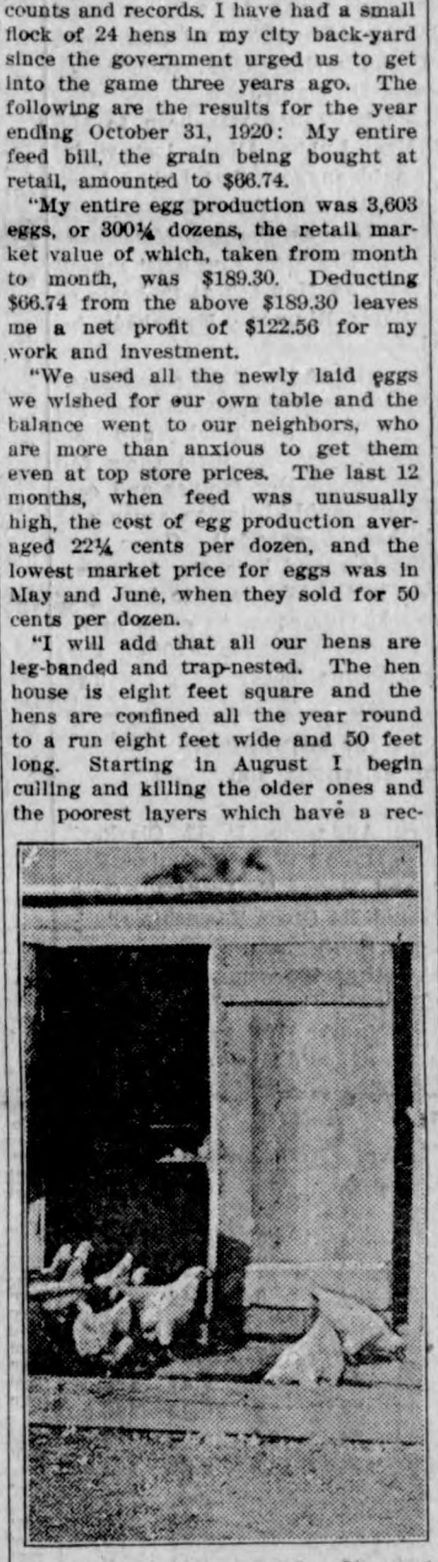
When proper care has been given the flock the results in most instances have been very gratifying. A woman living in St. Louis recently wrote the department concerning the success that attended the efforts.

"I hear people say hen's don't pay, but surely they cannot have kept accounts and records. I have had a small flock of 24 hens in my city back-yard since the government urged us to get into the game three years ago. The following are the results for the year ending October 31, 1920: My entire feed bill, the grain being bought at retail, amounted to $66.74.

"My entire egg production was 3,603 eggs, or 300¼ dozens, the retail market value of which, taken from month to month, was $189.30. Deducting $66.74 from the above $189.30 leaves me a net profit of $122.56 for my work and investment.

"We used all the newly laid eggs we wished for our own table and the balance went to our neighbors, who are more than anxious to get them even at top store prices. The last 12 months, when feed was unusually high, the cost of egg production averaged 22¼ cents per dozen, and the lowest market price for eggs was in May and June, when they sold for 50 cents per dozen.

"I will add that all our hens are leg-banded and trap-nested. The hen house is eight feet square and the hens are confined all the year round to a run eight feet wide and 50 feet long. Starting in August I begin culling and killing the older ones and the poorest layers which have a rec-



Gratifying Results Can Be Obtained From Small Flock if Given Proper Care and Feed.

ord of 15 eggs or less per month, and in October I renew the flock by adding one dozen new spring pullets. These pullets now, in November, are all laying and will continue laying through the winter, while my older hens get through molting.

"Keeping the hens and surroundings scrupulously clean and feeding a balanced ration at regular intervals is the secret of success with a back-yard flock."

HOW TO BREAK BROODY HENS

Confine Them in Small Coop, Raised Off Ground, Preferably With a Slatted Bottom.

When hens become broody they should be "broken up" as quickly as possible. The sooner this is done, the sooner they will resume laying. To break a hen of broodiness, she should be confined to a small coop raised off the ground, preferably with a slat bottom. Give her plenty of water to drink; she may be fed or not, as desired. Not much difference will be found in the time required to break her of broodiness, whether she is fed or made to fast, say poultry specialists of the United States Department of Agriculture.

Usually from three to six days' confinement will break her, but some hens require ten to twelve days. The broody hen will be recognized by her inclination to stay on the nest at night, the ruffling of her feathers and her picking at anyone who approaches her, and by the clucking noise she makes. The fact that her broodiness has been "broken up" can be recognized by the disappearance of these symptoms.

AVOID ROUP-INFECTED EGGS

Select Eggs From Flock Which Has Not Been Infected Wherever It Is Possible.

It is not advisable to set eggs from a flock that has been infected with roup. If at all possible, by all means select hatching eggs from another flock which has not been so infected or from hens which have never had the disease.

ASPIRIN

Name "Bayer" on Genuine

say BAYER

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Cement-Coated Nails.

Approximately one-tenth of the wire nails manufactured are now cement coated, according to H. A. Knight, who writes on the subject to the Iron Age. The nails are coated by shaking them up in a hot tumbling barrel with a compound consisting mainly of resin, from which they issue with a thin, tough coating which greatly increases their holding power. The friction of the driven nail with the wood melts the cement and forms a glue, which cakes fast the nail.—Literary Digest.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Opossums Instead of Cats.

A writer in a nature publication says: "I kept a pair of opossums in the cellar of my home. One night when all was still I was surprised to hear grunts coming up from the cellar. I had not known that opossums grunted like pigs. These opossums lived in the cellar nearly all winter. I am sure they scared the rats away, as no more rat signs were noticed. I fed them chicken heads, apples, sweet corn, etc."

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

Garden Spot, Anyway.

A Boston geologist and philologist says he is convinced that the Garden of Eden was located in the area now occupied by the state of Ohio. Whether right or wrong, Ohio is certainly a garden spot when it comes to raising presidential timber.—Brooklyn Standard-Union.

Catarrh Can Be Cured

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work.

All Druggists. Circulars free.

F. J. Cheney & Co., Toledo, Ohio.

Arkansas Consolation.

Some of these fellows who are always complaining that the world doesn't understand them ought to be glad of it.—Walnut Ridge Blade.

To Have a Clear Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Adv.

Properly Qualified.

The generous who is always just, and the just who is always generous, may, unannounced, approach the throne of heaven.—Lavater.

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a pkg. Adv.

Clearly Defined.

First Critic—"What is your attitude toward those impressionists?" Second Ditto—"Oh, I'm a suppressionist."

Rare Species, However.

"Pa, what is a good talker?"

"A man who can talk and make you actually want to listen to him."

Styles make many a handsome woman look otherwise.

Klemme and Vicinity

Mr. M. O. Hocum went to Cedar Rapids last Wednesday on business.

SEWING wanted. Mrs. Gilbert Schafer. tf.

Miss Leona Hood from Goodell was a Klemme visitor Monday.

FOR SALE—10 tons of mixed hay, in barn. Roy Schaefer. 4-14tfc

Miss Sylvia Moberly was a caller at Britt yesterday.

"Dad" Yahnke drove over to Mason City Saturday on business.

August Lau, Jr. and family and Miss Annetta Schuldt drove to Mason City Saturday on business.

A big picnic was enjoyed in Liberty township last Friday to celebrate the close of the school year.

A baby boy is reported born to Mr. and Mrs. Holly Lewis of Mason City last week. Congratulations.

Agnes Finn of Goodell an dher neice Loretta Hood, of Belmond were callers i Klemme Monday.

Miss Marian Luick came from Belmond yesterday for a few days visit with Klemme friends.

Ralph Quintus, the plumber, from Garner. was in town yesterday doing some plumbing work.

Mr. and Mrs. Thayne Bailey from Belmond were Klemme callers on Tuesday.

Mr. and Mrs. S. S. Mathon from Goodell were callers in Klemme on Tuesday.

Mrs. Andrew Hanson and son from Hanawha were Klemme visitors on Wednesday of this week.

Marlin Croner, Harry Sandry Lester Stille and Clarence Tanner went to Chicago Saturday night.

Mrs. N. L. Palmer went to Fodest City last Wednesday for a visit with Mrs. A. B. Schaeffer.

Mr. and Mrs. G. A. Beard from Belmond were Klemme visitors on Wednesday of this week.

Mrs. Chamberlain and son of Belmond were Klemme visitors yesterday.

We have a full line of rods, reels, lines, hooks, tackle—everything to make the big ones easy to catch. Get your fishing tackle here. 1-wc.

Mrs. Coobs, of McGregor came the other day for a visit at the W. F. Pavey home and especially to see her new grand-daughter.

Mr. and Mrs. Lou Mulroney, of Fort Dodge, and Mr. and Mrs. J. Jorgenson, of Garner, were Sunday visitors at the R. A. Jorgnson home.

All those big fish were caught with tackle purchased at Jacobs & Son's store. Everything for the fisherman. adv-1wc

NOTICE—All those who owe us an account please call and settle same at once. We mean business. F. H. Ridder. tf

Mr. and Mrs. Burgess moved to Klemme last week and have rented rooms with Mrs. Leo Wilkins. We welcome them to our city.

Do you want to save money? Write for free circular telling how, H. P. Sutherlin, 3256, Adams St., Chicago, Ill. adv-1-wp

A fie baby boy was born to Mr. and Mrs. Lubbe Albers last week. We would suggest that Lubbe furnish us with a smoke.

The Womans Foreign Missionary Society of the First Methodist church will meet on May 5th at th home of Mrs. Chris Blumer. Everybody invited.

This part of the state experienced some real cold winter weather the latter part of last week and especially Friday. A little snow fell here. Around Des Moines and east of Cedar Rapids between seven and ten inches of snow fell. Crops were slightly damaged here say farmers.

WANTED—We want to buy four or five broods sows, to come in between now and May 10th. Carl Hopke, Phone 3114. 2wc.

C. C. Tessier, of Garner, was in Klemme Saturday between trains. He came over to wire up our new Linotype machine to the Electric "juice."

Miss Pauline Bruene, who teaches at Garner, spent the week end with Miss Frieda Schult. Miss Annetta Schuldt also spent the week end with Miss Schuldt.

The High School team and a pick up bunch of ball players around the town had a game yesterday afternoon. After playing thirteen innings the High School boys finally won the game.

Notice—The Standard Oil Station at Klemme is now open and we are now delivering oil, gas, etc. with our truck. Leave orders at the Ell garage. Terms cash. Henry Lemke. Manager. 1wc

NOTICE—Call at once and give me your order for getting cattle pasturing this spring. Good feed and water and plenty of salt. Good service, five months pasturing. Telephone 2905. A. C. Lau. tfM7.

About five car loads. auto loads we mean, drove over to Garned on Monday evenig ad took some "goat riders" with them who received the secod and third degree in the Odd Fellow Orded, and all that went with it. They stood their "joy ride" well. All report a fine time.

The $100 Ocen Wave, a sort of a merry go round affair, ardived and has been installed on the playgroud at the country school taught by Miss Annetta Schuldt. Miss Schuldt says her school is the first country school in the state to have an Ocean Wave. That speaks well for her school. The money was earned by having a basket social some time ago.

John Swalve was kicked by one of his horses the other day and was considerably "stove up". It seems the horses became frightened when an automobile passed while he was discing and started on a rampage. During the skirmish a tug becameunfastened and the horse kicked over and walloped Jack on the leg. He walks a little game legged as the result.

NOTICE OF ASSESSMENTS OF BENEFITS. DRAINAGE DISTRICT NUMBER 100

To Martha Brass, Hio Harberts Andrew Anderson, F. H. Clark, J. M. Zelie, J. U. Jones. E. W. Hood, Frances E. and W. J. Cummins, Framer Cordes & Hal E. Smith, William T. and Henry T. Arentsen, C. A. Church, Trustees of Twin Lake Township and Ed Olson Township Clerk, and to the Board of Supervisors of Hancock County.

You and each of you are hereby notified that the commissioners appointed by the Board of Supervisors of Hancock County, Iowa, to view and classify the lands in Drainage District Numbr 100 and to apportion the said lands and tracts the total cost of said Drainage District. have made and filled their report in the office of the County Auditor as required by law which report follows:

1. All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2. All tile must pass the specifications for drain tile of the American Society for Testing Materials. Tile in sizes 6" to 10" inclusive must pass the specifications for Farm Drain Tile.

Tile in sizes 12" to 26" must pass the specifications for Standard Drain Tile. Concrete tile will be allowed only in size 24" to 26."

3. Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to back fill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specifications are on file with the county auditor.

5. Work to be commenced thirty days from date of letting of Contract or as soon as an outlet is furnished. Contract will be completed by June 1, 1922.

All ditches and drains to be constructed in all respects in accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's Office subject only to such changes and alternations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1 o'clock P. M. of the 3rd day of May, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids will be received on any one or all sections, for tile alone, for construction work alone, or for both tile and construction.

The Board will, at their decision, let the work as a whole or in sections to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENT WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 7, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty four hours after demand, and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa this 14th day of April, 1921.

(SEAL)

Chris Jacobs,
County Auditor.

Good Example.

Aunt Polly was milking in the cow lot, and her politically excited son found her there. "Maw, you're a Democrat, ain't you?" he asked. She made no answer, but he persisted: "Say, maw, ain't you a good Democrat?" Finally she said, emphatically: "I hain't nothin'. I'm a woman milkin' a cow. You go in the house and shut up!"

PILES

and other rectal troubles may be handled with satisfaction to all concerned by conservative, practically painless, modern office treatment. It is absolutely free from danger. Does not necessitate going to the hospital, and causes the patient little or no inconvenience. Satisfaction guaranteed or money refunded. Further information on request but an office consultation is recommended when convenient.

HERE'S A REAL HEN

KLEMME HEN HAS IT ALL OVER HENS IN SURROUNDING TOWNS

Klemme Hen Not To Be Outone By Britt, Garner, or Clear Sisters—She Produces Real Egg

A great "hen story" has been on the go amog the various editors in this part of the state, and they all claim their town has the prize hen for laying freek eggs. Klemme is not to be outdone in this matter for there is ahen here that should be given all the medals for laying a big egg. The other day one of John Josten's Plymouth Rock hens laid an egg which measured six inches aroud themiddle and was four and one-half inches long. We will say that it was sure some egg and a big as any ordinary goose egg. That hen deserves to be placed at the head of the list of big "cackle berry" producers.

The following item appeared in the Garner Democdat last week and is worthy of re-printing for the benefit of our readres:—

"A couple of weeks ago a hen belonging to a party in Britt creata sensation by laying an egg of unusual size and within this egg was another cackle berry. Both eggs were perfect in form, but the outer egg contained no yolk. Last week a Clear Lake hen came forward and distinguished herself, or rather disgraced herself, by laying a spoiled egg. Guess we should have made the word plural as our recollection of the item with reference to it stated that she repeatedly produced the same quality of egg. A Garner hen owned in fee simple by Menso Heddens, probably filled with the spirit of jealousy, decided that she would produce an article of the egg kind that would put her Clear Lake and Britt sisters to shame. Accordingly she set about her task and for several days in succession she produced an egg of very dark brown color. The color is such a deep brown that the shell is hardly transparent and looks like an Easter egg prepared to delight the child heart. Last Monday she evidently run out of coloring matter as all the egg which she laid that day was of this dark brown hue with the exception of the small end of the egg which was of snow which. This bird is one off a good sized flock that preambulates about the Heddens farm home, is of the barred Plymouth Rock type and quite as unassuming as any of the other hens of the place. according to Menso. This is no fable but an actual fact. Mr. Heddens stands well in church circles and we have his word of honor that the egg he showed us Monday had not been colored and that it was as the old hen had deposite it without alteration. Truly this is the year for biddy to spring sensations.

OIL FUND IN IOWA

The latest oil excitementis on the Missouri river bottom in Harrison county not far from Missouri Valley. Hhen drilling began 1500 people had gathered and addresses were delivere and a big dinner provied at which over 1,000 were served. Mrs. H. R. Coulthard is the promoter and the drilling is on the farm of her father. W. A. Smith. Everybody in all that section has taken stock in the enterprise. It is proposed to sink the first well to a depth of 3,000 feet unless oil is struck sooner. The announcement is made upon reputable authority that the Standard Oil Co. has offered $100,000 for the prospect as it now stands.

Important Band Item!

The Klemme Concert Band is in a very critical position. Something must be done—immediately. We realize that the business men are backing us and we are trying to be worthy of their support. Now, we would like to meet with the business men of Klemme on Monday evening to discuss several important matters before the summer concerts can be rendered. This means that every business man must be present at this meeting which will be held in the basement of the First National Bank at 8:00 o'clock next Monday evening.

(Siged) Band Committee

As a Modern Filipino Actually Looks

There are hundreds of thousands of this type of young men in the Philippines They are to be the future rulers of the destinies of the islands.

The Filipino has been much misrepresented in the United States. This is largely because the Sunday supplements have made a specialty of portraying the semi-naked non-Christian hill tribes as "typical" Filipinos, which is far from the truth.

The total population of the Philippines is 10,350,640, of which 9,495,272 are Christians and civilized, and have been so for 300 years, possessing a culture and refinement that will compare favorably with that of other countries. The number of non-Christians is 855,368, and only a small percentage of them are uncivilized. They are fast becoming educated, and will ultimately make good citizens.

Seventy per cent of the inhabitants of the Philippines over ten years of age, according to the last census, are literate. This is a higher percentage of literacy than that of any South American country, higher than that of Spain, and higher than that of any of the New Republics of Europe whose independence is being guaranteed by the Allies.

A CLEVER AUTO DEAL

GETS HIS OWN PRICE

This little "deal" is said to have been pulled off recently in Fairrmont. A resident had an old car. He took the old car to a garage and said he would buy a high priced new one if they would take the old one in for a certain sum, about $200 too high. "Well, I'll leave it and if you can sell it for that price, I'll take the new car," the owner said. In aday or two a man came in and looked at the old car. The price was satisfactory. I'll pay you $25 down to bind the bargain and in a few days came in with the rest of the money." Then he went away. The first man came in, got his car. and paid for it, giving the old at his own price. The garage is stillwaiting for the "other fellow" to come in with the balance of the money. Now they say the man who got the new car gave astranger $25 to gt in and buy the old car. There are tricks in every trade.—Fairmont Sentinel.

FROST KILLS FRUIT HERE

The fruit blossoms were all killed here by a couple of heavy freezes the fore part of the week. The nights have been very cold and it was cold enough several nights to freeze a quarter inch of ice on the water.

The fruit trees were very heavy with blossoms this year and the prospects were good for a bumper crop here as fruit here was not damaged earlier in the spring as was fruit in other states.

Gardens are, however, in fine shape and no damage was doe to them.

Band Leader Secured

The Klemme Band boys have secured a leader for the band for this summer; Mr. C. F. Ecklund, who als directs the band at Britt. He was here for the first time last week on Wednesday evening and was here again last night. The band boys need a lot of help for the concert season will soon start and they desire that all old players in the band will come to the rehearsals. Mr. Ecklund is also very anxious to have the "old timers" there. The practice night will be changed and at this time we are not certain just what night the band will meet.

BOOST FOR THE BAND!

AT THE CHURCHES

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10:00 o'clock. Sunday school at the close of preaching service at 11:00 o'clock.

Epworth League at 7:30 P. M.

Preaching service at 8:00 P. M.

Sunday school in Liberty township church at 10:15 A. M.

Preaching service Sunday morning at 11:30 o'clock.

Epworth League Sunday night at 7:30 o'clock.

Midweek prayer service each Thursday evening at 7:30 o'clock.

You are invited to our services.

A. H. MEYER, Pastor

MOTHERS' DAY

Mothers Day will be observed next Sunday at the First Methodist church with appropriate services. The sermon will be especially for mothers. If your mother is alive wear a red carnation, if dead a white carnation.

In the evening the orchestra will favor the congregation with special music.

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 A. M. and 8:00 P. M.

Sunday school at 11:00 A. M.

Mothers' Day will be observed at the morning service by an appropriate program of readings, special music by the choir and little folks and a brief address by the pastor. The custom of wearing a flower in honor of one's mother should be observed if possible.

May 6 is St. John's day. Those seekers after light who may have an especial interest in this anniversary should vote that the theme of the evening sermon next Sunday will be "The Search for Light."

A. E. BURIFF, Minister.

Recitation, "The Mother Robin" by Lois Trafford.
Recitation, "Valley Lilies" by Arlene Ell.
Recitation, by the "Shining Light" class.
Song, by the Choir.
Address. by the Pastor.

HERE'S A LUCKY FARMER

PLOWS UP POT CONTAINING $14,903; DREAM REALIZED

Salem, Va.,—Henry Dameron, 25, descendant of pioneer Virginia settlers, who works on his uncle's mountainside farm near here from sun-up to sun-down at $10 a month. often dreamed he said of finding a treasure and buying a farm of his own.

A few weeks ago, while plowing near the foot of Brush's mountain, his plow unearthed a peculiar looking object.

Investigation revealed it to be a small metal pot wrapped in buckskin containing gold and silver coins valued at $14,903.00.

About $13,000.00 was in gold,$600 in silver and the balance in currency so badly disintegated that the denominations could not be distinguished. The latest date on any of the coins was 2823.

Young Dameron was fearful that his fortune might be taken from him and kept his secret until a short time ago.

WASHINGTON NEWS ITEMS

Convention of D. A. R

Washington, D. C.. May 5, Special to the Times—There is a convention of the Daughters of the American Revolution in Washington this week and among those present from the 10th District were Mrs. Strine of Boone, Mrs. McMurray of Webster City, Mrs. Webster of Ft. Dodge and Mrs. Robert Johnson of Humboldt. They were shown around the Capitol City by Mrs. L. J. Dickinson, Mrs. Good, Mrs. Towner, and Mrs. Ramseyer.

Geo. Call of Sioux City and Fred Larabee of Ft. Dodge were calling on the members of the Iowa delegation this week.

Mr. and Mrs. Garner Cowles of Des Moines visited in Washington this week on their way east. While in Washington they were guests of Mr. and Mrs. L. J. Dickinson.

Col. Brookhart was calling on the members of the Iowa delegation this week in regard to certain farm measures.

Hearings on H. R. 168 introduced by Mr. Dickinson will start next Moday and it is hoped that favorable action will be taken thereon at an early date. This is the bill regulating the future sales of grain on Boards of Trade.

The Immigration Bill passed the house today and it is predicted that it will have speedy passage in the Senate. This bill would restrict immigration of foreigners until things are things are more settled in the United States.

fied by the Senate this week.

The Columbian Treaty was rati-

NEW BUSINESS FIRM OPENS

FARMERS GRAIN COMPANY NOW DOING BUSINESS

The Klemme Co-Operative Grain Company is now in full swing with H. G. Miller as manager. As stated in the Times of last week the farmers would take over the elevator business on the first of May. Mr. Hocum and the officers of the Company met Monday and closed the deal. Hocum turned over the keys and the farmers now have full charge.

Mr. Hocum has made a great number of friends among the farmers and there are many who will not like to see him leave. Mr. Hocum is a fine man and will be great loss to the business circle of Klemme. He is undecided yet as to what he will do but more than likely he will remain in the city until he can locate another grain business. At any rate we wish him the best of luck; and also wish the new farmers grain company a prosperous business.

A WONDERFUL STATE

IOWA BEAUTIFUL LAND

In Iowa it is but a short spin "From praire lands to fairy lands." Our proposed National Park, the Switzerland of Iowa, is a wonderspot that the glaciers left untouched.

Lake Okoboji, famed as summer resort, combines the charm of the prairie and the forest, of hill and valley. Here and at Spirit Lake close by are home-like hotels. numerous summer cottages, a golf course, tennis courts, excellent bathing and everything needed to entertain the thousands who visit this resort every summer.

Clear Lake, is another beauty spot surrounded by woods protecting pleasant summer cottages and caps for summer visitors.

Iowa has a number of attractive state parks. Among these are the Devil's Backbone, Oakland Mills, Boneyard Hollow, Wildcat Den, Lopley Park. and others.

In Iowa you can see a natural bridge rivaling that of Virginia; caves equalling those of Kentucky in scientific interest; grotos in which ice forms while the sun wilts the corn; lakes like those of Switzerland.

Iowa has the greatest water power plant in the world.

In Iowa 98.4 per cent of all the land is under cultivation and productive—a record unequalled for a like area anywhere in the world.

Iowa leads in the production of corn and live stock.

Iowa stands first among the states in per capita wealth. Iowans spent $30,000,000 in 1919 for gasoline for automobiles.

Iowa has more hours of sunshine every year than does California.

Iowa has never known a crop failure.

IOWA'S FAIRS

Iowa is admitted by agricultural writers and other authorities to be the greatest fair state in the Union. With ninety-six county and district fairs scheduled for the year 1921 Iowa stands supreme as a center of agriculture and live stock expositions.

The great State Fair of Iowa holds an equally prominent position among those of its kind. It is looked upon as a model in all parts of the country.Other states send their committees to Iowa to study the plan and methods followed in producing the Iowa State Fair and look up to it as the final word in great American expositions.

People of the state, especially those interested in farming and live stock industry, have reason to be proud of the record which Iowa fairs have made for themselves thoughout the nation. Much of the credit for this present standing is due to the interest in these fairs manifested by the various communities in which they are held. The farmers of the state are genuinely proud of their county and district expositions, and equally proud of the great state fair. the climax of all.

By years of experience we have come to realize that the interests of the farmers are tied up absolutely with the interests of the fair. This is the one institution which is constantly striving for an improvement of agriculture in all its lines, for better methods of farming, for better results and higher standards for production. The fair owes much to the farmer and the farmer owes much to the fair.

County Superintendents Election

On the fifth of April there was convened in every county seat in the State of Iowa a covention of school officials to choose a county superintendent of schools for three years beginning September first, 1921. That the general character of county superintendents has been reasonably satisfactory is demonstrated by the fact that out of the ninety-nine who were chosen, 76 were re-elected.

The logical conclusion from this action being that the school boards of the state felt that in general the county school interests were in good hands. In 17 counties new superintendents were chosen but in a number of these cases the preset encumbent was not a candidate. In 6 cases the election was postponed.

J. R. Baggs was re-elected for this county.

Ruined Churches to Be Restored

Ancient Cathedrals, Damaged During Mexican Revolutions, Will Be Rehabilitated.

MANY USED AS BARRACKS

Unusual Fascination of Mexican Churches Lies in Their Mixed Architecture—Treasures Taken by Sacrilegious Vandals.

Monterey, Mex.—Restoration of the church properties to the Catholic clergy by the Mexican government is to be followed by a general rehabilitation of many edifices which were badly damaged during the long period of revolutions. In many instances magnificent churches were used as barracks by soldiers. Gold and silver ornaments, rare paintings and other things of value were stolen by sacrilegious vandals and probably will never be recovered.

One of the things that impresses the visitor to Mexico most strongly is the number and beauty of the churches of the country, writes a Monterey correspondent of the New York Sun. In mining camps, villages, haciendas, at every place, in fact, where there is human habitation, a church may be found. Some of the older buildings erected in the early days of Spanish control are in ruins, but many remain intact and are still in use.

It has been said that the unusual fascination of Mexican churches lies in their mixed architecture, the Christian spire, the Moorish dome, the Indian facades, the Saracenic coloring and, added to this, the fact that the workmen employed by the Spanish artists and architects were Indians, who left the impress of their own peculiar handiwork in these ancient buildings.

A Remarkable Church.

One of the most beautiful and remarkable of the early Mexican churches is the one in the little mining village of Valenciana, in the mountains of Guanajuato. This church was erected in 1765 at a cost of more than $1,000,000 by the count of Valenciana, who at that time was said to be the richest man in the world.

On the top of the hill on which the village is built stands the big church. Surrounding it and built into the hill are apartments which were formerly used as a convent and fortress, but which are now occupied as stores and dwellings. Near by has been erected a monument to the man who erected the edifice. The narrow pathway to the church leads to a broad flight of steps into the old churchyard, brightly colored flowers and vine-hung trellises.

Entrance into the church is made through exquisitely carved doors set in richly ornamented walls. To the right is the sacristy, where are kept the magnificent baptismal font, surmounted by a halo and a dove, all of gold; the vestments of gold embroidered on rich cloth of satin and velvet in brilliant colors, numerous images of the saints, the virgin used in the various calendar celebrations and an immense crucifix. These are all kept in large closets which are readily opened for the inspection of visitors.

Certain Rare Paintings.

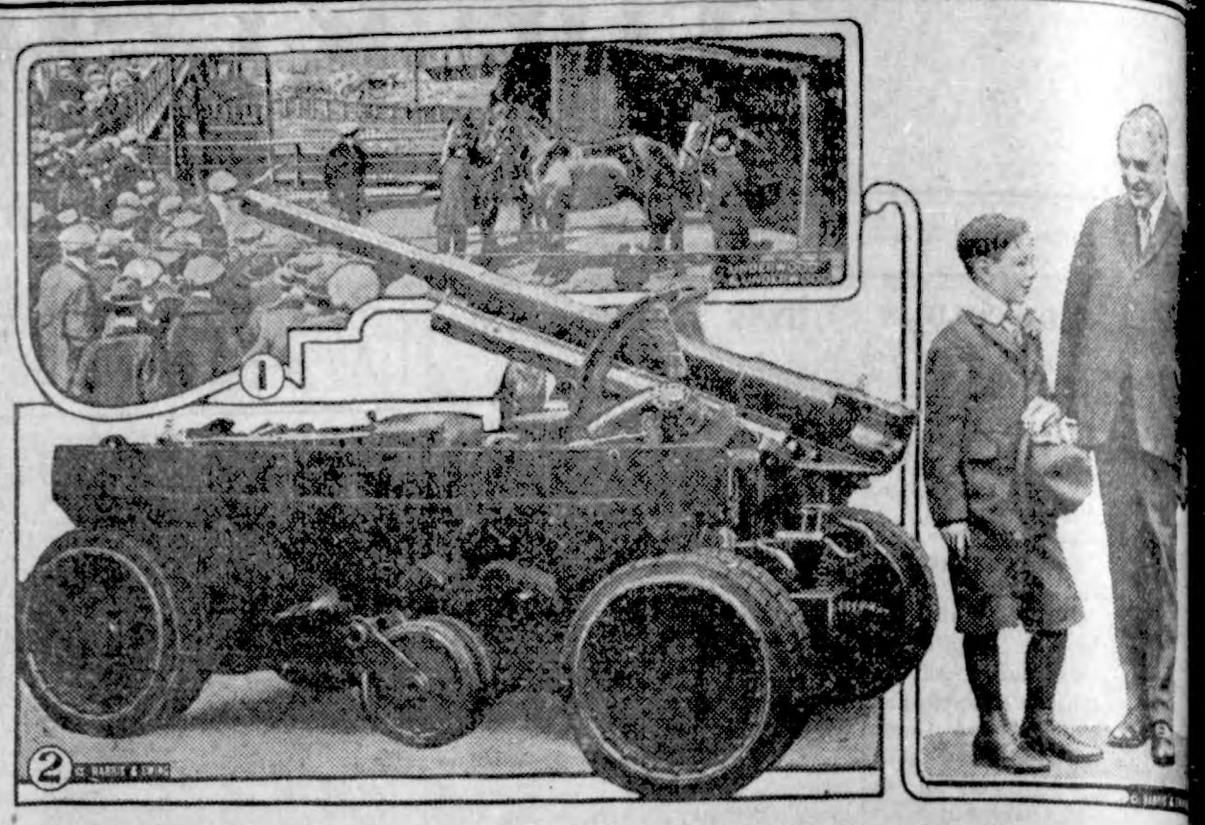
In the church proper is a magnificent altar of immense size and remarkable beauty, richly ornamented with elaborate fretwork and exquisite carving. The pulpit is entirely of inlaid mosaics of curious pattern. Large, gold-framed mirrors and rare paintings adorn the walls. Many of the paintings depict scenes from the life of Christ and the lives of the saints. One of the handsomest of the portraits is that of San Cayetano, patron saint of Guanajuato. Along the sides are to be found old wardrobes of chests and a set of antique drawing room furniture of rosewood and mahogany of rare and wonderful design, imported from Spain.

One of the most interesting features of the church is the miracle chapel, where there is an altar of unusual beauty and richness. In this room are hung many small artificial arms, legs, hearts and other members of the body, with inscriptions attesting the miracles performed by the Virgin, who, it is believed by the devout folk of the community, dwells there. The Virgin's image, under a glass case, is adorned with a priceless set of pearls, including necklace, earrings and bracelets.

War Heroes Get Legacies Left by Alsatian in 1902

Paris.—An interesting patriotic ceremony occurred here recently when the first distribution was made of a legacy written many years ago by a French Alsatian, who in his will left a grant to be distributed among five soldiers who especially distinguished themselves in the great war that was to restore Alsace-Lorraine to France.

The name of the Alsatian was Metzger. He died in 1902, but felt so sure of the restoration of the lost provinces that he gave in trust to the town of St. Germain the five legacies, each of 800 francs. Each of the five men who received the gift had the Medaille Militaire and the Legion of Honor. Two of them still are in the army, one is an upholsterer and two are now farmers.



1—Striking British coal miners watching the pit ponies being brought up from the mines. 2—New [illegible] of American army mobile ordnance, weighing six and a half tons including the "75" rifle, which traveled [illegible] New York to Washington on its own power in seventeen and a half hours. 3—President Harding promising [illegible] tle Johnny Wackerman financial support for the boys' swimming pool in Washington.

32,000 Acres in Wheat Farm

Henry Vincent Supposed to Have Largest Acreage in the Northwest.

EMPLOYS BIG FORCE OF MEN

Steam and Gasoline Tractors Will Be Used in the Coming Harvest—Used 250,000 Bags for His Crop Last Year.

Walla Walla, Wash.—Henry Vincent, the big Eureka Flat wheat grower, who harvested 12,000 acres last year, has increased his holdings until this spring he has a wheat farm of 32,000 acres. This is believed to be the largest farm in the Northwest. The entire acreage is practically devoted to wheat. All the seeding has been done and where the fall planting was finished before the rainy season in November the fields are green.

During the seeding of this great tract of land 39 drills and 42 harrows, kept up with five steam ploughs, each with a capacity of 60 acres per day.

Employs Large Force.

To properly manage his great agricultural project Vincent maintains a large force of men and women. There are also 600 mules and horses, and during the harvesting season he hires enough outside to make a total of from 450 to 500 spans. Last season 250 men and women and 30 boys worked for two months on this great farm, harvesting and marketing the grain.

This year's harvest, should the crop be a normal one, will be handled by five combined harvester threshers, ten headers and four separators. A new departure will be the use for the first time of a steam propelled combine with a 30-foot cut and a combine propelled with gasoline tractor which has an 18-foot cut. These two machines have a combined capacity of cutting and threshing 75 to 90 acres of ripened wheat per day.

The great difficulty with heavy tractors in the wheat section is with the rolling nature of the land. Wheat is planted on steep hills where horses and mules can be driven but where the heavy machinery slides and tips.

To care for his wheat last year Vincent used 250,000 new jute bags for which he paid 17 cents each. This year he has ordered a new supply of cotton ones from Georgia.

Many Big Wheat Farms.

Another large wheat farm near here is that of Ben Grote, who has seeded to wheat 10,000 acres. John Webb has a 9,000-acre field of wheat and there is another of 7,000 acres near Toledo. In what is known as the Big Bend country there are numerous wheat farmers who plant from 1,500 to 3,000 acres each year to grain.

An unfortunate feature of the growing of wheat in this way is that the land is being rapidly depleted of its fertility. There is need of a system of diversified planting to save the land from utter barrenness. For nearly fifteen years many of these big farms have been growing wheat every year. Some wise farmers let their farms lie fallow every other year, thinking they get an increased crop enough to pay for the idle season.

"Put Heart Into the Civil Service"

"Let us put heart into the civil service" said President Harding as he shook hands with Miss Gertrude McNally after the meeting of the executive council of the National Federation of Federal Employees, at the White House.

NEWS REVIEW OF CURRENT EVENTS

Colombia Treaty Ratified by the Republican Senators With Reluctance.

MUCH GIVEN, NOTHING ASKED

President Says We Will Fight to Maintain Monroe Doctrine—Japanese Cabinet Refuses to Yield on Yap — Allies Preparing Further Coercion for Germany.

By EDWARD W. PICKARD.

Ratification of the Colombia treaty, by a reluctant senate, did not evoke many loud cheers in the United States. Democrats for years had urged the adoption of the pact as a virtual repudiation of the acts of Theodore Roosevelt and John Hay in connection with the separation of Panama from Colombia. The Harding administration urged it, not on that ground, but because it believed this sop to Colombia would help to restore amicable feelings toward the United States on the part of the Latin-American peoples, and also because Americans wish to develop oil fields in Colombia. All but four of the Democratic senators voted for the treaty, presumably for their old reasons. Forty Republicans obeyed the behest of the administration, most of them because they hesitated to break with it on an important issue so soon after the beginning of Mr. Harding's regime. Fifteen Republican senators refused to turn so squarely against the policy of their party and voted against ratification after putting up a strong fight, in the course of which they tried to amend the pact by provision that nothing in it should be regarded as a confession of wrongdoing by Roosevelt in the acquisition of the Canal Zone.

Colombia will now greedily seize the gifts made her—$25,000,000 and valuable privileges in the use of the Panama canal—and gives practically nothing in return, not even assurance of fair treatment for our capitalists who may invest in her oil fields. If most of the money does not stick to the palms of the grafting politicians of Colombia there will be a complete reversal of custom. More important, there is little reason to believe this treaty will lessen the hatred of the United States which is the prevailing sentiment throughout most of Latin-America. This statement is based on the opinions of men who are thoroughly familiar with the Latin-Americans.

In pursuance of his policy of conciliation President Harding delivered a happy address on Tuesday on the occasion of the unveiling, in New York, of a statue of Bolivar the Liberator. The day was the anniversary of both the Battle of Lexington and the opening of the final campaign which resulted in the independence of Venezuela. Naturally the Monroe doctrine was the subject of the main part of the President's speech, and of it he said:

"The doctrine proclaimed under Monroe, which ever since has been jealously guarded as a fundamental of our own republic, maintained that these continents should not again be regarded as fields for the colonial enterprises of old world powers.

"There have been times when the meaning of Monroeism was misunderstood by some, perverted by others, and made the subject of distorting propaganda by those who saw in it an obstacle to their own ambitions.

"The history of the generations since that doctrine was proclaimed has proved we never intended it selfishly; that we had no dream of exploitation.

"On the other side, the history of the last decade certainly must have convinced all the world that we stand willing to fight, if necessary, to protect these continents, these sturdy young democracies, from oppression and tyranny."

The government of the United States has decided that Gen. Alfredo Zayas, candidate of the conservative-popular coalition party, was elected President of Cuba last November and that nothing should be done to prevent the island congress from proclaiming him President. Boaz Long, American minister to Cuba, communicated this decision to the Cubans and it was expected they would abide by it.

Our government also took further action in the Panama-Costa Rica dispute, letting both those nations understand that the refusal of Panama to accept the White boundary award, insisted upon by the American government, must not be made the basis for the renewal of hostilities. Both these little republics, it is understood, are mobilizing their forces and breathing fire. Salvador, Honduras and Guatemala, comprising the new Central American union, have assured Costa Rica of their support.

According to the Tokyo newspapers, the Japanese cabinet has decided that there is no reason to change Japan's policy on the Yap mandate because of the recent American note on the subject. Public opinion in Japan is increasingly against any yielding in the controversy, and no one in the United States believes our administration will give an inch. Official information has reached Washington that the conscription and universal military training laws of Japan are being applied more rigidly, and that all Japanese officers stationed in the Pacific islands south of the equator and in the East Indies have been recalled to Japan, and all Japanese between the ages of twenty-one and thirty-seven without previous service have been ordered to return to Japan for military training. Former Secretary of the Navy Daniels, in an address at Memphis, said: "America cannot surrender the Yap cables even if it should mean war with Japan. . . . No matter what it may cost, and that may be war, I cannot imagine that a peaceful settlement of the Yap situation with Japan will be found."

All of this sounds rather warlike. But the allied powers in Europe seem inclined to side with the United States in the controversy, and reliable obeservers believe that if they do consent to exclude Yap from the Japanese mandate, Japan will be forced to bow to such a decision.

Fighting has broken out between the armies of north and south China, and it is feared in Peking that it is the precursor of renewed civil war. The eight military governors of the Yangtse valley have combined against Gen. Chang Tsoling, war lord of the northern government and alleged ally of Japan and Semenoff. Chang is suspected of a scheme to restore the monarchy.

Premier Lloyd George held a conference during the week-end with Premier Briand of France concerning the further coercive measures against the Germans to be adopted in case they do not comply with the reparations demands on May 1—as they almost certainly will not do. What these measures will be is not yet known, but it is reasonably sure that Great Britain will support France in the occupation of the Ruhr district. The reparations commission ordered Germany to transfer the gold holdings of the German imperial bank to its Coblenz and Cologne branches as security for payment of reparations. This Germany refused to do.

Berlin last week pleaded with President Harding to act as mediator in the reparation dispute, promising to pay what he might determine was just. The president declined to act, but said if Germany would formulate new proposals he would consider bringing the matter to the attention of the allied governments.

Premature, to say the least, was the report of a week ago that the miners' federation of Great Britain had called off the strike. The story was based on a false cablegram. The transport and rail workers, indeed, did change their minds and decided not to quit work in sympathy, but the miners, though somewhat disconcerted this split in the triple alliance still standing firm at this [illegible] New proposals were made by mine owners, but the federation declared they were too vague to form basis for negotiations. The miners assert that their own present proposals are entirely clear—a national board with a national tonnage levy to enable the poorer pits to pay the rate of wages agreed upon out of [illegible] contributed through the levy by miners and mine owners.

The government, it is said by well posted persons, is confident that it will be able to keep the nation's needs supplied even if the strike continues. There is enough coal on hand in England to last for [illegible] months, and plenty more to be obtained from other countries.

Twenty leaders of the British Protestant church recently sent to the premier a memorial protesting against the disorders in Ireland. In reply to them Lloyd George made an important declaration. First, answering their allegations in order, he denied the existence of irregular forces that had no discipline; that there were unauthorized reprisals, and all the charges against the crown false. He quoted figures showing that police and soldiers were punished for breaches of discipline and appealed for public support for the "sorely tried men who are trying to preserve order in a country given up to anarchy." He then dealt with the Sinn Fein in this manner:

"The Sinn Fein rejected home rule and demanded in its place an Irish republic for the whole of Ireland. The Sinn Fein went further. It deliberately set to work to destroy constitutional and constitutional methods became recognized that violence was the only method by which it could realize the republic.

"If I thought there was a different policy, which would lead to a solution of our difficulties, I would not hesitate to adopt it, however difficult it might be to the course the government now is pursuing.

"The government of which I am the head will never give way on the fundamental question of secession. So long, therefore, as the Sinn Fein demands a republic and refuses to accept, loyally, membership in the British commonwealth, coupled with the fullest home rule compatible with conceding Ulster the same rights it claims for itself, the present evils will continue. I do not wish there to be any misunderstanding on that point."

The Greeks and the Turkish nationalists have resumed operations in Asia Minor. The former, having reorganized their army, are carrying on the offensive on the Brusa front from Eskishehr as their main objective. The Turks are making a show of resistance without really giving battle and meanwhile are using most of their forces in an advance on Smyrna. The last reports they were only 60 miles from that city. The Kemalists, however, are not entirely happy, for they are beginning to realize the perfidy of their allies, the Russian Bolsheviki. The shamelessly faithless Reds are not giving the aid promised in the treaty, and are demanding from the Turks further concessions with regard to the settlement of Near East questions.

The bootlegging industry of the United States was dealt a severe blow last week when the Canadian province of Ontario, by a majority of more than 150,000, voted for the application of the Dominion law prohibiting the importation of liquor from any province, state or country. There has been a steady stream of liquor smuggled into the United States from Canada, the amount brought in across the Detroit river alone being estimated at 1,000 cases a day. Much of this will now be stopped, and what is brought in will be much more expensive.

New York city is in agony these days because the new state prohibition law is being enforced in the metropolis, which had come to consider itself exempt from such laws, that the rest of the country was supposed to observe. The police there are feverishly active and great quantities of liquor have been confiscated.

Pictures Go by Wire

Norwegian Inventor Can Reproduce Photos or Writing.

Claims Picture or Message Can Be Transmitted Accurately Over Practically Unlimited Distance.

Christiania, Norway.—Herwood Peterson, a chief engineer in the government telegraph service, has invented a wire and cable system by which it is possible to transfer a picture or a message in original handwriting over practically unlimited distance. The device was recently publicly tested here between two 600-mile points and was reported successful.

Contrary to the present telegraph system, Mr. Peterson used an alternating electric current, allowing a strictly synchronous work of the sending and the receiving apparatus, a higher speed and an enormous saving of operating costs.

The system, it is claimed, also makes it possible to transmit double the number of words compared with any other telegraphic system now used, and it operates automatically from the moment the telegram, picture or drawing is received by the operator until it is received at the place of delivery. No new wires or cables are necessary.

The manuscript to be transferred is placed on a metallic cylinder—somewhat resembling an original wax phonograph cylinder—covered with a photographic film and exposed to a strong arc light.

The manuscript is copied on the cylinder film, developed and cromographically etched into the metal.

The cylinder is then placed on the sending apparatus, to which is transmitted an electric current going to the receiving apparatus. When the cylinder rotates a needle moves on it, touching every point on the cylinder. Whenever it touches the copied letters of the manuscript it causes a short circuit, which is transmitted to the receiving apparatus with its photographic paper on which the copy is reproduced.

Killed Dog Holding Woman.

Chicago, Ill.—Mrs. Abel Levitus has been in the hospital suffering from the bite of a bulldog which clung to her leg for more than five minutes while attempts by men to loosen the animal's grasp were unavailing. The dog was finally shot as it clung to her. Mrs. Levitus was in a North side hotel lobby when the dog came in and grabbed her by the ankle. Men beat the animal with chairs, but to no avail. The proprietor procured a gun and shot him dead.

Retreats 1,000 Days to Pray.

Osaka, Japan.—Rev. Kojun Yoshiza, dean of an Osaka Buddhist temple, has returned here after passing 1,000 days alone on an islet in Lake Biwa in meditation and prayer.

AUCTION!

The Wellemeyer Department Store of Klemme, Iowa, carries the largest and best selected stock of House Furnishings in Hancock County. Carlot buying brings their selling price low in comparison to usual retail prices. They have at present an assortment of eight Player Pianos on their floor of well known advertised makes. They handle practically all makes of Good Phonographs, have at the present time twenty-five Phonographs on display. Their own truck delivers your purchases to your door, and their easy payment plan is a convenience which their customers appreciate.

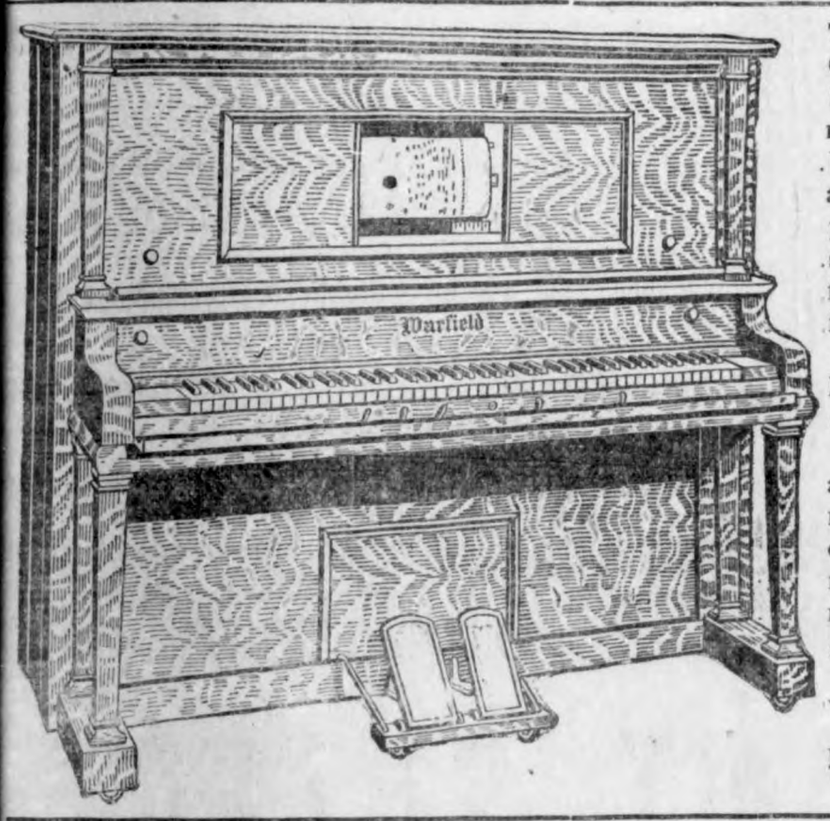
Desiring to quickly bring the public into our store, and desiring to get acquainted with more of the people who live farther away, we have decided to sell at Public Auction, and to accept the highest bid, whatever it may be——

A Warfield Player Piano
A Vocalian Phonograph
A Pullman Bed Davenport

These goods are all new and best quality

This is your chance. The best bid takes it. Come and exanmine these three splendid items now on display in our store, and make a bid on one or on each. Sealed Bids will be recieved up to 3:00 P. M. on—

SATURDAY, MAY 14, 1921



This Waltham Piano Co. Style 312 Player is an instrument of noble proportions, and beautiful to the eye and ear, a high quality product down to the smallest detail. It is four feet nine inches in height, has a Harp attachment, has extra heavy sounding board, the very best action, genuine ivory keys, and is finished in rich mahogany. . .Our price on this splendid instrument is $730.00, Twelve rolls and a player bench go with each piano. . .

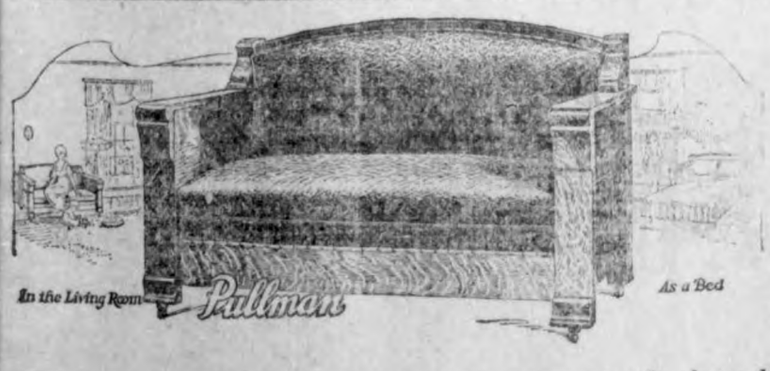
What will you offer?

MAKE A BID.

The Aeolian Vocalian Phongraph
Style 820

SPECIFICATIONS

Cabinet Measurements—Height, forty-eight inches; width, twenty three and one-half inches; depth, twenty-six inches.
Case Woods—Choice mottled mahogany.
Motor—Multiple spring, nickle-plated, constant speed non-vibrating, and mouted free from contact with resonating parts. Equipped with regulator.
Vocalion Automatic Stop—Of an entirely novel and improved type; superior to and simpler than any other on the market.
Volunome—An additional means of tone-contdol, making unnecessary a variety of needles.
Record Space—Cabinet contains sev en albums.
WE SELL IT FOR $325.00—WHAT WILL YOU GIVE? MAKE ABID.



This is a genuine Pullman Bed Davenpoort. . .It gives double service, day and night. It does not show from its outward appearance that it contains a bed, but it does contain a most comfortable bed. It is the easiets of all bed davenports to operate. It has a wax oak frame and a brown mule cover-ing and retails for $57.00. What will you give. Make a bid..

GENTLE JOLT FOR SWEENY

Possibly There Are Others Who Might Benefit by Reflecting on George's Observation.

Frothingham Dodge, the Boston municipal reformer, in the course of an address to Harvard students, said:

"Man wasn't made to loaf. The minute he begins to loaf he takes to drink or hypochondria—I don't know which is worse.

"There's a loafing hypochondriac named Sweeny who spends all his time talking about his health. He's always ailing, and usually when you go to see him you find him in bed with a headache or rheumatism or dyspepsia or what not.

"Sweeny was tottering feebly down the street one day when he fell in with a burly friend named George.

"'George,' he said, 'I'd give anything to be as strong and healthy as you are. What do you live on?'

"'I live on fruit,' said George.

"'Fruit, eh?' said Sweeny eagerly. 'That sounds good. I'll have to try it. What kind of fruit, George?'

"'The fruit of labor,' George answered significantly."

ROSE UP IN THEIR WRATH

Entire Body of "Plain People" of Crimson Gulch Tired of the Part They Played.

"Going for a little holiday?" inquired the member of a surveying party.

"No," replied Piute Pete. "These suitcases represent all our worldly possessions and the departure which it is your historic privilege to witness is a two-handed play on which me an' Cactus Joe here intends to stand pat forever."

"But Crimson Gulch is just beginning to be the fine town which you have so long hoped for."

"It is. All the boys except us has prospered one way or another, so that every one of them is an assessor or a stockholder or somethin' that makes him some kind of a rate booster. So me an' Cactus Joe is emigratin'. We're willin' to do our duty as citizens, with any kind of an even break. But we're tired of bein' the en-tire plain people."

Perfect but Premature.

She had big brown eyes that were both temperamental and intelligent. She had thoroughbred nostrils which dilated when she felt; and lips that were scarlet. Many men had expressed admiration for her. She had never loved.

He loved her. He was accustomed to taking what he wanted. He expressed no admiration. He crushed her to him and kissed the big brown eyes and the scarlet lips.

She flew into a flaming rage and sent him away, but—

She sent for him.

She demanded an apology.

He tenderly kissed the big brown eyes and scarlet lips.

She did not send him away.—From "Bits of Life."

Getting Even.

Archie attends one of the schools of this city and is thinking seriously of entering high school in February. He does not approve of woman suffrage.

One day after receiving a lecture from one of the teachers, he entered the room pouting. The teacher asked him what the trouble was. He replied: "If the girls are going to vote like the men, I'm going to pout just like the girls do."

"Are you trying to be a girl?" asked his teacher. A giggle was heard from every one present.—Indianapolis News.

The Family Laundress.

George Luks, an artist, said at a reception in New York:

"Servants are paid such high wages nowadays that only labor unionists and captains of industry can afford to keep them. As for painters—"

Mr. Luks made a helpless gesture and went on:

"A promising young painter said to me the other day in a complacent voice:

"'My work is now hung on the line.'

"Then a bitter thought struck him, and he added:

"'So's my wife's.'"

No Half Ways for Him.

Mrs. Jones had arranged to meet her husband at a certain store. After standing about for some time she grew impatient, and, thinking that he might have forgotten to meet her, she called him up at his place of business. Supposing that central had given her the right number, she exclaimed: "Hello, Frank, is that you? I'm nearly dead."

"Well, madam," came the reply, "I guess you have the wrong man. I'm the undertaker, and I want them entirely dead."—Boston Transcript.

Enslaved.

"Our new office boy is in love with our prettiest stenographer," remarked Mr. Dubwaite.

"What are you going to do about it?"

"Nothing. I hope he'll remain true to her. For the first time since he's been here he's always around when we want him."—Birmingham Age-Herald.

How He Got It.

"Pa had the last word in an argument with ma last night."

"That so?"

"Yep. Ma was arguing that she simply had to have a new gown for a dinner party that is coming soon."

"Well, how did your father get the last word in that sort of a battle?"

"He finally said 'yes.'"

post office of Cavern.

Golf Now Presidential Game.

What a part golf has come to play in our public life! Thirty years ago there were two or three golf courses in America. The few people who played it were regarded as faddists who had encountered some form of aerial croquet, observes the Cincinnati Times-Star.

In quest of recreation, President Cleveland sought the quietude of boat and bait in a side stream. So far as records show, President Harrison had no form of sport. President McKinley found his sole form of relaxation in the smoking of cigars. Then came Theodore Roosevelt, whose strenuosity turned him to tennis with an occasional boxing match until a professional or a more youthful if less vigorous amateur.

But after Colonel Roosevelt golf reigned supreme, President Taft played the game regularly and President Wilson, until his unfortunate illness, was seen on the Chevy Chase course almost every day. Senator Harding now is to move his golf clubs into the White House.

Bird Protection Effective.

That the passage and enforcement of the law preventing spring shooting and marketing of migratory game birds is now producing excellent results is pointed out by officials of the biological survey. Without such restrictions they say the game birds not only would be greatly reduced in numbers, but in many instances would be brought near extinction. The biological survey, which is charged with the enforcement of the federal law and regulations protecting migratory birds, is receiving reports from all sections of the country showing that with the protection now enjoyed by the birds, their numbers are increasing each year, and that they are returning in spring to numerous breeding grounds which they have deserted for several years.

Are Pies Round or Square?

The teacher of a class in arithmetic was explaining how to find the circumference of a circle. After measuring a number of circles the children found that the circumference was always 3.1416 times the diameter. It was called pi. Then the teacher asked the class: "Why do you suppose the mathematicians call it pi?" No one seemed to know and finally one girl held up her hand.

"Well, Mary," said the teacher.

"Because pie is round," was the reply.

"It isn't; sit down," was the command.

Mary sat down, murmuring: "Well, I never saw a square one."

Not Common.

"I dunno whether that feller is engaged in some shady occupation or not. But—"

"Well?"

"There's something mighty suspicious about the way he minds his own business." — Louisville Courier-Journal.

Horticultural.

Dyer—Miss Gray was married the year she came out.

Ryer—What you might call nipped in the bud.—Judge.

Origin of Pensions.

The practice of pensioning or in ring sick and wounded soldiers is said to have been started in England by Oliver Cromwell

Announcement

We wish to take this opportunity to announce to the public that we have taken possession of the grain and coal business formerly owned by M. O. Hocum, and that we are now open and doing business.

We solicit the patronage of all and extend a cordial invitation to make us a business call. Our business policy will be such that at all time we expect to pay the highest market prices for farm products and will also endeavor to retail to the buyer at lowest prices on coal, feed, grain, etc.

Klemme Co-Op Grain Co

H. G. Miller, Manager Klemme, Iowa

Klemme and Vicinity

School will soon close for the summer vacation.

Ed. Ell received a car load of Fordson tractors Monday.

Mrs. Carl Priebe went to Garner on business Tuesday afternoon.

Mr. and Mrs. Beard from Belmond were callers in Klemme last Friday.

Miss Olive Butts. of Belmond was a Klemme visitor Friday last.

Ben Swalve and family and Mrs. Gilbert Schafer drove to Belmond on Thursday of the week past.

Miss Adna Church of Garner was a visitor with Klemme friends Tuesday, night.

Mrs. Henry Lewis went to Clear Lake Tuesday evening for a couple of days visit.

Mr. and Mrs. Charlie Stromer of Garner were Klemme callers Tuesday.

Mrs. Burke and daughter, Marie, of Garner, were calling on Klemme friends Friday.

Mrs. Hubbard and Mrs. Nelson, of Goodell were Klemme callers last week on Friday.

Miss Lola Smith returned from Forest City Saturday evening, having resigned her position there with the White Cafe.

Mr. and Mrs. Joe Stearnes were called to Belmond Monday night by the illess of his father. They returned Wednsday morning and reported that his father was no better.

Miss Marian Luick, of Belmond has been visiting Klemme friends all of last week. Now we wish to have our readers also note that LuVerne Smith did not make his weekly trip to Belmond last Sunday, a fact which may seem quite strange.

Einar Salling, the cream hauler has adorned his house with a nice new coat of paint which greatly adds to the appearance of his place. Thor Christensen, his recently acquired son-in-law did the work. The young man is an experienced painter and decorator and may locate here.

Our friend, Art Wellemeyer has a new thing in the way of an auction which he advertised in seven of the leading papers in this neighborhood last week and doubtless many of you read the ad in the Times and other papers. It is an auction sale and the bids are made on blanks for a player piano, a phonograph and a bed davenport. Some one is going to get a bargain on one of these articles and at their own price. If you have not taken advantage of bidding then we would advise you to do so at once.

Ye Editor had two callers last Friday afternoon from Garner; Editor J. E. Tierney of the Garner Democrat, who came in to pass remarks on our new Linotype machine, and the other was Banker Isaac Sweigard of the Farmers National Bank at the town of Garner. Nope he didn't give us a toe hold on any loose coin. all he paid us was a pleasant visit.

The play given by the tenth grade of the Klemme High School at the Idle Hour theatre last Friday evening entitled "Thompkin's Hired Man" was well played and all who took part are to be highly commended on the masterly way in which their part was handled. Adolf Lauritzen played the hired man part and made a great hit with the crowd. The proceeds are to be used for baeball uniforms, etc.

The Wilson Highway between this place and Garner is being graveled. The big army trucks belonging to the county are being used in the work. This work at present is in full blast between Joe Schuldt's farm and working toward Klemme. The road is practically tiled all the way and is well graded so that when the gravel is worked in good we should have a very fine road.

The County Ministerial Association has made arrangements to hold services every other Sunday at the County Home. Last Sunday Rev. S. M. McConnell conducted the service. Two weeks from that date another of the pastors of the county will have charge. This is a nice arrangement and the inmates of the home will enjoy the services we are sure. —Garner Democrat.

The Drinks Were Rather Salty!

"Dad" Yanke and Billie Keraus were loading a car of spuds for Wellmeyer Monday and had worked hard and faithfully all morning and late in the afternoon and they were both tired and extremely thirsty—mostly thirsty. Bill had a hunch that two bottles of cold near-beer would hit the spot just right and the motion was seconded by Dad. Accordingly Bill beat it to the store to get four bottles of ice cold malt and wrapped them all up fine in a nice paper bag and set them on the counter while he hiked up to the office to see about something. Bill then got his four bottles of malt and carried them real carefully to the car where Dad was working hard and on sight of the sack smacked his lips and was all set for a nice cold drink. He opened the bag and pulled out—Three Sacks of Table Salt. Did Bill and Dad cuss? The air was blue, some rummy at the store had switched on them. IT was a long dry afternoon and they could not drink the salt.

CORRESPONDENCE

GOODELL NEWS

Special To The Times

The Class Play given by the Seniors last Friday night was very good, and a large crowd was present.

Daphne Houghton, who has been somewhat better, is very sick at this writing.

Jay Griggs and daughter, Mae, autoed to Hampton Tuesday.

Father Eardley. of Belmond was a Goodell caller Saturday.

E. A. Eardley, of Belmond was a business caller here Saturday.

Wm. Monoghan is on the sick list this week.

Mary Sullivan closed a very successful term of school last Friday, as did Clara Johnson, J. D. G. Houghton, and others.

Last Wednesday the Goodell boys went over to Meservey to play base ball but the Meservey team would not play on account of being afraid of getting Scarlet fever.

The Grades of the Goodell school will give an Operetta on Thursday evening, May 5th.

Jay Griggs was a Klemme caller Saturday.

T. Hamilton enjoyed a visit from two of his sisters the fore part of the week.

Marvel Chase visited school last Wednesday forenoon.

Mrs. J. J. Cook and Mrs. V. A. Cook were Mason City shoppers last Thursday.

AVERY TOWNSHIP NEWS

Special To The Times

Edgar Buss, assisted Sylvan Johnson in filling a tile ditch last Friday.

Wm. Jefferson Bell braved the muddy roads and drove to the home of his parents Sunday.

Mrs. Fred Bachman was a Goodell caller last Saturday morning. Her daughter, Wava. returned with her.

Henry Helps and family autoed to Clarion last week Thursday, where Mrs. Helps had dental work done.

Dorothy Helps visited with Janie Dutheridge last Saturday and Sunday.

Miss Geraldine Smid visited at the home of Miss Myrtle Bell last Saturday and Sunday.

Fred Bell was a business caller at Britt, Iowa, last Saturday morning.

Mr. and Mrs. Will Schlawein and family and Johnny Fuller were Sunday visitors at G. A. Golls.

Mr. and Mrs. Sylvan Johnson were Sunday visitors at the home of Elko Buss and family.

This Critical World.

It's impossible to please everybody, and if a girl has what we, in our ignorance, consider a good figure the neighbor women say she is bunchy.—Ohio State Journal.

Placing Blame.

A vulgar man, in any ill that happens to him, blames others; a novice in philosophy blames himself, and a philosopher blames neither the one nor the other.—Epictetus.

Watered Stock.

Jimmie (visiting his uncle in the country)—"Oh, Uncle George, your hired man is not honest. He let th' cows drink a whole lot of water just before he milked them."

Nervous.

It is the man of many parts who should be careful not to go to pieces.—Cartoons Magazine.

Bobbed Hair Wins Husbands.

It may be possible girls are bobbing their hair that it won't take them so long to get ready when an automobile toots outside. Many a husband has been lost to a girl because she used forty-nine hairpins.

PILES

and other rectal troubles may be handled with satisfaction to all concerned by conservative, practically painless, modern office treatment. It is absolutely free from danger. Does not necessitate going to the hospital, and causes the patient little or no inconvenience. Satisfaction guaranteed or money refunded. Further information on request but an office consultation is recommended when convenient.

Some FACTS About

Ford

THE UNIVERSAL CAR

Here are authentic figures from the Ford factory at Detroit. They show you how many Ford cars and trucks have been built each month since January 1 and how many have been sold to retail customers, in the United States.

	Produced		Delivered to Retail Customers
JANUARY	29,883		57,208
FEBRUARY	35,305		63,603
MARCH	61,886		87,221
Total Production	127,074	Total Retail Sales	208,032

wing the actual sales for the first three months of 1921 exceeding production by 58 Ford cars and trucks!

April requisitions already specify 107,719 additional cars and trucks and the mated April output of the factory and assembly plants combined calls for 90,000!

These facts clearly show that the demand for Ford products is growing much er than the manufacturing facilities to produce and were it not for the dealers' ited stocks, which are now being rapidly depleted, many more customers would e been compeled to wait for their cars. It will be only a matter of weeks, there- , until a big surplus of orders will prevent anything like prompt deliveries.

If you would be sure of having your Ford car or truck when you want it you uld place your order now. Don't delay. Phone us or drop us a card,

ED. G. ELL

Bring in Your Old Shoes

e will give $1.00 a pair for all your old shoes

ere's the proposition---

We will allow you $1.00 toward a pair of new shoes.--no matter what kind you wish, or price you want to pay. This is a straight out and out proposition, no joker to look for. You simply bring in the old shoes and receive $1.00 of on your new ones. One of our Gildner Stores tried this method of stimulating business and sold over one third of the stock.

FIRES OF PECULIAR ORIGIN

Many Disastrous Conflagrations Have Been the Result of Incidents of Most Trivial Character.

There have been a number of cases lately of women's frocks catching fire without any obvious cause. The mischief has now been traced to an "art silk" which is really material prepared during the war for the manufacture of cartridges.

Fires are started in all sorts of odd ways. A man had just taken his seat at dinner when his dress jacket burst into flames. The solution was found in the fact that a potash throat lozenge, loose in his pocket, had become ignited by pressure against the side of a safety match box.

A few years ago a rounded window in a chemist's shop at Scarborough focused the rays of the sun so that they set fire to a celluloid box, while a fly was responsible for the destruction of a large house at Westport, in New Zealand. The insect flew into a gas jet, and, escaping with its wings ablaze, blundered into a muslin, curtain which at once burst into flames.

Birds have been responsible for more than one conflagration. At Coverack, in Cornwall, a chimney in a farmhouse took fire. Out of it fluttered an owl with its feathers burning. It settled on a hayrick, and the latter was completely destroyed.

Rain falling on a truck of lime at Beccles Station caused a fire which destroyed the truck and its contents, and the string of a military kite falling across overhead tramway wires and a wooden house caused the destruction of the latter.

A strange case occurred in a wood near Grange over Sands. Red ants had constructed a huge hill in the roots of a splendid fir tree. Hot weather dried the heap, which was composed of vegetable matter. Then came warm rain and a return of heat. Chemical action resulted in spontaneous combustion, and the heap ignited, setting fire to the tree and bringing it to the ground.—London Tit-Bits.

Colors Affect the Health.

It is no longer a theory, but a proven fact, that certain colors produce certain desirable or extremely disastrous effects, even upon the ordinarily sensitive mind. Psychologists, eminent physicians, and skilled decorators are making a keen study of this subject, and each year discloses some new and valuable truth.

For a long time we have known that blue and violet were employed successfully in treating nervous cases; and so soothing indeed is blue that, when used in a whole room scheme—walls, curtains, rugs—it acts as a partial anesthesia upon extremely sensitive natures, sufficient for dental purposes or the carrying out of minor operations.

Red develops the action of the muscles as much as 50 per cent and is often employed in the medicinal world where stimulating results are desired, as in the treatment of smallpox, melancholia and certain forms of anemia. Red, therefore, is not a good color to choose when decorating the room of a "teenage" child, for, aside from its hot and heavy suggestion in summer, it overstimulates the already restless nature of the growing boy or girl.—Good Housekeeping.

Rich Agricultural Land.

The Egyptian fellah rarely eats meat. He works with every member of his family, twelve, fourteen or sixteen hours a day. He rarely touches wheat flour. He makes a flour of his own from a plant which we would call a weed. But he works the most valuable agricultural land in the world. Under irrigation it produces three crops a year. It sells for as much as $1,500 or $2,000 an acre. His cotton sold last year for $200 a kantar of 105 pounds weight. Prices just now are down to a quarter of that. Banks and corporations and such like sound financiers are much worried over the situation.

But not the fellah. He followed the good old advice and put last year's money into land.

Spooks Contradictory.

One of the features of Sir Oliver Lodge's "Raymond," which attracted much comment, was the alleged statement of the spirit Raymond that tobacco and cocktails were available in the spirit world. Raymond's testimony receives a challenge in "Revelations of Louise," by Albert A. Crockett. One of the spirits in this record asks for a cigar and says: "I have not smoked since I died. We don't have tobacco over here." He then explains that when the spirit reenters the flesh its appetites come back as in life.—From a Bulletin of E. A. Stokes Company.

Preventing Chapped Faces and Hands.

Chapped hands and faces, a well-known physician says, are a form of inflammation of the skin caused by unnatural dryness. In winter the fat glands are inactive and to prevent chapping, the skin should be supplied with lubrication. Too frequent washing should be avoided and the skin dried very carefully. Then cold cream or olive oil should be rubbed into the skin. Before retiring the skin should receive the same treatment.

American Houses for France.

American contractors are constructing a thousand wooden houses for France. The windows, doors, paint, nails and bolts go with each house. Each house will consist of three rooms and a shed, and will occupy about 23 square feet.

LIBERTY TOWNSHIP NEWS

Little Vella Paul, daughter of Mr. and Mrs. H. Paul, was taken sick one day last week and was taken to the hospital at Mason City for an operation. She had some internal affection about the ear.

The Pringnitz children and also the Lange children have been on the sick list the past week.

There was no service at the Liberty township church last Sunday evening. What's the matter with the preacher? It was a fine evening and the stars were shining bright. No wonder if an inch of mud should hold up the whole congregation.

The farmers in Liberty township aren't in it at all when it comes to doing things. One farmer in the west part of the county started to plant corn the fore part of last week and he is very likely through by this time.

A large number of young people from here took in the high school play last Friday evening.

Good Example.

Aunt Polly was milking in the cow lot, and her politically excited son found her there. "Maw, you're a Democrat, ain't you?" he asked. She made no answer, but he persisted: "Say, maw, ain't you a good Democrat?" Finally she said, emphatically: "I don't know nothin'. I'm a woman milkin' a cow. You go in the house and shut up!"

OF INTEREST TO FARMERS

The following news items are of public interest and especially to our farmer friends:

The Dairy and Food Commission made a ruling during the past winter that eggs need not be candled from March 1st to May 1st, as eggs are always fresh during this period. Dealers, however, are cautioned that after May 1st all eggs must be candled and the candling certificates must be in every case of eggs sold, as required by law.

The last Legislature passed a new "Pure Seed Law" which becomes effective July 1st, 1921. This law follows closely the requirements of the so called brifern Seed Law, and and is being passed by many of the states. Its requirements are more stringent and definite than this law. The Dairy and Food Co.mmission is required to test samples of seeds for which a charge of fifty cents per sample is made.

The Weight and Measure Law has been amended so as to license all gasoline pumps and meters. This license costs $3.00 per year. The Department is having made a metal license tag which must be placed on or near each pump or meter in plain sight of the purchaser.

The Dairy and Food Commission has made a ruling estblishing the different grades of cream as follows:

Extras—shall consist of sweet cream, clean in flavor and not to contain more than 2-20 of 1 per ct. acidity.

Firsts—shall consist of cream that is clean, smooth and free from all undesirable odors, clean to the taste and only slightly sour.

Seconds—shall consist of cream that is too sour to grade as firsts; may contain undesirable flavors or odors to a slight degree, also that which is too old to pass as firsts. All sour cream containing less than 25 per cent butterfat shall be graded as Seconds.

It is hoped that this will raise the quality and returns on Iowa butter.

The Dairy and Food Commission will welcom e requests to furnish speakers for dairy meetings and for dairy picnics.
—Dairy and Food Commission, Des Moines, Iowa.

First Campaign Tour.

Political history shows that Horace Greeley was the first candidate for the presidency to make an extensive speech-making tour over the country That was 48 years ago.

Uncle Eben.

"Givin' advice," said Uncle Eben, "is often a roundabout way of hintin' to a man dat you don't think he's got as much sense as you have."

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

Happiness Not All.

There is in man a higher than love of happiness; he can do without happiness and instead thereof find blessedness.—Carlyle.

WAVES OF THOUGHT

The world may owe every man a living, but it takes a hustler to collect it.

Many a man would have kept out of hot water had he stuck closer to cold water.

The world may be growing better, but locksmiths keep right on making locks.

Yes, Elsworth, more people squint with their brains than with with their eyes.

As a rule, a man doesn't know he is temperamental until he is told that he is.

It's time to cross your fingers when you hear a man boasting of his good deeds.

There may be 198 objects in a boy's pockets, but he knows every one that is there.

People who agree to everything you say are about as entertaining as a phonograph.

If a man could only see himself as his neighbors see him, he could easily see his finish.

A man may forget to wind his watch, but the flight of time goes on just the same.

It is perfectly proper for the thin girl to expect the dressmaker to make the most of her.

The glittering words of an orator often remind us a small piece of soap can make many bubbles.

An ounce of contentment is more beneficial to a woman's complexion than a pound of cosmetics.

Some women look upon a husband as a money-earning convenience rather than as a domestic necessity.

And He Didn't See the Joke.

The subway train was swaying from side to side and the passenger who hadn't got a strap to hang onto was suffering as a consequence.

Three times he landed on the lap of a stout matron, who finally lost her temper and inquired:

"Here, what are you doing? What do you call yourself?"

"Well," came the smiling reply, "I think I must now describe myself as a lap-lander."

The joke appealed to the matron, who not only forgave him, but decided to retain his humor. She tried it first on her husband. "Yes, dear," she said, "three times he landed on my lap, and when I asked him what he was he said he was an Eskimo."

About Pigs.

An eight-year-old Columbus boy recently asked his mother to tell him the meaning of the word "canine," which he had found while reading. The mother explained the meaning of the word, as connected with dogs, then broadened her information by telling him of the words "feline," "bovine," "equine," etc., as pertaining to other animals. The youngster was duly impressed with the knowledge he had gained, and remained thoughtful for a moment, evidently turning it over in his mind. Suddenly he exclaimed: "Oh, yes, mother, I understand! And porcupine means something about pigs, doesn't it?"—Indianapolis News.

Consideration for Daddy.

A six-year-old Columbus boy has been insisting, since Christmas talk, began, that he must have a watch for Christmas. His mother remonstrated with him, pointing out that he was rather young to have a watch.

"Of course," he said, "I want you to get me other things, too, but I just must have a watch."

"Well," asked his mother finally, "just why must you have a watch?"

"I want a watch so when I'm in church I won't have to wake daddy up every time I want to know what time it is."—Indianapolis News.

Improved Gunnery in the Navy.

Analysis of the gunnery exercises of the American navy during the past year shows that the greatest progress toward efficiency was made by vessels of the battleship class, due to the large number of men aboard such ships and the comparative stability of the personnel. The navy department considers that battleship gunnery is at present about equal to that of foreign battleships. It is believed that next year vessels of other classes will be brought up as regards gunnery to the level of our battleships.—Scientific American.

The Spotlight Scramble.

"I'd kind o' like to go to an old-fashioned dance," said Farmer Corntossel.

"You mean one of those affairs where the fiddler called the figures?" inquired St. Simlin.

"Yep. Wonder if we couldn't get one up?"

"Not a chance. You couldn't get any kind of a crowd together these days that 'ud think of allowin' one man to do all the talkin' besides bein' the instrumental soloist."

White Fleas.

Robert Lee Phillips, six years old, living in East Washington street, is much impressed with all he learns at school, says the Indianapolis News. The other evening he was busy cutting out "paper animals" and as he played he kept repeating to himself, "Fleas is white, fleas is white." His older brother grew tired of hearing it and said: "Where do you get that?" Very emphatically he answered: "At school. 'Mary had a little lamb; its fleas is white as snow.'"

A Mistake Somewhere.

"Ma, did you ever hear a rabbit bark?"

"Rabbits don't bark, dear."

"That's funny! My story book says that rabbits eat cabbage and bark."—Boston Transcript.

SHORT SMILES

Added Strength.

Restaurant Keeper—"I hope the sausage was all right?" Guest—"Yes, I feel it has given me horsepower."

Hardly.

"Yes, this is a Boston bull." "Well bred?" "Could anything from Boston be otherwise?"

Sure Enough.

"What is worse than amateur theatricals?"
"Amateur paper-hanging."

A College Lad.

"Is he a raw youth?"
"Well, he wouldn't so consider himself. Call him a rah-rah youth."

Quite So.

"The census bureau employs some 4,000 clerks." "Quite a job to take the census of the census."

Not Unanimous.

"Do you pay your servant well?"
"I can't say. Everybody except the servant seems to think so."

Arrived There.

"I wrote a poem once, an Ode to Oblivion." "What became of it?" "It reached its destination."

Mentioning No Names.

"The department of agriculture announces a bumper crop of nuts."
"We've already met some of 'em."

Curt Criticism.

"How was the musical evening at the Gawker residence?" "A misnomer," replied Mr. Grumpson, briefly.

Kisses and Cheese.

"Bread and cheese and kisses make up an old formula for happiness."
"Yes, it antedates limburger."

Keeping His Word.

"Why are you paying these bills of Flubdub's?" "I promised to keep his desk clean while he was away."

Question.

"This dog of yours, Algy." "Yaas?" "Do you lead it around or does it lead you around?"

Behind the Scenes.

Juliet—"Jackson says he's drawing full houses." Romeo—"Only on his own deal, m' deah."

Faith Gone.

She—Do you believe in dreams?
He—No; I was in love with one once and she jilted me.

Better So.

"Poor Mrs. Gribbles can't hear more than half her husband says to her."
"That's all right; she oughtn't to."

True.

"The astronomer's articles are very long." "Well, he's used to boundless space."

Couldn't Hear Him.

Mrs. Benham—"What did the minister preach about?" Benham—"My hearing is sadly defective when I am not awake."

Life's Compensations.

'Poets very seldom make any money by their work." "But then they don't have to pay for their license."

Some Other Day, Perhaps.

"Shall I dust the bricky brack, mum?"
"Not today, Nora. I don't think we can afford it."

Safety First.

Corporal Sweeney had been detailed to take his squad of engineers to mop up after a company of infantry. Arrived at the cellar of an abandoned chateau he was instructed by his lieutenant to go inside, leaving the remainder of the squad gathered about the door to get the fugitives.

"Yes, sir," answered Sweeney obediently. Then, turning to his men, he added the caution:

"But if more than one man comes out of the cellar, for the Lord's sake, don't shoot the first one."—The American Legion Weekly.

The Sign of No.

"That dog of mine is very intelligent," said the sweet young thing.

"I have no doubt of it," replied the caller.

"I was singing just now and I asked Fido if he liked the song, and he wagged his tail."

"But did he wag it up and down or from side to side?"

"Why, from side to side, of course."

"Well, I should say that denoted that he meant he was not pleased."

What's in a Name?

The American Indians, having apparently run out of such names as Laughing Water and Sitting Bull, have now turned to the field of popular songs for inspiration, and we read of a redskin in Calgary named Dardanella. If this sort of thing goes on we shall expect to hear of Big Chief Oh-what-a-pal-was-Mary, or Medicine Man You-didn't-want-me-when-you-had-me-so-why-do-you-want-me-now.—Life.

The Reason.

The other day a corpulent woman kept her daughter home from school to help with the work. Indignantly the teacher wrote a note to the father and demanded a written excuse for the child's absence. Now, he was henpecked, but his note was worthy of a genius. He wrote: "Dear teacher—I let Geraldine be absent for ample reasons. See her mother."—Exchange.

Special Demonstration Saturday

Did You Ever Sharpen a Shove

Not very often, have you? There are so many other things to sharpen you never get to it. You haven't time. Those "other things" take too

But when you have a Luther Hummer Tool Sharpener the "other thi take such little time and work that it's easy to keep everything on the sharp *all* the time. Now that doesn't jibe with your past recollection tool sharpening jobs, does it? Well, the Hummer sharpens tools in the way—the way they do it in machine shops, factories, shipyards, etc.

It's a real machine with ball bearings, worm gear drive and all-steel struction. You sit on it and pedal. No one needs to turn it for you. fellow can be doing something else. It is equipped with Dimo-Grit wh and it will sharpen *all* your farm tools, mower sickles, too. A special att ment holds the sickle so that the bevel of each section fits against the side of the wheel. You simply move it along from section to section keep pedaling. It's a lot easier than the old-fashioned way. And the secret of it all is in the famous Dimo-Grit wheels.

DIMO-GRIT
THE WHEEL FOR STEEL

What is Dimo-Grit? Is it mined? No. Is it a kind of stone? No. Dimo-Grit is made under the volcano-like heat of huge electric furnaces and nothing else like it has ever been made in any other way. It can't be. A scientist discovered the process while trying to make artificial diamonds. And Dimo-Grit has revolutionized tool sharpening methods.

Would you like to try a Hum yourself—to test the wonder sharpening qualities of the fam Dimo-Grit wheels? All right! Bu in one of your own dull tools— duller the better, and see h quickly and easily the Hummer put a keen cutting edge on it it soon. When you see a Hum work you'll be convinced.

FREE Bring in one knife, any kind, and a pair of shears get them sharpened free while you wait.

126 MAMMOTH JACKS

I have a bargain for you, come quick. W. L. DeCLOW'S JACK FARM Cedar Rapids, Iowa

N. U., DES MOINES, NO. 18—1921.

PROVING IT

By JULIA A. ROBINSON.

(© by McClure Newspaper Syndicate.)

Jack was not a timid man; there was nothing cowardly about him. Indeed, he was considered brave by his associates, though they sometimes thought he liked to boast of his courage.

"Nothing can scare Jack," they were in the habit of saying.

With squared shoulders and head erect Jack would accept the compliment. No, he was not afraid of anything.

"They say there are ghosts in the woods back of the camp," Peter Banks said to him one day.

"Ghosts? There's no such thing as ghosts!" retorted Jack.

"Just you try going up to a ghost and feeling of it!" challenged the other.

"Give me a chance and I'll do it," invited Jack.

"I dare you to go into those woods tonight at midnight!" cried Peter.

"I accept your challenge," calmly replied Jack, "I only ask that you go with me to prove that I am not afraid."

"Me? Not on your life!

About midnight Jack could stand it no longer. He left the camp and started out toward the wood. He passed the morgue without a thought. He had often passed it at night. He walked along boldly, head erect, and wished the fellows could see him now and note how brave he was.

He wandered far into the wood, a little farther than he had intended to go. It was quite dark. Even the stars were obscured from sight. All was still.

Suddenly, without a word, a white figure appeared, not many yards away, how near, Jack never could tell. He could not make out the form—indeed, he did not try. It seemed a swaying mass in white. Then another arose out of the darkness and they appeared to float toward him.

For about three seconds Jack stood still. Every nerve quivered. He could not think. All sense seemed to have left him and all power of thought.

Then, forgetting bravery, with not a thought of courage, Jack turned and ran frantically back to the road, not once looking behind. It seemed to him that a host of demons was pursuing him.

"Hello! What's up?" called a voice in his ear, and a mocking laugh sounded.

Jack pulled up quick and stared. He quivered, but his senses were coming back to him. There stood Peter in the middle of the road, a grin on his face.

"Saw 'em, did you?" he asked. "Did you feel 'em?"

Jack was trembling, not at all on his dignity.

"D' you believe in ghosts, now?" sneered Peter. "Didn't run—oh, no! Where's all your boasted bravery now? Feel of 'em, did you?"

"Don't joke," groaned Jack. "Did you see 'em? Where were you?"

"See 'em? No. Didn't I tell you I wouldn't go into those woods at night? I ain't making no boast of bravery. I kept a safe distance. I stood right here to see you run. It was good fun, I tell you, to see the scare in your eyes."

"But—really—" began Jack, "say, it did look like ghosts. I never saw anything so much like 'em. Do you believe in them, truly?"

"Sure I do, and I know you would come to it, if only you had the test and could once see 'em."

Jack was panting, trying to regain calmness, not willing to give in.

They heard voices and listened.

"There's nothing like being in the woods at this time of night. It is most wonderful. It takes my mind from those dreadful hospital scenes that we have to endure. It gives me nerve and courage to go back to my work."

"Yes," replied another voice. "These nightly walks in the free woods give me courage and strength. There's nothing like contact with nature to make one brave to meet the hard duties of life."

Two night nurses passed them and entered the front door of the hospital, just across the way. They were dressed in white, flowing garments.

The two men standing there looked into each other's faces and laughed.

"Give up?" asked Jack. "Do you say there are ghosts now?"

"Yes, I give up," answered Peter.

"Say, was this a put-up job, Pete? Did you know about those nurses and their nightly walks?"

"'Pon my word, not I, not a word!" affirmed Peter. "I honestly thought there were ghosts, and I thought you'd find it out. That's why I came out here to see you scared, but I wouldn't have gone into those woods on your life. Do you give up and confess you were afraid for once?"

"Yes, I give in to the accusation," nobly acknowledged Jack. "I confess my knees did shake and I didn't know what I was about. Guess I won't boast any more. But I've learned one thing. There's more than one way to be brave, and more than one reason for being brave, too. I've bragged of bravery simply for effect, though I don't believe I ever felt fear before. Now those nurses are learning to be brave for the good they can do in the world, and the help they can give to others. That's the kind of bravery that counts, and that's the kind for me from now on."

ORCHARD GLEANINGS

METHOD OF KILLING PSYLLA

Most Satisfactory Spray Mixture Is Combination of Soap, Tobacco Extract and Water.

The best means of killing Psylla flies in spring is spraying during a period of warm weather during early spring. The most satisfactory mixture, from the standpoints of safety to fruit and leaf buds and effectiveness against the insect, is three-fourths of a pint of tobacco extract (40 per cent nicotine) in 100 gallons of water to which are added from three to five pounds of soap.

Eggs about to hatch and newly emerged nymphs succumb to an application of the lime-sulphur solution. By postponing the dormant treatment for the San Jose scale until the blossom cluster-buds are beginning to separate at the tips, very effective work can be done against the eggs. The lime-sulphur should be used in the proportion of one gallon of the concentrate 32 degrees B., to eight gallons of water. In some tests of other contact sprays the miscible oils, oil emulsions, weak dilutions of nicotine, and soapy solutions were of small value for the destruction of the eggs. On the other hand, the wash

Spraying Orchard—Note Whitewashed Trunks to Reflect Sun and Prevent Sunscald and Trunk Injury.

having considerable amounts of sediment (15-20-50 formula) was less destructive to the eggs but the young psyllas which hatched for the most part failed to reach the opening buds and these succumbed to the action of the sediment which became attached to their bodies after leaving the egg shells.

While the adult psyllas seem to prefer to spend the winter under the loose bark of the trees, they may seek shelter under any waste which affords protection. Matted weeds, tufts of grass, leaves, or rubbish on or about the trees present ideal hiding places for the insects.

The rough bark not only provides a shelter for the psyllas during the winter but it also constitutes the chief obstacle to thorough spraying during the dormant season to kill the hibernating flies. Its removal is desirable for two reasons: first, to render the trees less attractive for the purposes of hibernation during late fall, winter and early spring; and, second, to facilitate a more thorough spraying of the trunks and lower portions of the larger limbs. The loose bark should be removed by a dull hoe or floor scraper, preferably during a wet period, as the bark is then more easily detached. Care should be taken not to cut into the live tissues as the wounds may become infested with disease. The bark should be collected and burned to kill the insects which are attached to the scrapings.

The chief factors which make for efficient work against the hibernating psylla flies and their eggs are (1) a knowledge on the part of the grower of the habits of the flies and an acquaintance with the eggs; (2) an understanding of the conditions under which these stages are most vulnerable to sprays; (3) thorough work in spraying.

DESTROY PEACH TREE BORER

Fine Crystals of Para-dichlorobenzene Sprinkled Around Base of Trees Is Efficient.

The horticulturists of the United States Department of Agriculture have found a new agent for the eradication of the destructive peach tree borer which has done $6,000,000 damage annually. The most effective remedy known heretofore has been to dig the larvae out of the trunks of the trees or to kill them with a long sharp wire. The new treatment consists of sprinkling crystals of para-dichlorobenzene around the base of the trees and covering slightly with earth. The substance is highly volatile, readily changing to a gas which is heavier than air and settles down through the soil. The gas is an effective destroyer of the pest. The para-dichlorobenzene can be obtained at any drug store. A pound is sufficient for eight or ten trees and costs only about 25 cents.

ARTIFICIAL MULCHING HELPS

Very Satisfactory Substitute for Cultivation and Is Good for Soil Management.

Trees properly mulched will be found much more productive and profitable than those left to compete with weeds and grass for water and food. As a matter of fact, artificial mulching is a very satisfactory substitute for cultivation and an entirely practicable method of soil management under many conditions.

LIVED IN PILE OF WASTE PAPER

Man Takes Up the Habitat of Hermit in Crowded Section of New York City.

MADE CAVE FOR SELF

Naked Body Reclines Beneath Mass of Old Papers and Rags Which Completely Fill Room in Tenement.

New York.—New York city's East side—a minute strip on a minor island—is, perhaps the most densely populated region on the Western hemisphere. And yet it was in this humanity-throbbing district that Theodore Greesley chose to take up the habitat of a hermit. It was in the spot where more persons live, and have their being than any other in this country that this old man, long bearded and gray, sought to withdraw from all human contact.

Up on the third floor and to the right of a dull, brown tenement at 129 Chrystie street there's a small room, which, along with its few chairs, its small bed and a picture or two, Mrs. Alice Bernard had rented to Theodore Greesley six years ago. She had seen little of him since. He would call to pay the rent occasionally—it was only $1.50 a week. For almost a month Mrs. Bernard had not seen the old man at all, nor had any one else.

Police Chopped Door Down.

So this landlady trudged up the three flights of steps to find out what had happened. She stopped at the door of the small room and listened. There was no sound and her rappings went unheeded. Even unlocking the door did not gain for her admittance. Frightened she called the police. Two sturdy Irishmen tried their weight against the portal but they failed to move it.

A fire ax finally chopped an entrance, but upon a strange scene. The room was literally packed with old newspapers and rags. They were wedged in so completely that they had barred the swinging of the door. Nowhere was there a sign that the

Found Him Dead.

room was inhabited. It was completely filled with this waste. From the ceiling it slanted down toward the door.

Had Tunneled Beneath Heap.

On one side was an indication of a passage or tunnel into this strange hillside of papers and rags. And into it the policemen burrowed. They followed several feet until they came to a wider opening—a cave in this unusual artificial mountain. It was about four feet wide and not more than two feet in height.

It left only room enough for a small man to curl up in a reclining position. And that was the position in which they found Theodore Greesley—dead, stark naked except for the covering of his long and tangled beard.

BOY'S WIT SAVES TWO LIVES

Ten-Year-Old Lad Snatches His Sister From Paths of Street Cars.

New York.—The quick wit of ten-year-old Pasquale Demoristi of Lodi, N. J., probably saved him and his six-year-old sister, Rosa, from death under the wheels of a Third avenue car at Twenty-ninth street.

The mother and father had crossed the street. Pasquale and his sister trailed behind. Hand in hand, both started across the avenue. A south-bound and a north-bound car approached.

Rosa became frightened and screamed. The children started to run when the north-bound car bore down on them, despite the motorman's frantic efforts to stop it.

When it seemed certain one of the cars would strike them, Pasquale grabbed Rosa around the waist, made a flying leap and caught hold of the edge of the vestibule of the south-bound car and held on until the car was brought to a stop.

MRS. REIFENSTEIN, AGED 67, GAINS 25 POUNDS

Declares She Would Like To Put a Bottle Of Tanlac In The Hands Of Every Sick Man, Woman and Child In This Country — Never Saw Its Equal.

MRS. EMMA REIFENSTEIN, 337 Webster Ave., Syracuse, N. Y.

"I am sixty-seven years of age, but in all my experience I have never known a medicine like Tanlac. Think of it! At my age to gain twenty-five pounds in weight, but that is just what I have done," said Mrs. Emma Reifenstein, of No. 337 Webster avenue, Syracuse, N. Y.

"If I had it in my power," she continued, "I would put a bottle of Tanlac in the home of every sick man, woman and child in this country, for I know what this wonderful medicine would do for them. For almost two years I was almost a nervous wreck. I did not dare to leave the house or even go up town unless my husband went with me. I was afraid to even cross the street and had a feeling of dread all of the time.

"My stomach was weak and easily upset. For days at a time I would go without solid food. I could not rest at night to do any good and felt tired and worn out all of the time. Some days I could hardly drag myself across the room and was so weak and miserable I was ready to give up.

"My health is fine now and I eat anything I want and never have a touch of indigestion. I have never slept better than I do now. My recovery is the talk of our neighborhood, as it was generally believed I could not last but a few weeks longer. This grand medicine has brought me health and happiness and I just can't say enough in its praise."

Mr. J. Reifenstein, in commenting on his wife's statement, said: "Yes, her recovery has been a happy surprise to us all. A few weeks ago I had no idea she would be able to pull through, but now she is in better health than I have ever seen her and the credit is due to Tanlac. We have been married fifty-two years today and I don't believe I have ever seen her looking any better."

Tanlac is sold by leading druggists everywhere.—Adv.

Blood Is the Sap of Life; Keep It Pure

You grow by good blood as a tree grows by sap. Rich blood, robust man. Good sap, sturdy tree. Keep the blood healthy and wholesome; poor, impoverished blood cannot nourish the body or remove the waste as nature intended.

When your blood is impure, itching, flaming skin eruptions often break out, and your body gets run down and weak—easy prey for disease. To be safe, keep the circulation wholesome.

For this S.S.S., the famous vegetable blood remedy your druggist keeps, is excellent. Start enriching your blood with S.S.S. today, and write about your condition to Chief Medical Advisor, 838 Swift Laboratory, Atlanta, Ga.

USED 50 YEARS S.S.S. FOR THE BLOOD AT ALL DRUGGISTS

THUS SINCE WORLD BEGAN

As Philosophers Have Said, Devious Are the Ways to the Heart of a Maid.

Lo! there was once an artistic maiden who did things cleverly and wore bobbed hair and smocks. Her art was really very bad, nor the maiden unaware of it. She had three suitors and she was sore perplexed until one day suitor No. 1 said, "I shall be frank. Your art is very bad, but I love you." She dismissed him.

Suitor No. 2 said, "Your art is very good."

The maiden said to him, "Prithee, sir, do you not agree with me that in places it is a bit—er—crude?"

He answered the maiden. "Now that you speak of it, I agree with you that in places it is a bit—er—crude." And she cast him forth from her father's threshold.

Suitor No. 3 spoke unto the maiden in this wise: "Your art is perfect. It delights my soul. It is true art, without flaw. I love you."

The maiden knew in her heart that her lover lied and she straightaway married him.—Ruth O'Hanlon in Life.

Not So Encouraging.

"Your father merely grunted when I told him I wanted to marry you.'

"Don't be discouraged, Alexander. Father is an elemental creature and expresses pleasure as well as anger by grunts."

"Yes, dear, but this was a fortissimo grunt. In fact, there was so much power behind it I'm afraid it was a snort."—Birmingham Age-Herald.

Many a blushing maid is admired for her cheek.

Jubilant Jubilee.

"Some years ago," says an American who used to live in London, "before Queen Victoria's death and about the time the queen's jubilee was to be celebrated, there was overheard this conversation between two old Scotchwomen on a street corner:

"'Can ye tell me, wumman, what is it they call a jubilee?'

"'Weel, it's this,' said the other. 'When folk has been married twenty-five years, that's a silver wuddin'; and when they have been married fifty years that's a golden wuddin'. But if the mon's dead then it's a jubilee.'"

Copper Mining in Alaska.

The copper mines of Chitina valley are the largest and richest thus far developed in Alaska. Their successful development has been made possible by the completion of the Copper River and Northwestern railroad, which affords transportation to tidewater. The recent mining progress in this district is shown in a report entitled "Mining in the Chitina Valley, Alaska," by F. B. Moffat, issued by the United States geological survey, Department of the Interior, as Bulletin 714-C.

Ink Spots.

For fresh ink stains apply an abundance of soap and wash hard. A little lard rubbed on the stained places before the soap is applied will loosen the stain. If this is not successful a saturated solution of oxalic acid is about all that will remove the ink. Soak the stain for a few seconds, then rinse in clear water and finally in water to which a few drops of ammonia have been added.

There's More Than Flavor

Many foods, while pleasing to taste, contain but little nourishment.

Grape-Nuts

combines with its rich, sweet flavor the full nutriment of wheat and malted barley which makes it an ideal food.

It has been the favorite *ready-to-eat* cereal for a quarter of a century.

KLEMME LOCAL NEWS

Bert Mathews was at Mason City yesterday on business.

Henning Sanberg, of Goodell was a Klemme caller Saturday.

Mrs. W. S. Schmidt and son Herman, went to Belmond last Friday for a visit.

George Griggs of Goodell was a business caller at the Times office Wednesday morning.

Mrs. A. Kirkwood and Mrs. Will Kirkwood were Garner callers Tuesday.

Mr. and Mrs. Harm Rust from the town of Goodell were Klemme callers Friday.

Mrs. George Ruka and daughter, Alma, of Goodell, were Klemme visitors last Friday.

Mrs. Avery and Mrs. Wesenberg, of Goodell, were Klemme visitors on Friday of the week past.

Miss Grace Christians came from Garner Saturday after having visited there for a few days.

Emil Barz ad family, of Atkins, Iowa, drove up here Tuesday in their car and will visit with Klemme relatives for a week or two.

Mrs. H. Coobs returned to her home at McGregor last week Wednesday after a few days visit with her daughter, Mrs. W. F. Pavey.

Have you paid your subscription to the Klemme Times

Mr. Thorvald Christensen went to Jewell, Iowa, on business yesterday.

Ray Nelson, of Garner, was a visitor here last evening.

W. F. Pavey was a business caller at Mason City Wednesday morning.

Mr. and Mrs. Earl Ruka were up from Goodell yesterday afternoon.

"Sam" Larsen was a business caller at Mason City Wednesday of this week.

Mrs. E. S. D. Kahrs went to Nevada, Iowa, Monday for a visit with relatives and friends.

Dr. R. M. Thomas drove to Ames Saturday for a visit with relatives and friends.

A. D. White and family from Goodell were in Klemme yesterday afternoon.

Mr. Carl Engerset was up from Goodell yesterday afternoon on business.

Miss Sullivan, one of the efficient teachers of the Klemme schools, spent the week end at her home.

Mr. W. S. Schmidt drove over to Hampton, Iowa last Friday to buy some trees to set out.

Mrs. Oscar Rice and baby from Clarion came last Wednesday for a few days visit with her parents. Mr. and Mrs. Fred Musfelt.

Mr. and Mrs. Chris Jacobs and daughter, Mrs. Chas. Papousek, of Garner were calling on Klemme friends Tuesday evening.

M. O. Hocum and P. M. Griesmer went to Storm Lake yesterday afternoon to attend a Shriners Meeting which is in session there today.

Dr. Barth and wife of Garner were in Klemme last Thursday evening shopping with our Klemme merchants and visiting friends.

Henry Johnson will not tile this year as he figured it would be too strenous work since his recent operation and so he has gone to work for Martin Jensen. We wonder how two Swedes will get along

J. N. Day has had the force at his store go through a regular house cleaning program the other day. It looks much better. We presume J. N. sat on a soap box and engineered the work.

Mrs. Anna Fuller and Mrs. Elmer Fuller entertained the Rebecca Circle of Garner last Friday at a one o'clock dinner. There were twenty-five ladies present from Garner. All report a royal fine time here and a most delicious dinner.

C. C. Tessier, the electrician from Garner was in Klemme Tuesday afternoon doing some electrical wiring. Since his visit to town we parted with more coin of the realm, but we have some convenient electrical wiring in the print shop.

U. G. Smid went to Mason City Saturday and from the looks of him we take a guess that he had a round with some dentist there and came out loser, for he is now shy every tooth in his head. A set of "store teeth" will put him in fine shape again and then watch him sail into beefsteak.

Klemme children did not overlook "May basket night" even if some of we older ones forgot all about it. As the first day of May came on Sunday this year the youngsters hung their baskets Saturday evening and they could be seen hurrying from one little friend's home to the next one. The kids had a great time.

Henry Reuber arrived from Hanover, Ont., Canada, Tuesday for a week's visit with his son, Dr. R. N. Reuber, and Dr. Zinn. He also visited relatives at Battle Creek, Mich., and at Goldfield, Iowa. This is his first trip into Iowa and he is quite impressed with the country.

Public Utilities and the public

In booming your home town to a stranger, and you are a mighty poor citizen if you don't boom your home town, anmong the first drawing cards you will mention will ge your electric lights, gas, telephone, and street car transportation if you happen to live in a town of larger size. If you are getting good service you will expand upon this at length and in glowing terms, and the stranger will be favorably impressed with your town as a good place in which to live and do business. You know this is true, and you know that a town that has these services is to that extent at least a modern, up-to-date town, and if it does not have them, even though it is your town, it is to the degree of this lack a jay town. You will admitt that of course. As a matter of fact both large and communities find it difficult, and all but impossible, to live without the service furnished by public utility corporations. These corporations are furnishing you a service that you not only want, but that you will agree is indispensable. They cannot therefore be classed as inherently your enemy, but from the nature of the case are at the bottom your friend, and when their bills are presented you should accept them as you accept the bill of any other friend, and if the bill is found to be correct it should be paid with the same good grace you pay your other bills.

No one will expect you to pay a bill, for merchandise, service or what not, that is extoartionate, or for something you did not receive, but if it is correct you as a honest man should pay it without protest, and your friend, the utility company, should pay it without protest, and your other friends.

In estimating what will be a fair price for a commodity or service there is really only one ting to be considered, and that is what that service or commodity is worth to you. Whatever it is, is a fair price. Of course the matter of what it cost to produce it also enters. If it costs more to produce it than it is worth to you, it is dear, if the charge is based on the cost, and if it costs less than it is worth to you, it is cheap, on the same condition.

On both of these points we are willing to submitt the justice of the charge we make for service. If you will try to imagine how you would get along without the utilities' service and then think how much it would mean to have it, you will get what we mean by what the service is worth. On the other hand we are willing at all times to disclose what it is costing us to give you this service, so that you will be in position to give an intelligent oppinion both as to worth and cost. There is no reason why utilities companies and the people should not be the best of friends. In fact it is suicidal for both to be anything else. As we remarked on a previous occasion: Our cards are on the table. We want y ou to know all there is to be known aboutthis subject, not altogether for your good, b ut our good also. What is for the good ofthe utilities companies is for the good of th e public, and vice versa.

OAKDALE TO BE ENLARGED

Des Moines, Iowa, May 12—Reports received by the Iowa Tuberculosis Association from other states show that more progressive health legislation was passed by the Iowa legislature than in any other state. Out of 19 bills recommended by the health workers 16 were enacted. Among these were appropriations for the State Tuberculosis Sanitorium which will provide for two large buildings, one of which will fill the long felt need for some place in the state for the care of tuberculous children. The increase of the per capita per month maintainance fund for Oakdale from $50 to $65, a measure advocatd especially by the American Legion and Tubeculosis Association, will make possible better care of exservice men and other patients. Bills of particular interest to counties are those allowing counties to levy two mill if needed instead of one for the county hospital purposes and permitting county supervisors to establish free wards in private hospitals. Four bills regulating to prevention of tuberculosis in cattle and hogs and providing for the preferential testing of dairy herds and the regulation of milk supply were passed. Treatment at birth of babies' eyes to prevent blindness was also universal. The vital statistics bill, which will admit Iowa to the Federal registration area as prescribed by the Census Bureau. was passed. This law had been advocated for ten years by the Federation of Women's Clubs and the Parent-Teachers Association. A large number of measures desired by the school interests were successful.

It's A Shame To Tell

A woman in one of our neighboring towns suspected that her husband was in the habit of kissing the hired girl and resolved to detect him in the act. Saturday night she saw him pass quietly into the kitchen. The hired girl was out and the kitchen was dark. The jealous wife took a few matches in her hand, hastily placed a shawl on her head, as the girl often done, entered the back door and was immediately seized and kissed, and with heart almost bursting. the wife prepared a terrible rebuke to the faithless spouse and tearing herself loose from his fond embrace, struck a match and stood face to face with—the hired man.

Seevn Cairns Brothers Coming

The always popular Seven Cairns Brothers and their Big Company will make their annual visit to Klemme with their Big New Tent theatre one night only, on Wednesday, May 18, presnting thir latest 4 act comedy drama "The Price He Paid." The boys have been coming here for a number of years and our people have learned to like and respect them. They always carry an excellent company of ladies and gentlemen and their word is as good as gold. Remember the date and don't miss this yearly treat.

GOV. KENDALL TO SPEAK AT GARNER

Gov. Nate Kendall, of Des Moines will speak at Garnr next Thursday evening, May 19th. The graduating class of the Garner school have secured him to speak at their commencement exercises on that evening.

A large crowd is expected and so the program will ge held at the Camp Grounds south of Garner.

This will be a good opportunity for many Klemme people to hear the Governor of this state.

Appreciates School Teacher

To show the appreciation of the work done by Miss Sullivan in the primary room this year about thirty five of the pupils' mothers gathred and successfully carried out a surprise last Thursday. A bountiful supper was served and many useful and vauable presents were left Miss Sullivan as a remembrance.—Contributed.

In the lobby of a movie palace the manager put up a sign, "No smoking here; remember the Iroquois fire." The next morning he came down to the theatre, and found, scrawled beneath his sign: "Don't expectorate in here, remember the Galveston flood."

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 A. M. and 8:00 P. M.

Sunday school at 11:00 A. M.

At the evening service the annual sermon for the graduating class of the high school will be given.

A cordial welcome to all services.

A. E. Buriff, Minister.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10:00 o'clock. Sunday school at the close of preaching service at 11:00 o'clock.

No services in the town church on this Sunday evening.

Sunday school in Liberty township church at 10:15. Preaching service at the close of Sunday school at 11-30 o'clock.

Epworth League Sunday night at 7:5 . Preaching service at 8 o'clock. Midweek prayer services each Thursday evening at 7:30.

You are invited to all of our services.

A. H. Meyer, Pastor.

SECOND SPRAY GETS MOTHS

Apply When Most of the Pedals Have Dropped from Blossoms.

Be sure that you spray the fruit as soon as the majority of the petals have dropped from the blossems, say the horticultural experts at Iowa State College, as this is the spray with controls the codling moth and gets the green fruit worm and apple scab.

In spraying for apples and pears use lime sulpher, five quarts to 50 gallons of water, and one and one half pounds of lead arsenate powder

This same mixture can also be used on plums or cherries for the control of curculio. brown rot and leaf slug. Bordeaux mixture mixed at the rate of 4-4-50 can be used in this case.

This and the first spray should be applied at all fruit trees whether they are bearing or not as these sprays tend to keep the foliage in a healthy condition and will insure crops of fruit for the following year. This is especially true this year when much fruit has been killed by freezes

Later sprays are intended for the protection of the fruit and should be planned to be placed on trees that are bearing during the later part of June and August.

Commercial lime sulpher should not be used on peaches or Japanese plums but use self-boiled lime sulfur or atomic sulpher. Directions for the use of this material are to be found on packages. Further information regarding sprays can be obtained from the extention department at Iowa State College at Ames.

A FISH WITH LEGS

The latest window attraction in Algona is a live water dog, or water puppy, which is being exhibited at the Jesse Speraw pool hall. The little animal and two or three crawfish have a water tank all their own, and have , for a week, been inspected by scores of curious passersby. Wm. Funk is the man who caught the water dog, and very much surprised fisherman he was, when it left the water dangling from his hook. Mr. Funk, who lives near the Presbyterian church, was at the time fishing in the river near the Magnuson ice house, ad was usig worms for bait. Why the water dog was so named is not known, but probably because its head somewhat resembles that of a bull pup. It has a long body, and its legs are set like those of a German dashund. It has a tail like a beaver an in a general way its shape is ot unlike that of a polly-wog. The body is somewhat snakelike, and has a circumference of perhaps 3 inches. It was necessary to consult an encyclopedia to idetify the animal—or does it belong to the fish tribe From this source it was learned that the water dog belongs to the salamander family. It is provided with a set of larval gills which it never closes. These gills are placed like those on a fish, and are constntly waving. They are protected by prongs protrudig frfom the neck, and are covered with a feathery substance of a dark red color. The prongs and their "feathers" give the effect of a collar.

The water dog in question is evidently ull grown, for the encyclopedia says they mature at 12 iches in length, and this one is apparently that long. The body is spotted brown in color. These water dogs, in America, live among the rocks and weeds at the bottom of lakes and streams and feed on insects, worms and frogs. Anoother window display in the same lline that is attracting curious observers is a small live aligator at the E. J. Skinner hardware store. Mr. Skinner has a sister who lives in Florida and she sent the animal to him.—Kossuth County Advance.

In Successful Farming appeared the following poem, showing why boys and girls leave the farm:

I left my dad, his farm, his plow,
Because my calf became his cow;
I left my dad, twas wrong of course
Because my colt became his horse
I left my dad to sow and reap
'Cause my lamb became his sheep;
I droped my hoe and stuck my fork
Because my pig became his pork.
The garden truck I made to grow
Was his to sell and mine to hoe.

WASHINGTON NEWS ITEMS

Congress Sets Hot Pace

This session if congress will no doubt be one of the most strenuous in the history of the country if the first weeks are a criteron to go by. The members are on the job night and day in a determined effort to bring business conditions back to normalcy. The House has enaceted the emergency tarriff, a bill permiting farmers to organize co-operative marketing associations, the imigration bill and the Navy bill, while the Senate has confirmed the appointments made by the President, approved the Columbian treaty and reorganized the committees for efficient work. The House Committees have been busy also. Especially is this true of the Committee on appropriations, of which Mr. Dickinson is a member. They have reported the Army bill, and are considering a great deal of other beneficial legislation.

The bill regulating future sales of grain on board of trade was reported out of the Committee on Agriculture this week. The Committee had before it the Dickinson bill, the Tincher bill, the Steenerson bill and the Evans bill. They also received suggestions from Secretary of Agriculture, Mr. Wallace, and reported out a combination bill under the name of th Tincher bill, he being a member of the Committee on Agriculture. One of the originators of the law regulating future trading was Mr. Dickinson of Iowa who introduced his first bill on the subject on the opening day of the last sesion of the 66th Congress. He reintroduced his bill, with a few changes on the opening day of the present session and his study of the situation was a valuable asset to the committee in forming the bill which was reported out.

The Budget bill was passed by the House by a vote of 344 to 9 and is the first step in putting Government expenditures under centralized control.

Dr. Flint, President of the Cornell college is in Washington for a few days making arrangements for a commencement speaker for June 8th at Cornell.

E. B. Wilson. President off the First Trust and Savings bank at Des Moines, Iowa, called this week and interviewed several members of the Iowa delegation.

KLEMME'S "GREENHOUSE"

Art Wellemeyer has an annual habit, we might call it, of converting his store into what looks like a fine green-house. As the people cannot very well go to the greenhouse for their plants, Art conceived the idea of bringing the greenhouse to the people, and with this thought uppermost in his mind, he drove to Forest City the other day in his truck, taking with him his wife and two children. The "Mrs." perhaps knew the kind of flowers to plant better than her spouse and we suppose she selected the plants for Art. When the truck pulled into Klemme it looked like it had locked horns with all the garden plants in the state. Wellemeyer gets a fresh load of the green stuff every few days during the present month. It is a great convenince for the people to be able to have the advantages of a ggreen house brought almost to their very door. Yep, some of Art's plants adorn our garden, but— Mrs. Editor did the planting, we did the digging.

Birthday Party

Little Miss Eleis Lau celebrated her third birthday last Saturday afternoon by inviting about twenty-five of her little friends to come to her house for the afternoon. The crowd of little folks went to the school play grounds accompanied by Mrs. Walter Lau, where they played games and enjoyed themselves on the play-ground equipment. After they had played a long time they were again ushered back to Eleis' home where Mrs. Lau had ice cream and cake for the youngsters. All report a most lovely time and are awaiting the time when Eleis will have another ,birthday party.

Laid Bad Eggs, Died As Martyr

Fertile, Iowa.—That the irate Clear Lake wood-butcher who slew his flock of leghorns for laying stale eggs was too hasty with the ax, was claimed here today by a Fertile poultryman who read an account of the tradegy in Saturday's Globe-Gazette.

"While Mr. Thorpe's hen," said the chcicken fancier in a conversation this morning with a local newspaper man, "no doubt went a step too far when she profefred a commodity unfit for the carpenter's table, yet I cannot believe that she meant to offend her owner. Her motive was identical with that of the Britt barnyard prodigy that lays double eggs with a view to curtailing production at a time when the market is glutted and prices are low.

"The Britt fowl resolutely refused to deposit her egg at the proper time; and as a result, a second egg forms enclosing the first. When at last it is dropped in the nest. we have the phenomenon of an egg within an egg—and biddy has scored one point in her effort to stabilize the market; for a double egg counts only one when sold by the dozen. By laying two in one, she lowers production by a small fraction.

"I do not consider the double-egg," he continued, "so much of a curiosity as the tandem egg recently found by my wife. It was laid by a small Bantam pullet that frequents a grassy lot where snakes are known to abound. W think the pullet got the idea for her tandem egg from the snakes, as the repile family is oviparious and produces its eggs in a string-like formation. We are saying nothing, however, about our tandem curiosity as we are perfectly willing that Clear Lake and Britt shall retain the freak egg honor, whether single, double. stale, fresh or hard boiled as the wood butcher who made so free with the ax among his leghorns.

CLOVER FIELDS BEING RUINED

Leaf Feeding Caterpiliars Attacking Red Clover Fields In Iowa

Two species of leaf-feeding caterpillers are seriously injuring red clover fields in southern counties of Iowa. In many cases, according to F. A. Fenton of the entomology departmet of Iowa State college who has been investigating the outbreak, fields are killed to the extent of 75 percent. From a distance they look as if they were burned over but on closer examination it is found that they are literally alive with these worms and that the sprouting clover has in many cases been completely eaten out at the crown, and the plants killed.

One epecies is the larvel stage of the clover leaf weevil, a close relative of the alfalfa weevil. This is the smaller of the two. is light green in color with a white stripe down the middle of the back. The other species is much larger and dull brown in color with a series of diamond shaped markings down the back, ad an indistinct stripe along the side. The pricipal damage is being done by this species which in many fields is the more abundant of the two.

When the fields are mostly killed the only remedy is to burn them over, if there is chaff enough to give a hot blaze. Then the may be plowed under and planted to some other crop. This treatment will kill the majority of the worms and prevent them from giving rise to further broods this summer.

If the clover is ot killed and there are large numbers of the worms in the field they may be killed by cattering the poison bran mash among the worms. This will kill the cut worms but will not control the leaf weevil. The latter is the less injurious of the two and if very abundant is often killed off by an epidemic foungous disease which almost invariably develops. Owing to the large numbers of these weevil larvae in the field and probably that they will be killed by this disease it is inadvisable to turn stock into the fields, as the diseased larvae often cause symptoms of poisoning in animals that have eaten large umbers of them.

One of the best things about war is that it is so all-fired expensive that evn the richest nations cannot afford it very often.

WRIGLEY'S

"AFTER EVERY MEAL"

Mint leaf, peppermint or luscious juicy fruit, either flavor is a treat for your sweet tooth.

And all are equally good for you. Teeth, appetite and digestion all benefit.

Your nerves will say "thank you," your vim will respond.

WRIGLEY'S is liked for what it does as well as for its BIG value at the small cost of 5c.

WERE OTHERS IN THE FIELD

School Superintendent Learned That He Was Not Alone in His Devotion to Fair One.

The superintendent of schools in a small Indiana town recently persuaded the school board to revoke its ruling to employ only single women as teachers in the school. At the first school at which he called he tried to joke the young teachers. "Now you'll all be getting married," he laughed. "Have any of you been getting any proposals since the ruling was passed?"

Accidentally his eyes happened to meet those of the young teacher in whom every one knew he was interested. She thought the question was addressed to her and blushingly answered, "Just three others besides yours."

Amid the roars of the other teachers the young superintendent made his exit from that building. But never since that day has he mentioned the new ruling.—Indianapolis News.

Immune.

James—May I kiss you?

Eileen—They say kissing tends to the propagation of microbes.

James—Well, you kiss me, then. I'm not afraid of them.—Carolina Tar Baby.

DIFFERENT IN THEIR MAKEUP

Boys Together, John Burroughs and Jay Gould Were as Wide Apart as the Poles.

One poignant recollection John Burroughs had of Jay Gould as boy and man, he spoke of in this way: "I was large and strong, while Jay was small and slippery. A boy taught us to wrestle, but Jay would break his hold and land on top. I would say: 'Jay, that isn't fair,' but he would only laugh. Not wanting to be thrown, he resorted to tricks, and because I was indulgent, would wrestle with no one else. He went away to an academy and, when he returned, his father had sold his land and bought a village tinshop. Jay got in with a man and made maps. By and by he left that part of the country and, our lives being no longer parallel, I never spoke to him after that, although I saw him twice.

"One day while I was custodian of a vault at the national treasury in Washington I heard a familiar voice. Looking up from my desk, I saw Jay Gould, dark and thin and wiry as ever, and even then one of the richest men in the United States. He hadn't observed me, and I said nothing."

Even a dumb clock can make itself understood with its hands.

It's So Easy to Make the Change

There's no bother and no sacrifice in turning away from the ills which sometimes come from tea and coffee, when you decide on

POSTUM CEREAL

Then you have a rich, full-bodied table beverage which fully satisfies the taste—and there's no ingredient to harm nerves or digestion.

Thousands have changed to Postum as the better meal-time drink and they don't turn back.

Suppose you try the change for ten days and note the result.

"There's a Reason" for Postum

KEEP CHICKS IN BEST CONDITION

Young Fowls When Old Enough to Shift for Themselves Must Be Given Care.

NEGLECT IS CAUSE OF LOSS

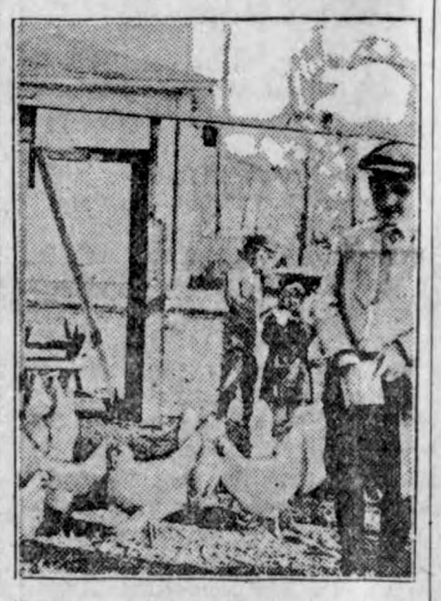
Bulletin Given Out by Department of Agriculture Especially for Beginners Gives Essentials for Proper Growth.

(Prepared by the United States Department of Agriculture)

The enthusiasm with which many poultry raisers, particularly beginners, start in the spring with young chicks sometimes lags as the season advances and the chicks get old enough to shift for themselves. If care is neglected at this period, however, success is improbable. The baby chicks may be smart little fellows from strong, vigorous parent stock, and they may have been brooded carefully for the first two or three weeks, but unless they receive proper care and management during their later growing period they will not develop properly, and many of them will be lost by sickness and disease. This is the timely warning made by poultrymen of the United States Department of Agriculture in Farmers' Bulletin 1111, "Management of Growing Young Chicks," published by the department, in which is given the essentials to proper growth and development of chicks. The bulletin is written briefly and in simple terms for beginners, especially members of boys and girls' poultry clubs.

Suitable Food and Care.

The chief essentials to the proper growth of chicks, according to the bulletin, are good coops, or houses, cleanliness, proper feed and water, shade and free range. Growing chicks should be provided with large, roomy coops or houses, which will give them a comfortable place to stay at night and during stormy weather. The bulletin suggests no particular kind of house, but states it should be so built that it will provide the chicks with



Member of Boys' Poultry Club and His Flock.

plenty of light, pure air and sunshine, and protect them from dampness and storms of all kinds.

Chicks should never be crowded in brood coops, for crowding will cause them to become overheated, resulting in improper growth and sometimes in dead chicks.

Sickness or disease usually starts in unclean quarters, and in such places lice and mites are always more plentiful, the bulletin says. The coops should be cleaned and sprayed once a week, and clean shavings, chaff, or sand put on the floor. Examine the chicks and houses often for lice and mites, and if found they should be gotten rid of at once. Farmers' Bulletin 1110 gives directions for fighting lice and mites.

Feed Right for Rapid Growth.

The three kinds of feeds most necessary for rapid growth are grain feed, green feed and dry mash. A grain mixture should be fed night and morning, giving as large a quantity as the chicks will eat clean, but no more. A good mixture for growing chicks consists of three parts cracked corn, two parts wheat and two parts hulled oats. Kafir corn or rolled or hulled barley may be substituted for hulled oats. A supply of fresh green feed is almost as neecssary as grain for growing chicks. They obtain plenty of it if they have free range, but if kept in confinement, lawn grass, beet tops, cabbage, lettuce or other such green feed should be supplied regularly.

Grit and oyster shells should be provided so the chicks may help themselves whenever they wish. When sour milk can be obtained it should also be kept before the chicks, as no feed is regarded better for them. When this is given the amount of beef scrap in the dry mash may be reduced one-half. Plenty of fresh, clean water is absolutely necessary, and in hot weather it should be provided twice daily in dishes that have been thoroughly cleaned.

The bulletin emphasizes the importance of free range and shade for growing chicks. They are necessary if chicks are to grow rapidly and develop into vigorous fowls. When growing chicks have free range they obtain quantities of green feed, bugs, worms and other things, therefore they require less grain and are less liable to sickness and disease.

KILL OUT DODDER SEED

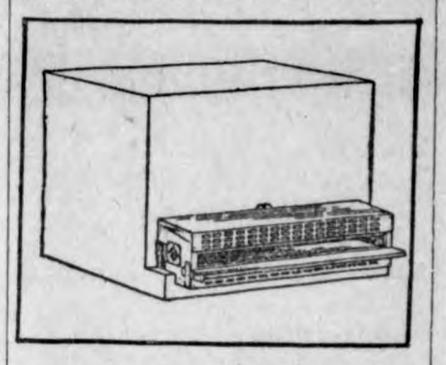
During the first season of infestation in clover or alfalfa, dodder usually occurs in small scattered areas. Such infested areas should be either mowed and removed before the dodder matures seed or else burned in the field. If seed has formed, burning is the only remedy, since it kills not only the plants but also the seeds of dodder which may be lying on the soil surface.

AUTOMATIC TRAP ON BEEHIVE

Primary Object of Invention Is to Prevent Bees From Leaving in Large Numbers.

The Scientific American in describing an automatic beehive trap, the invention of D. S. Rowe of Marseilles, Ill., says:

"The invention relates more particularly to an automatic bee trap. The primary object is to provide means whereby the entrance and exit openings of a beehive may be automatically closed by the weight of the occupants to prevent the bees from leaving the hive in large numbers, which is commonly known as 'swarming.' It is a further object to provide a means by which the ordinary passage of the bees in their performance of gathering honey is unobstructed.



A Perspective View of a Hive, With Invention Attached.

WHITE ANTS INJURE TIMBERS

Insects Enter Wood Wherever It Comes in Contact With Damp Earth and Eat Into Beams.

Winged white ants are often observed flying about houses in spring, and are sometimes supposed to have come in from outside. The bureau of entomology of the United States Department of Agriculture explains that these winged insects really are hatched inside the buildings, and usually are to be taken as indicating nests of wingless white ants working destruction in the timbers.

These insects, which really are not properly ants, enter the wood wherever it comes in contact with damp earth, and often eat into the center of an upright beam without manifesting their presence on the outside until the wood is entirely ruined, and possibly a settling and cracking of the building has resulted.

The department urges that buildings be constructed with such foundations that no wood touches the ground, or if it is necessary to use wood, that it be impregnated with tar creosote. Concrete floors should be laid on a gravel base to prevent dampness and cracking, and where cracks occur they should be promptly filled.

UNIFORM PRODUCTS FAVORED

Find Better Market, Bring Higher Prices and Are Handled at Less Expense Than Others.

Without uniform standards for farm produce there is no recognized basis for the business of buying and selling, says the bureau of markets, United States Department of Agriculture. Standardization of products gives seller and purchaser a common language and a set quality upon which prices may be compared and fixed. Experience has shown that the products which are sold by grade find a better market, bring letter prices, and can be handled at less expense than those sold without reference to standards. Standards have already been fixed for many farm commodities, such as American Upland cotton, shelled corn, wheat, oats, and for small fruit containers. These Federal standards apply only when the product is intended for interstate or foreign commerce. It is highly important to secure state cooperation so that the provisions that apply to a few products will apply to all that are offered for sale.

DIARY OF MUCH IMPORTANCE

Well Adapted to Cost-Accounting Records When Information Wanted on Few Enterprises.

A diary is well adapted to cost-accounting records when information is wanted on only a few farm enterprises, say specialists of the United States Department of Agriculture. If the diary is written up each day it takes but a moment to enter the hours and minutes spent in working the crop, and the necessary notes regarding the cost of seed, fertilizer, and equipment. The common form of diary is a book containing a blank page for each day's record and with space in the back for financial accounts. Another form has a page for each day divided to give space to the records of two years. A similar type furnishes space for a five-year period.

Gives Tanlac Credit For Splendid Hea

T. J. PARKER
4246 Juneau Street, Seattle, Wash.

"I used to think all the Tanlac testimonials were exaggerated, but I have felt thankful a thousand times I ever believed in it strong enough to give the medicine a trial," said T. J. Parker, well-known saleman for Gately's Clothing Store, residing at 4246 Juneau St., Seattle, Wash.

"Several years ago I commenced having periodic spells of sickness and a few months ago I had an attack that I thought would finish me. When I did finally get up, I was scarcely able to go. I had no appetite and what little I forced myself to eat caused so much gas on my stomach I could hardly get my breath.

"At night I was often so bloated I couldn't breathe while lying down and just had to sit up and struggle for air. At times I had cramps so bad I could hardly endure it.

"My liver was sluggish and times I got so dizzy I would fall. I felt tired and miserable time, couldn't even sleep and at a time I wasn't able to go

"Well, a friend of mine me to try Tanlac, and it certain done a good job for me. My tite is fine now and although eating just anything I want much as I please, my stomach gives me the least trouble. I picked up in weight, my strength come back to me, and I am joying the best of health.

"All the men at the store Tanlac put me back on my feet, am glad to give this statement what it may be worth to others."

Tanlac is sold by leading dru everywhere.—Adv.

Prayers in Stock.

Aunty was putting Amy to bed, and she was just about to fall asleep.

"Don't forget to say your prayers, first," gently reminded aunty.

"It's all right, aunty," drowsily replied Amy. "I often skip a night and say two prayers next time instead when I aren't so awful sleepy."

A Lady of Distinction

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores, followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Adv.

Jud Tunkins.

Jud Tunkins says since he looked into a jewelry store window and saw pipes for lady smokers he's about ready to join the anti-tobacco crusade.

Women Made Youn

Bright eyes, a clear skin and a b full of youth and health ma yours if you will keep your sy in order by regularly taking

GOLD MEDAL HAARLEM OIL CAPSULES

Look for the name Gold Medal on eve and accept no imitation

Absence of Disease Isn't Health; You Need Vitality, Energ

You may have no particular disease, and yet fall far short of enjoying real health. To be actually healthy you must be sturdy, alert, vigorous, a-sparkle with enthusiasm and the joy of living—fairly bubbling over with vitality and energy. Are you thus?

If you are well, yet listless and unambitious, it is because you lack some quality that would fill you with vim and drive, and nine times out of ten the sole cause of this lack is found to be disordered, weak blood.

Wholesome blood is the very fountain source of that energy which puts spring into your muscles, snap into your step and sparkle into your eyes. If you want this, begin right now to enrich y blood stream.

You will find, as thousands others have found in the last fi years, that S.S.S. is an excell remedy to do this for you, one th removes the poisonous impuriti and helps build your blood into rich, nourishing supply. S.S.S. an herb compound, discovered the Indians, and still made as th made it.

Get S.S.S. from your druggist t day. Start taking, and then if y want expert medical advice fr write in detail about your condit to Chief Medical Advisor, 862 Swi Laboratory, Atlanta, Georgia.

We are not a preacher but we do preach on paint. umber is high and the best protection for your building is

High Grade Paint

And while we are preaching paint we will say we arry the following high grade house paints in outside hite---

Minnesota Gilt Edge

John Whitte Moco

We have everything you want in paint, all colors too. pecial Prices on Red Barn Paint. Full line of brushes nd tools. Lots of linseed oil. We bought in large uantity at new prices which means---"Reduced Prices."

Don't "Swat the Fly"

You won't have to "swat the fly" in the house if you et your screen of us and get it put on before fly time. Ve have black and galvanized screen in all widths. Make your old screen look like new with our Screen Enael which is easy to put on.

JACOBS & SON

HARDWARE KLEMME, IOWA

Cultivator Time is Coming

"Do Your Shopping Early"

Mr. Farmer you are now busy planting your crop--- good seed and a good planter insures a good stand, but without proper cultivation your corn will not bring a good yield. We have the best cultivators to do the best work.

John Deere and La crosse Single and two-row cultivators

and other good makes will fill that long felt want for a good cultivator and say --- we sure sell them at a low price.

Cultivator Repairs

Get your cultivator in shape now and have us fill your order for repairs. We carry spearpoint shovels in all sizes.

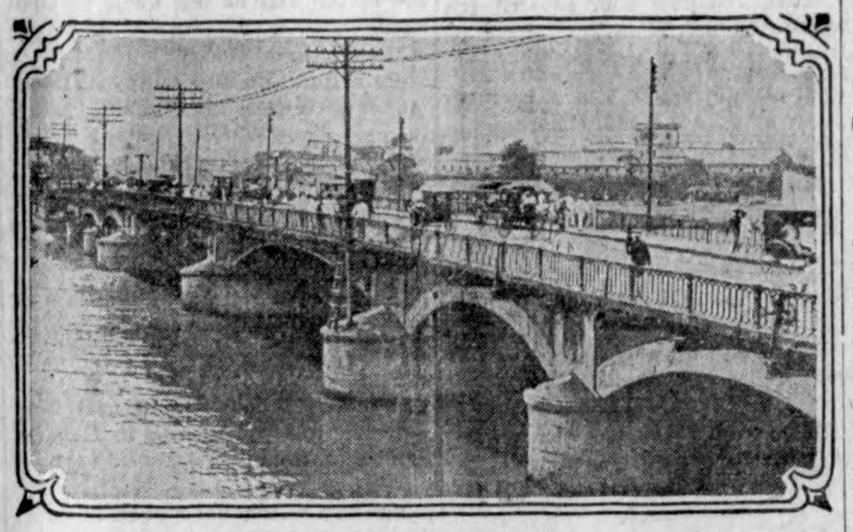
Other Timely Hints

Speaking of repairs - we also have lots of Double-trees, Eveners, Tongues, etc. for all machinery. And say we have a good supply of Rape and Millet Seed--- get yours now. Hot weather is coming and the "Mrs." will want a chicken Waterer and you will want a Hog Waterer, we have both at most reasonable prices.

"If it's for the Farmer, we have it"

W. M. Baack

A Passing Landmark of Old Manila



This is a photograph of the famous old Bridge of Spain, Manila. It is now a departed landmark of the Philippines, for its place has been taken by one of the finest bridges in the entire Orient, the new Jones bridge.

The Jones Bridge is named in honor of the late Congressman W. A. Jones of Virginia, author of the Jones law of 1916 which promised the Filipinos independence upon the establishment of a stable government.

The old Bridge of Spain is called "the mother of Manila's bridges." The original bridge was built of pontoons sometime between the years 1590 and 1600, being known as the Bridge of Boats. The stone bridge shown above was built about 1630. It was twice damaged by earthquakes, and was once partly demolished by a flood.

PRESS COMMENT ON PHILIPPINES

The Philippines!
(Shenandoah (Ia.) Post.)

Our idea of the Philippine question is to get out as quickly as possible and stay out. What do you say?

Our Little Brown Cousins
(Argus, Rock Island, Ill.)

There is no mistaking that Filipinos want their independence. And it is just possible, as they insist, that they in the islands, better than we Americans over here, are the best judges of whether they are fitted for independence. The United States wants no outburst in the Philippines as England faces in Ireland. The easiest way to head off a rebellion is to give the islands their independence before they have cause to rebel.

Shall We Let Philippines Go?
(Cedar Rapids (Ia.) Republican.)

The United States cannot continue to hold the Philippines unless this nation wants to give the lie to its own professions in the matter. The United States must keep faith with the world. The American people do not want the Philippine Islands to become their Irish question.

Filipinos Are Making Headway
(Mt. Vernon (O.) Republican-News)

The Filipinos are making an intensive and intelligent campaign for independence. They are urging their claims with shrewdness and vigor. They declare that they have proven beyond question that they are capable of self-government, and they believe that with independence the Filipino will so conduct himself as to gain the respect of the world.

Here's a Real Argument For Philippine Independence

A Typical Philippine Homestead

The United States isn't the only country that has homesteaders—those enterprising pioneers who leave thickly populated districts and take their families into virgin territory to create homes for themselves. The Philippine islands have thousands of thrifty homesteaders.

The above photograph shows a picture of a Christian Filipino homesteader and his family near Pikit, Cotabato province, Mindanao, P. I. Five years ago he was a cab driver working for low wages at Cebu, a thickly populated city. He went into the then wilderness of Mindanao, planted hemp and cocoanuts, paid for his land and has become wealthy. Thousands of similar instances could be cited. One Mindanao homesteader is worth $200,000.

The Philippine government is encouraging the immigration of Filipinos from the thickly populated sections into Mindanao. This is the second largest of the islands of the archipelago. It is still sparsely settled, although it is one of the richest and most productive islands in the world. Many Americans have established plantations there and become rich.

Filipinos are using the stories of the many successful Filipino homesteaders as an argument for independence. They make the point that a people that can go out into a tropical wilderness with no capital save their patience, perseverence and energy and win homes for themselves, have the necessary stamina to run their own affairs.

ASKS INDEPENDENCE WITH OR WITHOUT PROTECTION

Manuel L. Quezon President Philippine Senate

Manila, P. I. — The people of the Philippines want independence in whatever form they can get it, Manuel Quezon, president of the Philippine senate, declared in an address before that body.

"Let the Americans in the Philippines and those in the United States know that the people of the Philippines covet their freedom, liberty and political emancipation so much that they will not hesitate to receive from the Congress of the United States complete and absolute independence without protection," Quezon said.

"If the United States, dictated by its own interests, decides to extend protection to the Philippines, well and good. We would accept that as a solution of our problems. If not, let us have absolute independence in whatever form we can get it."

President Quezon declared that if the question were put before the Filipinos for a vote, 98 per cent would favor absolute independence.

We have frequent occasion to test against the efforts of Japa impose her dominion upon unwilling peoples, yet we have thus far failed to exemplify the ideals which we recommend to Japan. If we should withdraw our sovereignty from the Philippines, in accordance with our repeated promises, we could the more consistently ask Japan to follow a similar course toward Shantung, Manchuria and Siberia. Our plea would have a great deal more force if we could make it with clean hands. To say that the Philippines are not ready for independence is merely to express an arbitrary, gratuitous opinion. It is perfectly easy to create conditions—in one's own mind—that no people ever could comply with. Our delay about respecting our own pledge is a reflection on our national good faith and a constant invitation to international complications in the far east.

INDEPENDENCE OF PHILIPPINES

(Atascadero (Cal.) News.)

The Philippines should be given absolute independence, which is their natural right, even if we are well aware that they have not yet reached the full stature of Americanism. We ourselves have not reached it so long as we insist upon governing other peoples against their will.

AMBITION SOARED TOO HIGH

Pioneer Grape Grower Unfortunate Was Not Satisfied With First Really Excellent Results.

A hundred years ago Dr. C. W. Grant bought a small, rock-ribbed island in the Hudson river nearly opposite Peekskill. There was a general laugh at what people declared to be his folly, as the island was so barren and worthless that it did not seem possible for anything to grow there. Dr. Grant, however, had ideas of his own, and he began a growth of grapes on the then new variety, the Delaware. In a very short time the island was known to grape growers all over the country, and Doctor Grant was declared to have done more for grape culture than any other man in America.

The great business enjoyed by the physician turned his head, and he began to work toward a scheme that would turn the island into a paradise of growing flowers, especially magnolias and rhododendrons, and he hoped to give seed or cuttings to every home in America. The result of his attempts was bankruptcy, and he left the island, which soon went back to rock and barren soil.

BEASTS MAKE GOOD ON FILMS

Eastern Journal Makes Unkind Comparison Between Four-Footed and Human Actors.

It was said at a recent meeting of the London Zoological society that the plan of making, and keeping on record, films of rare animals had been entered upon with considerable success, the natural movements of the beasts having been reproduced on the screen in a most interesting and instructive manner. It is indeed reasonable to suppose that the four-legged film actors may even be more successful, from an artistic standpoint, than their human colleagues; first, because their motions are naturally intelligible without the accompaniment of spoken language; and second, because they cannot be trained, as "movie" performers apparently are, to chop up their movements into a limited number of stereotyped gestures, in more or less regular sequence, which audiences presumably know by heart and may anticipate well in advance.—Christian Science Monitor.

IN THE WAY HE SHOULD GO

Father Determined to Spare No Pains in the Proper Upbringing of His Offspring.

In Chicago they tell of the great pride which the parents of a certain lad take in him. Father is determined to make him a great business man, a veritable captain of industry.

One day the mother heard loud screams emanating from an adjoining room and rushed in to investigate the cause. Father was vigorously administering chastisement to the young hopeful.

"James! James! Why are you thrashing Harry?" demanded the wife.

"Because I caught him in a lie, that's why," said the father, continuing the thrashing.

"A lie? You say a lie?"

"Yes! I will teach him to lie better than that if I have to break every bone in his body!"

Mr. Ryetop's Little Mistake.

"Good Morning, Mr. Ryetop," said the waiter, "I hope you enjoyed that old Scotch I left in your room when you were out."

"It was pretty fair," drawled Ryetop, rubbing his parched lips, "but the siphon you sent up had the strongest stream of fizz water I ever tackled. The blamed thing came near blowin' me through the window."

The waiter looked puzzled. "Siphon? I didn't send up any siphon."

"Yes you did. It was red and bound with brass bands."

"Great Scott! That was the automatic fire extinguisher!"

In Full Foliage.

Pretty little Joan was a town-bred little girl, and the holiday she had been looking forward to with very great glee arrived when she was allowed to go down to spend a fortnight on her country aunt's farm.

One morning, while walking in the orchard, she saw a peacock for the first time with its beautiful feathers spread out to its full extent.

Running to her aunt, the little maid cried:

"Oh, auntie, do come and see! There's an old chicken in bloom!"

At That She May Be Right.

"I don't like that man."

"Why not?"

"Every time I see him he tells me I'm looking younger."

"I should think you'd be pleased to receive such a compliment."

"Not at all. No man ever says that to a woman unless he thinks she is getting old.

Truth About Father.

At dinner mother was astonished when my small brother, attracting the attention of the guests, remarked: "We're so glad you're here. Papa is nice when we have company, but you ought to hear how he scolds mamma when you're not here."—Exchange.

Mrs. John Schwichtnberg were at Garner Tuesday on business.

Mrs. H. S. Schlei has been on the sick list for some time, according to reports.

Rev. and Mrs. Ortmeyer, of Forest City were visitors with Mr. and Mrs. Albert Yahnke last Friday.

Art Wellemeyer was at Des Moines the latter part of the week on business.

Pete Peterson and family of Goodell were visiting in Klemme Saturday.

Hart Harberts and family from the town of Goodell were shopping in Klemme Saturday.

Alma Ruka and Miss Thompson of Belmond, were Klemme visitors on Saturday.

Walter Newberger and wife from Ventura were shoppping in Klemme Saturday evening.

Sunday would have been an ideal day if it hadn't of been so windy and dusty.

Mrs. Lena Schroeder and Mrs. Henry Barz were Garner visitors on Monday of this week.

Mr. and Mrs. John Velau and Mrs. Chas. Velau drove to Mason City last Thursday.

Miss Viola Sampson, who has been visiting relatives at Atkinson, Wisconsin for som months, returned to Klemme last week.

Mrs. Bert Dutton's folks came to see them last week from Alden, Ja. Her parents are 81 years old. They returned again Saturday.

The County Eigth Grade Examinations were held last Friday. There were quiet a few Klemme pupils who took the work.

Mr. Green and son were business callers at Garner Monday morning between trains. Mr. Green is the man who works in the Pavey blacksmith shop.

Mr. and Mrs. Henry Rusch, who have been visiting the Lau families for the past two months, returned to their home at South Haven, Michigan last week on Wednesday.

Milton, Homer and Roxanna Shaper, Clarence Tanner and Mildred Andrson drove to Charles Cty last Sunday morning for a visit with friends. All returned to Klemme the same evening except Miss Roxanna who remained until Tuesday evening.

Little Dorance Day, son of J. N., took in his first school picnic last Friday when he went to the country school taught by Miss Donna Baumgartner. Miss Donna's school closed on that date for the summer vacation.

Fishing Season opens on Sunday, May 15th. Many of th Klemme fellows have made plans to take in the first day at the lakes. Fishing should be good this year at Clear Lake as the fries they dumped in there a couple of years ago should be nice size now. Get out your rod and reel fellows and let's go!

The Kanawha Reporter says that their sewerage system is almost completd. The sewerage system in this city will also be completed in a few weeks if the ditchers continue having good luck, they will finish in a few days with the digging. The gang who are puttng n the dsposal plant are also making rapid progress and will soon finish their job.

Carrol and Norman Lau, sons of Aug. Lau, Jr., had a little excitement with their car last Saturday afternoon. They were returning to their home and turned out when they met another car. Something went wrong with the stearing gear and the car cut a few fancy capers and then tipped over No one was hurt and the car received only a broken wind shield and bent fender.

Pete Merkel met with a rather severe accident last Friday afternoon while he was working with his tractor. The machine had become stuck in a tile ditch and Pete put a jack under it to raise it out again. It was while working with the jack that he had the accident. He was pulling on the lever when the jack slipped out from under the tractor and struck him on the head, rendering him unconscious for some time. Pete's facial beauty was considerably marred up for a time but he is shaking hands with himself that it was no worse.

"Where a Dollar Does Its Duty"

Mason City, Iowa **Manly, Iowa**

In the Hardest Market in Years The Haynes Scores Greatest Success

states Alton G. Seiberling, Vice President and General Manager
The Haynes Automobile Company, Kokomo, Indiana

This is the greatest year the Haynes has ever known. It is far exceeding last year and the year before, when production alone measured the volume of sales. That was a "sellers' market," and little if any work was necessary to sell a car.

To-day things are different. People are scrutinizing their purchases. They are insisting that every dollar shall buy its full value.

And to-day the sales of Haynes cars are exceeding those of last year by one-third. The volume of sales is 133⅓ per cent. of any previous year. So great is the demand for the Haynes that to-day in our big factories at Kokomo we are employing 16 per cent. more men than ever before, even in the big rush days of last year and the previous one.

There is just one big impressive reason for this. When anybody sees the Haynes and studies it until he knows its worth he wants it. The Haynes 50—the smaller and lighter six-cylinder, five-passenger touring car introduced the first of the year—has swept the country. Never before was a motorist offered such value. When you realize that it is on a par in quality and workmanship with the larger Haynes models you sense the extreme desirability of the car.

Although we had prepared for a large volume of orders, the demand is already so great that deliveries are apt to be delayed. We urge you to select your Haynes now so that you may have it in good time.

THE HAYNES AUTOMOBILE COMPANY, KOKOMO, INDIANA
EXPORT OFFICE: 1715 BROADWAY, NEW YORK CITY, U. S. A.

MONEY TALKS

The time to save is in the strenght of youth when acquiring is most easy.

When later years come the power to do has diminished but the needs of life have not become less.

Today is the time to lay by the store. Promise yourself a bank account, and, once you learn to obey the dictates of good reason, you will ward off the hardships of life.

Some FACTS About

Ford

THE UNIVERSAL CAR

Here are authentic figures from the Ford factory at Detroit. They show you just how many Ford cars and trucks have been built each month since January 1 1921 and how many have been sold to retail customers, in the United States.

	Produced		Delivered to Retail Customers
JANUARY	29,883		57,208
FEBRUARY	35,305		63,603
MARCH	61,886		87,221
Total Production	127,074	Total Retail Sales	208,032

showing the actual sales for the first three months of 1921 exceeding production by 80,958 Ford cars and trucks!

April requisitions already specify 107,719 additional cars and trucks and the estimated April output of the factory and assembly plants combined calls for 90,000!

These facts clearly show that the demand for Ford products is growing much faster than the manufacturing facilities to produce and were it not for the dealers' limited stocks, which are now being rapidly depleted, many more customers would have been compeled to wait for their cars. It will be only a matter of weeks, therefore, until a big surplus of orders will prevent anything like prompt deliveries.

If you would be sure of having your Ford car or truck when you want it you should place your order now. Don't delay. Phone us or drop us a card,

ED. G. ELL

ARMERS TO HAVE POULTRY CULLINGS

The board of directors of the ounty Farm Bureau met in Britt onday afternoon. On matter of portance taken up was that of lding poultry culling demonstrations. It was voted to send L. B. Rue. of Forest City, to Iowa State ollege, Ames, to take a course in ultry culling in June. It was also ted to hold a poultry culling demstration in each of the one huned and forty four school districts Hancock County, being one to ev- four sections, these to be given July and August.

With the lower cost of feeds Biddy comes one of the most important oducts of the farm and the object ll be to cull out the non productive s and keep only those that will oduce a large umber of eggs. It s been demonstrated that a laying n can be fed as cheaply as one t lays but seldom. These demonstrations should prove profitable the farmers of Hancock County. Britt News-Tribune.

SAVE AND HAVE MAYONNAISE

Can Be Made Easily and at a Reasonable Cost to Consumer

Mayonnaise, a product so desirable in the concoction of salads in American homes, ca be made easily and at a medium cost, say the home economics department at Iowa State College.

In saving time follow this rule. Place a whole egg in a bowl, beat and add seasoning to taste, with a teaspoon of salt, one fourth teaspoon of mustard, and one eight teaspoon of paprika or white pepper. Then add oil starting with one eight cup of oil and beat well and add until you have used a cup o oil. This will give a good thick dressing which may be thinned later by adding one fourth cup of vinegar or lemon jnice This is much simpler, say the experts than adding oil drop by drop and the dressing is the same value.

Money can be saved by taking this mixture of salad dressing and adding the following to it. which not only makes the dressing go twice as far but it removes the oily taste so objectionable to some people. Take three level tablespoonsof cornstarch, one fourth cup of cold water and mix till smooth. Thenadd one cup of boiling water andcook until this mixture is transparent. Add salt to suit taste and mix this with dressing. Serve the same as the old fashioned kind of mayonnaise.

KLEMME CONCERT BAND NEWS

In spite of the threatening storm Tuesday evening, the rehearsal was well attended and a great deal was accomplished. Under the able leadership of Mr. C. F. Ecklund of Britt. the band is getting on its feet again. Those who still absent themselves from rehearsals are missing a good deal, but we realize that it is not possible for some to be present every time. However, we will soon be in shape to render the customary concerts if the members of the band will practice the composition in their Artarmo band books at home and then come to the next rehearsal on Friday May 20th. This night has been selected because of the class play on Tuesday, the 7 Cairns Bros. on Wednesday, and ov. Kendall's address at Garner on Thursday evening. All members will save the Band considerable money by being on hand early so we can start to practice promptly at 7:45. And please remember that each instrument is essential. Thank you.—Secretary.

TWO-SWORD MEN OF JAPAN

With Their Disbanding, Comparatively Few Years Ago, the Secret of Blademaking Disappeared.

As late as 1868 there were some 400,000 two-sword men in Japan, highly trained fighters attached to the nobles of the land in bands ranging from two or three, to an entire army. When the revolution came the work of the two-sword men was done, the nation was made into a solid unit and the strength of the blade carriers was needed at plow and bench.

With this disbanding, an exchange explains, the trade of the swordmaker was also lost to the vast number following it, and with them, as the years passed, died the secrets of the warrior tools. Swords can be obtained in Japan today whose blades are so keen they can cut through a veil or a sofa cushion, and also can be driven through a bar of iron, provided the wielder has the strength. Others have blades covered with a beautiful and intricate tracery that disappears and reappears at odd times, and no one can solve the "why" of it. One moment the blade is as smooth and unmarked as a mirror and the next the design leaps out before the eye of the startled beholder and can even be felt by sensitive fingers. Yet other blades are colored red, blue, silver or gold, and while seemingly an alloy, a chemical analysis shows nothing but steel. Yet others are coated with a poison that is unseen, but beyond all other poisons deadly. In large part it consists of decayed human blood.

RACE SOON TO BE EXTINCT

Evils in Wake of Civilization Have Spelt Doom to the Polynesians of South Seas.

That modern civilization is bringing death and extermination to the splendid race known as the Polynesian, is the claim of all travelers who have spent time on the beautiful southern Pacific islands. Charles Bernard Nordhoff, in the Atlantic Monthly, in sorrowing over this says:

"To say that Christianity was their undoing would be absurd; they died and are dying under the encroachments of the European civilization of which Christianity was the forerunner. Everywhere in the South seas the story has been the same, whether told by Stevenson, or Melville, or Louis Becke. We brought them disease; we brought them cotton clothing (almost as great a curse); we suppressed the sports and merriment and petty wars which enabled the old islanders to maintain their interest in life. And lastly, we brought them an alien code of morals, which succeeded chiefly in making hypocrites of the men whose souls it was designed to save. Today there is nothing to be said, nothing to be done—the Polynesian race will soon be only a memory."

New Method of Identification.

Not only are the finger prints of every human being different but the position of the bones of the fingers, and also the shape of the nails are different. Doctor Beclere, a well-known student of radiography, utilizes this fact in a new method for identifying criminals. The method consists in making an X-ray photograph of the hand, showing the bones and the fingernails. Ordinarily such a photograph would not show the flesh, but in order that the record may be complete the fingers are soaked in an opaque salt, by means of which all the lines and marks are clearly shown. Doctor Beclere considers that the possibility afforded by his discovery of keeping a record of nails as well as of finger prints should prove of the greatest use in identifying criminals.

Vast Wealth in Liberia.

The Sun and New York Herald a few weeks ago was probably the first newspaper in our country to announce that Liberia, in West Africa, had just come into view as very rich in natural resources, both agricultural and mineral. It is nearly as large as the state of New York, fronts on the Atlantic for about 300 miles and its coast belt is only about twenty miles wide. North of the coast belt the whole country is a vast forest, through which Sir Alfred Sharpe of England has recently penetrated. He has informed the Royal Geographical society of the enormous population of this, till now, unknown forest land and of the unexpected resources, including gold and other minerals, that await development there.

Radio Control for Airplanes.

There can be doubt that if the war had lasted a few months longer we would have witnessed the leading armies employing great fleets of airplanes controlled by radio means. The United States army had progressed pretty far along this line when the armistice was declared. The same can be said for Germany. Now we learn that the French have demonstrated that five or six small and inexpensive bombing planes, without pilot, can be successfully guided by a "shepherd" in a larger plane through the means of Hertzian waves.—Scientific American.

Repairing our Speciality

When it comes to repairing and overhauling automobiles and tractors of all makes you will find we are experts

We are Ford Experts

We know Fords as well as Henry himself and we use only genuine Ford Repair Parts--if you want real Ford mechanical Service let us do the job for you.

Accessories --- Tires

We carry a full line of auto accessories, repairs, etc. Fisk tires and tubes in all sizes and styles.

Yours for SERVICE,

s Miss Van T

bing her heart out and Mr. Randolph was standing in the bewilderment of one who knows he has not only taken the wrong turning but placed both his feet in a beartrap, a thick, heavy, unsympathetic voice arose from the foot of the steps.

"Here! Youse! Break away an' come along of me."

Memories of a mischievous boyhood swarmed to Mr. Randolph's mind, recollections of those days when, as chief of the Madison Square gang, his ears had tingled to the cry of "Cheese it, de cop! We'se pinched, fellers!" A cold sweat came out upon his brow; he slowly relaxed his grip on Miss Van T.'s person and whispered tremulously to her to keep her nerve but hand him her latchkey.

Over his shoulder he said with forced calm, "On what charge, officer?"

"Same old dope," replied the policeman phlegmatically; "drunken, disorderly. Come along, now, er d'yer want me to climb them steps so's we c'n all roll down together?"

During that speech Mr. Randolph made a lucky shot at the keyhole, stealthily turned the lock and opened the door. "The way's clear, Madge," he whispered. "Beat it."

"Oh, is it, Bobby, you dear," rattled Miss Van T. in a stage whisper that could be heard across the street. "I didn't mean it, really, what I said about hating you. But I do love Beacher, Bobby, and I'll—I'll—"

"For heaven's sake, Madge," groaned Mr. Randolph, hearing sounds as of a bear starting to swarm a tree, "keep all that till New Year's."

"I was just going to say," continued Miss Van T. breathlessly but with a cold eye fixed on the cumbrous shad-

"Break Away an' Come Along of Me."

ow coming up the steps, "that I'll owe it to you, Bobby. I'll owe it to you. D'you understand?"

"Sure," lied Mr. Randolph as he pushed her firmly through the door, then caught its knob, slammed it shut and turned to meet Nemesis. "Hello, Flahaharty!"

The huge policeman stopped his ponderous but sure progression and stared long and suspiciously into Mr. Randolph's face. Finally he gave a grunt of recognition. "Slim," he said to himself aloud as though somewhere within his vast bulk there were a separate monitor that had to be tipped off to the situation, "Slim Hervey."

"Sure," said Mr. Randolph, leading the way toward his wagon. "Who else did you think it was at this time o' night?"

"How did I know," demanded Mr. Flahaharty gruffly but not unpleasantly for him, "as you had taken on deliveries o' fancy dress-goods on top o' your regular line?"

He breathed heavily and allowed his eyes to protrude farther than usual in search of a thought which he sensed in the near distance. "I tell you, Slim," he finally continued, "I don' know what this burg is a-comin' to. Why, even the street kind used to have a man to take 'em home, but this here was a bit o' high-flyin' fluff—me, I could see that—an' they had to give it to a cab!"

"Forget it," said Bobby nervously.

"All I says," continued Mr. Flahaharty, "is thank God both o' my goils is married to hairy men that can an' does lick the stuffin's outen 'em."

"Well, here we are," said Mr. Randolph as he stooped to turn her over. From his seat behind the wheel he began to breathe more easily and leaned out to study the face of his friend, the officer, to make sure that therein was no guile.

"Cheer up, Jim," he said not quite

"I'll try," said Mr. Flahaharty dubiously, "but it'll come hard, bein' the first time I ever seen a thing like that. She sure give you a tussle, Slim!"

PART III.

Maid's Adventure.

Take a young girl of about twenty who, in her childhood, was pampered of fortune in money, position, good breeding, and pets, turn her loose on the world at the age of ten with no prop but a faithful, sickly and destitute old nurse, kill off the nurse a couple of years later, let the girl fend for herself as scullery-maid and what not through the uninteresting stage that precedes the sudden bloom of unexpected beauty, give her a long succession of jobs secured "on her looks" and lost because she wouldn't, lead her up to the crowded portal of despair and the long-drawn-out surrender; then snatch her suddenly back from destruction, feed her, give her the sole freedom for a night of Mr. Robert Hervey Randolph's comfortable apartment and—what will she do? The answer is easy. She will find the bath and turn on the hot water.

That was the very first thing that Miss Imogene Pamela Thornton did after she had finished spying from the window on the movements of what she supposed was Mr. Randolph and what, in reality, was Mr. Patrick O'Reilly in Mr. Randolph's best top-hat, best suit of evening clothes and overcoat, best gray silk muffler, price twenty-two dollars, and best patent-leather shoes—the last a very tight fit which made the revamped gentleman's gait a cross between that of a chicken on a hot stove and a drunk on his reluctant way home.

Even the unsuspecting Miss Thornton was puzzled by that halting locomotion in connection with what she knew of Mr. Randolph, but she added it, two and two, with the mysterious twenty minutes spent by that gentleman and the driver in the recesses of the cab, apparently to settle a difference in ideas as to the value of a waiting taxi, and decided that poor Mr. Randolph must have issued from the interview in a semi-crippled state.

She herself was too excited to let pity altogether absorb her. Without waiting for either the tortured wayfarer or the taxi to get quite out of sight, she dropped the window curtain and turned to possess herself of her world of comfort for a night. A starved instinct led her straight to the luxuriously appointed bathroom. As previously intimated, she turned on the hot water and clasped her hands ecstatically as she watched its crystalline surge and imagined she could smell the opalescent steam.

But not for long was she inactive. Having surrendered to circumstance to the extent of promising to stay in the flat until ten the following morning, she decided to do the job wholeheartedly, for Imogene Pamela was one of those lucky and fated young women who can never give themselves by halves. If happiness so much as showed its nose, it was her nature to tackle blindly for its waist and go to the mat for the immediate present.

Consequently, let not her modesty be misjudged when it is related that, in the short time it took to fill the bath, she accomplished the following: Rooted out Mr. Randolph's best silk pajamas, found his softest bathrobe, filled a hot-water bottle and slipped it far down between the too cold linen sheets of his big bed. Continuing at this rate of achievement, it may be imagined that in ten minutes more the young lady, having bathed, was curled up and sound asleep. Not on your life!

Item: It took her twenty-one minutes by the clock to scrub out the memory of the scabby zinc bathtubs of many years. Item: Twenty more minutes to wash her hair. Item: Half an hour more to scrub her underwear and stockings. Assorted items: Various pauses during which she shamelessly looked at herself in a full-length mirror of such pure reflecting qualities as had not crossed her path since England was a pup. After that, a long, entrancing item, called "drying her hair."

Did you blame her, three lines back, in your heart for her frequent inspections of self in the mirror? If you did, look at her now! Mr. Randolph's bathrobe is billowed at her waist and tied tight to keep it from trailing on the floor; for almost a like reason, its sleeves are rolled up above her elbows. It is open in a V at the neck, showing the adolescent curve of a virginal but much excited bosom.

With a woolly towel in both hands, she plants herself before the staid old looking-glass and gives it such a treat as it has never before savored in its sixty-two years of service to the Randolph family. Rub, rub, rub with the towel. Her cheeks grow pink and pinker, her eyes round and rounder. They twinkle and smile, and once, when she made a little face at herself, they laughed out loud. Her hair slowly wakes from its stringy dampness until it, too, bursts into a sort of light and curly merriment. Pamela puffs out her cheeks and blows at its reflection.

(TO BE CONTINUED.)

Arbitrage.

This is a term applied to transactions taking advantage of difference in price in different markets for the same articles. At the same time that the trader buys in the cheaper market he sells in the dearer. The margin between the two prices must be more than the cost of exchange in order to show a profit. Arbitrage transactions are usually in bullion or coin, bills and exchanges or stocks and bonds.

"FOUND"

By JACK LAWTON.

(©, 1921, Western Newspaper Union.)

In all his young life Jimmie had never before known the meaning of the word discouragement. His college career had been a joyous time of successful preparation, this first business position but a stepping stone to a greater. When the "greater" was won Jimmie felt his future assured. Then, lo! His castles fell in ruins. Jimmie's services were no longer required. The great plant which during the war had prospered was now reduced to economic necessity, and Jimmie, one of many satisfactory employees to be dispensed with.

He was stunned by the unexpectedness of it, as he stood in the spring sunshine.

But the prettiest girl that he had ever seen sat on the seat toward his right, among the bus passengers. Her cheeks had caught the stinging caress of the breeze, and her eyes were the purply hue of the country violets she wore. The girl's hat was not modishly new like those about her; it was still evidently a winter hat, which had weathered many storms.

Jimmie saw the light of adventure glow in the girl's eyes, as she viewed the great boats on the river. He noted her wondering surprise, as they passed the marble palaces of the rich. And with every mile Jimmie's observance and Jimmie's blissful interest grew, until past misfortunes seemed of no concern at all in face of this marvelous event of love at first sight.

Jimmie had scoffed at the idea before. Now his one overwhelming fear was that the girl should descend presently those twisting bus stairs and be lost to him forever. A man on the seat beside him was obliged to nudge him twice in order that he might pass. Jimmie nodded apologetically; he recognized in the white-haired man an occasional companion at his favorite restaurant table.

The man usually boarded this bus at the noon hour and sometimes again at night. Jimmie was desperate when he realized that the next stopping place would be his own. For a moment he was tempted to ignore its significance, but Mr. Brothers would be in his office at this hour, and it was with Mr. Brothers that Jimmie hoped to find employment. If he delayed, the position offered might fall to another.

With a sinking sense of loss Jimmie made his way to the office building and entered an elevator. At the fifth floor he stood, ascertaining his direction.

Then, unbelievably, a girl came from a later arrived elevator to breathlessly face him. It was the girl! Jimmie gasped. Her cheeks were pinker from her haste and her eyes seemed bluer in their earnestness. She thrust a bill purse toward him.

"There!" she exclaimed, in the soft sort of voice Jimmie had known she should have, "is your purse. You dropped it on the bus seat; I followed you all the way here."

Jimmie looked speechlessly down on the well-filled purse; absently he read a name on the identification card within.

"It isn't mine," he remarked discouragingly.

The girl stared; her bright satisfaction vanished.

"Then, whose?" she began.

Jimmie came to himself with a joyful start. Here was the one girl in the world at his side. Here was a glorious springtime afternoon before them. Opportunity sometimes knocks but once. Jimmie grasped his opportunity.

"I think," he said, "that it probably belongs to the white-haired man who sat beside me. He often takes dinner at night in the restaurant where I do. If you'd let me take you there later, and we could ride down on the bus on our way, you might be able to restore to the man his property."

The girl hesitated. Frankly she studied Jimmie's face; then, evidently assured, she smiled and a friendly dimple peeped forth.

"All right," she agreed. "You do not need a recommendation as to honesty, at least."

The white-haired man was seated at the restaurant table when two smiling young people abruptly joined him.

"We know this is your purse," Jimmie greeted, "for the waiter has told us your name. But, perhaps, as a matter of form you had better identify the contents."

The rightful owner looked back questioningly from his regained property.

"I have inserted an ad in the 'Lost Column' of this evening's paper," he said, "offering a reward for return of the purse. May I hand that reward to you now?"

"If you please," the pretty girl interposed. "We have learned, Mr. Ware, of your great business interests. Mr. James Brandon is anxious to find worthy employment. Perhaps you could help him in that."

The white-haired man's shrewd eyes regarded Jimmie.

"No doubt," he promised, "we may be able to come to an arrangement."

He turned to the pretty girl. "And you?"

"I," she replied, "have just come in for the day from Balcom's Corners."

"You will like Balcom's Corners," she told Jimmie later. "When you come out at the week's end, the lilacs will all be in bloom."

"You bet, I will," said Jimmie.

FARM POULTRY

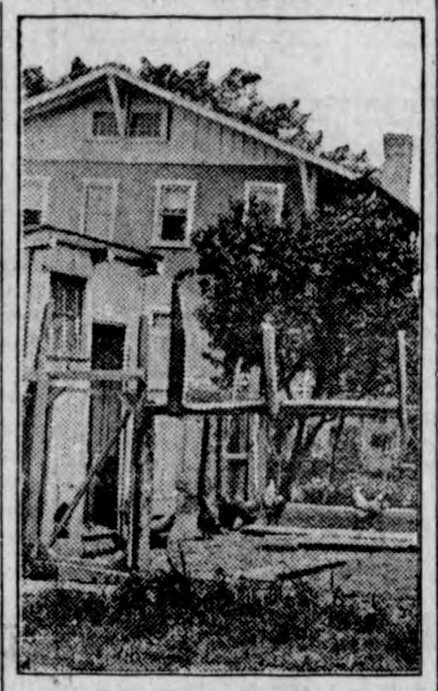
WIRE FOR FENCING POULTRY

Two-inch Mesh Is Most Commonly Used and Can Be Purchased at Moderate Price.

(Prepared by the United States Department of Agriculture.)

Wire netting, two-inch mesh, is commonly used for fencing poultry yards and can be bought at a moderate price. Where several runs are adjoining, three-fourths of an inch or one-inch mesh wire should be used at the bottom to a height of two to two and one-half feet to keep the males from fighting one another.

The height of the fences should be regulated by the variety of fowls. The heaviest breeds, like the Brahmas, may be restrained by a four-foot fence, and



Variety of Fowls Should Regulate Height of Fence.

most of the other breeds can be kept in by a six-foot fence. Hamburgs and Leghorns may be kept in the yards by clipping the flight feathers on one wing. Gates should be provided in order to permit access from one yard to the next.

If convenient, it is well to have double yards, for then one may rotate green crops. The yards may be sown to oats, wheat, or rye, and while the fowls are using one yard the green feed in the other can be getting a fresh start.

When the yards are to be on only one side of the house, they should be on the south side in order that the fowls may have the benefit of the first dry ground in early spring. It not infrequently happens that in localities where snow is abundant the ground on the south side is dry many days before that on the north side.

If the yards are to be in permanent sod and are to furnish green feed for the fowls, 70 to 80 square feet should be allowed for each bird, poultry specialists in the United States Department of Agriculture say. If part of the green feed is to be otherwise provided for, and the yards used mainly for exercise grounds, 35 to 40 square feet per bird will be sufficient.

Shade of some kind should be provided, and this can often be advantageously furnished by planting fruit trees (such as pears, plums, cherries, and apples) in the yard.

GRIT SUPPLY IS ESSENTIAL

Material Takes Place of Teeth in Preparing Fowl's Food for Further Digestion.

Grit is essential to the health of fowls and to economy in feeding. Grit takes the place of teeth in preparing the feed for further digestion and is required for the proper preparation of feed in the gizzard. When the feed is not properly taken care of in this organ, an undue strain is thrown on the fowl's system, often resulting in disease and also allowing much of the nutriment to pass through the bird's body without being absorbed. In every pen or yard a box of grit should be kept. Recent investigators have asserted that grit is a part of the necessary feed of a flock, giving the fowls strong bones and a bright plumage.

Ordinarily, the hen does not consume enough lime to form the shells of eggs, if she is laying abundantly, unless something besides the ordinary grain feeds is accessible to her. Oyster shells are very good for this purpose. A box of crushed shells may be placed before the fowls, allowing them to eat at will. Old mortar and fine gravel are also useful in supplying lime, say poultry specialists of the United States Department of Agriculture.

Charcoal readily absorbs gases, impurities, and acids, and thus acts as a corrective when the stomach is sour and digestion has been impaired.

GREEN DUCKS IN BIG DEMAND

Vast Market Waiting to Be Developed for Fowls Throughout Most of the Country.

There is a vast market for "green ducks" waiting to be developed throughout most of the country and the man or woman who takes the trouble to develop it need not fear being unable to sell all that can be produced.

ASPIRIN

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicycacid.—Adv.

Probably Made Threats.

He—"Did you have much trouble learning to sing?" She—"Yes; especially with the neighbors."

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Another Excuse.

Hub—That button is still off.

Wife—Yes, dear, I am economizing on thread.

Sure Relief

BELL-ANS
FOR INDIGESTION

Klemme and Vicinity

Mothers Day was observed in the c hurches of Klemme last Sunday.

Prof. Wilson and family expect to r main in Klemme this summer.

N. L. Palmer was a busines caller Garner Monday between trains.

Mrs. Anna Fuller was taken to the pital at Hampton last Sunday.

Mrs. Hod Lawhorn came over from ner Monday for a visit with her mme friends.

Dr. R. N. Reuber and his father ve over to Goldfield Monday for isit with Dr. Edgar Zinn.

Dewey Rice and family of Carion re visiting at the Fred Musfelt me here Sunday.

Henry Church, who has been quite sick at his home at Garner for some time, is now able to be up and about.

Mr. and Mrs. Ell, of Mason City were visiting in Klemme last week with their son, Ed. and family.

Mrs. Gee, of Goodell was a Kemme visitor with her daughter, Mrs. Chris Crem last Friday and Saturday.

Mrs. Ed. Jennison and two daughters, Virgie and Iola, of Belmond, were Klemme visitors Monday.

Mrs. J. Jorgenson was down from Garner Monday visiting at the R. A. Jorgenson home.

Mr. and Mrs. M. O. Barr and Mr. and Mrs. Burgess went to Crystal Lake for over Sunday.

Mr. and Mrs. Ted Dutheridge are at Morris, Ill., where they went to attend the funeral of an uncle.

Mr. and Mrs. Carlton Hyde and Miss Hughes, of Garner, were visiting with Mr. and Mrs. R. A. Jorgenson here Saturday evening.

Mr. and Mrs. Will Bachman and daughter, Lela, and Mrs. C. M. Bredbenner and daughter, autoed to Mason City last Saturday.

Some of the Klemme High School boys wnt to Britt last Friday afternoon to attend th Hancock County Higgh School Field Meet.

The word "Klemme" has been set with white rocks in the little parking facing the depot, Passengers aligghting from the train will notice the insription at once.

LOST—A gold wrist watch on the srteet betwenn Idle Hour and Drug Store on April 29th. Finder please leave at the Times Office and receive reward. adv.

Miss Adna Church, of Garner, has been stying with Miss Edith Haupt here the past week as her folks are under quarantine at Garner for the small pox. None of the family are very ill however.

Mr. and Mrs. Ben Swalve, their son Dick and his two daughters, Carrie and Florence, returned from Austinville. Minn., Saturday where they had visited a day with Mr. and Mrs. Swalve's daughter, Mrs. Henry Behring, and family.

County Treasurer John Suurballe, of Garner, was a caller at the Times office last Friday afternoon. John said that he had been so busy at the court house that it was the first day that he had been away from the job since the first of the year.

The Farmers elevator here are going right after things in general since they took hold of the business. They are at present remodeling one of the grain bins and are lowering the floor and making it into a store house for salt and feeds.

The towns in Hancock County will neary all have bands this summer according to thev arious papers in the caunty. There will be a band at Britt, Kanawha, Garner and Klemme, at least. A band is a great advertisment for a town and a town without a band is sure a dead town.

"Jack" Wellemeyer has proven to be a real fisherman as he demonstrated last Thursday evening when he went fishing at the river south of town. Jack caught a carp which weighed better than eight pounds and was nearly as large as himself. This is the biggest fish caught in the river this season, and if anybody is going to hook a bigger one they will have to go some.

Another one of the large plate glass windows in Henry Lau's store is broken as the result of boys playing ball in the street. Sometime ago we warned the city council to pass an ordinance and see that it was enforced, prohibiting ball playing on Main Strreet and also roller skating. We suppose the business men will have to stnad for having their plate glass windows broken a few more times until the city council waks up. Get busy.

PETROLIUM LUMP COKE

..Will have on track about May 16 a car of Petrolium Lump Coke—will be the ony car that I can get...Why not use Coke at $15 per ton when hard coal is bound to be $18.00 to $18.50 a ton. Only a limited amount —your order must be filled quick..

WALTER F. LAU

The bal game between Cairns Brothers and the local team will positively start at 2:30 p. m. sharp. Everyone should turn out and boost for the home team to win.

NOTICE TO CONTRACTORS

Sealed bids will be received at the office of the County Auditor, Garner, Iowa, until 1:30 o'clock P. M. May 17, 1921, for grading, paving and incidental work on the North Iowa Pike from the Kossuth County line to Hutchins, and from Britt to Garner.

Bids will be opened at the above office promptly after the time for receiving same has closed.

A certified check for five (5) per cent of bid made payable to the county auditor, shall be filed with each bid which in case of a bidder receiving the award should he fail to execute a contract and file a bond within ten (10) days after acceptance of his bid, shall be retained by the county as liquidated damages.

The proposed work consists of constructing approximately 14.52 miles of paving requiring the moving of approximately 54,341 cu. yd. of earthwork, the construction of 153,640.1 sq. yd. of pavement. Work must be completed during year 1921 or contractor must state in his bid the amount to be deducted for the unfinished work after Jan. 1st, 1922.

Plans and specifications for the work may be seen and may be secured at the above office or at the office of the county engineer, Garner, Iowa, or at the office of the State Highway Commission at Ames, Iowa. The county reserves the right to waive all technicalities and to reject any or all bids. All contracts awarded for this work are subject to the approval of the State Highway Commission before becoming effective as contracts.

CHRIS JACOBS,
County Auditor.

May 7, 1921.

PILES

and other rectal troubles may be handled with satisfaction to all concerned by conservative, practically painless, modern office treatment. It is absolutely free from danger. Does not necessitate going to the hospital, and causes the patient little or no inconvenience. Satisfaction guaranteed or money refunded. Further information on request but an office consultation is recommended when convenient.

ast Week of School Crowded With Many Great Events

nual School Picnic Friday. Balt Game With Britt High

E HIGH SCHOOL COLUMN

By the Staff..

FAREWELL

ith this issue of the paper, we you farewell. The last days of h School are at hand (for this n.) It stands to reason that e will be no school news during ation, so this space can then be d for other material. It has n a pleasure to conduct this col- n for the school, and it is hoped t you, as readers, have not been ed by too many unnecessary de- s. We take this opportunity to Blanche Medaus due credit for contributions to this column in past. "Sufficient unto the fare- l are the words thereof."—Earl en, "Chief of the Staff."

Ve intended to have a ball game h Goodell H. S. at the diamond e last Friday but we received d a few days before the game t we were to play at Goodell. ll. we did. The diamond was y rough but it served the purpose. game was uneventful (from our nd point.) They secured two res to our fourteen. However result was of minor importance; t impressed us was the treat- t we received. "Treatment" is ropriate here, for after the game y invited our team and its root- to the school house where we ted on ice cream and delicious e, "with phonograph accompani- t." We certainly have to "hand o" Goodell when it comes to giv- a royal reception. We will re- mber it for a long time.

n last Monday evening occurred first school affair of its kind in mme—the Junior-Senior Ban- account of the unfavorable weath- it was held at the home of Supt. son instead of at the city park, it was originally planned. The derful menu and beautiful dec- ions gave evidence of much e and clever planning on the t of those in charge. The banquet very successful and was certain- appreciated by the Seniors, who remember it for years. Howard es, as President of the Junior s, was toastmaster of the even- The numerous toasts were all given and greatly enjoyed. To you a better idea of the banquet e is the menu:—

Fruit Cocktail
Chicken Sandwiches
Potatoe Salad
Banana Salad
Wafers - Olives

Coffee
Nuts - Mints

t is planned to make the Junior- ior banquet an annual High ool affair.

he abundance of rain on Tues- evening prevented many from nding the Commencement exer- s and the Senior class play. "Dad- " However, we rejoice in the that the play was successful and the receipts were large, consid- g th weather. It was the "crown- event" we might say, of the en- school year. If everyone real- how much Miss McKahan ac- plished and what she sacrificed rder to stage the play, she would ive praise without limit. We e very fortunate in having her our coach, and we owe the suc- of the play to her.

he Baccalaureate service of the or Class was well attended last day evening. Rev. Buriff is to congratulated and complimented his eloquent, worth-while serm- and also for his brief but appro- te address on Tuesday evening.

Ve had a ball game with Ventura eduled for Wednesday, but of se, we couldn't play in the rain.

It seems that we will not get to play Ventura this year. We are dissapointed.

Let's come to the picnic tomorrow and stay until it's over. After the bountiful dinner which will be served. be sure to drive out to the base ball diamond and see the game between the Britt and Klemme high schools. This promises to be a mighty battle, so you don't want to miss it. Come and root, yell and boost for K. H. S.

The latest thing in baseball circles is the wonderful "BRITT OR BUST" home-run paddle which Supt. Wilson has been wielding with such astonishing effect. Yes, it has an awful name, but it deserves it. He manufactured it of the best poplar he could obtain. It is poplar, but not popUlar. Still our worthy pedagogue is counting on it to win the game for us on Friday.

Most of the high schools of the county are closing this week, it seems. Many plans are being made for a greater Klemme High next year, and Supt. Wilson is responsible for them all.

The graduates have been busy patting the back of Dr. Zinn, who showed his friendship and generosity to such an extent that he gave them each a respectable cash present. They have also received many other gifts of value which will be cherished for a long time. "It pays to graduate." This is true in more ways than one. It is unfortunate. indeed, that such a small per centage of those who enter the High School remain to complete the course. They certainly miss a great deal when they do not graduate.

We will play Britt H. S. a return game of ball a week from Friday, as they seem to desire another game with us.

The Seniors have been excused from practically all their school work the past week or so.

"FINIS"

OBITUARY
Wilbur J. McGee

Wilbur J. McGee was born near Green, Butler county, Iowa, November 29, 1875; he died at his home in Klemme on May 14, 1921. in the forty-sixth year of his age.

On December 31, 1901, at Highmore, South Dakota, he was married to Elizabeth Jane Wareing. To this union four children were born, the eldest, Doris, preceding her father into the eternal home. November 11, 1919, while Beatrice, Galen and Wayne, with their widowed mother are left to mourn his loss. His own parents, four sisters and three brothers also survive him.

In 1908 he moved with his family from South Dakota to a farm near Meservey where they resided until February, 1920, when they took up their residence in Klemme; this last removal being necessitated by the progressive encroachment of the disease which finally cut short his life.

On Easter day, April 4. 1920, he united with the Methodist Episcopal church of Klemme, and so far as his strength permitted was a steadfast attendant upon its services.

He was a good husband, a kind father, a faithful friend and a loyal and patriotic citizen. Though compelled by the condition of his health to comparative inactivity during his residence in Klemme, he made many friends who join with his former neighbors in sorrow for his departure and in sympathy with his family in their deep bereavement.

Funeral services were conducted by his pastor at the residence of the family in Klemme, on Monday, May 16, and interment was made in the cemetery at Greene. Iowa, on the same day.

W. C. Oelke has gone over to Klemme to assist in the First National Bank for a month. They will find Mr. 'Oelke thoroughly competent and reliable. He is conservative and a safe business man.—Corwith Hustler.

CIGARET LAW HITS SMOKING BY MINORS

Will Legalize Sale of Cigarets Beginning July 1.__Boys Under 21 Years Under Ban

More strict regulations as to the sale of cigarets to minors will go into effect with the new cigaret law on July 1. This law also will legalize the sale of cigarets to adults and will help reimburse sadly depleted state and town coffers thru license fees and tax.

Under the new law, it will be a misdemeanor to sell or give cigarets or papers to any person under 21 years of age. For the first offense, a fine of from $25 to $100 or a jail sentence not exceeding 30 days may be imposed. For subsequent offenses, the fines may range from $100 to $500 and the jail sentence from one to six months, or both.

It also provides that all minors found with cigarets or cigart papers are subject to punishment by fine or imprisonment. As far as the regulations as far as the minors are concerned, the new cigaret law promises to be a great improvement over the present law, which has never been really enforced.

Dealers in cigarets and papers will be required to pay a mulct tax of $75 per annum in cities of the second class; $100 in the larger cities. No one may sell cigarets without permits from municipalities or county supervisors, which permits may run for two years. No permit may be issued until the tax is paid and, in addition to the tax, stamps must be put on each package of cigarets or papers sold. The stamps are purchased from the state treasurer.

The first annual tax covers the period ending July 1, 1922. The mulct tax goes into the general fund of the city, town or county. The dealer is required to furnish a bond of $1,000 guaranteeing his compliance with the law.

Chas. Stiehl Lands County Contract

At the letting of county concrete bridges which was held last week at the court house a couple of Hancock county contractors succeeded in landing a part of the work. L. J. Kalvig of Kanawha and Chas. Stiehl of Klemme were successful in landing several bridges. Steiner & Wagner. contractors from Swea City were awarded some of the work. The same day, May 3rd, bids were received by the board for construction on sections 6 and 7 of district number 7. All the bids were considered too high and were rejected. A Contract to clean out district 1 and 2 was awarded to E. L. Hatton of Britt.—Garner Leader.

BELMOND MAN TO GRAND JURY ON INCEST CHARGE

One of the most revolting, brutal and beastly crimes that has ever been broubht to public attention came up for trial last Saturday in the city court, when Tom Ersland of this city was arrested on the charge of incest, his victim being his 14-year old girl. When the facts became known, the city and county authorities took immediate measures to bring the inhuman fiend to justice. He has been working in Minnesota, and a fake letter was sent him which brought him home on the midnight train last Friday night. when Nightwatchman Rierson met him with handcuffs and lodged him in jail. He was given a trial the next morning, bound over to the grand jury on $2,000 bonds, and the sheriff took him to the jail at Clarion, none too soon, from the reports, for violence of an extreme nature was brewing. The maximum sentence which can be given Ersand is 25 years, which woud seem was about 975 years too short. It is alleged that the crime has been committed for the past three years, and that he forced his daughter to obey him. threatening her life if she ever told, and it was only upon the most emphatic promise of future protection from her father that the girl gave the authorities information.—Belmond Independent.

Telephone Operators School To Be Held at Belmond

The telephone operators of Belmond and neighboring towns will have a three day school of instruction in Belmond on May 24, 25 and 26. The Belmond Telephone Company in co-operation with the Engineering Extension Department of Iowa State College at Ames, is planning this intensive short course to give the local central girls instruction in the most up-to-date methods of switchboard operation.

Miss T. Anne Barnes, Traveling Chief Operator of the Iowa Independent Telephone Association, will be in charge of the instruction which will consist of talks, demonstrations and switchboard practice covering both local and long distance operating. Demonstration switchboards and subscriber's stations of most improved design will be provided to make the work thoroughly practical.

All operators who care to avail themselves of this opportunity are invited to attend this school. While the three days will be crammed with demonstrations and instruction there will be time for the operators from neighboring stations to get acquainted and renew old friendships. Mr. T. A. Davenport, manager of the Belmond Telephone Company is in charge of the local arrangements for the school.

Northern Light Display Clearly Visible Here

NORTHERN LIGHTS WITNESSED SATURDAY NIGHT

Scene Was Very Beautiful

Many people of Northern Iowa witnessed the aurora borealis which was clearly visable here Saturday night. The grand northern light display took place in the heavens at 8:30 o'clock and lasted until about 11:30 o'clock. The northern lights were so bright here that night that it was nearly as bright as day, and it was not an impossibility to read a newspaper out of doors at ten o'clock. No doubt the display of lights would have been more magnificent had not the moon been shining as it was also quite bright.

The Northern Lights radiated from a center directly overhead and from this point yellow, rose and other colored rays of light beams would shoot downward, and then again the action would seem to be reversed and the streaks would seem to travel upwards. The rays appeared to be long cylindrical shaped waves of colored light.

The auroral beams are said by astronomists to be parallel to the magnetic needle and to be acted upon by the earth's magnetism making luminous magnetic matter which goes under the name of northern lights. Some also claim that the northern lights are the reflections of the sun's rays against the ice bergs in the extreme north, and for that reason get the name of "norther lights." The aurora borealis is less frequently seen as one goes further south.

The northern lights are very facinating to watch and appear quite mysterious, especially when they are as clear as they were Saturday night.

COMET FIRE WORKS SHEDULED TO TAKE PLACE IN JUNE

The comet, Pons-Winnecke, and the earth are slated to pull offf some real fire-works on the night of June 28th, or a few nights before that or after, beginning at about 10:00 o'clock. It will be a collision between the comet and the earth, but there is nothing to be alarmed about. By the word "collision" in this case will mean that the comet will come within the circle of the earth's attraction—some 12,000.000 miles or more. Even should the comet actually strke the earth there would be no shock felt, for scientists claim that a comet is made up of gases and the entire weigh of the whole thing is but a very few ounces. So in that case the earth could pass entirely thru a comet without any serious effect.

The dispay will resemble fireworks as the gases of the comet will be attracted by the pulling power of the earth and in their swift motion toward the earth will be ignited by the great friction passing thru space and will thus appear as fire of all colors.

The attraction will appear northeast of the great dipper and about half way between the horizon and the zenith.

Klemme Sewerage System Was Completed This Week

WASHINGTON NEWS ITEMS

A bill providing for the regulation of future sales of grain on boards of trade, recently reported from the Committtee on Agriculture, passed the House of Representatives today by a vote of 255 to 69. Strong opposition by the large grain interests was shown by the hundreds of telegrams received by the members asking them to vote against the measure. Many friends of the legislation contend that it is good so far as it goes but the regulative provisions are not far reaching enough to cure all evils but it is a step in the right direction as it gives the Secretary of Agriculture authority which will materially assist him in protecting the producer of grain from the market by the manipulators and the speculators. The bill had the approval of the farm organizations. Mr. Dickinson makes the statement that "The bill is a good one as far as it goes, but that it is a slap on the wrist for the gamblers whereas he is in favor of hitting them with a sledge."

The Immigration conference report passed the House restricting the immigration to three per cent of the respective nationalities now in this country. It will now go to the President for his signiture.

The Army Bill passed the House this week and was sent to the Senate. It carried appropriations for an army of 150,000 men. This was a reduction of $11,000,000 in the bill as presented to the House; the reduction being made by reason of the strong demand for economy among the members.

Mr. Guy Houston of Chicago, president of the American Association of Joint Stock Land Banks, former State Senator Mr. Joe Allen, of Des Moines, and Mr. H. A. Moehlenpah of Milwaukee, Pres. Investors Finance Corporation, together with Mr. W. W. Powell, Secretary of the American Joint Stock Land Banks were calling upon various members of the House this week seeking relief for the farmers.

WELLEMEYER HAS SUCCESSFUL "SILENT AUCTION"

Wellemeyer's "silent auction" closed Saturday. Sealed bids were received up to that date on a player piano, a phonograph and a bed davenport. Mr. Wellemeyer used a lot of newspaper advertising in conducting this sale and was well pleased with the results he received. It is something rather novel to conduct a sale of this kind and somewhat doubtful as to the success, but Art is one of those "I want to see how it works" sort of fellows and he wanted to give it a whirl anyway.

There were 153 bids received on the player piano, of which George Kessler of this city bid $600 and received the $750 instrument. Emil Blumer got the $325 phonograph for $250, the amount he bid. The bed davenport was bid in by Mrs. C. H. Weigmann, of Garner, for $40. It was a $57 outfit. There were 142 bids received on the phonograph and 177 on the bed davenport. Bids were received from Belmond, Kanawha, Corwith, Britt, Garner, Forest City, Clear Lake, Ventura, Meservey, Thornton, Swaledale, Mason City, Dows, Goodell and other towns.

Art is one of those men who believe in keeping the printer busy and at the same time he spreads the name Wellemeyer and Klemme all over the map.

WOE TO THE FARMER

Having sidetracked the horse as a means of travel, Henry Ford intends to banish the cow. He declares laboratories have demonstrated better milk can be made by machinery. The cow, Ford says. is a crude machine and it is a simple matter to produce milk from the same cereals that will be free from the germs of tuberculosis and better in quality and cheaper. Believing in Mr. Ford's genius as an inventor and manufacturer, we predict that ten years from now men will be breaking their arms while cranking the cow.—The Greenfield Free Press.

Klemme Now Among List of Modern Towns In The State

THE SEWER GANG WILL COMPLETE WORK HERE THIS WEEK END

The sewer gang completed the last strecth of digging Saturday afternoon and laid the last sewer tile.

The fore part of this week they spent in repairing crossings and doing other clean-up work along the ditches.

Tom McElligott, boss on the job, informed us Monday that he would hav the job all finished at the end of the week and they would then be ready to ship out to the next job.

The entire gang are a fine bunch of fellows and as far as we know, they have lived up to their contract in every way and even seem to step over the ropes in trying to treat all and please everyone alike. We have heard no complain from anyone in regard to the work this company are doing here.

Tom was not sure just where they will go from here as they have a couple of jobs to be finished this year. One is at Quimby, Iowa, and the other is in Illinois some place, but they will probably go to Quimby first. We certainly wish them a lot of good luck wherever they may go.

WARD & WEIGHTON HAVE DISPOSAL PLANT FINISHED

Ward & Weighton, who were awarded the contract for the disposal plant here have finished the construction of same and will have it in working order for the sewer in a few days. They were held up waiting for crushed rock to arrive with which to finish the job, but we understand they have it all completed now.

The disposal plant is located south west of the cemetery and is quite a large structure.

CAIRNS BROS. THINK KLEMME THEIR "JINX"

The ball game which was scheduled to take place between the 7 Cairns Brothers ball team and the Klemme Sox yesterday afternoon was called off on account of the rain. It seems that Cairns Bros. are always in tough luck when they come to Klemme for it nearly always rains for some unaccountable reason or other. They have come to Klemme eight years in succession and last year was the first year they came here without it raining. We talked with Roy Cairns and he said Klemme was their "jinx" and that to beat it they would have to sneak into town some time unannounced and perhaps the weather man would not hear they were here and in that way they could have a spell of decent weather for once.

They did not set up their tent at all but made arrangements to show in the Idle Hour theatre. It cleared off toward evening but they were not taking any chances with the weather man. A good big crowd turned out to see them and as usual they put on a high class, clean play.

They also gave two band concerts on the street and had with them a better band than ever this year.

THE FIRST DAY OF FISHING WAS NOTHING BIG

Sunday was the first open day for fishing game fish and quite a number of the Klemme followers of the sport went to the lakes to try out their luck. Fishing on that day was not very good on account of the cold weatehr which w have had for the past two weeks. A few small fish wre caught, of course, but the "gamy" ones would not chase a hook at all. Some nice bull-heads were caught by some of the men who had forsight enough to know the game fish would not bite. Fishing all spring has been rather quiet.

A streak of nice warm weather will bring out the big ones.

Teach Kids How to Swim, Play

4,000 Centers Keep Boys Out of Mischief and Help Them to "Keep Fit."

WONDERFUL RESULTS SEEN

Summer Activities on Playgrounds Eliminate Swearing, Cheating and Stealing Among Children—Fair Play Prevails.

New York.—More than 4,000 playgrounds and recreational centers in the United States are helping to keep boys out of mischief, teaching girls swimming and other athletics and showing adults how to benefit themselves physically and mentally by play.

The effect they have in keeping boys out of trouble with the police is emphasized in reports which have come to the Playground and Recreation association from all 'over the country as one of the most important results of the establishment of playgrounds in cities. These facts are given in the year book of the association just made public.

The chief of police of San Francisco believes the establishment of neighborhood recreation centers is a constructive measure toward suppressing the crime wave. He asked the community service to extend its recreation work because he believed that the wrong use of leisure time had much to do with the increase in crime.

Cure for "Bad" Boys.

Granville Lee, supervisor of the Portland (Me.) recreation commission, says that bad boys behave themselves better during the playground season and also that there are fewer street accidents to children because of playgrounds.

The playground directors of Bay City, Mich., have discovered that summer activities on the playgrounds have practically eliminated all swearing, cheating and stealing among the children. They note with satisfaction that the spirit of fair play has helped to put the playground bully where he belongs and boast of an appreciable falling off of delinquents.

Cases are reported where mothers have been amazed to note that their children did not catch cold, although they played in the snow; that the youngsters have gained in weight and appetite. In one case a father forbade his daughter to play because it made her eat too much.

One thousand children were taught to swim in one week at Tacoma, Wash., and it is estimated that 500, the majority of them girls, have learned to swim at Seattle.

Pageant in Snowstorm.

Pageants, plays and community singing have been fostered throughout the country in the last year, with good results. One pageant was given at Kalamazoo, Mich., in a snowstorm, but it was attended by several thousands, and the scenes were much enhanced by the snowy setting.

Community singing in factories has been helpful in establishing friendships among the employees, and between them and their employers, and in lessening the popularity of crap shooting.

Many different organizations are promoting this work, with the result that a 42 per cent gain is reported for last year.

BRIDE IN DANCE OF DEATH

Young Lady Entertains Friends as Poison She Had Taken Ends Her Life.

Kalamazoo, Mich.—While the poison she had swallowed slowly drove life from her body, Mrs. Neva Fraser, eighteen, a bride of a few weeks, performed a veritable dance of death in the midst of a party of guests.

She walked over to the phonograph and started playing "Till We Meet Again," explaining it was the piece played at the dance at which she met her husband.

Her friends were ignorant of the tragedy taking place when she began dancing, but before the last strains died away they saw her fall in a crumpled heap.

Death sealed her lips before she could explain her motive.

MANY GERMANS QUIT BATHING

Find Hot Water a Luxury Because of the Shortage in Supply of Coal.

Berlin.—The hot bath has become such a luxury in Germany, owing to the shortage of coal and the manner in which the government regulates the distribution of fuel, that many persons have ceased bathing. Others have gathered courage for an icy sponge daily, but this is not popular, for the houses are generally cold, and exposure in cold rooms after a chilly tub paves the way for colds and pneumonia.

Ordinarily a family can afford hot water once every two weeks. Public baths, where once a plunge or a tub was available for a few pfennigs, have been forced to close or raise prices beyond the reach of workmen and salaried workers.

1—New portrait of Col. George Harvey, nominated by President Harding to be ambassador to Great Britain and confirmed by the senate. 2—Sons of the American Revolution on way to Mount Vernon and the tomb of Washington on anniversary of Battle of Lexington. 3—Scene on the island of Yap, showing American visitors in a native canoe and, at left, two pieces of the ancient "stone money."

RIVER PACKET DAYS RECALLED

Attempt to Revive Mississippi Traffic Brings Stories of "Good Old Times."

VOYAGE PLEASANT AFFAIR

There Was Great Rivalry Between Boat Owners and Crews and Many Exciting Races Were Pulled Off—Robert E. Lee Famous.

New Orleans.—Memories of old days on the Mississippi when stately packets plied in the passenger traffic are revived by the resumption of traffic between Pittsburgh, Pa., and this city by way of the Ohio.

Barges have carried freight traffic on the great river for many years since the packets were driven out by railroad competition. In the days of Mark Twain the Mississippi packets were celebrated for their "eats," their famous races, their pilots and even for their poker games.

It used to be no uncommon sight to see from 15 to 30 passenger vessels, from the palatial packet to the weather-beaten tramp, leave the New Orleans landing daily for up-river points.

Voyages Were Pleasant.

A river voyage in the olden days was a pleasurable affair if the boilers did not blow up or the vessel hit one of the shifting sandbars, mudlumps or hidden snags. A comfortable berth, wonderful meals, dancing at night, watermelon parties, well-stocked bars, stud and draw poker games for the patrons of that form of amusement, and last but not least, the antics of the negro roustabouts, all combined to make things pleasant for the traveler.

Saturday was usually the sailing day for up-river packets from this port. There was great rivalry between boat owners and crews, and usually from one to a dozen boat races were pulled off as the vessels chugged up the river. It was then that boilers blew up with marked frequency.

The most famous of these races was run by the Natchez and the Robert E. Lee, two of the largest of the river packets. So keen was the rivalry that early in the seventies it was planned to have them race from New Orleans to St. Louis. No passengers or freight were carried and for weeks the coming race was the chief topic of conversation along the river.

The Robert E. Lee was in command of Captain Cannon, while Captain Leathers was master of the Natchez. No stops were made except for fuel. The trip to St. Louis was made in just a few hours over three days, an unheard of record then, with the Robert E. Lee the winner by a small margin.

Promoters Are Curious.

Promoters now are figuring whether human nature has changed from the olden days, whether a person will be content to idle the time away on long trips which he could make in a fraction of the time by rail; whether they "have time" to take quiet pleasure.

Freight rates, interstate commerce commission hearings, uniform bills of lading and other prosaic commercial matters figure in the traffic side of the question. The passenger business is regarded as a gamble.

Girl Staged Holdup, but Forgot to Rob Her Prey

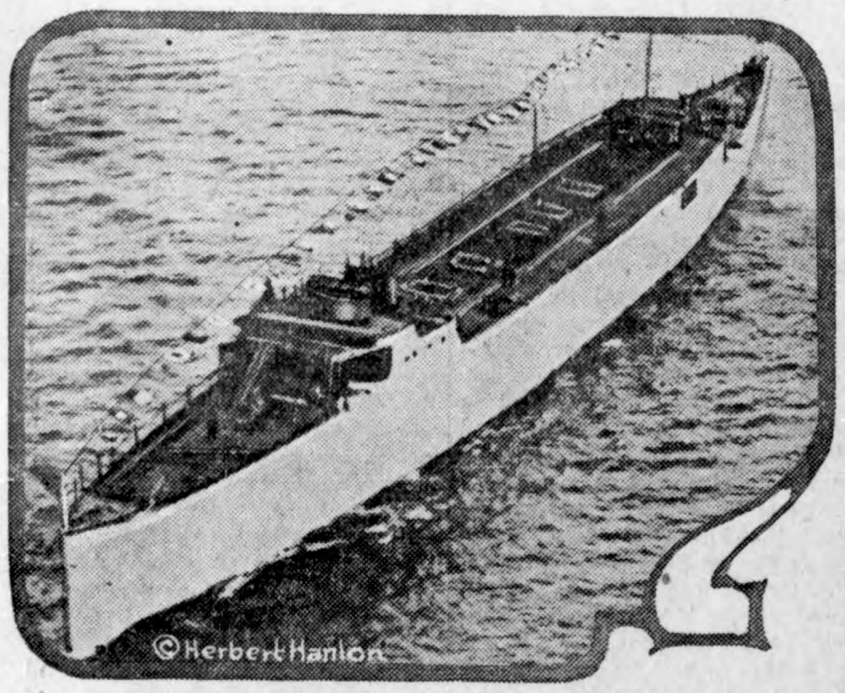
A girl bandit in Chicago let her prey escape when she forgot her lines. She was accompanied by a male accomplice when she met Harry Baumstein.

"Put up your hands," she demanded, as she pointed a pistol at him. Baumstein put them up.

"Now what shall I do?" she asked, turning to her companion.

Baumstein didn't wait to see. He told the police he turned the nearest street corner in record time.

One of Our New Scout Cruisers



An excellent photograph of the launching of the U. S. S. Milwaukee at Tacoma, Wash., made from an airplane. The Milwaukee is one of the ten scout cruisers authorized or being built for the U. S. navy. She is 550 feet long and will have a speed of 35 knots, combining the speed of a destroyer and the fighting qualities of a battleship.

HUNT CHURCH LOOT

New Party Formed to Seek Treasure of Bandits.

Wealth of Gold and Precious Stones Taken From Church in Peru During Revolution and Buried.

Papeete, Tahiti (Society Islands).—Interest has once more been aroused in the treasure reputed to be buried in the island of Pinaki, one of the coral islands to the eastward of Tahiti, and a new association has been formed in Tahiti to seek for the treasure.

The story is that during a revolution in Peru 60 years ago a church was looted of a rich treasure of gold and precious stones by four men, who succeeded in getting it to the coast where they buried it in a safe place, afterward making their way to Panama.

[illegible] secured a schooner there they returned to Peru, recovered the treasure and sailed to the westward, intending to make Australia their destination. Without papers, they could not gain entrance to any port.

So they determined to bury the treasure on an uninhabited island until such time as they could get a ship with proper papers and return to the island.

They scuttled their schooner on the Australian coast and coming ashore in the guise of shipwrecked sailors, started for Sidney overland. Two only, by name, Killrain and Brown, arrived in Sidney; the other two having been killed in a fight with bush natives. Such is the story of the burial of the treasure.

The tale of the attempts for its recovery begins in 1912 or 1913 when one day on the streets of Sidney a man by the name of Thompson was accosted by an elderly beggar seeking alms. On giving the man a small sum Thompson was surprised by the request for his name and address.

Some time later, he was summoned to one of the hospitals of the city. There he discovered that the one who had asked for him was the beggar whom he had befriended some time before. The old man told him that he had sent for him to disclose to him the resting place of a great treasure.

He said that he, Killrain, being the only survivor of the company and about to die, did not wish the secret to perish with him.

Thus it was that Thompson came into the knowledge of the story and sailing directions to locate the island. Being convinced that the story was founded on truth, he has spent eight years in search of it—so far without success.

Lately, some people in Tahiti have discovered what they believe to be a new clue and are preparing to fit out an expedition to go to the island.

Athens, the Greek capital, enjoys bright sunshine on an average of 300 days of the year.

NEWS REVIEW OF CURRENT EVENTS

Crisis Reached in Reparations Matter, With the Germans Still Evasive.

SIMONS MAKES NEW OFFER

Total War Damage Bill Formally Presented by the Allies—Knox Peace Resolution on Way to Passage—Naval Holiday Move Checked.

By EDWARD W. PICKARD.

It would be foolish to attempt to predict what will be happening in and to Germany in connection with the reparations dispute by the time this reaches the reader. It all depends on developments during the week-end, so the most that can be done is to tell what has taken place up to the time of writing.

Early in the week the German government, really alarmed by the preparations of the allies to enforce penalties, transmitted to Washington a revised offer which it was hoped would be submitted to the allied governments as a basis for further negotiations. In this Doctor Simons proposed Germany should engage to pay approximately $12,500,000,000 principal which with interest would total about $50,000,000,000. The allies have fixed the principal at $21,000,000,000 and the total with interest at $56,000,000,000. The suggested methods of carrying out the engagement are too complicated for discussion here, and indeed the allies found them so vague that further explanation was demanded. What France, at least, considered a "joker" in the offer appeared in the conditions appended, reading:

"Germany only considers these proposals as capable of acceptance if the regime of sanctions stops immediately; if the actual basis of German production is not further restricted and if Germany is admitted to world traffic and is relieved from unproductive expenses."

This of course meant there should be no further occupation of German territory and, presumably, that Germany should be left in possession of all of upper Silesia.

Berlin also suggested that "in case the United States and the allies should wish it, Germany will be disposed to take over to the limit of her capacity payment of allied obligations to the United States with regard to their debts to the latter." This plan has been broached before but met with little favor either in the allied countries or in the United States.

Secretary Hughes conferred with the ambassadors of the allied governments concerning the new propositions, and they were discussed in the capitals of Europe; and up to date the belief was general that they were not good enough to warrant the American government in formally presenting them to the allies. At the same time it was felt that the offer was worth further consideration, especially in view of a persistent report that Doctor Simons had assured Secretary Hughes of his willingness for a reasonable amelioration of his proposals. Many of the diplomats in Paris were said to believe a conference, with the United States participating, at which Germany would be permitted to discuss, instead of merely being dictated to, would result in important progress being made toward a solution of the reparations question. Lloyd George told the house of commons the new offer was thoroughly unsatisfactory.

The allied reparations commission, which by the treaty of Versailles was bound to fix before May 1 the sum Germany must pay, concluded its labors on Wednesday. The head of the German commission was summoned and the bill formally presented to him. The total sum demanded is a principal of 132,000,0000,000 gold marks, normally $34,000,000,000, which with interest over 42 years amounts to 226,000,000,000 gold marks. The commission in its communique said:

"In fixing this amount the reparations commission had effected the necessary deductions from the amount of damages in order to make allowance for restitutions effected or to be effected in execution of article 238, and in consequence no credit will be allowed to Germany in respect to such restitutions.

"The commission has not included in the above amount the sum in respect to further obligations incumbent on Germany in virtue of the third paragraph of article 232 to 'make reimbursement of all sums which Belgium has borrowed from allies and associated governments up to November 11, 1918, together with interest at the rate of 5 per cent on such sums."

Premier Briand was given full liberty of action by the French chamber of deputies after he had declared: "If on May 1 satisfactory proposals, with acceptable guarantees, are not made by the German government the Ruhr will be occupied."

Prime Minister Lloyd George already had assured the house of commons that if the German proposals were unsatisfactory Great Britain would support France in occupation of the Ruhr. Whether this occupation would be for the enforcement of the treaty of Versailles or the Paris January agreement was not made clear in either Paris or London. The French have been insisting that Germany's violation of the treaty would alone be sufficient to justify the seizure of more territory. Nobody, outside of Germany, disputes this but many are of the opinion that thus to cut further Germany's productive power would only make it more difficult to extract the reparations from her.

That the Knox resolution formally ending the state of war with Germany and Austria-Hungary will be adopted by the United States senate seems assured, though the debate may be extended. The foreign relations committee has made a favorable report on the resolution, only Senators Pittman of Nevada, Pomerene of Ohio and Swanson of Virginia, all Democrats, voting in the negative. House leaders have given assurance that the house will follow the lead of the senate. Representative Fish of New York has introduced a resolution for withdrawal of American occupational forces from Germany immediately on approval of the Knox resolution. It is not at all certain that the Fish measure will meet with approval, the disposition being rather to leave the question of withdrawal to the administration.

Despite the efforts to compel early action toward a naval holiday, by providing that expenditure of appropriations for warships shall be conditioned on the President's inviting all nations to discuss disarmament, it seems certain congress will not at this time take any action in the way of reducing naval armament. This, it is said, is due to the increasing tension of the relations between the United States and Japan. According to Washington dispatches, Secretary Hughes has explained the situation to the leaders handling the pending house appropriation bill for the navy, and President Harding invited Chairman Porter and Representative Rogers of the house committee on foreign affairs, to discuss with him the international situation and its bearing on pending legislation.

Japanese statesmen are being quoted rather voluminously to the effect that Japan has no desire to acquire the Philippines and prefers that America should retain possession of the islands to keep them peaceful and orderly. Viscount Kato, former foreign minister, adds that the Japanese, however, do not want to see the Philippines strongly fortified and that they are very much concerned about the concentration of naval power in the Pacific. He then said vehemently: "There is no reason why the Anglo-Japanese alliance should be renewed. This may sound strange, coming from a man who had an important part in drafting the alliance. If Great Britain or Australia thinks that Japan is eager to get an alliance under any conditions that may be imposed they are much mistaken."

If the British naval authorities are to be believed, the Japanese naval program is largely bluff. They say that if the present naval programs of the three leading naval powers are carried out until 1925, the United States will have 18 capital ships embodying the naval lessons of the late war, Japan 11 and Great Britain five.

The present naval strength of the three powers, according to information in the possession of the British is as follows:

Great Britain: Capital ships, 30; light cruisers, 51; destroyers, 185, and submarines, 96.

The United States: Capital ships, 36; light cruisers, 15; destroyers, 284, and submarines, 103.

Japan: Capital ships, 21; light cruisers, 17; destroyers, 87, and submarines, 23.

The week closed with much brighter prospects for a settlement of the strike of British coal miners. Sir Robert Horne, acting for the government, held a series of meetings with the miners' delegates and made new offers which included the suggestion of a wage reduction of 3 shillings per shift. The miners are willing to accept a reduction of 2 shillings, and it may be the government will arrange a subsidy to meet the difference. This would amount to $500,000 monthly while the industry is being reorganized. It was thought the delegates would recommend that the members of the union accept the proposed plan. Meanwhile the miners and owners have agreed to plans for the protection of the mines, and the railway men's union has modified its order against handling coal so that it does not apply to fuel for domestic purposes, hospitals and public utilities.

The railway workers of the United States had their innings before the railway labor board last week. B. M. Jewell was their first witness in their effort to retain the present wage scales. He presented a mass of evidence to support the unions' two principal points—that living costs have outrun pay rates and that wages in the only other basic industries comparable to railroading, coal mining and steel making, have not been reduced.

His argument also was framed to show that the railroads have not operated with economy and efficiency, as required by the transportation act, and that the "same financial interests which control the railroads also control the production of fuel, timber, equipment, oil and other supplies and that they have determined upon a policy of decreasing railroad expenses by reducing wages and at the same time charging unwarranted and unreasonable prices for supplies which the railroads must purchase."

In the Chicago district the dispute between building contractors and the Building Trades council reached a crisis. The unions having refused to accept a reduction in wages of skilled men from $1.25 to $1 an hour, the Building Construction Employers' association and the Associated Builders issued a formal "lockout" order to go into effect on May 1. As a result, work has stopped on about $10,000,000 worth of building operations in that district.

A committee of the Illinois legislature has uncovered graft, fraud and extortion in the building trades in Chicago and vicinity and it is expected the grand jury will indict many labor leaders and others involved. Every one who knows anything about labor conditions there knew this crookedness was being practiced, but the trouble was to get the victims to tell the truth. Some of them, evidently, have overcome their fears and done so.

Almost without opposition, the McCormick budget bill was passed by the senate, and a similar measure was assured of passage through the lower house. The senate bill, substantially the same as the one President Wilson vetoed, creates a budget bureau to prepare estimates of departmental expenditures and requires the President to submit an annual budget based on estimated receipts. It also creates the office of controller general for the auditing and accounting of all governmental expenditures.

News For The Farmer

CHICAGO BOARD OF TRADE IN FIGHT FOR EXISTENCE

That farmers of Illinois, whose representatives in the state legislature are determined to regulate the Chicago Board of Trade is shown by the big fight now in progress at Springfield over the Lantz bills. It is virtually a fight between the people of Chicago and those of the rest of Illinois outside of Chicago.

The Lantz grain exchange bills are not designed to put the Board of Trade out of business as Board of Trade representatives and Chicago newspapers indicate, nor will they do away with hedging, but they will admit farmers' co-operative companies to the place where the farmer's grain is sold and its price determined. They will place a representative of the state of Illinois on the exchange floor to see that the business is conducted fairly. They will eliminate market manipulation, excessive price fluctuation and widespread public gambling. "If these things will put the Board of Trade out of business, it must be a good deal worse than we have ever imagined," says the Prairie Farmer. "The wild fluctuations in price caused by its manipulation places a heavy load on the shoulders of every farmer, and it is high time to eliminate it."

Co-Operative Marketing Bill Passes The House

The House of Representatives passed the Capper-Volstead bill to give farmers the right to form co-operative marketing associations without being penalized by the anti-trust laws. The vote was 284 to 49.

Co-Operative Grain Marketing Conferences Are Called

Conferences of officers of farmers' organizations are being called by the sales department of the United States Grain Growers, Inc., the recently organized farmers' co-operative grain marketing agency. Meetings are being held in the principal grain markets for the purpose of obtaining suggestions relative to the establishment of zone sale offices. their management and other details.

The first meeting was held at Columbus, Ohio on May 12th, in charge of J. M. Anderson, president of the Equity Co-Operative Exchange, the oldest farmer-owned and controlled grain and live stock marketing organization in the United States. Mr. Anderson is chairman of the sales committee of the United States Grain Growers, Inc.

TO START NEW POULTRY FARM

Start Work on a Complete Plant For Practical Poultry Raising For Federal Students at Ames

A new poultry building, costing $18,000, 10 semi-monitor poultry houses and 25 colony brooder houses will be built immediately at Iowa State College to accomodate ex-service men who are given college training because of wounds of the last war are being sent to Iowa to study poultry raising. This plant, which will be part of the college poultry farm, will be the most complete poultry equipment at any college in America. according to H. A. Bittenbender, head of the poultry department.

The main building will be brick, three stories in height, covering a space of 40 by 60 feet and will care for incubators, storage and laboratories. The semi-monitor poultry houses will be 22 by 24 feet and each will accomodate 150 laying hens. The brooding house will be 10 by 12 feet and accomodate 5000 young chicks. The college is furnishing the buildings and the poultry for the foundation stock and the U. S. Goverment is installing the necessary equipment, such as incubators, brooders and stoves.

Students who take two years of poultry work will follow a course which will require them to carry the chickens thru a year. It will give them an opportunity to handle all phases of the work on their own responsibility.

"Iowa is fortunate in securing this equipment," says Mr. Bittenbender, "since it affords an excellent opportunity to gather data and do experimental work with individual flocks. such as the average farmer has to handle. With the large number of pens o fthe different breeds, many problems will present themselves, which will help the industry."

"Funds for this work are provided by a bill fathered by Senator W. S. Kenyon of Iowa and is fitting that Iowa should handle the poultry work."

STOP ROOTING BY FEEDING

Proped Balancing Of Rations Will Save Pastures

Hogs which start in during the spring to root the sod in the pastures can be stopped by balancing the ration, according to John M. Evvard of the animal husbandry section of the Iowa Agricultural Experiment station.

Last summer Mr. Evvard conducted a series of experiments and proved that hogs supplied with enough protein in the ration rooted very little. Where they were fed a ration lacking in protein they tore up the fields badly. Hogs fed on a corn and salt with blue grass pasture were the worst offenders. Where either tankage, or pasture containing protein crops, was provided, rooting was checked.

During this season of the year many farmers turn their hoggs out on pasture and do not feed them properly. By starting pigs on a properly balanced ration in the spring, the pastures can be saved from rooting, and pigs will grow better and be worth more in the fall.

CONTINUE BARBERRY CAMPAIGN

Carrier of the Stem Rust Spores To Be Further Eliminated

Plans for the further elimination of the barberry bushes, which carry the stem rust so detrimental to grain will be continued during 1921, according to R. H. Porter, extension pathologist at Iowa State College.

This work consists of removing common or European barberry bushes, since the shrub carries the spores in the resting stage of the rust. Much work has been done during the past three years in Iowa and practically all of the state is free, but a follow up campaign will eliminate the re-appearance of the barberry.

AVERY TOWNSHIP NEWS OF LOCAL INTEREST

Mildred Reimer, and Wava Bachman visited at the home of Wava's parents last Saturday and Sunday.

Walter Anderson visited at the Martin Jensen home last Sunday.

Quite a number of little girls gathered at the home of Jane Dutheridge last Sunday to help her celebrate her birthday.

Mr. and Mrs. Wm. Bell and family were Sunday afternoon callers at the D. A. Marshall home.

Ruth Bailey spent Sunday at the Tom Nelson home.

CATCHES NINE BABY WOLVES

Homer Haxton, was up at Pilot Mound, one day last week and he dug out nine little baby wolves and took them to Britt and they were on display in the Colee Cafe window over Sunday. He brought them to Garner Monday afternoon to get the bounty on them. School was dismissed at Garner Monday afternoon so all the pupils could see them. This is some thing that people do not see very seldom so it is quite an attraction.—Britt News-Tribune.

WHY IT PAYS TO TRADE WITH LOCAL MERCHANTS

No man would be foolish enough to put manure on the other fellow's garden.

He would put it on his own where it will bring big returns in increased productivity.

So should you cultivate your local resident merchant.

He is the very backbone of your community.

Destroy these enterprises and land values will decline; taxes will increase; the social life of the community will cease to exist.

Boost your town and the community will prosper.

Your resident merchants are the natural rgulators of supply and demand and are the warp and woof of th business fabric of every community.

Don't you think it is worth your while to make it possible for the man whose services you need to prosper in your community?

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

IATIVE TRIBE LITTLE KNOWN

Tehuelches of Patagonia Have Many of the Characteristics of North American Indians.

Many are the strange and interesting native tribes that are found in the Americas. Among the most interesting are the people of the ostrich, who inhabit an almost as yet unknown country, and in language, and character, and race, are altogether distinct from other Indians, says an article on "People of the Ostrich" in Boys' life. They live in the remote and almost legendary regions of the "land of large-feeted men"—a land, that like Chili, Peru, Mexico, and Northwest South America, has its story of the existence of a hidden city among the unexplored wilds of their Cordilleras.

The Tehuelches of Patagonia, that vast peninsular end of South America, are scattered across it, from the Straits of Magellan and the Rio Negro—a territory of over 1,000 miles in length and 300 at its narrowest. A brave, active, athletic people, wonderful horsemen, singularly expert with their weapons and implements, who lead a wandering life, and hunt the wild cattle, the guanacos—and ostriches. For Patagonia is a home of that splendid bird, which was there ages before men crossed its path in the faraway wilds of the interior. To the Tehuelches, this fine bird is as important in their existence as the guanaco, for they are a race of hunters, and grow but little food for themselves.

REACHES FROM AN AIRPLANE

Minister With Many Parishes to Cover Puts Modern Mode of Travel to Good Use.

No tolling church bells announce to the little communities scattered through one section of America's great Northwest the periodic Sunday morning arrival of the region's most enterprising itinerant evangelist. Instead, they hear the coughing exhaust of an engine, as his airplane spirals down upon the village. Drawn irresistibly by the novelty of the visit, they flock to the airplane, now at rest in a nearby field or meadow. They find the preacher on his feet in the pilot's cockpit of the plane "Sky Pilot," ready to begin his discourse.

Explanation of this strangest of all the airplane's uses is found in the evangelist's decision, some months ago, that the time and energy required for constant travel among distant parishes was seriously curtailing his effectiveness. He decided to defy all precedent by allying aeronautics and religion. He first subjected himself to a rigorous course of training, and became an accomplished airman. He then purchased his plane, selecting a three-seater of sporting type. The rear cockpit seats the pilot, and serves as his pulpit when the meetings are held in the open; the forward cockpit accommodating his two assistants, one of them a song leader.—Omaha Bee.

Women Crave Excitement.

The wife of a very wealthy man was arrested with a group of bandits after a pistol battle with the police, in which the woman was shot in the arm. She is a woman who has traveled, is educated and bears every evidence of refinement. The police say that there are many women of this kind who work with thieves unbeknown to their families. The call of adventure is the prime motive. In a raid on an East side wine cellar recently ten men and one woman were taken to headquarters in a patrol. All the men had criminal records. The woman is happily married to all appearances, and is a patron of the opera. She said the men and women in her set were dull and that she liked to get out and mingle with the men who lived by their wits and were not afraid of dangerous paths.—New York Times.

The Chef's Daily Manicure.

One of the daily events in the life of a chef in any of the large New York hotels is his morning manicure. Before he touches food, his hands are carefully washed and his nails are cleaned, cut and polished.

The job is not given to a sweet girl manicurist, but to one of the hotel physicians. He is always on hand during the day; should the chef accidentally cut himself, the doctor will bandage the wound, as he is there for that purpose.

Chefs are precious these days; many of the French ones—unable to get their daily bottles of wine—have gone back to France, where the thought of prohibition can still be treated as a joke, though even in France there are heard ominous rumbles between the jokes passed at our expense.—Popular Science Monthly.

To Jail by Airplane.

Aerial policemen in San Francisco are thus far the first to make use of the airplane to conduct a prisoner to jail, via the automobile patrol.

The sky route offers the most direct passage between two places, and in this instance the prisoner was transferred from the Alexandra county jail across the bay of San Francisco to the locality where an automobile patrol was waiting to continue the journey through the city. Where it is necessary to save time, the airplane can be of service, as in this case.

When the air becomes crowded with machines, the arrest of violators of the air-traffic laws will undoubtedly become common and aerial patrols will no longer excite comment.—Popular Science Monthly.

FIGURED IN HISTORIC PAST

Representation of Monarch of the Time of Abraham Now in Pennsylvania Museum.

In the dim old days of the patriarch Abraham people looked very much as they do now, judging from the oldest representation of human figures unearthed by the tolling brotherhood of archeologists. Two striking figures, one standing and one seated, are included in the elaborate design of the clay seal, or "postage stamp," which has excited the enthusiasm of Dr. Legrain, curator of the Babylonian section of the University of Pennsylvania museum.

Dr. Legrain has figured out the inscriptions of the little tablet as indicating that it dates from the period when "Ur of the Chaldees," mentioned in Genesis in connection with the history of Abraham, was a flourishing kingdom. And he finds reason to believe that the seated figure, decorated with flounces of beautiful accordeon plaiting, is a portrait of his majesty Ibi-Sin, the last king of Ur and possibly an intimate friend of the Father of Israel.

To the modern eye both figures are remarkably well drawn and lifelike in attitude, especially considering the fact that they were modeled in clay on a very small scale. Dr. Legrain thinks the tablet served the double purpose of a seal and a postage stamp on a sack of money forwarded to a banker named Shulpae by his reverence the high priest of the temple of Ur, at which Abraham worshiped.

TOO HEALTHY FOR MEDICINE

People of Tristan da Cunha Throw Supply Left by British Cruiser Into the Sea.

The island of Tristan da Cunha is described as "an unspoiled haven of rest for the weary soul, a mecca for those who long for relief from worries of life," by the chaplain of the British cruiser Dartmouth, which has just returned from a visit to that isolated spot.

"No need to worry over money there, for there is none," said the chaplain. "There are no taxes, no doctors, no lawyers, no clergymen, no policemen, not even a head man. Newspapers and mail arrive, with luck, about once every two years.

"There is not even any medicine, for the latest supply of remedies was thrown into the sea by the inhabitants, who are remarkably healthy. Epidemics are unknown.

"Tristan is a British possession in the south Atlantic, between South Africa and South America. Its snow-capped peak towers nearly 8,000 feet above sea level. It is only 21 miles in circumference. The nearest inhabited place is St. Helena, 1,200 miles away. The only habitable portion of it is a tongue of fertile land at the foot of the precipitous cliffs."

The Wrong Number.

Mrs. New Auto owner, all excited, called her husband over the telephone at his office, and announced: "The auto tags came by mail, but we will have to send them back. They sent the wrong number." Business of considerable questioning from the business office end of the telephone.

Then: "Well, they're not the same numbers we had last year, so I thought they had made a mistake."

Explanatory: The machine had come into possession of the family late in the year, a license number was obtained that had six figures and the husband got in early for a 1921 license hoping to obtain a smaller number and he got it.

Anyway, the wife had a good laugh at her own expense when the husband arrived home that evening. And she is learning something each day about autos.

Pellagra and Income.

After a three-year study of pellagra in the cotton-mill villages of South Carolina, the United States public health service shows that pellagra varies inversely with the family income in this locality. As the income fell the disease was found to increase and to affect more members of the same family. As the income rose the disease decreased, and was rarely found in families that enjoyed the highest incomes, even though this highest was still quite low.

A recent statement given by one of the large life insurance companies indicates that the food standards of Southern wage earners must have improved remarkably of late, for the death rate from pellagra has fallen from 6.7 per 100,000 in 1915 to 2.3 in 1919.

Much Gasoline Wasted.

About one-third of the gasoline used in automobiles is wasted. This is the conclusion reached by A. C. Fieldner of the United States bureau of mines, from experiments under traffic conditions to determine the air pollution of the vehicular tunnels under New York city. The waste is chiefly due to too rich gasoline mixture. It is estimated that an improved and practically automatic carburetor might save American auotmobilists $34,000,000 a year.

Free Medicine.

A prominent city man, who is as parsimonious as he is wealthy, is very fond of getting advice free. Meeting a well-known physician one day, he said to him:

"I am on my way home, doctor, and I fell very seedy and worn out generally; what ought I to take?"

"Take a taxi," came the curt reply. —Tit-Bits, London.

TO EXPLORE OCEAN'S DEPTHS

British Government Contemplating an Expedition for the Gathering of Scientific Information.

The British government is contemplating the dispatch of a deep-sea exploring expedition which is expected to gather much valuable scientific information.

Most people imagine that the depths of the ocean have been pretty thoroughly explored, but this is very far from being true. As a matter of fact, only a very small fraction of the whole area of deep sea bottom has been surveyed. Attention is particularly called to a vast subaqueous region around the Falkland islands and up as far as Montevideo, which is almost unknown, and which, having a depth of less than 100 fathoms, may offer opportunities for the development of lucrative fisheries.

The first deep-sea exploring expedition, that of the famous Challenger, was set on foot just 50 years ago. The ship left port in 1872, and ideas on the subject were in those days so primitive that there was dispute as to whether she should use wire or hempen rope for soundings. It took a whole day to make one sounding, or a single cast of the dredge for bringing up fishes and other animals.

Since then deep-sea sounding apparatus has been much improved by cable ships, and fishing gear has been greatly modified by steam trawlers, which use dredges. Besides, a great deal that is of value has been learned by oceanographic expeditions subsequent to that of the Challenger. Hence the new exploring vessel will start out with a prospect of accomplishing a very great deal of work of real importance.

TOO MUCH FOR SMALL MINDS

Childish Messengers Have Hard Time Remembering Names of Books They Are Sent For.

"I want 'Ressurection in the Parks,'" demanded a little chap of the librarian at the West Indianapolis branch library. "My brother said for me to get it for him."

The librarian did not wish to let the little chap know she was puzzled. She knew it was something that went on in the parks that the boy wished. The "resurrection," she decided, might be "recreation," and that was what she suggested. "That's it," smiled the little chap, "I knew I had that word wrong."

Librarians often deal with little brothers and sisters who are running errands for big brothers and sisters in high school. When one of the tots asked the librarian at the West Indianapolis branch for "Europe's Fables," the librarian smiled, for that was simple to translate into "Aesop's Fables." It was different when another asked for "Out of the Twist," the librarian then had to inquire diligently before she found that the child patron meant "Oliver Twist."—Indianapolis News.

Explanation Briefly Made.

Harold Knutson, Republican whip of the house, tells a yarn about an old fellow up in his country who has a job carrying the mail from the depot to the postoffice, for all of which he gets $1 a trip.

Some of the boys around the grocery store the other night got to kidding the old chap about his job and, eventually, they asked him how much he made out of it.

"I make $1 a trip, three trips a day, $125 a month, or $3,000 a year," he said.

These figures not sounding just right, one of the boys sought to pin him down on his calculations.

"How do you make $3,000 a year?" he asked.

"A-carryin' the mail," responded the carrier, and with those few words he departed.

Saturday Change.

Many storekeepers begin their Saturdays by shopping in the neighborhood for small change—dimes, nickels, and pennies. Seven customers out of ten at the butcher's, baker's and grocer's on Saturday pay for their purchases with $10 and $5 bills. Not one in twenty counts out the exact amount.

One storekeeper has found that $50 in subsidiary coins is none too little to carry him through.

Transit lines and automatic vending machines receive tons of coins in a day. Within 48 hours these coins are back in circulation.

Dimes, nickels and pennies are the most active elements of our circulating medium.

Cat Evidently Was Offended.

A yellow cat called Shimmy, of no particular breed, but lately a cherished mascot of the Aberdeen (Wash.) fire department, left her home there suddenly. Shimmy, according to the fire laddies, who hunted three days without success for their vanished pet, made her nest in a coil of hose which is used to wash the floor of the fire hall. On the morn of Shimmy's disappearance a careless fireman turned the water into the coil. Shimmy was catapulted toward the ceiling and shot by the stream of water into the street. The cat has not yet come back.

Financial Backing.

"Your friend the reformer seems to be enjoying great prosperity these days."

"He had a stroke of luck."

"What was it?"

"He ran across a very rich person who had a troubled conscience."

Why Printers Go Crazy

Strange, isn't, what a difference a letter or two can make? A prnter somewhere in the Rocky Mountain district gave real individuality to a circular announcing the beginning of a newspaper by merely eliminating all use of two letters. The circular speaks for itself:

"We began the publication of the Roccay Mountain Cyclone with a phew diphphiculties in the way. The type-phounders phrom whom we bought our outphit phor this printing ophphice phailed to supply us with any ephs or cays, and it will be phour to phive weeques bephore we can get any. The mistapue was not phound out till a day or two ago. We have ordered the missing letters, and we will have to get along without them till they come. We don't lique the loox ov this variety ov spelling any better than our readers, but mistaix will happen in the best ov phamilies, and iph the ph's and cs and x's and q's hold out we shall ceep (sound the c hard) the Cyclone whirling aphter a phasion till the sorts arrive. It is no joque to us—it is a serious aphair."

Bobbed Hair Wins Husbands.

It may be possible girls are bobbing their hair that it won't take them so long to get ready when an automobile toots outside. Many a husband has been lost to a girl because she used forty-nine hairpins.

The Hancock County Ministerial Association held their meeting in this city Monday afternoon. Rev. Gauger, Wiggins and Webb, of Garner; Rev. Miller from Goodell; Dr. Pierce of Britt; and a Reverend gentleman from Kanawha and Corwith. whose names we did not get, were here to take in the meeting. The meeting was held at the State Savings Bank. We suppose the sky pilots are organizing so that they can pull down more wages, preach shorter sermons (which last would suit us) and resolve to work a half a day a week instead of one. Must be a great snap to be a sky pilot now days.

Garner will have their band concerts on Tuesday evening. have secured a competent band er who will come to Garner and can thus devote his entire when necessary. That is an arrangement for then they will their man when needed. should hire their leader on the plan.

WHY THE CELT WAS PUZZLED

Visitor's Inquiry Did Seem Unreasonable in View of Statement He Had Previously Made.

A well-known physician of New York tells why he does not know whence his ancestors came.

Now, he had always understood that his ancestors were Scotch-Irish, and on the strength of that belief had prided himself on their royal blood.

Once it occurred to him to go and have a look at the old place whence they were supposed to have come. When he arrived at what he believed was the right district he appealed to an old Irishman to tell him the exact spot.

The Celt regarded him much as one does a crazy man, and then said:

"Ye say that your ancestors emigrated from here 200 years ago? Then why the deuce, sir, are ye lookin' for them here now?"

Historic Race Is Repeated.

History repeated itself at Natchez, Miss., recently when the Robert E. Lee, a giant seaplane, defeated the Mississippi-Warrior tugboat Natchez. Hundreds of people thronged the river front to witness the race, which easily went to the namesake of the historic river packet, the Robert E. Lee, the winner of the original race.

The Natchez is the first of six powerful tugs that are being constructed to tow barges on the Mississippi and Warrior rivers, and was proceeding down stream to New Orleans at the time of the race. On the departure of the Natchez the Robert E. Lee took to the air and once again the race between the namesakes of the two famous river craft was enacted.

Cultivator Time is Coming

"Do Your Shopping Early"

Mr. Farmer you are now busy planting your crop---good seed and a good planter insures a good stand, but without proper cultivation your corn will not bring a good yield. We have the best cultivators to do the best work.

John Deere and La crosse
Single and two-row cultivators

and other good makes will fill that long felt want for a good cultivator and say --- we sure sell them at a low price.

Cultivator Repairs

Get your cultivator in shape now and have us fill your order for repairs. We carry spearpoint shovels in all sizes.

Other Timely Hints

Speaking of repairs - we also have lots of Double-trees, Eveners, Tongues, etc. for all machinery. And say we have a good supply of Rape and Millet Seed---get yours now. Hot weather is coming and the "Mrs." will want a chicken Waterer and you will want a Hog Waterer, we have both at most reasonable prices.

"If it's for the Farmer, we have it"

W. M. Baack

TO CLIMB MOUNT EVEREST

British Royal Geographical Society Said to Be Contemplating Ambitious Expedition.

Enormous interest has been aroused by the announcement that the Royal Geographical society contemplates fitting out an expedition to attempt the ascent of Mount Everest, in the Himalayas. For not only is this the highest mountain on the globe; but it is also the world's mystery mountain.

Although it was discovered 70 years ago, no European has yet succeeded in getting anywhere nearer than about fifty miles to it, much less setting foot on its slopes.

This is because it so happens that it is situated partly in Nepal and partly in Tibet, and the governments of both these countries object to the presence of European explorers.

Besides this the Nepal base of the giant mountain is in any case practically unapproachable, owing to the dense jungle growth, extending for a width of 60 or 70 miles all round, and into whose depths no white man may venture and live.

The proposal now is to attempt the ascent from the Tibetan side. This is doubtless possible, but whether the summit can be reached or not is another matter.

Most experts say not, and point to the fact that the duke of Abruzzi's attempt to scale Mount Godwin-Austin, Everest's mighty neighbor, and the second highest peak in the world, resulted in failure.

He ascended as far 24,600 feet, but was then obliged to turn back, owing to the difficulty of breathing, due to the extreme rarefaction of the air. Mount Everest is more than 29,000 feet high.

ANCIENT HARPS OF IRELAND

Two Instruments, Each Having a Distinct Purpose, Were in Use in Olden Times.

The ancient Irish harp was of two kinds—a small instrument used chiefly for religious purposes, first by the old Druids in their rites, and later by the Christian bishops and abbots. The other harp was large, and was used in public assemblies and in battles.

The bagpipes were introduced into Ireland from Caledonia. They had the same use in the Irish armies they now have in the Highland regiments. But the Irish made, in the course of time, an improvement, using bellows to fill the chanter, instead of the mouth, and continued improving the instrument until the union-pipes of today are the result.

As to early Irish harpers and their music there is little known, but at Queen Elizabeth's court, Irish tunes were popular. Of late huge books of ancient Irish melodies have been collected and arranged. Petrie has attracted attention to this field by his thorough investigation of Irish folk music.

India Ink Really Chinese Ink.

The intensely black inks have various sorts of finely divided carbon as their pigment, and the vehicle in most instances is some type of oil or varnish. India ink is the name often applied to what is in reality Chinese ink. The best of this variety comes from the Anhui province and is made from the lamp black produced when wood oil is slowly burned in one earthenware vessel and the soot or lamp black produced is collected on the sides of a second jar placed above the first. A paste is made with varnish and pork fat and this is then mixed with glue. Some ink is made from the soot of sesame or rapeseed oil, but in any case the paste is pressed into molds. There are, of course, many grades of this ink, the lower being made from the coarser soot and glue. In 1918 the Chinese exported 127,000 pounds of this ink.—Scientific American Monthly.

Literature of the Czechs.

Czechic literature has voluminous and impressive accomplishments to show. Take, for example, Bohemia's three great writers of the nineteenth century, Dobrovsky, Jungmann and Palacky. Jungmann compiled a dictionary of the Czech language in five volumes, Palacky wrote a work of 20,000 pages on Czechic history, and Dobrovsky wrote a grammar of Czechic. The most indefatigable writer, however, was Jaroslav Vrchlicky. He translated Dante's "Divine Comedy," Ariosto's "Orlando Furioso," Calderon, "Faust," Walt Whitman, as well as works from French, Hebrew, Yiddish and Chinese. No one knows how he found the time to do it. Among the leading Czech writers of the present, Frana Sramek, Toman Kodicek, the Capek brothers and Theer rank high. —New York Evening Post.

Before and After.

"Before and after pictures," said an opera singer at a Philadelphia musical, "afford some very striking contrasts. This is especially true of before and after pictures of marriage.

"A man sat with pipe and book and an $18 bottle of hooch before the radiator one night while his wife turned a three-year-old dress.

"The man laid down his book and tossed off his fifth drink of hooch. His wife looked up at him calmly, and said:

"'George, when you proposed to me you said you were not worthy to undo the latchets of my shoes.'

"George stared at her in amazement.

"'Well, what of it?' he snarled.

"'Nothing,' she answered; 'only I will say for you that whatever else you were, you weren't a liar.'"

FLORIDA RABBIT A FIGHTER

Victor in Remarkable Combat With Dog, as Reported by "Honest and Upright Person."

Russell Thompson of Sarasota, a noted angler and dealer in fishing tackle, consequently a very honest and upright person, has submitted the following, with affidavit attached to the Florida Fisherman.

"Last Sunday morning I happened to be standing looking out the window. All at once Dr. Jack Halton's bird and hound dog came down the alley with his back feet over his neck (in the act of running) and Mayor Edwards' rabbit in the lead. The rabbit is a very large specimen of the rodent family and well able to care for himself, as well as the dog who happens to be a combination bird, rabbit, coon and anything else that happens to be in sight. Well, it was not long before the same pair came back, but the rabbit was not in the lead. Rube, the dog, and the rabbit played for about twenty minutes up and down the alley, in the back yards, and seemed to be having a wonderful time, when all of a sudden the rabbit, tiring of such amusement (please believe me), jumped and bit Dr. Jack Halton's dog under the neck, then, to do the job up right, kicked poor Major several times, thus ending the morning's exercise."

ONE HIGH SCHOOL A DAY

For Twenty-Eight Years That Has Been the Record This Country Has Made.

In a pamphlet on high schools in this country, issued by the federal bureau of education, it is stated that the total number of these schools in 1917-18 was 13,951. The mailing list of the bureau includes the names of 16,300 high schools. The number of these schools has increased over 452 per cent since 1890. This means that one high school has been established in this country each day in each calendar year since 1890—a high school a day for 28 years.

In 1890 60.8 per cent of the high schools were under public control, but in 1918 the public-controlled high schools were 87 per cent of the whole.

The average size of a city high school is 653 students and of a rural school 59 students.

In 1890 only 312 persons in each 1,000 population were enrolled in public high schools. In 1918 the corresponding number was 15.6, or almost five times as great a proportion. California leads in high-school education, with 27 persons out of each 1,000 in the population. Kansas is a close second, with South Carolina at the bottom of the list, with 5.3 persons.

The Yellow World.

It is easy to see why China's imperial color is yellow, writes a correspondent from Yangste river. Her rivers are yellow, her long plains are yellow—especially in a famine year such as this, and as for her seas—the boundaries of her world—so desert-yellow is their color that a string of camels crossing them would look more in keeping than a string of junks. And so one can understand why the very heart of the heart of China, the Imperial city, should lie like a shimmering lake of golden tiles within her lotus-besieged walls. Even against the evidence of my own eyes I cannot believe that the Great Wall is built of solid ordinary stones laid one upon the other. Rather it seems moulded out of the stuff of which the mountains themselves were made, long ago when the world was plastic and empty of all save possibilities. There never was so sinuous a thing as the Great Wall built by men, I think, so sinuous and so aspiring.

Does Away With Long Climb.

Something unusual has been accomplished in the completion of the entrance to the Southwest museum, in Los Angeles. The building is situated on a high hill and until recently it has been necessary for pedestrians to make a long and laborious climb up the hill to reach the main entrance. Now, however, the climb has been obviated by an artistic as well as practical improvement. A tunnel, 224 feet long, was bored into the hill and ended in a large octagonal waiting room, on one side of which is a twelve-passenger electric elevator of the automatic type. The elevator makes a climb of 108 feet, delivering the passenger into the main hall of the museum.

Copper's Value as Alloy.

The use of a small proportion of copper in all iron and steel products exposed to air and moisture is advised by D. M. Buck, metallurgical engineer of the American Sheet and Tin Plate company. The use of 0.15 to 0.25 per cent, in normal open-hearth or Bessemer steel greatly lessens corrosion, but heretofore the use of copper steel has been chiefly confined to sheet metal. It is estimated that the life of the sheet metal is at least doubled by the addition. Copper melts at about 700 degrees F. below the average tapping temperature of the steel, and it diffuses readily through the metal without tendency to separate out afterward.

Savages Give to Missions.

Two hundred boys from the Nega Hill tribes of Assam went to the war in France, and all were baptized into the Christian church while in the army. Upon returning home every one donated a month's pay to mission work as a thank offering for their preservation.

TOLSTOY IRKED BY IDLENESS

Letter Written by Russian Philosopher Condemns Life Led by Indolent Men of Means.

The Vossische Zeitung prints the following letter by Tolstoy, written in 1884, with the remark that it has never before been published except in Russian, and that its value lies in the fact that as early as 1884 Tolstoy had about made up his mind to do what he did in 1910—leave home and live the life of a peasant. The letter reads in part:

"I am living in the country, involuntarily according to a new method. I go to bed early, get up early, write very little but work a great deal, either making boots or mowing hay. I see with joy (or possibly it only seems to me like joy) that there is something up in my family. They do not condemn me; as a matter of fact, they seem ashamed of themselves.

"What miserable creatures we are and how we have all gone astray. There are a great many of us here, my own children and the children of Kusminsky, and nobody does a thing but gulp down food. They are all big and strong, yet they do nothing. People in the village are at work. My children eat and make their clothes and their rooms dirty and that is all. Everything is done for them by somebody else, yet they do nothing for anybody. And worst of all, they seem to feel that it is as it should be. But I have had my own part in building up such a system, and I can never forget it. I feel that for them I am a trouble-fete. But it is clear that they are beginning to see that this cannot go on this way forever."

HAD NO CAUSE FOR WORRY

Under the Circumstances Wash White Could Afford to Live Life of Elegant Leisure.

Senator Gronna of Dakota was analyzing a political opponent at a Dakota luncheon.

"The man is bad through and through," he said. "He's actually so bad that he mistakes badness for goodness—is proud of himself, in short.

"By Jove, he makes me think of Uncle Washington White. As Uncle Wash loafed in front of the poolroom one morning the preacher's wife stopped and said:

"'Washington, why don't you go to work?'

"Old Wash White, as he puffed serenely on his corncob, answered:

"'Bekase Ah got a wife an' children toe suppo't—'

"'But,' the preacher's wife impatiently interrupted, 'you can't support them by loafing here in front of this poolroom.'

"'Excuse me, Miss' Fo'thly,' said Wash, with dignity. 'Lemme finish mah remark. Wot Ah means toe say is that Ah's got a wife an' chillun toe suppo't me.'"—Detroit Free Press.

New York Boys' New Game.

The game of marbles no longer holds a throne in boyville. Any New York side street where there's enough room between bluecoats and automobile traffic to play, will show you that a new game has taken its place.

"Sidewalk checkers," the boys call it. The new game really has the elements of both the old marble shooting days and checkers as played on a board. Checker men are used—red, black, blue—the color makes no difference. A ring is drawn with chalk and the object is to flip your checker man with enough force to knock your contenders out of the ring.

"Hully gee!" said a future Ponzi as he gathered up his winnings on Reade street near Broadway, "ain't I got enough lumber here to start me a paper mill?"—New York Sun.

Men Who Repair Skeletons.

There are two kinds of skeleton-menders—the bone surgeon and the skeleton-assembler. Art schools, medical colleges, and students of anatomy require an accurately constructed skeleton to aid in their work.

All the bones must be properly assorted and carefully put together. They are strung on fine wires. The skeleton-assembler must also pick out of the hundreds of odd bones that are sent him the 200 or more bones that belong to the particular individual being reconstructed. It is not an easy task, and the price of skeletons is justified by the amount of work required to construct them.—Popular Science Monthly.

May Use South American Wood.

The Pennsylvania railroad, owing to the unprecendented cost of railroad ties, has decided to investigate the adaptability of the hard woods of Central and South America for this purpose, it is announced. Normally the Pennsylvania system uses from 5,000,000 to 6,000,000 ties annually. The average net cost has risen fully 100 per cent since the beginning of the war. Furthermore, white oak, which the company regards as the most desirable wood for ties, is becoming scarcer. Therefore, the company has inquiries under way to determine the comparative cheapness and durability of southern hard woods for railroad ties.

The Useless Bell.

"The bell on your house has been out of order for weeks. I should think you would have it repaired."

"What's the use? Nobody ever rings it any more. Our friends just sit out in their cars and honk their auto horns until we come to the door."

Wellemeyer Dept. Store

Klemme, Iowa — May 19, 1921

Klemme and Vicinity

Mrs. Martha Bras from Goodell was a Klemme visitor last Friday.

The May term of court is in session this week at Garner.

Mr. and Mrs. Ralston from Meservey were Klemme visitors Monday.

Mrs. Mary McNutt from Goodell was a visitor in this city Monday.

Mr. and Mrs. Ellsworth of Goodell were callers in this city Monday.

Mrs. Frank Dominny of Goodell was a Klemme visitor Saturday.

George Lufck's were up from the town of Goodell Saturday.

Mrs. Gunderson from Kanawha was a Klemme caller Saturday.

Mrs. Frank Quigley, Jr. from Goodell was a Klemme visitor Saturday.

Mr. and Mrs. Cliff Brogan from Meservey were Klemme visitors on Monday of this week.

Mr. and Mrs. Cornelius Jansen of Meservey were transacting business here Monday.

M. O. Hocum and family drove to Mason City last week Thursday on business.

Mrs. Denny Conlan, of Goodell was visiting in Klemme Monday between trains.

Dr. and Mrs. G. A. Bemis, of Garner, were calling on Klemme friends last Wednesday evening.

Mrs. Schank. of Belmond was a Klemme visitor Monday. Her daughter, Elizabeth accompanied her.

Mrs. John Baumgartner and daughter, Donna, went to Iowa City Monday on business.

Mrs. Ralph Quintus and Mrs. Louis Quintus, of Garner, were Klemme visitors Friday.

Mrs. J. N. Day was at Garner last Wednesday having some dental wark done.

Mr. and Mrs. John McCorkle of Kanawha were Klemme callers Saturday.

Mrs. Henry Griffen and children of Goodell were Klemme callers on Saturday.

Mr. and Mrs. Lyman of Garner, came Tuesday for a visit with her parents, Mr. and Mrs. Fred Wilkins.

Mrs. Cordes, of Goodell, was a Klemme caller between trains last Saturday.

Walter Ross and family of Garner were visiting in Klemme Saturday.

"Bud" Ulrich and "Jimmie" Wade drove over to Charles City Monday on business.

Mrs. Ole Sandberg and son from Goodell were visiting in Klemme on Saturday.

C. H. Tompkins, of Garner was in Klemme Monday on a business mission.

George Ruka and daughter, Alma. of Goodell wre Klemme visitors on Saturday.

LOST—Sunday night auto license number plate, Ia. 156,525 1921. Finder return to Times Office for suitable reward.

Mr. Sugar, of Nevada, Iowa, was a business visitor here the fore part of the week. He is connected with the ranch business east of town.

A. D. White and wife and daughter Mamie. and Mrs. Ed Hughes, all of Goodell were Klemme visitors on Saturday evening.

A number from here drove over to Britt Sunday afternoon to see the ball game between Britt and Kanawha.

Mr. and Mrs. Walter Ludwig, and Mr. G. H. Ludwig, of Nevada, Iowa, were over Sunday visitors with Mr. and Mrs. E. S. D. Kahrs.

Mr. Cline, of Fairmont. Minnesota, was in town the fore part of the week. He came here to look after some tiling on the Stone ranch east of town.

LOST—A gold wrist watch on the srteet betwenn Idle Hour and Drug Store on April 29th. Finder please leave at the Times Office and receive reward. adv.

Mr. and Mrs. J. N. Day and son Dorance drove to Garner last Friday. Walter Nissen who had been visiting them for a few days went with them and from there he took the train for his home at Milford.

Mr. W. C. Oelke, of Corwith, is the gentleman who has been assisting in the First National Bank the past week. He spent Sunday with his family at Corwith but was back on the job again Monday. He will remain here for a few weeks.

It may be a little late, but better late than never to report good news. It was reported to us the other day that a fine baby boy arrived at the Cornelius Wille home a week ago Thursday. Alright Cornelius you can bring us the smokes.

Mrs. Thos. McElligot. of Evanston, Illinois, came Sunday for a visit with her husband here, who is in charge of the construction company putting in the sewers. Mr. McElligot drove over to Mason City Sunday to meet her.

Rev. and Mrs. A. H. Meyer went to Dows last Friday for a visit with relatives and also to attend the picnic put on by the school. Frances and Willard Heuer, their neice and nephew returned with them for a visit of a few days.

Miss Minnie Lenz was drawn on the jury and went to Garner Tuesday morning to attend the court. She is the second Klemme lady to be summoned for jury work. Mrs. C. W. Wiles holds the honors for first place.

Hod Lawhorn and wife returned Saturday from Dubuque where they were called by the serious illness of Mrs. Lawhorn's father. He died a week ago Sunday, shortly after Hod arrived. Mrs. Lawhorn was with him several days before his death.—Garner Signal.

CUT FLOWERS for Decoration Day should be in our hands by Saturday, May 28th. Blooming plants in pots should be selected now for Decoration Day, and buy your garden Plants now for Wellemeyer's Plant Sale closes Saturday, May 28th.—adv.

The county sheriff came over to Hardy last Saturday and took the village blacksmith, his still and surplus liquor to Humboldt. This is a sad bit of news for many of the boys who have been going forty miles for booze when they could have obtained it right at home if they had been wise to the fact.—Renwick Times.

It is reported that in various parts of the state that many farmers are plowing under their spring crop of oats that has been damaged by the numerous frosts, and are now preparing the land for corn. They believe that the oat crop was so seriously damaged as to be practically worthless

Walter Nissen came from Milford, Iowa last week Wednesday for a few days visit with the J. N. Day family. Walter will go to Morningside College at Sioux City next year. His brother Donald is a Junior there this year and his other brother Harold is a Freshman there this year. The boys are all well known to Klemme people. especially Donald, as he comes here each year to work in John Day's store.

Over at Bode last week, says the Renwick Times, they are having a rat killing contest. The city council has placed a bounty of two cents on every rat killed within the city limits, and a special prize of $5.00 will be paid the one killing the most rats up to June 15th, $3.00 for the second premium and $2.00 for the third. Such a stunt might be wll to pull off in Klemme or any other town as rats destroy many thousands of dollars worth of property every year.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10:00 o'clock. Sunday school at 11:00 o'clock. Epworth League Sunday night at 7:30. Preaching service at 8:00 o'clock.

Liberty Township Sunday school meets at 10:15 A. M. Preaching services at 11:30. Epworth League Sunday night at 8:00 o'clock.

The orchestra will again favor the congregation with special music on Sunday night.

Monday afternoon at 3:00 o'clock will be the first session of our Sunday school and Epworth League Convention. Monday night Dr. Kohlstead will give an illustrated lecture. A good program has been arranged for.

DAIRY FACTS

BREEDER HELPS ASSOCIATION

Nebraska Dairyman Offers to Sell Purebred Sires at Half Price to Promote Quality.

(Prepared by the United States Department of Agriculture.)

Following the meeting of the Nebraska State Dairymen's association at Lincoln, Neb., recently, a prominent breeder from that state offered to provide bulls for a bull association at half their value, according to a representative of the dairy division, United States Department of Agriculture. Appreciating the value of the bull association in establishing a certain line

Unusually High-Producing Herd of Purebred Cows.

of breeding, this dairyman told a dairy extension specialist that when he formed a bull association he could choose the bulls from his herd, set a fair price on them, and he (the breeder) would cut that price in two.

This breeder has a large and unusually high-producing herd of purebred cows, the herd average being more than 18,000 pounds of milk a year. Offers of a similar character have been made by several other breeders in different sections of the United States, says the department specialist, all of which indicates that the value of the association plan as a means of improving the quality of dairy cattle is becoming more generally recognized.

When a bull association is formed one dairy breed, usually the one predominating in the locality, is selected for that association, and purebred bulls of that breed are used to improve the herds. As time goes on a number of good purebred and grade herds of the same breed are developed. When one breeder supplies a number of bulls to one association these bulls, generally of similar breeding, make it possible to concentrate the blood of certain families among 250 to 300 cows. Each bull is used in each block for two years. Thus the four or five bulls are used consecutively for eight or ten years, developing in one community a large number of dairy cattle of uniform type and breeding.

STUDY OF INDIVIDUAL COWS

Scale and Milk Record Sheet Give Feed Requirements and Other Characteristics.

The first great step with any dairyman in determining the true measure of his individual cows is taken when he begins to test or deal with his herd as individuals, and not just as a whole. Then he soon learns that he must own a scale and milk record sheet, and use his mind and his pencil to study the individual cow, her feed requirements and her other characteristics.

FOR BEST WORK WITH CHURN

Important Not to Have Too Much Cream in at a Time—Handle All Butter With Ladle.

To do the best work with the churn, do not have too much cream in at a time. A churn that is too full does not get all the butter out of the cream. So you lose, and lose heavily. No churn ought to be more than half full—less would be better. And then keep your hands off the butter. Handle it with the ladle.

KEEP MILK IN HOT WEATHER

Qualities Improved by Cleanliness of Cow, Milker and Especially of Pans and Pails.

Milk will keep fairly well in the hottest weather, provided the bacteria are excluded. This can be done by cleanliness of cow, bag, milker and especially of milk pails and milk cans. Pasteurization is still used to improve the keeping qualities of milk.

CLEANLINESS IS GREAT HELP

One Man Can Groom Two Cows Sufficiently in Minute to Remove Particles of Dirt.

Clean cows contribute to cleanliness of milk. With a stiff brush one man can sufficiently groom two cows a minute. If a currycomb is used, take one on which the points have been worn down, so they will not be too severe on the cows.

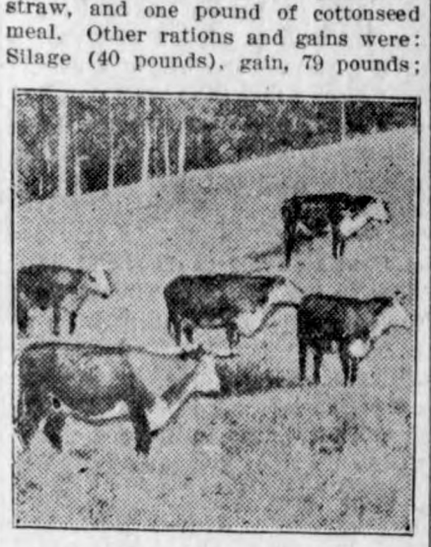
FARM LIVE STOCK

FEED FOR WINTERING STEERS

Methods Used and Results Obtained by Department of Agriculture at Lewisburg, W. Va.

(Prepared by the United States Department of Agriculture.)

Experiments to determine the most desirable rations and methods for wintering steers were continued last year at Lewisburg, W. Va., by the United States Department of Agriculture, cooperating with the state agricultural experiment station. Sixty two-year-old steers, averaging 927 pounds in weight, were divided into six lots of ten each and wintered for a period of 128 days, beginning December 23, 1919. The greatest gain—93 pounds—was made by the lot fed on a daily ration of 25 pounds of silage, 5.4 pounds of straw, and one pound of cottonseed meal. Other rations and gains were: Silage (40 pounds), gain, 79 pounds;



A Good Bunch of Steers.

silage (30 pounds) and cottonseed meal (one and a half pounds), gain, 67 pounds; silage (25 pounds) and mixed hay (eight pounds), gain, 63 pounds; mixed hay (20 pounds) and ear corn (two pounds), gain, 25 pounds; silage (30 pounds), gain 22 pounds.

The steers used in the wintering experiments at Lewisburg were grazed on pasture to determine the effect which the different rations fed and methods of wintering had on subsequent pasture gains.

PUREBRED FEMALES FAVORED

In Opinion of Specialists Number of Purebreds of Both Sexes Is Rapidly Increasing.

According to figures announced by the United States Department of Agriculture, live stock owners in the United States show a tendency toward purebred female animals as well as toward purebred sires. In fact, the use of well-bred sires appears to increase the use of good females. During the period October 1, 1919, to March 31, 1920, the quality of female stock kept in herds and flocks headed by purebred sires, was 48.3 per cent purebred, and 2.5 per cent scrub. The remaining number were grades of crossbreds. Later figures covering the period October 1, 1919, to December 31, 1920, show that the number of purebred females kept under corresponding conditions had increased to 55.9 per cent and scrubs had fallen to 2.1.

These figures are based on a knowledge of the breeding of nearly 400,000 head of animals and poultry. In the opinion of department live stock specialists, the more general use of purebreds of both sexes on farms in the United States is increasing. In about a year, it appears, the increase in the use of purebred females by purebred-sire users has been at least 7 per cent.

DEVELOP HORSES AND COLTS

Protein Feeds Tend to Produce Muscle —Concentrates Are Necessary for Work Animals.

For young horses and colts muscle development is very important. Protein feeds tend to produce this. So do leguminous hays, such as alfalfa, clover, cowpeas, soy beans and peanuts. The following concentrates are valuable: Wheat bran, cottonseed meal, rice, bran and shorts. From one to two pounds of cottonseed meal a day with the grain have been found to be very economical and highly desirable for horses doing heavy work.

SELLS HIS POOR PUREBREDS

Undersized and Poorly Conformed Animals Sold for Beef by Nebraska Live Stock Man.

"I sold as beef two purebred Shorthorn bulls, one undersized, the other of poor conformation." This statement to the United States Department of Agriculture from a Nebraska stockman aiding in the Better Sires—Better Stock campaign, indicates a growing understanding that desirable sires must be of good quality in addition to being purebred.

DEVELOP AND FATTEN SWINE

Terms Are Often Misused in Speaking of Hogs—Some Essentials for Development.

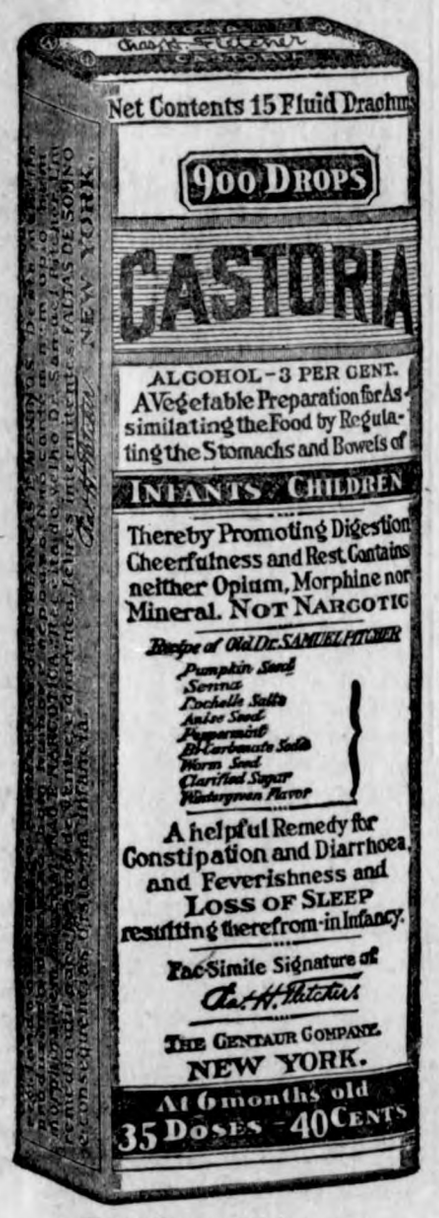
The word develop is often misused for the word fatten. This is a mistake. In order to develop a pig he must have suitable food to keep up a good growth of bone and muscle and regular exercise to give him strength and vigor.

Why Castoria?

YEARS ago Castor Oil, Paregoric, Drops and Soothing Syrups were the remedies in common use for Infants and Children; Castor Oil so nauseating as to be almost impossible and the others all containing Opium in one form or another, but so disguised as to make them pleasant to the taste, yet really to stupify the child and give the appearance of relief from pain.

It required years of research to find a purely vegetable combination that would take the place of these disagreeable, unpleasant and vicious remedies that from habit had become almost universal. This was the inception of, and the reason for, the introduction of Fletcher's Castoria, and for over 30 years it has proven its worth, received the praise of Physicians everywhere and become a household word among mothers.

A remedy ESPECIALLY prepared for Infants and Children and no mother would think of giving to her baby a remedy that she would use for herself, without consulting a physician.



Exact Copy of Wrapper

Children Cry For Fletcher's CASTORIA

Have You Tried It?

Everybody has read the above headline; how many believe it? Have you a little-one in the home, and has that dear little mite when its stomach was not just right felt the comforts that come with the use of Fletcher's Castoria? You have heard the cry of pain. Have you heard them cry for Fletcher's Castoria? Try it.

Just help baby out of its trouble tomorrow with a taste of Castoria. Watch the difference in the tone of the cry, the look in the eye, the wiggle in the tiny fingers. The transformation is complete—from pain to pleasure. Try it.

You'll find a wonderful lot of information about Baby in the booklet that is wrapped around every bottle of Fletcher's Castoria.

New Life for Sick Man

Eatonic Works Magic

"I have taken only two boxes of Eatonic and feel like a new man. It has done me more good than anything else," writes C. O. Frappir.

Eatonic is the modern remedy for acid stomach, bloating, food repeating and indigestion. It quickly takes up and carries out the acidity and gas and enables the stomach to digest the food naturally. That means not only relief from pain and discomfort but you get the full strength from the food you eat. Big box only costs a trifle with your druggist's guarantee.

Hot Springs Waters Wonderfully Successful in the Treatment of Rheumatism

THE peculiar properties of the waters of the Hot Springs of Arkansas are due to radio activity, found in them to an exceptionally marked degree, and their equal has never been known in the treatment of rheumatism and all uric acid troubles. These springs are owned and controlled by the U. S. Government.

The cost of living at Hot Springs may be regulated to suit any purse, accommodations varying from moderate priced boarding houses, up to the most fashionable hostelries.

MEMORIAL DAY TO BE OBSERVED IN KLEMME MAY 30

Memorial Day will be observed in Klemme this year as has been done in the past. Memorial Day comes on Monday this year and that is the day it will be celebrated.

The committee in charge of the program have not all arrangements completed so it is impossible to publish the program this week. but it will appear in the next issue of the Times.

The committee make a strong appeal for all Ex-Service men to be on hand to head the parade to the cemetery where the graves of Civil War and World War Veterans will be decorated. Appear in uniform if you will.

The Klemme Band will furnish the music for the day. There will also be other music.

Dr. Pierce, of Britt has been engaged to give the address. He is a very good speaker and without a doubt one of the ablest men in this part of the state.

The services will take place in the park and will begin promptly at 10 o'clock A. M.

FINDS FIRST CLASS MAIL IN STRAW PILE

Lst Wednsday D. L. Richardson went after a load of straw and while loading discovered a lot of letters. He investigated, found it was actually mail that had never been delivered by Uncle Sam. He reported to Postmaster Lee who went out and made a thorough search and found what had probably been the contents of a pouch that was stolen in Britt early in April. No pouch was found. The letters were brought to the Britt postoffice and labeled "Mail from Pouch Rifled and robbed" and then forwarded to their destination Thursday. It had been a matter ofsecrecy up to the time Mr. Richardson found the letters, that a pouch had been stolen from Britt, but now it is revealed that the pouch disappeared a month ago some time between the time it arrived in Britt over the M. &. St. L. and the time it was to depart over the Milwaukee. It is not known where it ws stolen from.

It is a strange coincidence that this pouch disappeared about a week before the robbery at Forest City. No clue to the theft has been reported thus far.

HEAVY FROST PAST WEEK

There were two or three heavy frosts the past week, and especially the one we had Sunday morning.

The frost didquite a bit of damage to the oats, so the farmers tell us. Garden truck was also damaged to some extent.

A frost at this time of the year is unlooked for.

Monday night it turned warmer again but then rain set in and this locality is well supplied with moisture.

Hancock County Ministers To Have Picnic In June

At the meeting of the ministers of the county here Monday at their monthly meeting of the Hancock-co. Ministerial Association. the ministers decided that they and their families would have a picnic on June 29th at Twin Lakes, west of Goodell.

This is something new for the ministers of this county, for as far as we can learn they have not held a picnic for "sky pilots" only in the county. They are planning to have a big time and will endeavor to make it an annual event.

NOTICE TO BAND BOYS

Owing to a change of Band Ladr there will be no rehearsal on Friday night. We are sorry to postpone the rehearsal but a change of leaders was necessary. Watch for further announcement as to the next rehearsal and COME.—Secretary.

More Books for the Klemme Library

A consignment of fifty books has been received at the circulating library in the Klemme Post Office.

These books are now on the shelves for the use of the patrons of the library. The list comprises the usual variety, with books of fiction predominating.

Read Your Own Electric Meter

Here's a good tip which we stole from the LuVerne News.— Many people who are not familiar with their electric meter often think they are being over charged. If you want to learn how electricity is measured, you can get a booklet from the engineering department at Iowa State College which will show you all about it, and you can then read your own meter. Percolators, toasters and heating devices consume electricity many times faster than electric lights. Electric irons use on an average a kilowatt per hour, while a 75 watt lamp uses a kilowatt in about 15 hours. It will cost you nothing to get this explanatory circular, and it may be the means of promoting a more harmonious feeling beteween you and the people who furnish you with your electricity.

COW HAS FOUR CALVES

A bossy cow out at Ralph Christie's farm distinguished itself and made a record for this locality and possibly for Northern Iowa when it gave birth last week to four perfectly developed calves, one bull and three heifers. Twin calves are not frequent occurences but occasionally appear. and triplets have been known but when it comes to quadruplet quadrupeds it certainly establishes a record. The calves are well and strong too which makes it the more remarkable.—Belmond Herald-Press

GARNER DEMOCRAT ADOPTS NEW MONICKER

The Garner Democrat is now no more. It all happened last week. Ted Tierney, the editor, was evidently disgusted with the way the Democratic Party acted up in the last election and he decided they were a bunch of bone-heads and that he would end it all by changing the name of his paper to the Garner Leader. It is a fine name and we hope Ted keeps the name of the new paper in mind. Of course it will be a serious loss to the Mule Party and no doubt Ted will receive a personal visit from old Jennings Brayn in regard to the back slide he made at a time when the Democratic party needs him most.

Anyway, Ted, the new name looks fine.

Draws One Week Labor On Street

Joseph Austn was arrested Tuesday mornng by Marshall Rippentropp and brought before Mayor French charged with causing a disturbance of the peace. The evidence at the trial showed that the young man had been making remarks about ladies which was taken up by others who refuted the statements. The result was he arrest and trial. Mayor French, after hearing the evidence assessed a fine of one week at hard labor on the streets of Titonka. The Topic does not make it a practice of going into details and publishing affairs of this nature. In this instance, however, we would derelect in our duty if we failed to give advice to our many young readers. The young man got into trouble because he made assertions about women that were not true. Other young men who are in the habit of talking too freely about the chastity of their neighbors should take heed and make no statements that are not true. Better be kind and considerate—help to build up the morality of the community rather by helping to tear down.—Titonka Topic.

The last general assembly passed a law compelling independent and consolidated school districts to publish a financial statement twice a year, setting forth receipts and disbursements and for what purpose. Inasmuch as a large per cent of taxes go to the support of schools we believe the tax payers will welcome this new ruling. We presume the new law foes into effect July 4th.—Bancroft Register.

SIX WOLVES LESS IN HUNGRY HOLLOW

From the Fertile News:—

Mort and Gus Hagen residing on a farm south of here killed a mother wolf and her six young whelps on Tuesday near the H. A. Paulson and Henry Hill farms in the section of the country known as "Hungry Hollow."

Kohlsted we elease" sent us by the Com- Conservation and Advance ethodist Episcopal Church, go, Illinois, which informa- ws, and which may be of terest to our readres and to o attended the convention: E. D. Kohlstedt, D. D.

Reverend E. D. Kohlstedt, of Field Activities. Commit- nservation and Advance of odist Episcopal Church, is a of Lawrence College and Biblical Institute. He is a member or the Wisconsin Conference, and was for sixteen years a pastor in Milwaukee and vicinity. For four years he was Superintendent of the Milwaukee District, and for two years was Executive Secretary of the Methodist Missionary Centenary of the St. Paul Area.

More than one million people contributed to the $108,000,000, payable in five years, pledged in the Centenary campaign of which $15,489,762 were paid into the treasury in 1920. A summary of the first year's expenditures and achievements made by the Committee on Conservation and Advance of the Methodist Episcopal Church, was given at the meeting of the Epworth League District Convention here by Dr. E. D. Kohlstedt. He also gave an account of the unmet needs of the church.

Dr. Kohlstedt gave a vivid picture of world wide missionary enterprise. In the home field there has been a great and broad expansion, and considerable Americanization work is being done among the foreign speaking people in the United States by 102 English speaking pastors, 283 foreign speaking pastors, 100 women and 141 other social workers. There are 225 foreign language students in training at colleges, universities and schools. In the maintenance for the support of pastors and workers in the United States, Porto Rico, Hawaii and Alaska during 1920, $2,155.000 have been paid. In rural and frontier fields 2,977 pastors have been partly supported. Among those are 500 negro pastors. The board of Home Missions and Church Extension supports 995 foreign speaking workers in both fields. Support has been given to evangelize the lumbermen in the northwest, and to thirty-eight evangelists working thru-out the States. Money has been given for 934 different extension or building projects in the United States, Porto Rico, Hawaii and Alaska.

To continue work in and near military and naval stations; and to help equip Methodist chaplains; to provide adequate ministry in negro districts, congested by the northward migration, and in great industrial centers developed by war industries; to provide to community centres in rural neighborhoods increased as the result of the war; to promote Americanization. and to provide scholarship for Methodist whose educational training was interrupted when they went to fight for Uncle Sam; over $1,093,397.41 was spent.

In Good Will industries, a new national institution of the Methodist Episcopal Church $416,415 was invested. To these industries are brought bags of cast of shoes, clothing and household equiptment, for the joint process of salvaging material wreckage and human lives.

Centenary funds practically saved the whole Methodist Episcopal Church in China and India from disaster iminent on the great reduction in value of the purchasing power of the American dollar. At Singapore and in the Straits Settlements, Centenary money has been spent in carrying farward thegreat developing program of the Church. In Japan direct appropriation was made last year of $166,714 and for work among Koreans $122.256. Twenty six new missionaries were sent to Africa, marking an increase of 76 per cent.

Physical relief extended to Europe and Armenia ran into hundreds of thousand of dollars. France, Italy, Finland, Spain, Norway, Sweden, Denmark, the Phillippines, Mexico, Central and South Amrica, and the Netherlands Indies received attention.

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 A. M. and 8:00 P. M.

Sunday school at 11:00 A. M.

Morning sermon subject, "What is Christianity?" In the evening the pastor will speak of "The Boys of 61," recalling the days when a great task was done in a great way by great men.

A cordial welcome to all at these services.

A. E. Buriff, Minister.

On Honor's Roll

Weave the garlands, scatter the flowers
Over these sacred mounds of ours,
Lily and rose and laurel spread
Over the graves of those long dead,
Dead on the Field of Honor.

By each headstone the old Flag waves,
But know ye not these are empty graves?
Each man rose from the dust to fight
In the latest struggle of Right and Might.
To fight on the Field of Honor.

Forth in shadowy ranks they thronged
To answer the call of a people wronged,
Washington, Lincoln, Grant and Sherman
Ay, and many a loyal German,
Rosecrans, Shurz and doughty Sigel
Who bore our Stars and Stripes and eagle;
"Stonewall" the stern. and chivalrous Lee;—
With our first troopship cross the sea!
These are the great Reserves who stand
Today at the back of our fighting band.

Women of France, 'tis yours to spread
Flowers on the graves of our newly dead;
We, while we strew these empty graves,
Weep for our dead across the waves
On the red Field of Honor!

—By Alice Williams Brotherton.

Baumgartner, Clerk of District Court died Monday

AUGUST BAUMGARTNER, CLERK OF HANCOCK COUNTY DIED MONDAY AT MASON CITY HOSPITAL

Was Popular In County Politics

A message was received Monday noon stating that August Baumgartner, Clerk of Hancock county, had passed away at a Mason City hospital following an operation for appendicitis. The body was brought to his home at Garner by Rex Shannon in his auto hearse to be prepared for burial.

The entire community, in fact the county was shocked when it heard of his most untimely death for he had apparently been in good heath.

Mr. Baumgartner has for many years been popuar with the peope in Hancock county as he has been elected and served several terms as a county official. He served as sheriff before James Ross who was succeeded by E. P. Hanson, now sheriff. Mr. Baumgartner has been in the office of county clerk one full term and was serving his second term at the time of his death.

Mr. Baumgartner will also be greatly missed in the Odd Fellow and Rebecca lodges of Garner of which he was a very active member and an officer.

He leaves to mourn his loss a wife one son, Harold who graduated from the Garner High School last week; three daughters, Josephine who was in last years graduating class at the Garner school and who is taking a business course at Des Moines, Iris who will be a senior next year, and Virgil who will be in the sophomore class. Besides his children and wife he leaves his aged father, a number of sisters and brothers and other relatives. J. E. Baumgartner of this city is his brother.

Joe Knadler Appointed Clerk

Joe Knadler, who served as deputy with Mr. Baumgartner, was appointed Clerk by Judge Clark, whois now holding court at Garner, subject to the approval of the Board of Supervisors at the June meeting. Mr. Knadler is very well qualified for the office as he himself had served two terms as Clerk, before being succeeded by Baumgartner.

GARNER LAD KILLED IN AUTO ACCIDENT TUESDAY

Harold Brede, son of Mr. and Mrs. Henry Brede leaving near Garner, was killed Monday afternoon in an auto accident.

Harold, aged twelve, with his mother and younger brother Dale, had come to town in their car and after doing their marketing started home about 3 o'clock in their Ford and striking a piece of road in bad condition because of paving on the cemetery way just as the big wind came up the machine turned over sideways twice.

A neighbor brought them to one of the doctors but the boy died a few minutes later from a fracture at the base of the skull. Mrs. Brede and the younger boy escaped with minor injuries it is thought, unless internal complications should set in.

The mishap which resulted in the Brede lad's fatal injury was brought about by Mrs. Brede's effort to get on the othr side of the road to allow another car to pass from behind. It was then that her car tipped over when it hit the soft dirt at the side of the road.

Funeral services were held yesterday at Garner.

Memorial Day to be Observed In Klemme Monday

Memorial Day

The annual Memorial day proclamation, setting aside May 30. as a holiday, was issued by President W. G. Harding this week. The text follows:

"Whereas this nation has been conceived in prayer and devotion by men and women who were moved under God to found a nation where principles of right should form the lasting corner stone; and whereas these principles purchased at the price of great sacrifice have been fostered by a worthy prosterity; and whereas the great war has lately laid its costly demands upon our lands; now, therefore, I, Warren G. Harding, President of the United States do hereby proclaim Monday, the 30th day of May. a day already freighted with sacrifice and stimulated memories, a day of public memorial. I invite my fellow citizens to fittingly pay homage on this day to a noble dead who sleep in homeland, beneath the sea or in foreign fields, that we who servive might enjoy the blessings of peace and happiness and to the end that liberty and justice without which no nation can exist, shall live forever.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done in the District of Columbia this 3rd day of May, in the year of Our Lord, 1921, and of the independence of the United States the 145th.

"Warren G. Harding."

WASHINGTON NEWS ITEMS

At a meeting of the Representatives in Congress from 25 States interested in Agricultural Legislation held at the office of the American Federation of Farm Bureaus last Monday evening. an organization was perfected to co-operate in promoting certain legislation to bring relief to the farming class. Congressman Dickinson of Iowa was made Chairman of the Committee and has appointed various sub-committees who will investigate and report on pending legislation on subjects of interest to the farmers.

A farewell dinner was tendered to Mr. Good of the 5th Iowa district last evening at the Chevy Chase club by members of the Committee on Appropriations. It is understood that Chairman Good will retire about the first of June to enter the practice of law in Chicago.

A number of members of the House visited the Marine Contonment at Quantico, Va., yesterday and report a pleasant trip down the Potomac on President Harding's yacht, the Mayflower.

The Lawn parties were again put invogue by President and Mrs. Harding when they entertained about 2,000 of official Washington on the White House lawn Monday evening. It was the first gathering of this kind held there since the administration of Mr. Taft.

LAWHORNS HAVE REUNION

There is quite a Lawhorn family reunion on here this week. Ardith is a member of the graduating class and her father, Will Lawhorn, and her brother Irwin, and sister Esther are here from Lena, Ill. Will Lawhorn is a brother of George, Joe. Hod and Chas. who live here. Mrs. E.E. Byron of White Lake, S. D., a sister is also here. She and Joe are twins. Their father and his wife are here from California. They have been here for some time. The senior Lawhorn and his children are all here except the oldest daughter who lives at Clear Brook, Minn. She was unable to leave home at this time. Now as to the number of the next generation who are here we can't say, but George, Joe, Hod and Chas. all have children and some have grandchildren. It is a costum of the Lawhorns to have a family reunion every few years. About five years ago they bad a like reunion here and some forty or fifty were present. —Garner Signal.

KLEMME WILL CELEBRATE MEMORIAL DAY MONDAY, MAY 30TH

As annuonced in the Times last week, committees were at work making plans and arrangements for the proper observation of Memorial Day in Klemme this year. All arrangements have been completed and the following program outlined will be carried out as far as possible.

Dr. Pierce, of Britt has been secured by the program committee to deliver the address of the day. He is one of the best speakers to be had in this part of the state, and it was only for the fact that Britt are holding their exercises on Sunday that he was able to appear here on Monday.

The committe requests that the soldiers, sailors and marines will all appear in their uniforms and take a part in the parade, if they so see inclined to do so.

Don't forget to bring flowers. All who can are requested to leave their bouquet at the Band Stand at the park at 9:30 A. M., or if more convenient bring them with you. There will be a car to take them to the cemetery. All school children and citizens are requested to carry a flag.

Following is the program for the day, beginning at 10:00 o'clock at the Band Stand at the city park—

PROGRAM FOR MEMORIAL DAY

Mayor Wenck President of the Day

PROGRAM AT THE PARK

Music ..... Klemme Concert Band
Music ..... Male Chorus
Prayer ..... Rev. A. H. Meyer
Song ..... Male Chorus
Address .... Rev. J. T. Pierce, D. D.
Star Spangled Banner .....
..... Chorus and Audience

PARADE FORMATION
Dr. R. M. Thomas, Commander

Following Order—
Klemme Concert Band
World War Veterans
Civil War Veterans
School Children by grades from Primary to High School in order of grades.
Citizens
(All citizens and school shildren are requested to carry small flag while marching to cemetery.)

PROGRAM AT CEMETERY

America ..... Band and Audience
Decoration of Soldiers Graves ....
....School Children in charge of F. Gruetzmacher.
Taps ..... Bugler
Benediction .... Rev. A. E. Buriff
Note—In case of stormy weather the program will be held at the Theatre. Program subject to change.
—Committee.

MISS EDITH HAUPT WINS HONORS AT GARNER HIGH

In the gradnating class of twenty eigth at the Garner High chool there were eleven girls who had an average of above ninety for the four years. The average for the entire class was 88.6 per cent.

The two highest averages in the class were Miss Ardith Lawhorn and Miss Edith Haupt. Miss Lawhorn won over Edith only by 12-100ths of one per cent—just a hair's breadth we might say.

The Klemme schools may well feel proud of the record made by Miss Haupt. She finisehed the 11th grade here and then went to Garner to complete her course.

Last year Miss Mable Waterman won second place which shows that Klemme maintains a good school although it is not large.

We also predict that some of our Klemme students going to Garner next year will do there part inkeeping up the record set by the other Klemme girls just mentioned.

Watch Your Kidneys!

That "bad back" is probably due to weak kidneys. It shows in a dull, throbbing backache or sharp twinges when stooping. You have headaches, too, dizzy spells, a tired, nervous feeling and irregular kidney action. Don't neglect it—there is danger of dropsy, gravel or Bright's disease! Use *Doan's Kidney Pills*. Thousands have saved themselves more serious ailments by the timely use of *Doan's. Ask your neighbor!*

An Iowa Case

S. B. Imel, 1321 Brookdale Ave., Charlton, Iowa, says: "My back troubled me and the misery was so intense I couldn't rest. My kidneys acted irregularly, at times too frequently. I heard about Doan's Kidney Pills and got a couple boxes. After taking them, the troubles were over and I have not been bothered since."

BELL-ANS FOR INDIGESTION

SUGGESTIONS ON RAISING CABBAGE

Plant Contains Large Quantities of Mineral Salts So Essential in Diet.

GIVE ATTENTION TO VARIETY

Select Richest Portion of Garden and Work Into Soil as Much Rotted Manure as Can Be Spared—Prevent Work of Cutworms.

(Prepared by the United States Department of Agriculture.)

Most people have a fondness of cabbage, served in one way or another, as it contains large quantities of the mineral salts so essential in the diet. Early cabbage is especially desirable, as it furnishes green food at a time when it is needed.

In giving suggestions on growing cabbage, garden specialists of the United States Department of Agriculture say the proper variety must be planted. Some kinds require a longer period for their growth than others. Jersey Wakefield and Charleston Wakefield are most universally planted for the early crop, Jersey Wakefield being considered earliest of all. The variety known as All Seasons has a round, flattened head and is a good intermediate sort. Copenhagen Market is a large, round-headed early cabbage that is very much in favor among market gardeners. Late Flat Dutch and Danish Ballhead are considered the leading late varieties.

Start Plants Indoors.

Plants must be started indoors, in a hotbed, or be shipped from some point farther South where the season is advanced, if extra early cabbage is to be grown. One or two cigar boxes filled with fine soil and placed in a south window will form a seedbed for starting 100 to 200 cabbage plants. The little seedlings must be transplanted to larger boxes or to a cold frame when they begin to crowd each other in the seed boxes. Cabbage plants are quite hardy, and along the South Atlantic coast are grown in the open by the acre.

Plant early cabbage in the richest part of the garden, having previously worked into the soil all the rotted manure that can be spared and then added high-grade commercial fertilizer at the rate of ten pounds to every 100

Good Solid Head of Cabbage.

feet of row. The fertilizer should be well mixed with the top 4 inches of soil over a space the full width of the row, which is generally 3 feet.

Do not plant cabbage on land where it was grown last year, especially if any of the heads were diseased or showed any kind of trouble. It is always a good plan to rotate crops, even in the small home garden. Cabbage is subject to several diseases, but fortunately these do not do much harm in small gardens. Insects, however, play havoc with the crop from the time it is planted. Cutworms are generally waiting in the soil during early spring to cut off the stems of the cabbage plants just at the surface of the ground.

Protect Plants From Cutworms.

The best remedy, or rather preventive, is to place bands or tubes of stiff paper around the stems of the plants as they are being set in the garden. Thin cardboard makes ideal plant protectors. By cutting the cardboard into strips about 3 inches wide, sections can be cut off and rolled around a lead pencil to form a tube. The protectors should extend an inch below the surface and at least 2 inches above. After the stems of the cabbage plants have become toughened and begin to grow rapidly the protectors can be taken off.

Cabbage worms, the eggs for which are laid by the light-yellow butterflies that are often seen flying about the cabbage plants, do a great amount of damage. Dusting the foliage and the heads with air-slaked lime, to which a little paris green has been added, or spraying them with arsenate of lead, one ounce to a gallon of water, are both effective. There is no danger as the heads grow from the inside and the outer leaves, to which the poison is applied, are all removed.

PASTURE LAND ON HILLSIDES

If Properly Taken Care Of Steep Inclines Can Be Made to Return Good Grass Yields.

Many of our pasture lands are so hilly that they cannot be used for cropping purposes, but if properly taken care of they can be made to return substantially profitable grass yields.

VEGETABLES ENTIRE YEAR FROM GARDENS

Accomplishment of Women in One New Mexico County.

Everything Tried in Dry-Land Section and Given Proper Attention Brought Good Results—Much Fruit Was Canned.

(Prepared by the United States Department of Agriculture.)

Women in Union county, New Mexico, are working to have on every farm a garden large enough to supply the family with vegetables the entire year, with a sufficient surplus for each housewife to can or dry enough vegetables for winter use.

The United States Department of Agriculture reports that the following is a part of what was accomplished last year in this county under the supervision of the home demonstration agent: A great many vegetables new

Products of Garden in New Mexico.

to the community were tried out, such as Swiss chard, Chinese cabbage, asparagus and celery, and fruits like ever-bearing strawberries, rhubarb, garden lemons, and other varieties not previously raised. These were grown successfully. Grapes, peaches, plums, apples and apricots have been planted by many people who had not thought these fruits would grow in their county. This is a dry-land section where practically no attention has been given to the home garden.

Everything tried, and given proper attention, brought good results. Some failures were reported, due to lack of moisture and lack of care. Reports also showed that, besides all that was used fresh on the table, from 25,000 to 50,000 quarts of vegetables and fruits were canned in this county last year.

AVOID DODDER INFESTATION

Farmer Should Use Plants Known to Be Immune to Attacks of Pestiferous Weed.

The necessity of selecting plants immune to dodder infestation when cultivating newly cleared land was emphasized by a report which recently reached the United States Department of Agriculture concerning the destruction of an entire field of eggplant on a newly cleared field in Pennsylvania. So bad was the infestation that not a single fruit was formed on the parasitized plants and the entire field was destroyed. The dodder was determined as hazel dodder, a species not uncommon on hazel and other wild shrubs and on tick trefoil and other wild herbs, but never previously reported on cultivated plants. The department recommends that on land known to contain the seeds of dodder, farmers should use plants which are immune to attacks of the pest. The following plants are not susceptible to injury by dodder; corn, soy beans, velvet beans, cowpeas, and small grains such as oats, wheat, and rye. Potatoes and buckwheat, crops commonly used on newly cleared land, are not very likely to be injured by dodder, but truck crops should not be planted on land known to contain dodder seeds.

GOOD COLLAR IS ESSENTIAL

Every Farmer Should Plan to Prevent Sore Necks and Shoulders of Work Horses.

Now that the busy season is here, every farmer should make a careful examination of the supply of horse collars on hand and see to it that he has a good fitting collar for every horse he purposes to put to work. Sore shoulders and sore necks on farm horses are generally caused either by collars that do not fit or by hames that are not properly adjusted.

CAREFULLY SAVE DROPPINGS

Either Use for Fertilizer or Dispose of to Persons Who Can Make Good Use of Them.

No matter how small the flock the droppings should be carefully saved, stored, and either used as fertilizer for plants or disposed of to persons who can so use them to increase the fertility of the soil.

CULTIVATE CORN TO HELP YIELD

Thorough, Early Plowing Encourages Plant Growth and Prevents Soil Crusting.

DESTROYS ALL YOUNG WEEDS

Successful Growers Favor Shallow Cultivation, Except Where Excessive Rains Have Packed Soil —Maintain Dust Mulch.

(Prepared by the United States Department of Agriculture.)

From the time of germination to maturity corn should be given every opportunity to make a steady, sound growth. If the development of the plants is checked from any cause it may reduce the yield no matter how favorable the later treatment. The most successful corn growers realize the importance of thorough, early cultivation in order to prevent any check in the growth of the plants because of weeds or crusted soil. As a consequence of heavy rainfall, the stalks may increase rapidly in height and at the same time, for lack of cultivation or of soil fertility, or for other reason, they may be slender, too tender, or of poor color. Thrifty corn plants are thick, strong, and of dark-green color.

Use Weeder Soon After Planting.

Horse weeders and harrows should be used when needed to break a surface crust, check insect depredations, or kill young weeds that start before the corn is up. While the plant is very small, narrow shovels that throw the soil but very little should be used, and fenders are usually desirable to prevent covering the plants.

Experience favors shallow cultivation, except if excessive rains have packed the soil, when deep cultivation will help to dry and aerate the ground. In cultivating it is important to avoid breaking the roots of the plants. If the plants have reached a height of 2 or 3 feet the soil in the middle of the rows should not be cultivated deeper than 4 inches, and sometimes less. For retaining soil moisture a loose soil mulch 2 or 3 inches in depth should be maintained.

The question is frequently asked how often corn should be cultivated.

A Two-Row Wheeled Cultivator Does Effective Work.

The answer is that it should be cultivated often enough to keep down weeds and to maintain constantly a loose soil mulch until the corn has attained its growth. A greater number of cultivations will be necessary when rains at intervals of about a week cause the surface soil to run together and crust. This crust must be broken and the soil mulch restored, or evaporation will soon rob the soil of much of its moisture. An essential object of cultivation is to restore the soil mulch as soon after a rain as the condition of the ground will permit. If the ground becomes hard and baked dry the crop will suffer greatly and when cultivated the dirt will break up into clods.

Many crops are cut short by stopping the cultivation because the corn is too tall for use of a two-horse cultivator. If the condition of the soil demands it, shallow cultivation should continue, even though the corn is tasseling. Blocks nailed to the handles will protect the hands from the corn blades. Iron mowing-machine wheels dragged between the rows will sometimes greatly benefit the crop.

Saving of Labor.

With a good riding or walking double cultivator one man can cultivate as many acres as two men with one-horse cultivators. This saving of labor is worth consideration. With a properly constructed wheeled cultivator, covering two rows at a time, one man has often cultivated 15 acres per day.

The shovels with which it is best to equip either single or double cultivators must be determined by the kind of soil, the size of the corn, and size and nature of growth of weeds to be destroyed. For sandy land sweeps are in great favor, and vary from 6 to 30 inches in width. The sweep scrapes along through the soil at a depth of 2 to 3 inches, cutting off weeds and allowing surface soil to pass over them, falling level and flat behind the cultivator.

SPINACH IS ADAPTED FOR EVERY LOCALITY

Plant Requires Rich Soil and Stands Cold Well.

Seed Bed Should Be Spaded and Quantity of Well-Rotted Manure Worked In—It Is Best for Use While Young and Tender.

(Prepared by the United States Department of Agriculture.)

Well-grown spinach is one of the best early spring and late fall greens that can be raised in the garden. Spinach is adapted for growing in practically every locality, requires a rich soil, stands cold as well or better than does lettuce, but does not do well during the hot part of the summer. United States Department of Agriculture garden specialists suggest one or two plantings in the early spring, just as soon as the danger of severe frost is past, and a planting late in the summer for fall use. Throughout the

Splendid Patch of Spinach.

South spinach can be planted in October and remain in the open ground all winter.

For growing spinach in the home garden a bed about 5 feet in width and 25 or 30 feet in length should be spaded and a quantity of well-rotted manure worked into the top 3 inches of soil. Three pounds of commercial fertilizer should also be scattered over the surface and well worked into the soil. Six or eight ounces of seed will be sufficient for this space. Sow in little drills or furrows running lengthwise of the bed, the rows to be about 6 or 7 inches apart. The seed should be covered ½ inch deep and the soil slightly firmed over it. Watering may be necessary if the weather should be extremely dry following the planting of the spinach seed.

Spinach grows quickly and requires very little cultivation, except to loosen the soil a trifle between the rows and keep weeds from getting a start. If the plants are too thick—that is, crowd each other—they can be thinned out and those removed in thinning cooked for greens. The plants left will then have room to grow larger. Spinach is very desiracle as an early spring green, as it contains plenty of iron and other mineral matter. It should always be used while young and tender.

QUALITIES OF FARM FENCES

To Give Satisfaction Barrier Must Be Made to Turn All Stock Without Injuring Them.

Farm fences should combine two qualities—service and economy—says the United States Department of Agriculture. To give satisfactory service the fence must be constructed so as to turn all kinds of stock without injuring them. To be economical it must be built as cheaply as is consistent with durability. The fence that is erected at a low initial cost is not necessarily economical, for it may be so short that it will be very expensive in the end.

The cost of maintaining a farm fence is determined by such factors as interest, repairs, and depreciation on the fence itself, interest on the value of land rendered unusable, and the expense of keeping down weeds. The cost of repairs and the annual depreciation depend largely on the construction. If a fence is made of a cheap grade of material and is cheaply constructed it will need frequent repair and will be short lived. Such a fence will have a high repair and depreciation charge, which in most cases will more than counterbalance the increased investment cost that the erection of a more substantial fence would require. If a fence is made of good materials and is properly built, its repair and depreciation charges should be very low.

The efficiency of a fence depends upon the quality of wire and posts used and upon the manner of construction.

LIME CORRECTS SOUR SOILS

Application Will Prove Beneficial to Small Garden Plot—Binds Loose, Sandy Loams.

An application of about 50 pounds of hydrated or air-slaked lime to a garden plot 30 by 60 feet in size will often prove beneficial. Lime has the effect of loosening and pulverizing any heavy clay soil and of binding loose, sandy soil. Lime also corrects sourness in the soil, which is often due to lack of drainage, but in a case of this kind drainage should be secured.

ASPIRIN

Name "Bayer" on Genu

Take Aspirin only as told in package of genuine Bayer Tab Aspirin. Then you will be fo the directions and dosage wor by physicians during 21 year proved safe by millions. Tak chances with substitutes. If y the Bayer Cross on tablets, y take them without fear for Headache, Neuralgia, Rheum Earache, Toothache, Lumbag for Pain. Handy tin boxes of tablets cost few cents. Druggis sell larger packages. Aspirin trade mark of Bayer Manufac Monoaceticacidester of Salicylic Adv.

Arts of Expression.

"That last speech of yours what I call commonplace," re the cold-hearted constituent.

"I was only endeavoring to the simple truth in plain term plied Senator Sorghum. "You w I try to put something across nobody's looking and I'll show some phraseological ingenuities sound perfectly brilliant."

Age of Discretion.

Youth has its compensations personally we are glad to have the age when we thrilled at the of a gent in a silk hat and fur —Galveston News.

Leoda Smith spent the week iting in Klemme.

Bock and daughter went to Tuesday morning.

Mrs. Henry Lewis was a passenger o Garner Tuesday morning.

Mr. Eckman was over from Garner last Thursday on business.

Mrs. Henry Suckow was a Garner visitor Monday morning.

t Weather is ming and You LL WANT A

Florence Oil Cook Stove

We carry Florence Oil Cook Stoves both 2 and 3 burner styles, with without range back and removable over -- just the stove you want--- conomical, No Wicks, No Smoke, Hot Blue Flame ALWAYS.

A full stock of Swan MOWERS, arden PLOWS and POULTRY letting at right prices.

We also handle all kinds of Stock ip, Fly Spray, Bug Powder, Arsente of Lead and Paris Green for otatoe Bugs, Spray Guns etc.

W. Kluckhohn & Sons

Mr. Herman Priebe was a business visitor at Belmond Saturday.

John Miller went to Garner Tuesday morning on business.

Nels Palmer went to Garner on a business mission Tuesday.

Philip Bock was a business caller at Garner Tuesday morning.

Mr. and Mrs. R. A. Jorgenson were Sunday visitors at Garner.

Curtiss Luick, of Belmond was a Klemme visitor Wednesday.

Henry Church was over from Garner last Friday visiting Klemme friends.

Clint Stokesbary caught a carp the other day which weighed twelve lbs on the scale. Some fish.

Mr. and Mrs. John Swalve were at Garner Saturday morning on business.

Fred Arnold was a business caller at the county seat town Tuesday between trains.

Mr. and Mrs. Newberger. son and daughter, were Garner visitors between trains Tuesday.

Quite a number of Klemme folks drove over to Clear Lake Sunday as the day was ideal for pleasure rides.

D. D. Ross of Garner was a business caller in Kl(emme the fore part of the week.

A baby girl is reported to have arrived at the Henry Barz home last Friday.

Mr. and Mrs. Marlin Croner were at Belmond Thursday. Mrs. Croner had dental work done.

FOUND—Ladies pocket book containing some money. Call at Times office and prove property and it is yours.

FOR SALE—One Holstein cow, to be fresh sometime in July. Also 3 Holstein heifer calves. Priced for quick sale. B. A. Reemstma. M26.

The W. F. M. S. of the First M. E. Church will meet Thursday, June 2nd. at the home of Mrs. Walter Lau.

Miss Laura Brooks was at Belmond Friday visiting friends. She returned to Klemme Saturday morning.

Mrs. Ed. Wellemeyer, of Garner and Mr. and Mrs. Haefner. were in Klemme last Friday visiting relatives and friends.

Mrs. Millie Smith and family are now nicely settled in the house formerly occupied by Prof. Wilson and family.

Hollis McCullough came the fore part of the week for a visit with his brother, G. P. McCullough. Hollis fell from a horse about a week ago and broke his arm.

Mrs. C. W. Wiles and Mrs. Walters went to Faribault, Minnesota on Monday on business. They returned to Klemme again Wednesday afternoon.

All those who were here attending the Sunday School convention returned to their homes this morning. There was a whole train load of thm.

Mr. and Mrs. Chas. Keraus, of this place were at Clear Lake fishing last Friday and then went to Swea City Saturday for a visit with their daughter, Mrs. T. F. Mitchell.

Prof. Wilson, wife and son left on Monday noon for Cedar Falls, weher they will spent the summer. The Prof. may take work at the college there this summer.

Annetta Schuldt returned home last Friday. She lives at Gladbrook and has been teaching here this year. She intends to go to college this coming term.

Chas. Gibbs began work at the depot Monday as helper for agent Barr. Charles worked at that position last year also during the summer vacation.

Miss Warnock came from Iowa Falls Tuesday for a couple of days visit at the Frank Gruetzmacher home. She teaches in the Gowrie, Iowa, schools this year. She was on the teaching staff here last year.

We were somewhat delayed in getting the paper out this week due to the fact that the electricity was off all Wednesday afternon and we could not run our linotype machine. A heavy bolt of lightning put the transformer on the blink and Mike Haskins had to come over from Garner to fix it up.

Real Republican Prayer.

On March 4 the school children of Terre Haute were instructed to utter a two-minute prayer for Mr. Harding. One primary teacher told her children all about Mr. Harding, the position he was taking and all the responsibilities he was to have. So at eleven o'clock she said: "Now, children, fold your hands and bow your heads. This is the time we're going to pray."

But up went the hand of a very ardent little Methodist Sunday school scholar. "Please, teacher, may I lead in prayer?" he asked.

His teacher nodded, and he uttered his earnest little prayer. "Dear Mr. Harding—Please bless us and keep us forever and forever. Amen."—Indianapolis News.

How to Avoid Colds.

Before you leave a warm room and open the street door to go out, always remember to shut your mouth. Keep it closed until you have walked briskly for about ten minutes. Then, if you keep on walking, you may talk as much as you please.

If you keep your mouth closed and walk briskly, the air can only reach the lungs by a circuit of the nose and head and become warm before reaching them, thus causing no derangement of these very important organs. On the other hand, large draughts of cold air dash directly in upon the lungs, and in a few days you wonder how you caught that awful cold.

Increase Sea Safety.

Lifeboat davits, described and illustrated in Popular Mechanics Magazine, are so designed that one man, by turning a crank, can lower a boat with ease. They are now being installed on a number of ocean liners, greatly increasing the potential safety of sea travel as well as the comfort of passengers, if use of the boats becomes necessary. The one crank operates both the outward swing of the davit and the falls. Because of the improvement in case of lowering, larger lifeboats can be used, with more commodious storage space for fresh water and provisions.

A Would-Be Auditor.

Well, what did you think of my acting? asked an amateur player of a truthful but diplomatic member of the audience.

"I can say this," replied the spectator frankly, "I have a friend who I am confident would have given $500 to have heard you."

"Who is it?" asked the embryo Booth, highly pleased.

"Well, you wouldn't know him. But he's deaf as a post."—American Legion Weekly.

HAS TABLE SET FOR DAVY

Little Old English Woman Refuses to Relinquish Hope for Husband Who Never Returns.

In a whitewashed cottage on the precipitous slope of one of the Clamorgan hills, a little, aged woman with white hair sat down to her simple Christmas dinner. It was homely fare enough, a stewed rabbit (brought in by a kindly neighbor farmer the previous day), one or two vegetables and a rice pudding.

She sat alone at the table, but opposite her was a plate with knife and fork and spoons set ready for another. It has been so every Christmas for the past 40 years, says a writer in the Continental Edition of the London Daily Mail.

On a bright May morning, in 1880, Lucy Williams, the 22-year-old daughter of a Welsh crofter, was married at the village church to a sailor, the son of a laborer two fields away. Two months later Davy set out from the cottage on the hillside to "foot it" to Cardiff, where his ship was due to sail the following day.

Lucy cried a little, but he assured her that he would be home again by Christmas and charged her to omit nothing in the way of viands from their first Christmas dinner together. Then he passed out through the garden gate and waved a last kiss to the little lass who watched his departure.

That was the last she saw of him. A fortnight passed and she received a letter from him posted at Nantes, another a few weeks later from New Orleans, and a third and a fourth, and then they ceased. Day after day she waited and month after month, but no news of Davy. Inquiries at the shipping office only evoked the information that the vessel was long overdue and that nothing was known of her. Then she was given up for lost.

But still she refused to give up hope. She had implicit faith that Davy would yet return. Christmas, her first Christmas married, came, but no Davy. Yet she omitted nothing in her preparations for the dinner. Had not Davy charged her? And he might yet come—who knows? And she placed his plate ready for him at the table so that he might see he was expected.

That was 40 years ago and every Christmas for 40 years she has remembered his words and never omits to put his plate on the table in case he comes home, and she will go on doing it to the end of the chapter.

Spanking Made Easy.

Brainy Peter gazed fondly at his latest patent device.

The invention of a genius it was, a spanking machine in the shape of an iron hand and arm, holding a rubber slipper. This marvelous machine spanked a child according to the magnitude of his offense.

Three volts punished the erring infant for crying, five volts for swimming on Sunday, eight for telling a lie, nine for stealing a cake from the larder. A sound thrashing at ten volts was the maximum for making a raft out of the extra leaves of the dining room table.

"Ah, ah!" he sighed. "What more can fathers want?"—London Answers.

Discovered!

"Poor, dear woman! She has probably been working hard all day. I must not disturb her," murmured Jones, as he crept upstairs, at 3 a. m., on all fours. He was just going into the bedroom when Mrs. Jones turned over.

"George!" she whispered.

George dived under the bed.

"George!" repeated Mrs. Jones. No reply.

"George!" continued Mrs. Jones, in sterner tones, "you may as well come out, for I know you are there."

There was no help for it. George crept out, rubbing his eyes.

"Bless my heart, Maria," he said, "I was dreaming I was out motoring.!"

Boon to Archeologists.

The extraordinary drought in Switzerland, which has continued since last September, has lowered the lake waters so much that archeologists are engaged in examining the interesting old lacustrine or pile dwellings dating back to the Stone age, for which Swiss lakes are noted.

Many persons have volunteered to help excavating for remains of these ancient dwellings, which, according to Doctor Keller, chief Swiss authority on the subject, ceased to be inhabited about the first century of the Christian era.

Mill in a School Building.

The operation of a completely equipped textile mill in a public school building of New York city marks the latest development of the industrial art movement for which the local museums and various trade bodies have been working together for some time.

Central Interrupts.

First Stude (over the phone)—And what have you been doing?

Second Stude—I just finished washing my B. V. D.'s.

Central (breaking in)—I'm ringing them!—Judge.

Technical!

Bill—How do you know she's a boilermaker's daughter?

Jim—Why, she riveted her attention on us and then made a bolt for the door.—Judge.

Big Emerald.

A syndicate of the United States of Colombia has just sent to this country an emerald weighing 360 carats. It is two and five-eighths inches in length.

LET OUT DEMON

Anoients Had Cruel Methods of Relieving Headaches.

People of Today Would Be Apt to Consider the Remedy as Worse Than the Disease.

"Headaches are bothersome things," writes Prof. Roy L. Moodie of the University of Illinois in the Scientific Monthly. "People have been annoyed by them for a long time, seven thousand years at least, and probably longer. We are all quite willing, when afflicted with a headache, to agree with the people of the Stone age that a headache is a demon, and we would be willing to do almost anything to get rid of it.

"The pain, whether due to a blow on the head, indigestion, nervousness or other cause, certainly reminds one of a demon, and it is readily understood how ancient man should have conceived the idea of releasing this demon which was bothering him. He devised a remedy which certainly was an effective cure for headache, whether the pain was due to eye-strain, brain tumor, skull friction or nervousness, although it must be admitted that his cure was worse than the pain.

"Primitive man devised his curative measures as a phase of his religious beliefs, hence the cure adopted for headaches was performed by a shaman or medicine man in some remote fastness of his region, and here the patient remained until completely recovered. This treatment consisted in opening the skull in a variety of ways to relieve the pain, or, as the Stone age men thought, to let out the demon.

"This ancient surgical art, which forms the very beginnings of prehistoric surgery, seems to have been developed in the region just north of Paris, near the Seine and Oise rivers, some seven or eight thousand years ago. In the dolmens, or burial mounds, scientists have found the ancient skulls trepanned or opened to release the headache demon. No special class of individuals seems to have been favored, since the operation was performed on man, woman or child, apparently without respect for either age or sex. Its frequency is attested by the great number of skulls exhibiting the surgical openings. In one burial mound in France yielding the bones of 120 individuals more than forty showed the effects of trepannation.

"It is not very pleasant to picture the torture undergone by the ancient sufferer at the hands of the priest, who either cut, scraped or bored the bone of the skull away with a sharp piece of stone. Some relief from pain may have been had by the application of a quid of cocoa, a plant yielding anesthetic substances which grows in Peru.

"But the worst thing about headaches is that they recur, so the ancient people, not deterred by one failure, submitted themselves to the operation again and again. A few ancient skulls reveal five cruel openings, all of which had healed. The patient had survived them all.

"The equipment of the primitive surgeon was meager. His knowledge of cleanliness was not keen. If he possessed a rough flint knife, a scraper, a few leaves of cocoa plant and a piece of coarse cloth to bind the wound, he was content. A mossy bank out in the woods served him for an operating table."

Dickens and Thackeray.

Gilbert K. Chesterton, who is a great admirer of Dickens, has this to say of him:

"Now, the interesting thing is this: That Dickens, whom so many considered to be a vulgar enthusiast, saw the coming change in our society much more soberly and scientifically than did his better educated and more pretentious contemporaries. . . . There is no trace in Thackeray of the slightest consciousness that progress could ever change its direction. There is in Dickens. The whole of "Hard Times" is the expression of just such a realization. It is not true to say that Dickens was a Socialist, but it is not absurd to say so. And it would be simply absurd to say it of any of the great individualist novelists of the Victorian time. He felt the society changing; and Thackeray never did . . . Now, for this reason Dickens must definitely be considered in the light of the changes which his soul foresaw. Thackeray has become classical; but Dickens has done more; he has remained modern."

Treatment for Hip Disease.

Hip joint disease in children has been looked upon as almost always due to tuberculosis of the bones of the joint. But Dr. Halfdan Sundt, who is medical superintendent of Fredriksvern Coast hospital in Norway, has recently published a pamphlet in which he asserts that 43.4 per cent of such cases are not tuberculosis at all.

Immobilization for a long period has been the standard treatment, but Dr. Sundt divided his cases into groups, one of which he allowed to run about freely with no treatment, and he found after three years' observation that the final results were just as good in those as in the other cases.

Serious Matter.

"How did you like my film play?"

"Good comedy," said the professional humorist. "Good work."

"But you didn't laugh."

"A brother artisan never laughs at good work."—Louisville Courier-Journal.

Cultivator Time is Coming

"Do Your Shopping Early"

Mr. Farmer you are now busy planting your crop--- good seed and a good planter insures a good stand, but without proper cultivation your corn will not bring a good yield. We have the best cultivators to do the best work.

John Deere and La crosse Single and two-row cultivators

and other good makes will fill that long felt want for a good cultivator and say --- we sure sell them at a low price.

Cultivator Repairs

Get your cultivator in shape now and have us fill your order for repairs. We carry spearpoint shovels in all sizes.

Other Timely Hints

Speaking of repairs - we also have lots of Doubletrees, Eveners, Tongues, etc. for all machinery. And say we have a good supply of Rape and Millet Seed--- get yours now. Hot weather is coming and the "Mrs." will want a chicken Waterer and you will want a Hog Waterer, we have both at most reasonable prices.

LIBERTY TOWNSHIP NEWS

(Too late for last week)

Miss Mildren Anderson is assisting Mrs. Louis Abele with her house work this week.

A party of five, of which the writer was a member, went to Forest City last Sunday afternoon to visit Pilot Mound which lies only a few miles east from the city. While we were roving around over the hills and through the thicket we met an elderly gentleman whom we got into a conversation with and he informed us that he was the owner of part of the land around the mount. Dead Man's Lake is on his farm. He also told us that they expected action from the state Board in the near future whereby about three hundred more acres of the thicket covered hills will be converted into a State Park. Pilot Mound is one of the natural beauty spots in the State of Iowa.

Miss Ethel Beier is assisting Mrs. Will Suckow with her work this week.

A young people's social was held at the Liberty township church last Friday evening. A large crowd was present. The evening was spent in playing games afer which refreshments were served.

Miss Lizzie Reimer was a Sunday visitor at the C. C. Schaefer home.

Corn planting is pretty well finish ed throughout this country.

Miss Lena Panhoff is asisting Mrs. H. Paul with her work again this week.

Rev. Meyer, Roy Schaefer, Milton Schaper, Lou Suckow, Harold Ridder, Emery Schaefer, Mildred Anderson and Wilbur Haefner met at the C. C. Schaefer home Monday evening for an annual business meeting of the Epworth League of Liberty township.

AVERY TOWNSHIP NEWS

Walter Johnson and Jefferson Bell visited at the Wm. Bell home Sunday.

Miss Leafy Wilson visited at the Elko Buss home Sunday.

Mr. and Mrs. Lew Newberger and family visited at the home of Mr. and Mrs. Garland Hoffman Sunday.

Louie Griffen and family visited at the G. A. Goll home Sunday.

D. D. Ross of Garner was down on his farm here Saturday and the fore part of the week.

Clint Dutton of this vicinity assisted John Baumgartner with his barber work Saturday night.

AVERY CENTER NEWS

Mr. and Mrs. Willis Knisley of Belmond spent Sunday at the home of Mrs. Rachel Wilkins.

A party of ladies enjoyed a day's fishing at Morse Lake Monday.

Mr. Lee Lewis is in the hospital at Hampton receiving treatment.

Mr. and Mrs. Pat Lyman of Ventura visited at the Fred Wilkins home this week.

Mrs. L. E. Avery and Mrs. Chris Dieger were Belmond callers Friday.

Mr. and Mrs. Glenn Latch and children visited at the Wilkins home Sunday.

Oliver, the little son of Mr. and Mrs. Roscoe Wiles, sustained a broken wrist Wednesday. when he fell from a barn door.

Mr. and Mrs. Lloyd Brugman entertained a party of friends and neighbors at a social dance last Monday evening. A pleasant time was enjoyed by all.

Mr. and Mrs. Ed Hemingway and Mrs. Mike Karney and children were Mason City callers Saturday.

If She Got Paid

We note where the University of Nebraska has inquired into the place the farmer's wife occupies in farm economy, and it reports that if she were paid on the same basis as other people her yearly earnings would amount to $4,000.

First, as a cook, she earns $10 a week. And at that she has no days off and is expected to be on the job all the time. She generally is, as every farmers wife can testify Then she does all the washing and ironing and for that she is allowed $5 a week.

On an average there are 19 days of sickness each year on a farm and in those trying times the farmer's wife, if she is not the one who is sick has to be nurse. For this the man who made the figures allows her $75 per year, assuming the wage of a nurse in the country is $25 a week.

She does the sewing, and should be credited with $6 a week for that Add to all these items the fact that she does the scrubbing and cleaning pickling and preserving and teacher for the children. and the man at the University says she easilyearns her $4,000 a year.

And we are right here to agree that it is not too much and to ask at the same time, how many of them ever get it? They bear the bulk of the burden, and they bear it without grumbling. So our advice to the husband of any one of them remember, next time he is asked for the price of a new dress, that he is getting off pretty cheap as it is when he figures that he has a $4,000 a year employee who isn't costing him much more than her board and lodging.—Clear Lake Mirror.

Use Old Oil on Chicken Roosts

Iowa poultrymen who have trouble with mites infesting the poultry houses can get rid of them in a cheap manner and at the same time use up some of the old oil from the crank cases of the farm automobile.

Thin it down with kerosene or gaso line and spray it on the roosts or roosting sections, as these are the places mites spend most of their time. If this is done twice a year you will not be troubled with the mites.

A quick easy way to free the hens of the body lice is to dip the hens in a solution made up of one ounce of sodium floride to each gallon of water used. But pick out a warm sunshiny day to do this, so that the chickens can dry off before they will catch cold.

This is the surest way to get rid of lice.

Blackman Leaves College

C. L. Blackman. for the past three years occupying the position of extension professor of dairy production at Iowa State College, has resigned his position to accept a position as secretary of the New England Holstein Friesian Breeder's Association, with headquarters at Springfield, Massachusetts.

Prof. Blackman's big job in the Agricultural Extension Department has been the organization and maintenance of cow testing associations throughout the state. Under his supervision these associations have increased and prospered and have become a powerful factor in the development of the dairy industry. He has also been active in conducting dairy short courses.

Prof. Blackman's resignation becomes effective June 15th.

STOCK SHIPMENTS PAST WEEK

Saturday night there were seven car loads of live stock shipped from the Klemme stock yards. There were two car loads of hogs shipped out and five car loads of cattle. Shipments continue to be good this year. Those who went into Chicago with the shipment of stock were John C. Larsen and Herman Priebe and son.

News For The Farmer

CONFERENCE A BIG SUCCESS

Two Hundred Farmers Discuss Methods of Getting Livestock Business On Firm Basis

That the Iowa livestock business, purebred and other kinds, has reached the lowest level and that it will improve from now on was the sentiment expressed by speakers at the livestock conference held at Iowa State College May 19. Two hundred farmers and breeders met and talked over informally things which must be done to start the business off on the right trend.

"The time is coming when Iowa will be called upon to produce as it did during the war," declared C. F. Curtiss, dean of the division of agriculture. "Agriculture was the first industry to feel the depression and farmers have retrenched to meet costs of production. The present surplus is only temporary and, with the indications of the return of normal business, we will have a food short age again inside of 18 months. Agriculture was the only business that delivered the goods on time during the war and it was the first to feel the deflation. We are coming out slowly but on a sound basis."

E. H. Cunningham, secretary of the Iowa Farm Bureau Federation told the meeting that the big trouble with the business at present was that the prices for purebred stock had gotten beyond the place where they attract the farmer buyers. He also told the conference that the quicker the crooked practices were eliminated from the business and the sooner the breeders got down to brass tacks the better off all would be.

L. A. Andrews, president of the Iowa Bankers Ass'n. spoke on the problems of financing the purebred business and he asured the farmers that there never was a better opportunity for success than at present. The afternoon meting consisted of a round table discussion.

DEAN WINS DINSMORE TROPHY

Is Best Horse Judge in the Sophomore Class

L. E. Dean of Huran, So. Dak., won the sophomore horse judging contest last week at Iowa State Colledge defeating 129 other students and winning the Dinsmore trophy.

F. H. Leinbach of Belmond, S. S. Wheeler of Caldwell, N. J., and J. E. Normand of Union were the three runners up. This contest is held annually and the winner is awarded the Dinsmore trophy consisting of a metal given by Wayne Dinsmore, formerly connected with the animal husbandry department of the college now extension secretary of the Horse Association of America.

ADVANTAGES OF SUDAN GRASS

Some Facts Which Make It An Iowa Crop

As an emergency hay or pasture crop sudan grass has five decided advantages whitch need emphasizing.

1. It gives a large yield. The average yeild at the Iowa station for the past four years has been 3.47tons of dry hay per acre, from two cuttings on land less fertile than that of the average Iowa farm. It has yielded as high as 5.9 tons per acre while the lowest yield ever secured on any plot, regardless of method or rate of seeding, was 2.20 tons per acre.

2 The crop can be grown easily and cheaply. The best yields are secured by broadcasting and harrowing, in much the manner that oats are sown.

3 The seed cost is low, Sudan grass seeds heavily and as a resnlt the seed is not expensive. The plant stools readi'y so that a relatively small amount of seed is required per acr.

4 It can be seeded late, any time from May 10 to July 1, altho seeding from about May 25 to June 15 may be expected to give the best results in an average season.

5 It is dependable, never having failed to make a satisfactory crop in the eight years that it has been under observation. It withstands drouth remarkably well after it becomes established.

Cow Peas Not An Iowa Crop

Cow peas, which are often recommended in many states as a hay crop, are not suitable to Iowa canditions, according to the farm crops department of the Iowa State College. They have been tried for the last 10 years in the experimental plots and have not proved a profitable crop. Soy beans give greater results as a hay crop.

SOIL SURVEYS ARE STARTED

Soil Experts Begin Tests On More Iowa Farms To Determine Best Methods of Handling Them

Soil survey work for this year has been begun in six Iowa counties and one more county will be surveyed, providing the United States bureau of soils can find a man to handle its part of the work. Men are at work in Greene, O'Brien, Benton, Jasper, Page and Des Moines counties. They will secure data on the kinds of soil, the condition of the soil and drainage problems during the summer. This work is a part of the plan to determine the condition of the soil of the entire state. Each year a definate number of counties are surveyed. being taken according to the order in which the people of the county ask that the work be done. Up to date 40 counties have been surveyed.

Maps of the areas are made, the streams and drainage possibilities noted and samples of the soils are sent to the experiment station at Ames where tests are made to determine what elements are lacking so that the soil may be either limed for acidity or fertilized or left alone, according to its needs.

Following the greenhouse tests, field plots are laid out upon the principal types of soil in the county and tests are made during the growing season to determine the actual conditions. Up to date over 70 such plots are being run.

As a result of these surveys many farmers are now able to raise alfalfa due to the discovery and remedy of acid soils. Many acres of Iowa land which were previously marshes have been drained following surveys, so that much land was put under cultivation which had been worthless.

This work is done under the soils section of the Iowa Experiment station in cooperation with the United States bureau of soils.

HERE'S HOW TO CATCH RATS

Use the Automobile to Attack Them in Latest Manner

If you are out to catch all the rats on your farm and want a simple method. try the "gas attack," says extension experts at Iowa State College. Back the automobile up near where rat holes are found, hitch a piece of hose onto the exhaust pipe, start the engine to running and force the poisonous gas from the burned fuel into the rat holes. This gas either kills the rats or dazes them as they try to escape so that they can be easily killed.

Strychine sulphate or barium carbonate are good poisons to put out for rats, but this often allows the rats to die under buildings where their bodies are hard to get. To use poison make a dough of four parts of flour or oatmeal to one part of barium carbonate and place in the rat runs where they can eat it. Where strychnine is used place a few crystals in some meat and place where only rats can get it. Guard against other animals picking up the poisoned bait.

Ferrets, and dogs are useful in campaigns since the ferrets can drive the rats out and the dogs do the killing. Cats are not considered efficient rat catchers.

After ridding a farm of rats it is a good plan to build concrete founations so that the pests cannot get under barns. Screens over windows and around drain pipes will prevent their re-entry into buildings. Keep rats hungry by not leaving garbage cans open or laying unburned rubbish around. Hungry rats do not stay long.

Rats multiply rapidly so that one pair will produce six to ten litters per year consisting of 10 rats per litter, so that in three years one pair will produce in 18 generations about 360 millions of rats, barring death and interruptions.

Rats not only distroy grain, poultry, eat holes in buildings and household property but they carry disease which cause many deaths in humans. Among these are bubonic plague and trichnia and they have recently been suspected of carrying infantile paraly sis germs.

WISEACRES WERE ALL WRONG

Wife Could Afford to Smile in Later Years at Those Who Opposed Her Marriage.

October 26, 1764, there were united in marriage a pretty girl of twenty, Abigail Smith, daughter of a minister, to John Adams, a young lawyer without a practice, himself the son of a rather poor farmer. The lady's friends were not enthusiastic over the match, as the girl's forefathers were all of literary or professional caste, while the young lawyer could boast of no connection but with the soil. The parishioners were outspoken in their disapproval of the match, it being based largely on their suspicion of lawyers in general.

The fiery old minister-father of Abigail promptly took exception to the remarks, and the very next Sunday announced his text as "For John came neither eating bread nor drinking wine, and ye say he hath a devil." The minister's faith in his son-in-law proved well given, for the unknown and clientless lawyer became the second President of the United States.

"YANKS" GOT THEIR COFFEE

Sergeant's Personal "Kick" to King George Brought About the Desired Change in Rations.

Sergeant Guyon of "B" troop, American forces in Germany, has the distinction of having his ration changed by direct orders from King George.

When the American army polo team from Coblenz was in England recently Guyon had charge of the ponies at Hershot. The king visited the field and was attracted by the ponies' blankets bearing the letters "A. F." He approached to inspect them and addressed Guyon.

"Well, how are you getting along in England?"

The British Tommies nearby standing rigidly at attention were petrified by Guyon's reply: "Oh, pretty well, thing, but say, this tea we have for breakfast is fierce—can't you fix it up so we can have coffee?"

The king laughed and addressing one of his aides said: "See to it that these men have coffee hereafter." And the Americans had coffee.

Marriage Promotes Long Life.

Marriage, according to Doctor Schwartz of Berlin, is the most important factor of longevity. Of every 200 persons who reach the age of forty years, 125 are married and 75 unmarried. At sixty the proportions are 48 to 22; at 70 years, 27 to 11; and at ninety years, 9 to 8. Fifty centenarians had all been married.

SILLY TO ARGUE!

Of Course "Married Men Are the Nicest."

Marjorie Puts It Plainly, Though Perhaps There Are Some of Us May Not Understand.

"Married men are nicest!"

But are they, really?

Well, I don't know, but I'd like to think so. Anyhow, I've heard the phrase trip more than once from pretty lips, and there is no doubt that the speakers were in earnest.

Sometimes it has been varied thus: "All the nicest men are married."

Now, a man when he stumbles away from the altar may feel small and humble enough; but the fact that he has squeaked out an "I do!" and has clumsily placed a plain gold ring onto a woman's finger does not mean that he has shed his masculine vanity and his childish delight in compliments.

Looking at the thing frankly, writes W. Harold Thomson in the continental edition of the London Mail, I fail to see how there can be any rule about it. After all, every married man was once a bachelor.

But our charming critics don't seem to think about that. They just say "Married men are nicest."

It's all very gratifying and very confusing.

I asked Marjorie about it the other day.

"Marjorie," I said, "you have put your hair up now and you talk as one having authority and not as the scribes. I want you to tell me why you say that married men are nicest?"

She put her head to one side and swallowed the second half of what she thought was a liqueur chocolate.

"I don't know," she said, "but it's true. They're kinder than bachelors and more understanding. They talk to a woman as though they were neither afraid of her nor—nor contemptuous of her. They're—sort of experienced about us, I suppose that's it."

"My child," I said, "don't you realize that when you marry you will choose a bachelor to be your husband?"

"Yes," she admitted, and nodded at me, "but I'll be in a most desperate hurry to make him into a married man. He'll be ever so much improved when he's my husband."

"Now look here," I said very patiently, "you want to face this calmly. If you had lived as long as I and knew as many wedded couples you'd realize that almost every wife knows that the ideal husband is either some bachelor or is married to some one else?"

"Is that clever?" Marjorie asked.

"It may be," I answered. "The point is—it's true!"

She was rummaging about in the chocolate box.

"It isn't the point at all," she told me. "The point is that the nicest men get married. They can't help it. They are the kind who fall in love and make women fall in love with them. Therefore they are the dears."

"Look here," I said, "this won't do. We're getting out of our depth. I want you to understand that a married man must start by being a bachelor, and therefore—"

She pushed the chocolate across.

"Oh, don't let's argue," she said. "It's no use, anyway. Married men are the nicest."

I took a chocolate.

Now a Weedless Lawn.

A long sought fertilizer has at last been secured, after twenty years of research, which will slowly and surely extirpate the weeds, while permitting the grass to grow freely. Ammonium sulphate is found to be more advantageous than sodium nitrate, which tends to create an alkaline condition of the soil, especially favorable to the propagation of weeds. Ammonium sulphate produces reversed conditions and the grass flourishes and the weeds are so weakened that they are crowded out. Of course, this plan of fertilization must be qualified, as only grass that is an acid tolerant would develop along the line of extirpation of the weeds. The weeds to resist must be non-acid tolerant also.—Scientific American.

Her Position.

Little Esther was sometimes permitted to talk on the phone with mother's help, and one morning when she had been left alone for a few minutes she decided to call up her grandmother.

She climbed carefully onto a chair, and from there onto the sewing machine, which stood near by. She took down the receiver, but when the operator called, "Number please," she could think of nothing to say.

"Get off the line, please," called the operator, as no one answered.

"I'm not on the line," piped up a small voice. "I'm on my mamma's sewing machine."

Not Now.

The sweet young thing had been unable to buy the article she wanted, but in each case the clerk had assured her that "next time" it would assuredly be in stock. One day she called at the store to find a new clerk on the job.

"Do you have spats yet?" she inquired.

The clerk blushed. "No, ma'am," he stammered. "I'm not living with my wife now."

ON HOLY GROUND

Mohammedans Venerate Sanctuary in Jerusalem.

Traditions of Ages and Profound Mystery Surrounding the Famous Dome of Rock.

The Mohammedan sanctuary in Jerusalem on the Mount of Abraham's and David's sacrifices echoes the splendor of Solomon's temple that once stood in that locality, writes J. F. Scheltma in Asia Magazine. With its latticed screens of eboy, its brocaded curtains, its stained glass and mosaics in their somewhat faded glory, the dome of the rock stands in the solitude of the sacred precinct like one of those places hewn of a single opal or turquoise we read of in oriental fairy tales.

Approaching it, the Moslem pilgrim has to observe a strict ceremonial. As he enters he puts his right foot forward, begging pardon for his sins and invoking God's mercy. Walking round the rock, he must keep it on his right hand, reversing the process followed when making the circuit of the Kaaba at Mecca. Before proceeding to the cave underneath, he must probe his heart and strive for humility of spirit, uttering the prayer of Solomon! "Oh God, forgive those who have sinned and relieve the injured!"

He firmly believes that the rock is supported by a palm tree rooted in one of the fair rivers of paradise, the tree in the shade of which the beautiful, martyred Asia, wife of Pharaoh, and Mirias, the sister of Moses, will slake the thirst of the Faithful on the day of resurrection.

After paying his respects to the dome of the rock, to its "tongue" (a broken column, slanting to the roof of the cave), to the marks of the Angel Gabriel's fingers and to the sword of Ali, Mahomet's valiant son-in-law, he visits the other shrines of the Holy Enclosure. There, in the heart of Jerusalem, are the dome of the ascent, where the prophet was lifted up when starting on his heavenly journey, and the dome of the chain. The chain that used to hang down from its ceiling was supposed to be possessed of miraculous properties. Whenever a judge had to decide in a difficult case between litigants who supported their conflicting claims by contradictory statements, he transferred his tribunal hither and invited them to touch the links of the chain while repeating their assertions. Then the truth came to light, for the chain could easily be seized by the veracious, but eluded the grasp of the iniquitous who tried by falsehood to get the best of his opponent.

One day, however, the oracle was baffled by a man accused of having borrowed money without paying it back. Now, he kept this money concealed in a hollow staff which he asked the plaintiff to hold for him while he, too, gripped the chain swearing that the sum he owed had been returned. The bystanders marveled greatly at the chain's failure to unravel the mystery of such clashing testimony, and soon afterward the wonder-working chain disappeared because, tradition says, it began to despair of sustaining its reputation for perspicacity among a population so full of fraudulent resources.

Gems Are Cheap in Tiflis.

If you want to buy a quart of diamonds for a dollar or two, go to Tiflis.

Tiflis is the capital of Georgia, one of the new republics that have risen in the Caucasus on the ruins of the Russian empire. The value of the Georgian ruble is worth hardly anything at all. But the dollar has such abnormal purchasing power in this nation of lost values that it seems less like money than magic. You can get a fine dinner at Tiflis for ten cents, and room rent in the best hotel for $1 a month.

The Bolsheviki have ruined Georgia. They have killed industry and trade and consequently the value of the native ruble. The swarms of refugees from Russia have sold their most precious possessions to Tiflis merchants for food and clothing, until the stores of the city have become stocked with diamonds and pearls and all kinds of precious things which were paid for perhaps with a plate of beans or a pair of socks.—New York Evening Post.

One Interview in 110 Years.

The Dalai Lama of Lhasa in Tibet has just given an interview to an electrical engineer. This is the first time that a Lama has talked with a European in 110 years. Lhasa is on a plateau, 11,000 feet high which is perhaps desirable as sanitation is nonexistent. Tibet seems to want telegraphic communication with the outside world and there are faint signs of an industrial awakening. Mr. Fairley, a telegraph engineer, had an audience with "His Holiness," who proved to be kindly and very inquisitive. He also visited the Tibetan council called the "Council of Shapes." A twenty-four course luncheon followed.—Scientific American.

Grapefruit Has Rival.

Experimental scientists in the Department of Agriculture have successfully produced the tangelo, a cross between the tangerine and the grapefruit. It is said to be more than either, and to have all the excellence of the grapefruit without the tendency to fly into the face of the spoon manipulator noted when grapefruit is being eaten.

Fire Resisting Material.

Magnesia cement is reported as economical and effective fireproofing material, recommended especially for mine timbers in a place where they became very dry. It is applied in two coats, each one-fourth of an inch thick, the second being put on before the first has set or completely hardened. The coating is stated to be elastic, stable, and durable, and adheres not only to timbers, but to almost any surface. It resists fire, water and climatic changes, being also an excellent electric insulator.

He Almost Believed—

"Sometimes I almost think that Intends to be really rude and disaging."

"What now?"

"Why, I met her out walking asked if I might see her home she said, 'Certainly; any one passing along our street may—or you can up to the roof of this office building and see it without having to go nearer.'"

The Roll of Honor

Memorial Day, May 30, 1921

There is no better tribute to pay to the men who have given their lives for a cause, than to dedicate ourselves to the triumph of the cause they died for.

That's a roll of honor on which every name can be entered; in which the daily activities of our lives may be made the expression of a patriotic purpose.

We can make our business serve the community, and through, the country. It,s easy to forget about it, in the prosaic affairs of life; but it is also possible to remewber it. Today is a good time to think about it.

en us, miss."
Quick tears rose to Pamela's eyes.

"Oh!" she cried. "You knew Maggie?"

"In a manner of speaking, I did," stated Tomlinson sonorously. "Kissed her; but she never let me get as far as hugging, poor girl! She said she knew she wasn't here for long enough."

Laughter bubbled into Pamela's eyes alongside of the tears, but, in spite of it, the next moment she was crying softly.

"P-poor M-Maggie!" she sobbed.

Tomlinson bobbed his head up and down in formal sympathy, too old to worry much over woman's weeping.

"I understand that she must 'ave went," he said. "Else you wouldn't be alone, miss. Will you have your breakfast in bed?"

"Oh, could I?" sniffed Pamela, and then her eyes fell on the clock. "No, I can't," she decided for herself. "You see, Tomlinson, I only pro-promised to stay until ten."

"I'll be getting your bath ready, then, miss," said Tomlinson, and withdrew.

Half an hour later Pamela was enjoying a lonely "tray"-breakfast, placed at her command before the couch, which faced the friendly fire in the big living-room. Without being a mind-reader, it is possible to surmise that she ate very slowly, in the vain hope that Mr. Randolph would pop in, with or without Father Christmas, and joining her in the meal, banish a baby Mr. Gloom that was hanging round.

While she was still toying with her food she heard the bell ring and Tomlinson's voice saying, in deep, respectful tones: "Miss Thornton will see you, sir. She is in the sitting-room."

Pamela dropped her egg-spoon and stood up, back to the fire, just in time to face a neatly dressed, pink-cheeked, bright-eyed, bald-headed little gentleman, who stood, poised but alert, in the open doorway, like a bird about to peck at her to see if she were the real thing.

"Miss Thornton?" he asked, in a peculiarly liquid voice.

Pamela nodded her head twice.

"I am Mr. Borden Milyuns," continued the molten voice, and the bright eyes studied her face expectantly.

Pamela puckered her brows in an effort to meet that expectancy halfway, but failed.

"Are you?" she asked doubtfully, and with a mental reservation against Mr. Robert Hervey Randolph for outraging the traditions of childhood by sending a Father Christmas in this dapper form. "Won't you sit down?" she added politely.

Mr. Milyuns hung poised for a second longer, and then advanced on the couch decisively, sat down on one end of it, and waved his hand at the other. Tomlinson slipped in and out, bearing the breakfast-tray away. Pamela accepted Mr. Milyuns' silent invitation and seated herself, but tentatively, as though she could only stay for a minute.

"Make yourself comfortable, my dear," said Mr. Milyuns; "I'm going to talk to you for some time."

"You can't," said Pam; "not here. I only have the flat for six minutes longer. That is, I only pro-promised to stay here until ten." Her eyes wandered half expectantly, half wistfully to the door.

The bird-man smiled.

"We'll see about that," he said. "I'm sorry you don't remember me. If you are indeed Miss Imogene Pamela Thornton, I used to take you on my knee often, many years ago."

Pamela could no longer be startled by such announcements.

"That's what Tomlinson said this morning," she remarked. "Ever since last night, everybody I meet seems to —to know my real name. I don't understand it."

"Please trust me," said Mr. Milyuns, "and you'll soon understand a lot more than that." He drew a slip from his pocket. "Now, do answer me carefully. Tell me the addresses of the first four places you and Maggie lived in after your father died."

"I can't remember the first," said Pam, but, after a second's thought, rattled off the names of three streets, and located addresses approximately by describing nearby corners prominent to a child's mind for one reason or another. "Those are the next three," she said. "After that, we went—"

But Mr. Milyuns was satisfied.

"That's enough for formalities, my dear. I'm convinced that you are the person for whom the firm of Milyuns, Branch & Milyuns has been searching for years. Do you remember your great-uncle, Asa Thornton?"

"Yes," said Pamela, a vague wonder and terror in her eyes; "but I didn't know he was real."

"'Didn't know he was real!'" exclaimed Mr. Milyuns. "What do you mean?"

"Maggie used to say," explained Pamela, "'If you're not good, your great-uncle, Asa Thornton, will catch you, and he hasn't cut his finger nails since your poor father married your dear mother.'" Pamela shuddered.

"You'll have to forget all that," said Mr. Milyuns soberly. "Before your great-uncle died, he repented very effectively of the way he treated your father, and left you an income of ten thousand dollars a year."

Pamela sat up very straight, and then sank slowly into the pillows at her back.

"'Ten — thousand — dollars — a—year!'" she repeated slowly.

Mr. Milyuns nodded.

"Beginning with today. There is no accumulation waiting for you, because, by the terms of the will, Mr. Randolph was allowed the entire income up to such time as you should be

"'Ten — Thousand — Dollars — a — Year!'" She Repeated Slowly.

discovered. That provision was quite natural, if you will remember that Mr. Asa Thornton had been searching for you unsuccessfully for some months before he died."

Pamela sat up straight again.

"I want to understand you," she said with a sudden dignity that increased Mr. Milyuns' admiration, already decidedly on the upgrade. "You mean that, with my appearance, Mr. Randolph's entire income completely disappears?"

Mr. Milyuns nodded.

"You have guessed it in one," he said flippantly.

"I don't need ten thousand dollars a year," said Pamela promptly. "You will please tell Mr. Randolph that I shall only take half."

Mr. Milyuns smiled.

"I'll try to carry out your orders," he said blandly, "but I'll have to find Mr. Randolph first. Let me add that you apparently don't know the young gentleman very well."

"What do you mean by that?" asked Pam.

"Well," said Mr. Milyuns, taking another scrap of paper from his pocket and handing it to her, "read that. It was left at my house this morning by a taxi-cabman, who didn't wait for an answer. You see that Mr. Randolph has handed over to you in perpetuity this apartment, Tomlinson, and all the other fixings. It doesn't look very much as though he intended to come back in the near future."

"But I want him to!" cried Pam. "I—I've been expecting him. I didn't half—half thank him for—for—" Tears of disappointment clogged her throat.

"There, there!" said Mr. Milyuns, leaning over and patting her hand. "I understand just how you feel, because Bob is one of the straightest, openest, most lovable young devils that ever went his own way through a delighted world."

Pamela nodded her head up and down in silent confirmation of all those kind words. She began to like Mr. Milyuns. She raised pleading eyes to his face.

"Won't you please find him for me?"

"My dear," said Mr. Milyuns, so promptly that if she had asked for the house and lot on the northwest corner of Fifth avenue and Fifty-seventh street, he would have promised it to her before he could stop himself. "I will. I haven't proved myself much good at the game, but I'll find Bob for you if I have to start a detective agency of my own. In the meantime, what are you going to do? I suggest that you accept these premises until the truant turns up—only, of course, we must get you a companion."

"'A companion?'" asked Miss Thornton. "But I have that already. Tomlinson is a dear."

"Tomlinson is splendid in his way," admitted Mr. Milyuns, "but he isn't quite a woman. You can't live here chaperoned by a mere male."

(TO BE CONTINUED.)

The Bright Side.

The warden of Ohio penitentiary says that this one is true. Recently a negro prisoner, in for life, was brought before him and in the conversation the warden said: "Why, Rastus, you are in for life, aren't you?" With a broad grin the negro replied philosophically, "Oh, no, warden, just from now on."

Horticultural Hints

CLEANING UP A BERRY PATCH

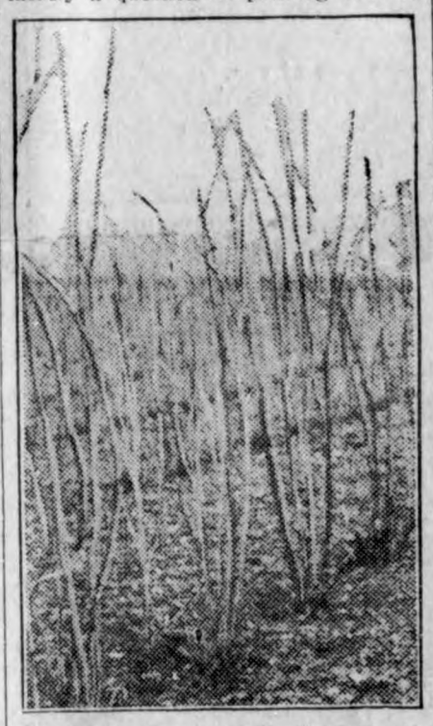
It Can Usually Be Brought Back to Productive State by Careful, Judicious Pruning.

A patch of small fruit which has been allowed to grow as it will for a season or two is a tough proposition, but it can usually be brought back to a productive state by careful and judicious pruning.

Berries should be grown in rows. They should never be allowed to form a bramble patch and grow where they will. Sucker plants springing up from the roots of parent bushes is what causes them to form the bramble patches and it is likewise these sucker plants which so tax the roots that fruit production is an impossibility. Define rows at least six feet apart in your patch, then grub out all the other plants and bushes. If you want to use them for additional planting the work can be done early in the spring while the canes are in dormant and the roots transplanted to other rows. But remove the sucker plants, grub them out and keep them out in the future by constant cultivation during the growing season.

The canes should all be cut back to six to eight inches in height and the growth of new canes encouraged. Allow only three new canes to form to the bush and when they are two and one-half feet high, about the middle of the following summer, top them off with a hand sickle. This will stop any further growth in these canes, will make them strong and stocky so that they will stand upright without trellis or support. It also causes lateral branches to be sent out and it is on these lateral branches that the fruit is borne. These laterals are allowed to grow as they will, but the following spring, just before fruiting season, they are pruned back one-half in order to improve the quality of the fruit produced.

By following this plan the old berry patch, unless it is hopelessly diseased, can be restored to productivity within one year. Getting a berry crop is merely a question of pruning and of



Raspberry Canes Held Upright by Linear System of Culture.

sufficient moisture. And the moisture in an ordinary berry season can be supplied by constant cultivation during the growing season, for it is just as important that the growing canes which are to bear next year's crop of berries should have a plentiful supply of moisture as for the berries. These canes are largely formed after the fruiting season and if cultivation and the consequent conservation of moisture is discontinued after the fruiting has taken place these canes will of necessity not be as strong, well developed and sturdy as they should be.

Pruning of berries and all cane fruits should preferably be done in the spring just before the sap commences to flow and after all danger of killing frosts are past. Danger of winterkilling where fall or winter pruning is practiced is great, because the open end of the cane permits the frost to travel down the soft center of the canes to the roots. That is why spring pruning is to be preferred. In this pruning, remove all dead canes from the previous season's fruiting canes and also thin down the present canes to not more than three or four sturdy ones to each old, established root stock. Quality berries are worth more than a quantity of inferior berries and these quality berries are produced only where the roots are not overtaxed.

Berries kept in a strong, sturdy condition by careful and systematic pruning and by constant cultivation, just as one would cultivate the cornfield, will remain productive for years. A good manure mulch every fall will aid them during the winter and will keep up the available supply of plant food.

Gooseberries and Currants.

Gooseberries and currants do not need much pruning, but after they get four or five years old they will bear much better fruit and more of it if the canes are cut out.

Pruning Bush Fruits.

Bush fruits do not need pruning the first season and after that the dead canes and useless suckers should be kept cut out and the canes cut back each spring.

DAIRY POINTS

NEED OF BULL ASSOCIATION

County Agent Obliged to Hustle Around and Arrange for Exchange of Purebred Sire.

(Prepared by the United States Department of Agriculture)

"I was in Mecklenburgh county, North Carolina, some weeks ago," says a field man of the dairy division, United States Department of Agriculture, "and had an opportunity of witnessing an incident which throws new light on the usefulness of the bull-association organization. There is an association in that county, and I was invited to 'sit in' at a meeting of the

Bull Associations Should Get the Best Bulls Obtainable.

board of directors. The question of holding a sale came up, and the county agent read a letter he had received from some farmers in another community who wanted to buy stock, and were coming to Mecklenburgh county to see what they could get. The directors appointed a committee to receive them and show them around.

"Thus this piece of business was provided for, and placed in the hands of the right persons. Otherwise the county agent would have had to give up other work he had on hand, and search for some one to whom he could refer the visitors, and go with them. Even then he would not have had the information so readily available as these breeders themselves had it.

"In another county I saw a different thing, which shows how the county agent is loaded down with work where there is no such organization. He had succeeded in getting a number of farmers in different parts of the county to take up pure breeding, and had placed some good bulls with them. These sires had now been used for two years, and a change had to be made. So the county agent found it necessary to hustle around and arrange exchanges among these farmers to keep the good sires at work; otherwise the owners would have sold them, and might have neglected to buy new ones, and might have lost the use of a good bull. If there had been a bull association in the county it would have attended to the business of exchanging, as one of its regular functions, and left the county agent free to take up other important work."

FEEDING VALUE OF POTATOES

Rank Below Good Corn Silage on Account of Higher Percentage of Moisture in Former.

From the standpoint of feeding value for dairy cows, it may be said that potatoes rank below good corn silage. The latter contains about 26 per cent dry matter and the former, about 21 per cent. The chemical composition of raw potatoes and corn silage is very similar. Both contain about 1 per cent of digestible protein and between 16 and 17 per cent of digestible carbohydrates and fats, but potatoes contain somewhat more moisture than well-cured corn silage. Potatoes at 36 cents a bushel would cost $12 a ton, whereas silage is worth less than one-half that price under present conditions.

PROVIDING SALT FOR COWS

Best Plan Is to Give Animals Constant Supply—Ounce Each Day Is About Right.

The best way to provide salt for the cows is to give them a constant supply so they have easy access to it. The average cow will use about half a pound a week. If salt is provided daily an ounce each day will be about right, giving more or less according to the demands of the individual animals. Cows giving milk require more than those not in lactation.

INCREASING YIELD OF COWS

Foreign Competition Can Be Eliminated by Better Breeding, Right Feed and Care.

Better breeding, the right kind and amount of feed and good care are the only ways the production of our dairy cows can be increased. When this is done, foreign countries flooding our markets with their butter will have to look elsewhere for customers.

Number of Eggs to Set.

Fifteen eggs are enough for any hen to cover, and during very cold weather or with very small hens, better results will often be secured if no more than 11 or 13 eggs are allowed to each one.

The Barn.

The dairy barn with a lot of expensive fixtures is not absolute necessary.

THREE YEAR OLD WASHED ASHORE

Mrs. Dingman Tells of Adventure of Childhood When Father's Ship Was Wrecked.

RELATES LATER EXPERIENCE

Declares That the Way Tanlac Restored Her Health Is More Remarkable Than Anything She Has Ever Had Happen to Her.

"I've had some remarkable experiences in my life, but none more wonderful than the way Tanlac overcame my troubles and made me gain twenty pounds," was the statement of Mrs. Christina K. Dingman, 1216 Alice St., Oakland, Calif. One of the experiences to which Mrs. Dingman refers is well known to her friends. When a child of three years, accompanying her father, a noted sea captain, on an ocean trip, the vessel was wrecked, but she was almost miraculously saved, the small box into which she was put being washed ashore. According to her statement, Mrs. Dingman enjoyed the best of health until three years ago when she began to suffer from a bad form of stomach trouble and later from rheumatism. How she was completely restored to health is best told in her own words:

"Nobody knows how I suffered for the past three years. No matter how carefully I ate I would endure agonies afterwards from smothering and sinking spells. Sometimes they were so severe I would fall to the floor and would have to be carried to bed. I went for days at a time without eating, as I dreaded the misery I knew would follow, no matter what I ate. Then rheumatism set in and my shoulders and arms hurt me so I couldn't comb my hair. My back felt like it was breaking in two.

"I was almost in the depths of despair when I began on Tanlac, but this grand medicine has made me a well and happy woman. I'm not even troubled with constipation now, thanks to the Laxative Tablets, which are far superior to anything of the kind I ever tried. It seems almost too good to be true, but here I am in the best of health and spirits after I had given up hope, and I'll always praise Tanlac for it."

Tanlac is sold by leading druggists everywhere.—Advertisement.

Class in Physiology.

Teacher—Where is the heart located.

Little Jimmy (silent).

Teacher (places hand on boy's chest)—Don't you feel the beating?

Little Jimmy—No; I usually feel it on the other side a little lower down.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

His Reason.

"I wish you would tell me," said the agent, who had been a long time on Mr. Snaggs' trail, "what is your objection to having your life insured?"

"Well, I don't mind telling you," replied Snaggs. "The idea of being more valuable dead than alive is distasteful to me."

Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the System, HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work.

All Druggists. Circulars free.

SHRINERS WILL PUT ON REAL SHO WAT DES MOINES

Des Moines, Ia., May 25—Details of the program for what promises to be the greatest gathering of its nature ever held in Iowa, the meeting of the Imperial council of the Ancient Arabic Order, Nobles of the Mystic Shrine, are rapidly being completed. Des Moines will entertain the Shriners of North America on June 14, 15 and 16. More than 75,000 visitors are expected in the city at that time. All of the temples of the Shrine in the United States and Canada, and delegations from Hawaii, Panama, and Nova Scotia will be represented. Sixty temples will send their bands, patrols and uniformed organizations, and two parades are scheduled, the first on the morning of Tuesday, June 14th and the second on the evening of Wednesday, June 15th.

A fireworks display which is the most elaborate ever staged in the west with the exception of those at the San Francisco exposition will be put on at the state capitol grounds on the evening of June 14th. On Wednesday afternoon, June 15th, a thrill program will be put on at the state fair grounds, open to the general public. It will include as a feature a head on collision between two locomotives, each having a tender and two box cars attached, a double parachute leap from an airplane by a woman aviator, and a program of harness racing, in addition to concrts and drills by Shrine bands and patrols.

Arrangments have been made for the housing of 75,000 guests. All persons who desire to make room reservations are asked to communicate with George Hamilton, at 412 Seventh street, Des Moines, Ia., and accomodations will immediately be assigned to them.

The camping grounds at the state fair grounds have been thrown open to visitors, and tents and camping equipment may be rented. Arrangments are also being made for the parking of automobiles.

A reduced rate of one fare and one half has been granted to Shriners and their families. Certificats entitling them to buy reduced fare tickets will be sent them on application to 412 Seventh street, Des Moines, Ia.

HANCOCK FARMERS SIGN PETITION TO HASTEN HARD ROADS

Hancock county early in the season let contracts for paving from the Cerro Gordo line to Garner and from Britt to Hutchins, and now it is proposed to pave the rest of the North Iowa pike in Hancock; and this apparently not only without objection on the part of the land owners, but even at their insistent request.

A petition was circulated last week and very literally signed by the land owners between Garner and Britt asking that the board advertise for bids again. This action was taken on the ground that the people had acted favorably on the proposition when it is submitted to vote.

The petition only asked for another letting on the road between Garner and Britt, but the board considered it advisable to ask for bids on the part of the road west of Hutchins also. If bids are received that are low enough to warrant the board in letting the contract, it will mean that the entire primary road across the county from east to west will be paved this season.

If a bid is received that the board deems low enough there is no doubt but the contract willbe let, as the property owners are almost unanimously in favor of it. Not only did they present a petition for another letting but a number of them appeared before the board and urged that the letting be called.

The property owners along this road have shown a desire for the paving at all times since it was first brought up. They worked for the proposition, voted for it when it was submitted at an election and never have any of them asked the board not to let these contracts.

GOURD SHAPED EGGS LAID BY FLOYD HEN

CHARLES CITY, May 23— Freak eggs have been the order of the day over the state but the hens of the county are not going to take a back seat in this egg contest matter and so one in this county has laid an egg that is well in line for the championship banner. Donald Claussen, son of Peter Claussen of East St. Charles has exhibited an egg in the shape and color of a small yellow gourd, large at one end and curled in a semi circle with a small bulb on the other end and it was freshly laid when brought to town.

PICNIC WINDS UP SCHOOL AFFAIRS FOR THIS YEAR

The school picnic was held at the Koerner grove last Friday as announced in the Times last week. The day was ideal and a large crowd turned out for the big annual event.

The youngsters enjoyed themselves with games, the men talked over matters and the women were busy getting the picnic dinner ready.

At the noon hour all sat down to the big dinner, which was thoroughly enjoyed, for nothing is as good as a picnic dinner.

In the afternoon the Klemme High School ball team played the Britt High School. The game was interesting from start to finish and was real exciting all the time. Britt defeated the Klemme boys 9 to 5.

The picnic was a great success and all eagerly await the next annual affir.

Card of Thanks

We take this opportunity of extending our thanks and appreciation to our kind friends for their many deeds of kindness, and words of sympathy during the sickness and death of our beloved husband and father, son and brother; also for the beautiful floral offerings and the choir for the beautiful hyms they sang. Our heartfelt thanks goes out to each one of you.

Mrs. Wilbur McGee and family
Mr. and Mrs. Oliver McGee and family.

NISSEN MEMORIAL COTTAGE BUILDING

MILFORD, Ia., May 15.—There will be a bee at the Methodist camp grounds beginning Monday, May 1, to last for three or four days for the purpose of building the Nissen Memorial cottage.

About forty men have promised to be on hand at the time and anyone else who can donate a day's labor in helping to construct this cottage will be welcomed to join this crowd.

The foundation was laid some weeks ago and the lumber is now on the grounds. This cottage is being erected in memory of the Rev. H. C. Nissen, who with his wife and only daughter, Alice, was killed in an auto-train accident a few years ago when he was pastor of the Methodist church at Milford.

The cottage will accommodate thirty-six people, besides parlor rooms and porches and is a result of donations of many of his friends. The labor is also to be donated by anyone who feels like helping.

The Rev. D. A. McBurney, president of the Methodist Camp association has charge of this bee.—Des Moines Register.

Rev. Nissen is a son of Mrs. Kate Nissen of this place and the family were well known here. They also have other relatives in this vicinity. Donald Nissen, who comes here every summer to work in the J. N. Day store is a son of the Rev. Nissen mentioned above.

TWO ACCIDENTS HERE SUNDAY

One severe accident and one minor injury was the toll for Sunday here.

John Woods, who was playing ball with the Klemme Sox against Woden, recived a broken leg. Jack was hold ing down the base when a runner on the Woden team stepped on his ankle as he reached the base, breaking the bone just above the ankle and also bruising the bones of he ankle.

It was a very unfortunate accident and as Jack is farming it will add an extra burden at this time of the year. H is getting along well at this time.

Milvern Ell was the other who was put on the injured list that day.

He was watching the game from the first base line when a low, hot liner right off the bat came his way and as he could not dodge it, the ball struck him on the side of his face and as a result of the accident he now has a highly colored cheek. No bones were broken but it jarred him up considerable.

NOTICE OF APPOINTMENT OF ADMINISTRATOR

Notice is Hereby Given, that the undersigned has been by the District Court of Hancock County, Iowa, appointed Administrator of the Estate of JACOB WENZ, Deceased, late of Hancock County, State of Iowa, deceased, and has duly qualified as such Administrator.

All persons indebted to said estate are requested to make immediate payment to the undersigned; and those having claims against the same will present them. duly authenticated, to said Court or to the undersigned, for allowance.

LIBERTY TOWNSHIP NEWS

Milton, Homer and Roxanna Schaper autoed to Britt last Sunday for a visit with relative sand friends.

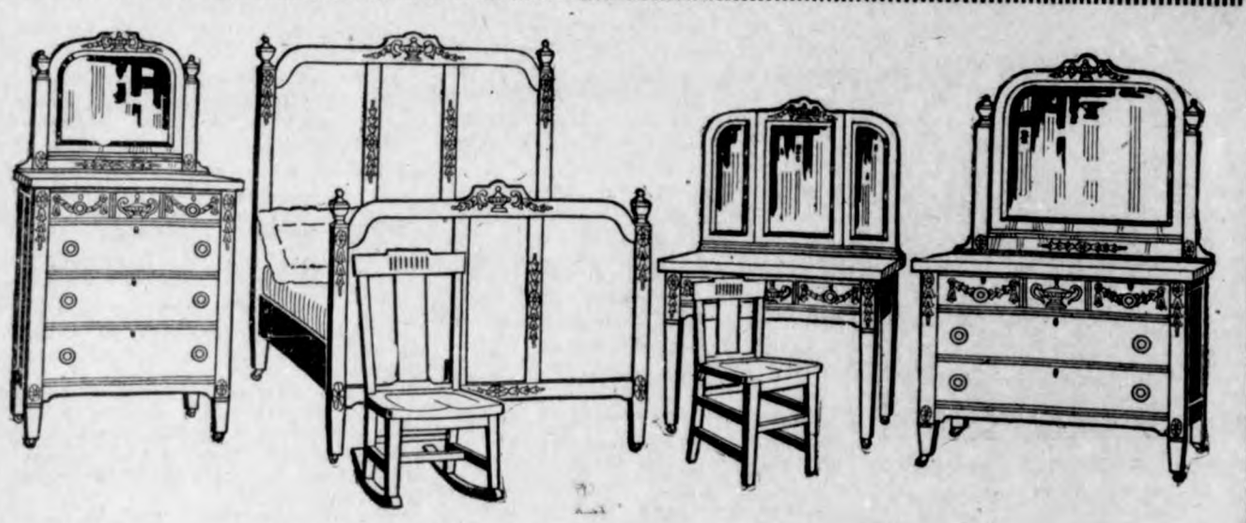
John Woods had the misfortune to receive a broken leg last Sunday while playing baeball at Klemme.

Quite a numbre of people of this community took in the Sunday and Epworth League Convention in Klemme this week.

School No. 9 will come to a close Friday. Mrs. C. W. Suckow the teacher has planned a picnic for the closing day. If it continues to rain every day as it has been we would suggest that they have a bathing party instead of a picnic.

Good Example.

Aunt Polly was milking in the cow lot, and her politically excited son found her there. "Maw, you're a Democrat, ain't you?" he asked. She made no answer, but he persisted: "Say, maw, ain't you a good Democrat?" Finally she said, emphatically: "I hain't nothin'. I'm a woman milkin' a cow. You go in the house and shut up!"



My talk today is to the middle aged couple who some twenty years ago purchased what was then a very nice bed room suit, but what is now somewhat old--out of style, why not buy a new bed room suit for your own use? The wax oak suit above is $175.00 complete. Shall we sell your old suit for you in our Second Hand Department?

VICTORY MEDALS FOR EX-SERVICE MEN

"All officers, contract surgeons, and enlisted men who served on active duty in the Army of the United States at any time between April 6, 1917 and November 11, 1918, and whose service was honorable" are enntitled to receive the Victory Medal issued by the government for such war service. This includes the men who did not get over sea, as well as the members of the A. E. F.

Those men who saw service over sea and were engaged in any of the major operations or had part in the occupation of any of the defensive sectors are in addition entitled to a clasp in addition for each such operation or sector. The operations listed as major operations are Cambrai, Somme, Lys, Aisne, Montdidier-Noyon. Champagne-Marne, Aisne-Marne, Somme offensive, Oise-Aisne, Ypres-Lys, St. Mihiel, Meuse-Argonne, and Vittorio-Veneto. Each officer or enlisted man serving in the First Army area between August 30 and November 11, 1918 or in the econd Army area between October 12 and November 11. 1918, will be entitled to the defensive sector clasp.

To secure a Victory Medal it is necessary that application be made on a blank furnished by the War Department for that purpose, and that the discharge papers or a certified extract from them be forwarded with the application. Rev. A. E. Buriff of this city, has received from the War Department a number of the necessary blanks and will be glad to assist any ex-service man in making application for the medal or for the medal and clasps, entirely without fee or expense. Bring your discharge and call o nhim at any time. If the soldier is dead, either in service or since, the next of kin may make the application and receive the medal.

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 A. M. and 8:00 P. M.

Sunday school at 11:00 A. M.

The Rev. J. H. Edge, of Belmond. will speak at both the morning and the evening services. Morning subject, "The Strategy of Methodism in America." Evening subject, "The Method of Methodism Abroad." The evening service will be held in the park, weather permitting. Mr. Edge is an exceptionally forceful and interesting speaker. Plan to hear him at both services.

—A. E. Buriff, Minister.

Myron Haskins may well have thought last Thursday that the end was near for him. He was at the power house when lightning struck the big chimney and sent part if it through the roof. As soon as the storm subsided so he could get out and fix up the lines, he went to a home and was working on a pole when the pole broke near the ground and he fell with it. He struck on the pavement and for a time it was feared that he had received serious injury. He was taken home and on examination it was found that no bones were broken. He has been confined to his bed since and is very sore and lame, but a few days will probably put him back as good as ever again. The fact that he escaped alive seems a miracle.—Garner Signal.

o o o o o o o o o o

Band Will Give First Concert of Season Next Week

On next Wednesday evening at 8:00 o'clock, the Klemme Concert Band will render the first concert of the season.

After experiencing a great deal of difficulty in trying to get an Instructor for this season who can be with us on concert nights, we have finally secured Prof. J. R. Andrews, who moved to Garner just recently. We are fortunate in being able to secure his services. He led our band on Memorial Day, our first appearance this year. He certainly is capable, having the ability to play almost any band instrument. We can assure you of a first class concert on next Wednesday evening, so dont miss it. Please indicate by your presence that you are "with us" and we will do our best to please you.

A Word To The Business Men

If you are sufficiently interested in the band to finance it again this season, the summer concerts will continue uninterrupted. A good band gives evidence of a booming town with progressive merchants. It is a real live advertisement. and we want to maintain it.

Attention!..Band Members

We have been informed by Mr. Andrews that he cannot be with us next Tuesday evening because of the fact that the Garner Band will give their first concert on that night; consequently, we will have our rehearsal on Friday night of this week (June 3rd.)

Hereafter, rehearsals will be held every Friday night, and concerts on the street every Wednesday night. Keep the dates in mind and reserve them for the purpose above stated. Every instrument is needed. Attendance at rehearsals and practicing at home will do much toward making any band a success.

Earl E. Josten,
Secretary-Treasurer.

Cranks Up Fliver—Breaks Arm

Sunday evening while attempting to crank the car Marvin, son of Mr. and Mrs. Fred Barz east of town met with a painful accident. The engine back-fired breaking the bone in his arm just above the wrist.

KLEMME BAND SECURES NEW DIRECTOR

Mr. Andrews, who has been hired by the band at Garner, has also been secured to direct the band here and made his first appearance with the Klemme band in open air concert on Memorial day. He is a very fine young man and comes highly recommended as a band leader.

SAVE THE BUMBLE BEES

A Good Crop of These Bees Makes Lots of Clover Seed

Do not kill the bumblebees if good crop is desired, say entomologists at Iowa State College, since bumblebees have much to do in producing seed in clovers.

Bees in general pollinate flowers. However, the honey bees have too short tongues to get to the bottom of the flower in red clover and so can not spread the pollin. The honey bee has a tongue which is only six millimeters long and the bumblebee has an added three millimeters which allows him to reach the bottom of the flower and to spread the pollin.

Bumblebees are subject to attacks from parasites and mice which will kill them off rapidly. Tests have been which show that where bumble bees are present seed is plentiful. On one patch of 66 acres without bumble-bees only 158 pounds of seed was gotten while another field of six acres planted at the same time and under the same condiions, but supplied with many bumblebees, prc duced 500 pounds of seed per acre.

One bumblebee is able to visit between 30 and 35 flowers per minute, and they work all day long.

MEMORIAL DAY WAS OBSERVED IN KLEMME MONDAY

Memorial Day was observed here Monday and the program was carried out as per the program published in the Times of last week.

Dr. Pierce, of Britt delivered the address of the day to a large audience who were greatly pleased. Dr. Pierce is one of the best speakers we have ever heard and Klemme was quite fortunate in securing him to deliver the address.

It did not rain here as it did in many near-by towns and so the program was carried out in the park as published in the last issue of the Times.

Quite a number of World War Vets turned out in uniform for the occasion.

The Klemme band headed the procession and it was the first appearance on the streets this year and their playing was greatly improved over last year.

Male voices furnished the choir this year which was quite a novelty as in former years the women were generally depended on to hold up that part of the program.

In all it was a very sucessful program and was well enjoyed by all.

IOWA FARMERS WANT CO-OP. ELEVATOR AT CHICAGO

Setting forth its support of the Committee of 17 and the U. S. Grain Growers, Inc., the board of directors of the Iowa State Union of the American Society of Equity has asked the U. S. association to recognize the Equity Co-Operative Exchange, and expressed its disapproval of letters sent out by Iowa Farm Bureau officials seeking to block the progress of the Chicago terminal elevator enterprise on which the Iowa society and the Equity Co-Operative Exchange have been engaged for 14 months.

xThe Iowa State Union also stated its position in support of continuing with the Chicago terminal elevator enterprise, towards which more than $250,000 had been subscribed before the Committee of 17 made its first report. As the Iowa Equity represents a solid block of 13,000 farmers who have united with the farmers of the Dakotas and Minnesota in pushing the terminal elevator business. and as both the Iowa Equity and the Equity Co-Operative Exchange have been active in bringing about the U. S. Grain Growers, Inc., it is not expected that any conflict will arise between them.

The action of the Iowa Equity in calling attention of the U. S. Grain Growers, Inc., to the situation was as a result of letters sent out from the Iowa Farm Bureu head stating that it would be inclined to oppose the Equity project. It is believed that this attitude of opposition on the part of certain Farm Bureau officials was due to their unfamiliarity with the close relationship existing btween the U. S. Grain Growers, Inc. and the other grain marketing organizations upon which the U. S. association is building its proposed plan.

It is expected that all opposition will cease as soon as the Iowa Farm Bureau officials realize that the Equity enterprise was well on its way before there was any Committtee of 17, and that the Equity Co-Operative Exchange is bound by contract to establish the Chicago terminal elevator when the stipulated amount of capital stock has been sold. It is also stated on good authority that the U. S. Grain Growers, Inc. has no fear of the Equity enterprise and expects to enjoy the closest co-operation in the Chicago market as well as elsewehere.

Iowa Equity men are citing the statement of President C. H. Gustafson in publicity matter to the effect that the pan of the United States Grain Growers, Inc. "will in no way interfere with the work of existing farm organizations," as evidence that the association itself has no objection to the plan of establishing the Equity terminal elevator in Chicago.—Co-Operative News Service, Chicago.

Two Garner Men Perish In Big Storm At Clear Lake

WORD "GIRL" IS USED BUT ONCE IN BIBLE, SAYS McKINLEY

How much do you know about the Bible? Not so much it's safe to venture, as M. D. McKinley of Jefferson, Iowa, who has a passion for studying it that's seldom equaled. Here are some of the things he's arrived at.

"In the Bible the word 'Lord' is found 1,853 times; the word 'Jehovah' 4,855 times. and the word, 'Reverend' but once, and that in the 9th verse of the 111th Psalm. The 8th verse of the 117th Psalm is the middle of the Bible. The 9th verse of the 8th chapter of Esther is the longest verse, and the 35th verse of the 11th chapter of St. John is the shortest. In the 107th Psalm four verses are alike, the 8th, 15th, 21st and 31st. Each verse of the 136th Psalm ends alike.

"No names or words with more than six syllables are fonud in the Bible. The 37th chapter of Isaiah and the 19th chapter of Second Kings are alike. The word 'girl' occurs but once in the Bible and that in the 3rd verse and 3rd chapter of Joel. There are in both books of the Bible 3,586.483 letters, 773,693 words, 31,373 verses, 1,139 chapters and 66 books. The 26th chapter of the Acts of the Apostles is the finest to read. The most beautiful chapter in the Bible is the 23rd Psalm.

The four most inspiring promises are: John 16th chapter and 2nd verse; St. Matthew 11th chapter and 28th verse. The first verse of the 60th chapter of Isaiah is one for the new convert. All should read the 6th chapter of Matthew. All humanity should learn the 6th chapter of St. Luke from the 20th verse to the end."

TEACH GIRLS HOW TO SPEND

Give Them A Chance to Learn How To Market Properly

Ninety per cent of the money brought into the Iowa wage earners home is spent by women, according to estimates made by the home economics department of Iowa State College. Because of this fact the girls taking the home economics cuorses are taught marketing that they can buy properly. At the same time the girls get practical training in planning meals for families of various sizes.

Each girl is required to keep close tab on the amount of food used and the kind of food purchased so that if a leak occurs she can be checked up.She is also checked on the amounts of the fifferent kinds of food used so that the amount of milk or vegetabes given to the family can be determined.

Information Service Started

The department of education and publicity of the American Farm Bureau recently started an editorial information service. The object of this service is to encourage editorial discussion of the farmer's problems in the city press. Unbiased facts relating to various phases of these problems will be furnished editorial writers.

NOTICE OF APPOINTMENT OF EXECUTOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Executor of the Estate of Carlena Griffen, deceased, late of Hancock County, State of Iowa. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated. to the undersigned, for allowance.

Dated May 27th, 1921, A. D.

F. A. ARNOLD, Executor.
Wichman & Hastings, Attorneys for the estate. (J-2-9-16)

Whitewash inside the barns will make them lighter, cleaner and coolre during the summer.

Lead arsenate will kill bugs and worms on rose bushes.

BOB ABEL AND GUS MAGNUSEN BOTH OF GARNER DROWN AT CLEAR LAKE DURING STORM WHEN BOAT CAPSIZED

Bodies Not Found Until Sunday

Bob Abel, Gus Magnusen and John Campbell, all of Garner were fishing at Clear Lake last Thursday afternoon when the big wind storm swept over this section of Iowa.

The heavy wind capsized the fishing boat before the occupants could row for shore. Bob Abel and Gus Magnusen were drowned but John Campbell being an expert swimmer and a powerful man was able to cling to the anchor chain on the boat and after a battle for over an hour a rescuing party reached him in an almost exhausted condition. Able and Magnusen both wore hip rubber boots and they were unable to stay above the water. both being good swimmers.

The men lost their lives about mid-way beteen Dodges Point and the shore to the north.

The bodies were not found until Sunday afternoon by the searching parties who had dragged the lake since the men disappeared.

Men in row boats and others in gasoline launced kept up a continual search until the bodies were finally found late in the afternoon of the third day. They were found about fifty feet from each other in about ten or twelve feet of water and were over half a mile from the place where they were last seen.

Funeral services were held at the court house lawn at Garner Monday morning.

Both men leave their wife and a a family of small children. The bereaved families have the sympathy of the entire country in their sad hour.

Grain Growers Plan To Finance Own Marketing System

Initial steps were taken on May 26th by the U. S. Grain Growers, Inc. to form a $100,000,000 farmers finance corporation. The plan is to give the producers machinery that will enable them to use their surplus cash in financing their own marketing enterprises.

MICKIE SAYS

Dr. Edgar Zinn, of Goldfield was a visitor in Klemme Sunday for a couple of hours. He was on his way to Clear Lake to look after his farm which needed some repairs after the storm.

Hawaiian Race Being Reborn

Infusion of Foreign Blood Reinvigorates Inhabitants of the Island.

KOREANS REFUSE TO MIX

Analysis of 14,559 Marriages in the Islands Reveals Some Surprises to Science—Japanese Not Most Prolific Race on Island.

Honolulu, T. H.—The Hawaiian race, which with the Polynesians in general, has been regarded as a dying people, is being reborn and reinvigorated by infusion of alien blood, according to statistics just compiled by Louis R. Sullivan of the New York Museum of Natural History now attached to the Bishop museum in Honolulu.

Mr. Sullivan has just completed analysis of 14,559 marriages in the islands, selected at random, and his findings in some cases have been surprises to science.

According to the tables, more American men in the territory marry women of blood foreign to their own than marry American or British women. The Japanese are not, as has been supposed, the most prolific race in the islands, but are surpassed in this regard by Portuguese, Porto Ricans, part-Hawaiians and Spanish. Of American women, more than one in every six living in the islands marry Hawaiians, part-Hawaiians and others of blood strange to their ancestry. Of all the racial groups the Korean women represent the only one which refuses to mix blood, not a single case of a Korean woman marrying a man other than a Korean having been discovered.

A New Racial Group.

As a whole, the tables indicate, the part-Hawaiian group has a tendency to consolidate, rather than scatter, since of Caucasian-Hawaiian males who marry, 32.7 per cent marry back into the full-blooded Hawaiian strain, while only 13.8 per cent take white wives, and the remainder, either inbreed among their own kind or marry at large. Of Asiatic-Hawaiian males, 43.6 per cent marry back into the Hawaiian strain, only 1.3 into the Asiatic strain and a negligible proportion into the Caucasian strain.

The result, so far as the Hawaiian race is concerned, is said to be a new racial group, fecund to a high degree, still abnormally susceptible to civilization's diseases, but with much higher resistant powers than the old Hawaiian stock and visibly adding to its numbers.

While the women of Korea lead all other males and females of the islands in marrying within their own race, there are other groups which are a close second in this respect. Only 0.3 of one per cent of Japanese women contract out-marriages, or unions with men of other races, while 0.7 of one per cent of Japanese men so pick their mates. The percentage for the Chinese is 6 per cent for the women and 41.5 per cent for the men; American, 17.9 for the women and 51.7 for the men; Portuguese, 32.3 women, 13.0 men; Hawaiian, 40.5 women, 19.5 men.

Pure Stock Dies Fast.

The pure Hawaiian death rate is the highest in the islands, 13.48 per thousand annually, although the pure Hawaiian birth rate is nearly twice as high as American, British and other whites.

Scientists recognize that susceptibility to diseases of civilization is responsible for the disappearance of the pure Hawaiian race, but the figures just made public by Mr. Sullivan are the first to show that the intermarriage is rebuilding the old race into a stronger, more hardy people.

One Bullet Hits Two Deer.

Swanzey, N. H.—After Marshal Hill had fired at a large buck deer and had supposed he had missed, he learned he had killed two deer with a bullet which passed through the body of a buck and entered the head of a doe.

OWNS CLOCK OF GEN. PUTNAM

Wooden Timepiece of Colonial Period Placed in Masonic Temple at Honeoye Falls, N. Y.

Rochester.—A relic of the olden times in the shape of a "Grandfather's Clock" has been placed in the hall in Masonic temple in Honeoye Falls.

The clock is owned by Dr. Harry R. Marlette, and because of its history it is worthy of more than passing notice.

This affidavit, sworn to before a notary public, vouches for its history:

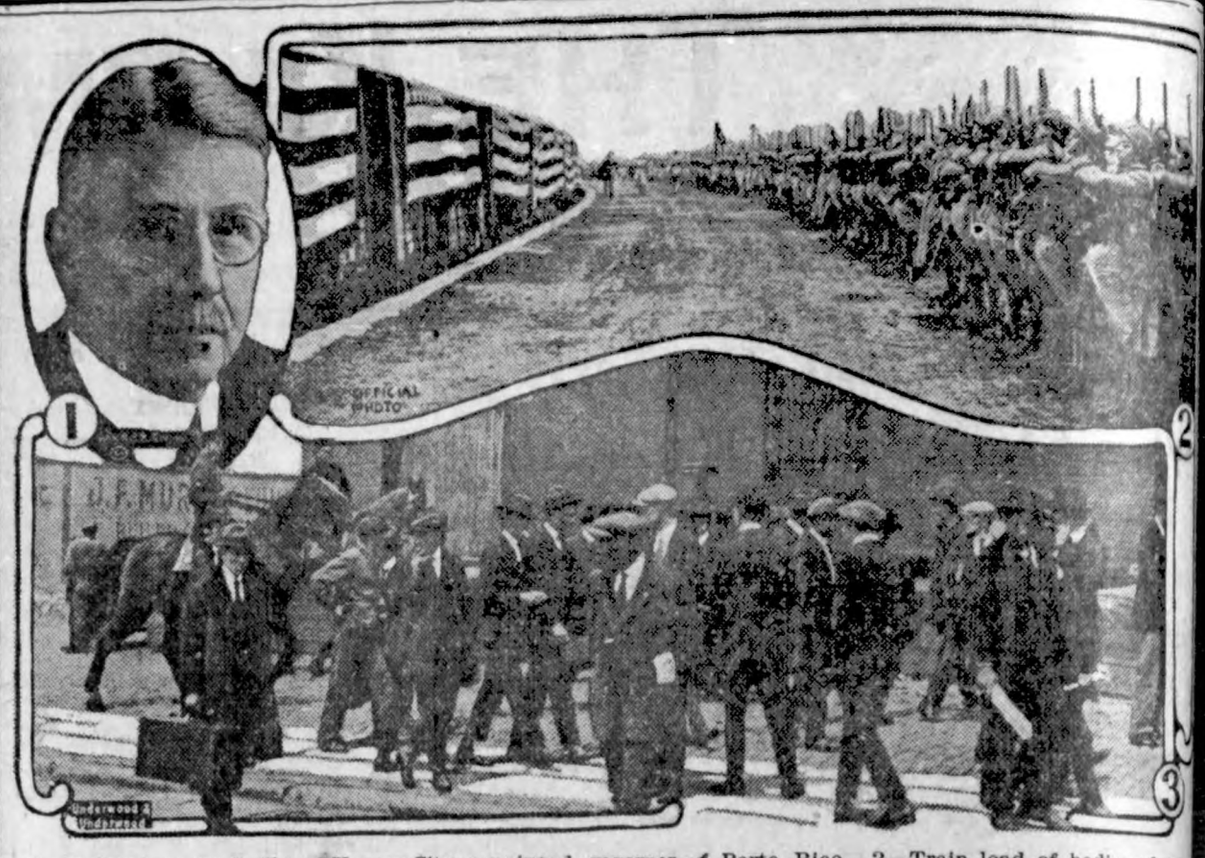
"This clock was made in England and was brought to this country by a man named Davis and was afterward sold by him to Israel Putnam, and at his death was handed down to his eldest son, Israel Putnam, Jr. (the famous general of the Revolutionary war).

"At his death it became the property of James S. Putnam. After his death I came into possession of it and it was sold by me to Dr. Harry R. Marlatte in August, 1920."

Could Not Get Central.

Castle, N. Y.—A country school teacher entered a business place one day and asked to use the telephone. A pencil sharpener was fastened to the shelf on which the telephone stood. She cranked the sharpener and took down the receiver. Getting no reply, she repeated it several times. Turning to the clerk, she said: "That's the reason I have never had a telephone installed in my house. You can't get service."

"Just turn the crank on the bell box. That was a pencil sharpener you were using," suggested the clerk.



1—E. Montgomery Reilly of Kansas City, appointed governor of Porto Rico. 2—Train load of bodies of American soldiers, exhumed from Sedan cemetery, saluted at Stenay by French regiment. 3—Police along New York waterfront scattering pickets of striking marine workers.

"Cold" Alchemy Hoax of Bacon

For 600 Years His Writings Have Been Studied in Hope of Finding Secret.

ONLY NONSENSICAL JARGON

Science Might Have Been Much Farther Advanced Today If Roger Bacon Had Not Hidden His Knowledge in Cipher.

Philadelphia, Pa.—Alchemists who for 600 years sought to find in Roger Bacon's cipher writings the secret of turning base metals into gold were the victims of a hoax, declared William Romaine Newbold, professor of intellectual and moral philosophy at the University of Pennsylvania, before the general meeting of the American Philosophical society here.

Bacon, he contended, hid under a nonsensical jargon of alchemists' terms a marvelous storehouse of scientific knowledge.

Doctor Newbold told of his two years' labor to decipher the code Bacon used.

As a result of the revelations made by the 800,000 word manuscript, scientists have declared Bacon had remarkable knowledge of mathematical systems conceived today, and had not the discoveries made by him remained unknown to others until rediscovered hundreds of years after his death, science would have been just so much in advance of its present state.

Explanation of the Cipher.

"Bacon conceived the idea of expressing every letter of a word which he wanted to write in cipher by a syllable and building the syllable into a new word," he said. "For example, if the letter 'C' is represented by 'GR,' 'A' by 'AD,' and 'E' by 'ED' the word 'Graded' would spell 'Cat.'

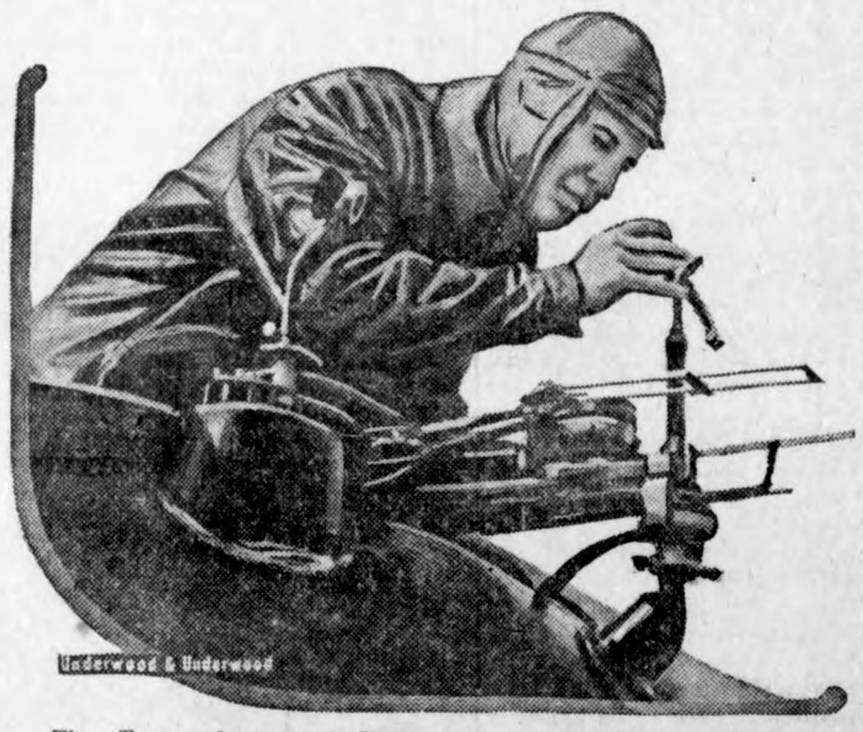
"The principle cannot be used in this way because, first, every word will be represented in cipher by twice as many letters, and second, no words can be used in cipher except those of an even number of letters. To meet these difficulties Bacon lays down the rule that successive syllables must end and begin with the same letters, doubled letters being dropped. Thus 'Cat' may be spelled in the Bacon cipher as follows: 'Go-ol-ld'; dropping the double letters, one gets the word 'Gold.'

No Wonder Secret Was Kept.

"In reading the cipher you double every letter except the first and last and thus discover the syllables which spell the word. But it is seldom possible to find syllables which fulfill these conditions and yet spell a new word when arranged in the order of letters of the original word like 'cat,' for example. 'Cat' may also be spelled 'ar-rk-da,' and the syllables may be rearranged into the word 'dark,' but when 'dark' is translated the word 'cat' will reappear as 'tea,' the order of the letters being disarranged. These are the principles Bacon used.

There are 484 possible combinations of the letters of two 22-letter alphabets, taken two by two. Bacon makes every one of the 484 represent a letter of his alphabet and with them spells his words in Latin in the way indicated above. He disarranges the underlying text as little as possible and it usually is still recognizable, but frequently it is disarranged so much that scholars probably never will agree as to how it should be reconstructed."

Getting Ready for Bombing Tests



The officers and men at the U. S. naval air station, Rockaway Point, Long Island, are busy these days preparing themselves and their equipment for the big test next June, which they hope will prove the airplane more destructive than the battleship. The illustration shows an aviator adjusting the bombing sight on a plane.

Pressed Boy's Trousers While They Were on Him

Tony Volpona, twenty-two years old, a tailor of Covington, Ky., was fined $50 and costs by Judge Munson on a charge of assault and disorderly conduct preferred by the mother of Howard Barber, twelve years old. The testimony showed that the boy entered Volpona's place of business and asked to have his trousers pressed.

Volpona said he caught the boy and laid him across the ironing board and proceeded to use the iron, which was warmer than he thought, causing the boy to cry with pain. In passing sentence, Jude Munson said he felt sure there was nothing malicious in the conduct of the tailor but that he was careless. The case has been appealed.

Regard righteousness as gain.

Women Ignore Sheik

Go on Stage in Defiance of Order of Vicar of Sultan.

Turkish Women Find New Freedom as Result of Conditions Following the World War.

Constantinople.—The command of the Sheik-ul-Islam, vicar of the sultan, ordering Turkish women not to appear on the stage, is being ignored by them. The German-Austrian and allies' occupations of the city, with the loss of husbands, fathers and brothers, and the press of poverty, has brought a new freedom to Turkish women. This is daily seen by their clothing. They wear their veils still, instead of a hat, but turned back and tied in a pretty knot, after the manner of their Russian refugee sisters.

Because of the high price of cloth, Turkish women no longer wear a multitude of garments, designed in old time to hide the outlines of their figures. Both veil and dresses are a deep sea blue, instead of the dull conventional black once the custom. Some affect the homespun brown dress, the becoming garment designed by Halide Hanum, the nationalist woman leader.

These changes have dissipated the mystery which once enveloped the Turkish woman and Americans here find that she does not differ in looks very much from others. On an average, they are not so good-looking as the American women. The difference may be said to lie in their timidity. Even this quality is dissipated quickly when they come in contact with foreigners, as is the case in the mixed receptions given at the Constantinople college for girls, maintained here by Americans. At such receptions the Turkish girls and women talk brightly and cleverly with American naval officers and other guests.

NEWS REVIEW OF CURRENT EVENTS

Germany, With a New Ministry, Accepts Allies' Ultimatum Unconditionally.

FRANCE IS STILL SKEPTICAL

Poles and German Civilians Fighting in Upper Silesia—Senate Passes Emergency Tariff Bill—House Insists on Small Army—Slacker Lists Given Out.

By EDWARD W. PICKARD.

Germany has surrendered again. Unconditionally and completely, she has accepted the demands of the allies, supreme council, and has promised to carry out the terms of the ultimatum without delay.

There had been little doubt of this result, but the trouble was to find a cabinet that would assume the responsibility and perhaps odium of yielding to the inevitable. After several leaders had declined the job, Dr. Wirth, minister of finance in the Fehrenbach cabinet and leader of the Centrist party, agreed to become chancellor and foreign minister, selected the rest of the cabinet and had it acquiesce in the demands of the allies. Then he went before the reichstag and said, among other things:

"There is no possibility for us other than acceptance or rejection. The victors have decided. Acceptance means that we declare our readiness to bear in voluntary labor the heavy financial burdens demanded year by year. Refusal would, however, mean surrendering the basis of our entire industrial activities, and, as a consequence, dismemberment of our economic body, already so greatly weakened, and the shackling of our entire industrial life."

Thereupon the reichstag, by the rather small majority of 221 to 175, voted to accept the ultimatum. The German government's reply to the ultimatum was telegraphed at once to Premier Lloyd George, who wired it to all the governments concerned. He then announced it to the house of commons, which received the news with cheers. In France satisfaction over the surrender of Germany was lessened by the smallness of the majority vote in the reichstag and the feeling that the Wirth ministry cannot last long. The French are still skeptical of Berlin's good faith, and propose to maintain their forces on the Rhine at sufficient strength to occupy the Ruhr until it becomes evident that Germany will carry out the terms of the ultimatum.

Dr. Wirth's reply commits the Germans absolutely to this course. In it he said:

"The German government is fully resolved, first, to carry out without reserve or condition its obligations as defined by the reparations commission.

"Second, to accept and carry out without reserve or condition the guarantees in respect of those obligations prescribed by the reparations commission.

"Third, to carry out without reserve or delay the measures of military, naval and aerial disarmament notified to the German government by the allied powers in their note of January 29, 1921, those overdue to be completed at once and the remainder by the prescribed date.

"Fourth, to carry out without reserve or delay the trial of war criminals and to execute the other unfulfilled portions of the treaty referred to in the first paragraph of the note of the allied governments of May 5."

The chief stumbling block, hitherto, in the process of disarmament of Germany has been the determination of Bavaria to maintain its civil-military organization. It is understood now the Bavarian authorities have promised that that body shall be disbanded immediately, though another report has it that Bavaria is to negotiate directly with France concerning civilian guards, offering to place these under the control of French authorities.

As for the reparations, Germany can pay, and she will pay if she is compelled to pay. But if there is any way of wriggling out of paying, Germany may be depended on to try it. Only ill informed sentimentalists now take any stock in the German wails of poverty and threatened bankruptcy; and mighty few people have any remaining confidence in German good faith.

Before the end of May, it is believed, the allied supreme council will meet again, either in Belgium or Italy, to discuss the modalities for securing the reparations payments and to take up the problems of Upper Silesia. At that session of the council the United States will be represented, probably by Ambassador Harvey, who has arrived in England with promises of the close co-operation of this country in the task of readjusting the affairs of Europe so far as they affect America, at least. This is in accord with the policy adopted by President Harding, a policy which probably will not be changed by the attacks on it already being made by certain elements in the senate. The fight in that body was opened by La Follette of Wisconsin, who introduced a resolution declaring it to be the sense of the senate that the United States should take no part in European affairs under the Versailles treaty, denouncing the pact and pointing out that it has been repudiated by the senate and the American people.

Ambassador Wallace in Paris last week resumed his place in the ambassadors' council, which is trying to settle the Upper Silesia embroglio; and Roland Boyden again took his old place on the reparations commission, under instructions from Washington.

At this writing the situation in Upper Silesia appears more serious than ever, despite reports of an armistice and statements by Korfanty, leader of the Polish insurgents, that an agreement with the allies had been reached. The Germans in the region and near by, forbidden by the French to make actual war on the Poles, are making full use of their armed civilian forces there and are reported to have defeated the Poles in the Cosel district, east of the Oder river. At Ratibor and Rosenberg, also, there was severe fighting. The Poles were using heavy artillery and other guns they had captured from the Italian plebiscite force, and the Germans had batteries provided by the Italians for defensive use. It was fairly evident that the French were at least tacitly supporting the Poles, and there was reason to believe that if the British and Italians could restrain the German civilian forces a temporary truce could be arranged pending the settlement of the entire controversy by the supreme council or the League of Nations. The Poles feel they have been "double crossed" by the allies, about Teschen, about the Ukraine, about Danzig, and now about Upper Silesia; and their patience was exhausted. Those who are informed concerning the treatment Poland has received are inclined to sympathize with her in this instance. Others look on her action at this time as another example of the impetuous and unruly behavior that has been characteristic of Poland in the past.

The allies are about to emphasize their aloofness from the struggle between the Greeks and the Turkish Nationalists in Asia Minor. Dispatches from Constantinople say the allied high commissioners, generals and admirals there have decided to proclaim the neutrality of that city and of the Bosporus and the Dardanelles while the warfare between the Greeks and Turks continues. Greece will be asked to remove her warships from territorial waters and will not longer be able to use the city as a base. Her forces on the Brusa and Ismid fronts must be supplied by way of Rodosto.

The difficulty in understanding the situation in the Near East is illustrated by the news that the Russian soviet authorities, who were supposed to be supporting Kemal Pasha, leader of the Turkish Nationalists, have been plotting against him with the object of establishing a soviet republic in Angora. The scheme was uncovered in time and many arrests of Bolsheviki were made.

By a vote of 63 to 28 the senate last week passed the emergency tariff bill. Only one Republican—Moses of New Hampshire—stood fast with the opposition, and seven Democrats were found with the majority. The senate and house conferees at once began their efforts to reach agreement, the only radical difference being over the anti-dumping and currency revaluation sections, which were rewritten by the senate committee, which also made provision for continuing the war time restrictions on imports of dyestuffs.

The house passed the army appropriation bill, but it refused to recede from its determination to make the army small. The measure provides for an army of only 150,000 men, and an amendment was adopted which authorizes the secretary of war to discharge enlisted men upon their application until that limit has been reached. It is likely there will be a prolonged contest with the senate over the size of the army, and possibly a veto by the President if the house wins.

President Harding has fixed things so the administration can to a certain extent use its judgment in appointing postmasters. He has issued an order affecting about 13,000 postoffices of the first, second and third classes, authorizing the selection of any one of the first three applicants on the eligible list as determined by open competitive examinations. Under an order by President Wilson the one at the head of the list had to be appointed. President Harding said the new arrangement was made to permit business training and experience to be considered, and so that the choice would not be based merely on "a cloistered scholastic examination which might result in a high grade in theory, but not a guaranty of efficiency in fact."

Publication of the slacker lists has been begun in various parts of the country, but some newspapers also have discontinued it because they found the lists as supplied by the war department were woefully faulty, including the names of many men who served their country patriotically in the war. Such names, according to a ruling of the department, will be removed from the lists without authorization of the department after the injured persons have presented their cases at Washington.

As for the most offensive of all the slackers, G. C. Bergdoll, the war department intends to keep after him unremittingly until it brings him back from Germany and punishes him. Such is the statement of General March, chief of staff, to the senate committee investigating the escape of the draft dodger. The inquiry, which has brought out many acrimonious accusations, seems to be narrowing down so that the blame for the escape of Bergdoll will be placed on Chief Gibboney, one of the slacker's attorneys, since dead, and the two sergeants from whose custody Bergdoll got away.

Another crisis drew near in the British coal strike last week. The transport workers decided that foreign coal should be unloaded in the United Kingdom, promising aid in this to the miners and taking up the matter with the railway workers. The government was determined that the entry of foreign coal for vital purposes should not be prevented, and began concentrating soldiers and sailors in the areas where trouble might be expected. Robert Williams, leader of the transport workers, said: "The embargo will be maintained even if disease results. The remedy is to stop the importation of coal."

According to foreign correspondents the British government has offered the Sinn Fein leaders a new proposition which the latter are willing to accept. Ireland is to have all the rights possessed by any self-governing member of the empire, including full fiscal autonomy and control of its judiciary and police, and the annual tribute of £18,000,000 will be abandoned. Arrangements for defense by the army and navy are open for discussion. A condition of the offer is that both north and south Ireland must accept it as a final settlement and must work together for a united Ireland.

Rev. A. E. Buriff was a busines caller to Garner yesterday morning.

Howard Forristahl was up from Belmond on business yesterday.

Dave Pierce. of Belmond was in this city yesterday on business.

John Larsens are entertaining company from Webster City, Ia. this week.

Mr. and Mrs. Hod Lawhorn drove over from Garner Wednesday evening.

Mr. and Mrs. Edwin Josten drove over to West Lake Sunday to spend Sunday.

Elmer Larsen of Sioux Rapids, Ia. came the other day to begin work for Clarence Arnold.

Dr. C. B. Tice and family of Mason City were visiting Klemme relatives and friends Decoration Day.

The sewer gang left last week for Pulmby, Iowa, where they began a sewer job.

Just tell the telephone operator 1—2 and then tell the news to us. The Klemme Times.

M. O. Hocum and Marlin Croner went to Chicago Saturday night on matters pertaining to business.

Mrs. Alex Kirkwood went to Crystal Lake yesterday afternoon for a visit with her brother and family.

Dick Baumann and family of Garner were visitors at the home of Mrs. H. Schuldt on Decoration Day.

Miss Bertha Bettin, of Charles City, came Saturday for a visit with her cousin, Miss Minnie Lenz, and other Klemme relatives until today.

Miss Pearl Anderson, of Eagle Grove, Iowa, came Saturday for an over Sunday visit at the R. A. Jorgenson home.

Mrs. Sam Kirkwood came up from Belmond Decoration Day to spend the day visiting with Klemme relatives and friends.

Mr. and Mrs. Gus Baack went to Rochester, Minn., last Thursday, returning to Klemme yesterday afternoon.

Mr. and Mrs. Will Barz and their daughter, Norma, and Mr. and Mrs. J. R. Fleenor, of Garner, drove to Klemme last evening for a visit with relatives and friends.

Mrs. Thor. Christensen, formerly Miss Emma Lauritzen, went to Jewell, Iowa, last Thursday for a visit with relatives and friends. Mr. Christensen went down there today.

Ed Kahrs the druggist has installed a new pop corn and peanut roaster in his place of business. The machine is the very latest and makes nice pop corn while you wait.

Mr. and Mrs. Wm. Keraus and children, and Mr. and Mrs. C. G. Waterman went to Swea City Sunday for a visit over Memorial with Mr. and Mrs. T. F. Mitchell.

The State Savings Bank have improved the looks of their grounds on the west side of the building by geting it graded up and leveled off and then have started a lawn. It will make the property real attractive.

Mrs. A. H. Meyer and niece and nephew, Frances and Willard Huer, went to Dows Monday for a visit. The children had been here a week or more visiting with Rev. and Mrs. Meyer.

Roxanna and Homer Schaper left for Pearl City, Illinois last Friday. They met their mother at Iowa Falls and she accompanied them the rest of the way. They plan to make their home at Pearl City.

Many Klemme people drove over to Clear Lak Sunday to watch the men drag the lake for the bodies of Bob Abel and Gus Magnusen of Garner. The bodies were found about five o'clock. They had started to float.

Mr. Michael McElligott, of Evanston, Illinois, came Tuesday to look over the sewer job here and to make settlement with the city council. He is the man who had the contract for the work which was supervised by his son, Thos. McElligott.

Paul Griesemer and Preacher Meyer went fishing the other day but we did not hear of any fish missing from the lake since they were there. However, Paul still tells about a great big black bass that was so big it broke his line. Of course Rev. Meyer does not say much—because a preacher don't know how to lie.

The Rock Island passenger from the south was considerable late last Saturday, in fact it did not arrive in Klemme until Sunday afternoon. The tender on the engine hopped off the rails near Rowan. The freight northbound was also held up and tagged the passenger into Klemme Sunday afternoon. We did not find out how the passenger south bound Saturday evening made the trip but presume they had to detour over some other line to Iowa Falls.

The little park near the depot set off with a cement frame containing the word "Klemme" evidently gave butter-maker A. D. Gimer of the Klemme Creamery a bright idea. Art carried out a like idea in front of the creamery and has the word "CREAMERY" set in an oblong space of sand in front of the creamery lettered with white stones. The design looks very nice and Art is to be complimented for the beauty the sign presents.

Good News For The Men

G. P. McCullough has installed the new

Number System

in his Barber Shop during the hot weather. Simply go in and get your number which

Holds Your Turn

and you can then go out and do your trading, talk to your neighbors or stroll around the city. No long waits for you in this shop.

G. P. McCullough

What This Oil Stove Will Save YOU

Here is an oil stove that will save you failure and disappointments in your cooking and baking. It will save the dirt and bother of a coal or wood stove and the shortcomings of the ordinary oil stove. Moreover, it will save at least one-third of the usual fuel expense.

The stove that will save all this for you is the famous Red Star, Detroit Vapor Oil Stove--the all-the-year 'round oil stove that looks and works like a city gas range.

No other oil stove is like this one. It is an entirely new-type of wickless burner which generates its own gas from kerosene, gasoline or distillate---giving you 19 hours of intense, perfect heat from each gallon of fuel.

And no other stove can be like the Red Star. For this scientific burner is patented---can be used on this stove only.

You can fry, roast, boil or bake anything on the

RED STAR
Detroit Vapor Oil Stove

in less time, with less expense and with more certain results. For example, you can roast a three and one half pound chicken in 70 minutes. Layer cake is baked perfectly in 25 minutes. Toast is beautifully browned in 8 minutes. Delicious flaky, biscuits are made in 12 minutes.

Think what a joy this stove will be for you! There is only one way to realize what a great improvement the Red Star is. That is, to come in and see for yourself. We will explain it to you, show you how easy it is to operate and prove to you that this is the most perfect stove on the market. Come in and see it now --- before you forget it.

E TRIALS OF A HOUSEWIFE

They Have Been Endured and How Overcome by Lydia E. Pinkham's Vegetable Compound

Experience of a Providence Woman

Providence, R. I.—"I took Lydia E. Pinkham's Vegetable Compound for a female trouble and backache. It began just after my baby was born, and I did the best I could about getting my work done, but I had awful bearing-down pains so I could not stand on my feet. I read in the papers about Lydia E. Pinkham's Vegetable Compound and the good it was doing other women, and I have got dandy results from it and will always recommend it. You can use these facts as a testimonial if you wish."—Mrs. HERBERT L. CASSEN, 18 Meni Court, Providence, R. I.

Ohio woman for three years could hardly keep about and do her housework she was so ill. Made well by Lydia E. Pinkham's Vegetable Compound:

Fayette, O.—"For about three years I was very nervous and had backache, sideache, dragging-down pains, could not sleep at night, and had no appe-

At times I could hardly do my housework. I got medicine from the but it did not help me. I saw Lydia E. Pinkham's Vegetable Compound ised in a newspaper and took it with good results, and am now able to housework. I recommend your medicine to my friends and you may my testimonial."—Mrs. CHESTER A. BALL, R. 15, Fayette, Ohio.

Illinois woman relates her experience:

omington, Ill.—"I was never very strong and female trouble kept me ak I had no interest in my housework. I had such a backache I could ok a meal or sweep a room without raging with pain. Rubbing my with alcohol sometimes eased the pain for a few hours, but did not stop eard of Lydia E. Pinkham's Vegetable Compound, and six bottles of it made me as strong and healthy as any woman; and I give my thanks to my health."—Mrs. J. A. McQUITTY, 610 W. Walnut St., Bloomington, Ill.

conditions described by Mrs. Cassen, Mrs. Ball, and Mrs. McQuitty will l to many women who struggle on with their daily tasks in just such con- s—in fact, it is said that the tragedy in the lives of some women is almost d belief. Day in and day out they slave in their homes for their families beside the daily routine of housework, often make clothes for them- and for their children, or work in their gardens, all the while suffering those awful bearing-down pains, backache, headaches, nervousness, the , and troubles which sap the very foundation of life until there comes a when nature gives out and an operation seems inevitable. If such n would only profit by the experience of these three women, and remem- hat Lydia E. Pinkham's Vegetable Compound is the natural restorative uch conditions it may save them years of suffering and unhappiness.

ere is hardly a neighborhood in any town or hamlet in the United States ein some woman does not reside who has been restored to health by this us medicine. Therefore ask your neighbor, and you will find in a great y cases that at some time or other she, too, has been benefited by taking it, will recommend it to you. For more than forty years this old-fashioned root herb medicine has been restoring suffering women to health and strength.

ydia E. Pinkham's Private Text-Book upon "Ailments Pecu- to Women" will be sent to you free upon request. Write The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. s book contains valuable information.

HOME TOWN HELPS

TREES GIVEN EXPERT CARE

Body of Public-Spirited Los Angeles Men Recognizes the Importance of the Work.

Recognizing that the average citizen, or average laboring man, knows little or nothing about moving trees, a group of Los Angeles men have organized a company which has for its purpose the transplanting of trees, and the removal of trees and stumps about the city.

The tree and stump company is a decidedly mobile organization. Its men travel in automobiles, carrying their tools and tree-moving machinery in trailers behind the cars. Thus equipped they are prepared to go quickly to any location about the city wherever their services are required.

The mechanical appliances of tree transplanting, and tree and stump removal, are few and simple. There is an abundance of block-and-tackle equipment for the handling of large, heavy trees, and a compact windlass of special design is used for pulling trees out by the roots.

When a tree is merely to be removed, a stream of water played from a hose is used to dislodge the earth from the roots. If the tree has to be moved any great distance, heavy wire netting is wrapped about the roots to hold the earth intact. This is then re-enforced with rope, and the tree is jacked onto roller dollies for transportation. At its new location the wire netting is removed, and blocks and tackle are used to hoist it into position.—John Edwin Hogg in Popular Mechanics Magazine.

NEWCOMERS WANT TO KNOW

Questions Intending Residents Will Ask Before They Decide on Locating In Any Town.

Questions that people ask about your town before they decide to make it their town:

Attractiveness: Shall I like the town—its "atmosphere?" Does it have the beauty of shaded streets and other beautiful features? Is it a quiet, roomy, airy, well-lighted town? Does it have attractive public buildings and homes? Is it well paved? Is it clean in every sense?

Healthfulness: Will my family and I have a reasonable chance to keep well in that town? How about its water supply? Its sanitary system? Its methods of milk inspection? Its health department? Its hospitals? Is it without any congested district?

Education: Can I educate my family and myself in that town? How about its public schools—present and future? Its institutions of higher education or of business training? Its libraries? Its lecture and concert courses? Its newspapers? Its postal facilities?

People: Shall I like the people of the town? Are they "home folks" without false exclusiveness? Are they neighborly and friendly? Is the town free from factionalism?

Recreation: Can I have a good time in that town—I and my family? How about the theaters, museums, gymnasiums, parks, etc.? Are inviting opportunities for pleasure drives afforded by well paved streets?—L. N. Flint, Department of Journalism, University of Kansas.

Railroads to Plant Trees.

A tree planting campaign will be started all along the Rock Island lines, the American Forestry association announces. The plans as worked out include tree planting suggestions and beautification plans for the stations and the homes of the employees of that railroad. The Rock Island Magazine, the association says, will announce the outline of the work in the next issue of that publication which goes to all its workers. "This is one of the most constructive programs yet presented," said Charles Lathrop Pack, president of the American Forestry association. "The plans hook up with our educational campaign for studying trees now being introduced in the schools through our national referendum for the choice of a tree most typical of America. The association will send free tree-planting instructions to any who ask."

For Memorial Parks.

Members of Company C, 104th Engineers, are planning a memorial tree planting in Stacy Park, Trenton, New Jersey. A tablet is to be erected in the center of a cluster of six oak trees, to be planted to mark the memory of the six Trenton members of the organization who were killed in action, says the American Forestry Magazine. Another planting of 180 oak trees along the Lincoln highway is also arranged for, to perpetuate the memory of the 180 soldiers of Trenton and Mercer County, who died in the war. The American Forestry Association is registering all memorial trees in a national honor roll.

Had Done That.

"I'm not quite sure about your washing machine. Will you demonstrate it again?"

"No, madam. We only do one week's washing."—Louisville Courier-Journal.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

LACKING IN WILLIE'S MAKEUP

Really Not Small Boy's Fault That He Was Unable to Comply With Mother's Advice.

Senator McCumber, chairman of the senate finance committte, was discussing those exposures of terrific profiteering on the part of dollar-a-year patriots.

"We must not be too hard on these misguided men," he said with a wink. "They occupied positions of great temptation, you know. It is easier to sermonize about temptation than to resist it.

"These weak, culpable and yet well-meaning men remind me of little Willie.

"Little Willie stole a quarter one day out of his mother's pocketbook. His mother detected the theft and trounced him severely. Then she preached him a long sermon concluding with:

"It's all a matter of resisting temptation. Always, always turn a deaf ear to temptation, son."

"Little Willie stopped his sobbing long enough to say:

"'But, mom, I ain't got no deaf ear.'"

The fire of genius is often unable to make the pot boil.

KNEW THE WORD OF COMMAND

Old Lady Quick to Recognize Phrase That She Had Heard Used by Her Willie.

Military terminology has affixed itself to our language. Recent advertisements of a new dictionary use such phrases as "cheerio," "how is your morale?" and "the zero hour." And only last week the papers spoke of a "barrage of coughing," which drowned out a lecture speaker in Brooklyn.

In City Hall park recently another instance was noted. A young man halted at a newsstand. "Times," said he. Then, as the "newsie"—an old woman of sixty—stooped to get it, "As you were! World!"

The old woman, as she handed him the paper, clicked her heels together and delivered a perfect hand salute.

"My Willie was in the army, too," she explained.—New York World.

Wisdom of Children.

Paul, a small boy, had been invited to a golden wedding party. After learning that golden wedding meant married fifty years he inquired whether everybody had to get married again after they had been married fifty years.

His sister, wise in worldly affairs, said. "Few ever wait that long."

Hot Springs Waters Wonderfully Successful in the Treatment of Rheumatism

THE peculiar properties of the waters of the Hot Springs of Arkansas are due to radio activity, found in them to an exceptionally marked degree, and their equal has never been known in the treatment of rheumatism and all uric acid troubles. These springs are owned and controlled by the U. S. Government.

The cost of living at Hot Springs may be regulated to suit any purse, accommodations varying from moderate priced boarding houses, up to the most fashionable hostelries.

News For The Farmer

LEAD ARSENATE SAVES VINES

Kills Bugs Which Eat Up Cucumber and Melon Leaves

Striped beetles which devour the leaves from cucumbers and melons as soon as these vines get started can be killed by applications of lead arsenate, says C. L. Fitch, vegetable expert at Iowa State College.

At the first appearance of these bugs apply powdered lead arsenate at the rate of one ounce to one gallon of water to both the upper and lower sides of leaves. If the bugs are very bad apply powder. either lead arsenate or tobacco dust, on the ground around the vines as the bugs often stay in the ground. They do not like powder.

If lice appear on the leaves apply a 1-1000 solution of "Black leaf-40" mixed with enough soap to make the solution have soap suds.

There is only one disease of vines that is uncontrollable. This is called mosiac disease and so far no method of checking it has been found.

LOOK FOR THESE IN CULLING

Laying Hens and Non-Layers Easily Separated in Flock

Culling in Iowa flocks can be easily done, says H. A. Bittenbender, in charge of poultry work at Iowa State College, if the following things are looked for in the farm hens.

1. Have a bright red fine textured pliable comb.
2. Are wide between the points of the pubic bones and have thin and pliable bones.
3. Are soft, loose and pliable in the abdominal regions.
4. Are energetic in search for food and consume large quantities.
5. Are first to leave the roosts in the morning and last in the evening.
6. Go to roost with full crops if it is possible to get the food.

Non-layers have none of these qualities and are easily detected by their lazy appearance around the barn yard.

FREE LIME FOR FARMERS

Company Offers Limestone To Be Used in Demonstrations

Thru the efforts of the extension department of Iowa State College, Iowa farmers who want to test an acre of land with lime can get the limestone thru Harry B. Warner. the soils specialist with the department. Mr. Warner has arranged with the Linwood Stone and Cement Co. of Davenport, to furnish limestone to any farmer who wants it for demonstration purposes if he or the farm bureau will pay the freight. The company will furnish three to five tons to each farmer. Farmers are asked to report to the extension department who use the lime under this offer.

"This offer," says Mr. Warner, will only be available until August 1 and farmers will see the advantage of getting together and using a carload of the ground stone. The company expects to send a carload into each county and more if necessary.

"Iowa farmers are learning the value of the use of lime and such an offer will give many a chance to improve a small portion of the farm."

TIME TO SPRAY AGAIN

Apply Codling Moth Spray After June First

Sprays for the prevention of the attacks of codling moths and apple scab should be applied between June 1 and June 15 to get the best results according to W. J. Kocken, horticulturist with the extension department at Iowa State College.

This spray need only be applied to trees with fruit, since it is designed to protect the fruit against the invasion of the first brood of codling moths.

Use 4 and 1-2 quarts of lime sulfur to 50 gallons of water and add 1 pound of lead arsenate which will prevent the attack of side worms.

Apples will be a valuable crop this season due to the frost injury early in the season and it will pay any farmers to take the extra pains to insure a good quality of fruit.

FEED CALVES SKIM MILK

Cheap Product and Makes Good Gains in the Spring Calves

Liberal feedings of skim milk to calves over three weeks old will pay any Iowa farmer, says A. C. McCandlish in charge of dairy husbandry at Iowa State College.

Twelve to sixteen pounds of skim milk is the amount to start off with but care should be taken to gradually make the change from whole milk to skim milk. Sixteen to eighteen pounds per day is a good full feed ration.

This feeding should be kept up until the calves reach the age of seven months. Extra amounts of skim milk given the calves will more than repay the farmer since it is a cheap product and keep the calves in a thriving condition.

Where market milk is sold and the skim milk is scarce a very good feed can be made from a mixture of equal parts of hominy or very fine corn meal, old process linseed oilmeal, red-dog flour and dried blood. One pound of this mixture in eight parts of water will be suitable for a calf six weeks old, and it can be increased as the calf demands.

Heifers that are well fed from the time of birth until they reach the producing age will yield more butter fat and milk than when they are poorly fed. Plenty of care during the summer months and clean pastures to run in will get them in fine shape by fall.

CORRESPONDENCE

TWIN LAKES AND AVERY NEWS

—Special to the Times.

Miss Estelle Murphy of Belmond visited at the Lloyd Brugman home last week.

Mrs. Lee Lewis' visited her husband at the Hampton Hospital Monday.

Mr. and Mrs. Hemenway of Mason City were over Sunday visitors at the home of their daughter, Mrs. M. Kearney.

Mrs. Mart Gailbraith and children visited friends here Monday and also attended the Memorial Services.

Mr. and Mrs. Wareham and their daughter of Williams, Iowa, spent Sunday at the Ed. Hemenway home.

Mrs. Wm. Allaben of Goodell is spending a few days at the Jay Buchanan home.

Mrs. Eli Hetland is enjoying a visit from her father and sister of Story City.

LIBERTY TOWNSHIP NEWS

—Special to the Times.

Milton Schaper made a trip to the city of Britt last Sunday with his Ford. We also have evidence that he had good reasons for going there. At least, we presume he thinks so.

The storm that swept over the country last Thursday did considerable damage. Some of the wrecks it left in this locality are Will Nuehring's barn and wind-mill. Ben Greiman's barn and the wind mills on the places of the following: Lou Griffen, H. C. Beier, John Lemke, and John Tanner. Most every place around shows traces of the storm by huge trees that have been broken off or torn out, also buildings that have been partly wrecked and hay stacks that have been tipped over, and wind mill wheels that have been partly blown off.

Will Ridder of Waterloo was here the fore part of the week visiting relatives and friends. He drove over with a Franklin car.

L. H. Suckow made a trip to Forest City last Sunday morning to take Rev. W. J. Suckow there where he holds the pastorate of a church.

Paul Stille, Louie Suckow, Lloyd Ulrich. Jimmie Wade, Orvel Bridges and Carl Carlson went to the Twin Sisters Lakes last Tuesday to try their luck at fishing. Needless to say they relieved the lake of some of its inhabitants.

A farmers meeting is planned for this Thursday evening to be held in the Liberty township center school house.

—Special to the Times.

Miss Edna Goll is on the sick list this week.

There were several trees blown down in this vicinity by the storm last Thursday.

Ila Dutton visited at the home of Mr. and Mrs. Sylvan Johnson last Sunday.

Ben Coobs was seen in this vicinity last Sunday afternoon. He was visiting relatives in Klemme.

Miss Gail Buss visited at the home of G. A. Goll's a few days last week.

FOR SALE— Good registered Short Horn Bull, at the right price if taken soon. U. G. Smid. J-2tf

Important Notice To Famers

ORDER YOUR

TWINE

NOW

Please place your order for Plymouth Standard Twine the best twine made -- with us, Henry Lau and Sons. Your order must be in our posseasion not later than June 15th, 1921.

We will only order twine to the amount for which we will get orders up to that date, get your order in NOW. the sooner the better, the price is very low.

15c to 15¼c CASH

ral Services of N. L. Palmer Held Here Wednesday

d Resident Here Many Years

IDENT AND BUSINESS F KLEMME PASSED WAY MONDAY

almer, long time resident and business manager of rn Lumber Co. here, pass- unday following an attack ouble.

mmunity was shocked and when his death was an- unday evening.

mer has been closely as- n the upbuilding of this and has always taken an in boosting the town and . He was at one time the our city and for a number eld the office of town clerk tion he held until the time th. He was a good boost- town and community.

ng is the obituary as read . H. Meyer at the funeral eld yesterday afternoon at

L. Palmer was born at Sun Visconsin, March the 22nd, died at his home in Klem- on Sunday evening. June 921, at the age of 53 years, and 15 days. The cause th was heart failure.

lmer lost both of his par- his boyhood days and was in early life to look out for himself. He often re- hat he had run up against edges of the world in early Palmer was a good heart- kind and considerate to ev- e chanced to meet. A good fine business man, a loving a man that loved his home that lived there.

s united in marriage to Miss Kimball at Algona, Iowa, on r 21, 1897 and located at Iowa, where they lived and he respect of every one. Mr. took an active part in the nd business development of n. For a number of years member of the school board erved as town mayor nd also rk. He was one of the old- ess men of Klemme, being of th Northern Lumber Co. nected with this firm for a of years. He was esteemed usiness associates as a in- by the beautiful floral offer- their presence here today.

Palmer had been failing in or quite a number of years, times he suffered quite se- ut always rallied again. So was again afflicted on Thurs ing last no one thought that d pass away so soon.

aves to mourn his death, his fe, one brother, one sister, ts, two uncles, besides many latives and friends.

al services were conducted home lawn on Wednesday n and interment was made lgona cemetery.

ut of town relatives who at- the funeral services were:— s. Kimball, a brother of Mrs. from Delavan, Wisconsin, Elroy and Mrs. Noah of To- ansas, Mr. and Mrs. Ed. Mar- four sons and daughter-n- Burt, Iowa. Mr. Matt Palmer of Mr. N. L. Palmer, of Louis Montana, did not arrive in the services but came later. the above there were many from out of town.

Card of Thanks

wsh to thank al those who so assisted us in our recent be- ent; we also wish to thank se who contributed floral of- , those who furnished cars for neral and those who sang at vices.

N. L. Palmer and relatives.

n Congress is not in session s an emperative demand that and do something, and when session there is a loud hollar o quit talking and go home.

IS GREATTINGER OVER GOLD MINE?

There is a great excitement at Graettinger this week about the alleged discovery of gold on the Bernard Smith farm situated one mile east and one half mile west of Osgood. Mr. Smith owns a well improved quarter section just north of the point where Jack Creek crosses the Rock Island track. He is a thrifty upright German farmer and is not in the habit of exaggerating situation. One day while digging a post hole he noticed a peculiar looking gravel but he said nothing about it. Later in digging in other places, he observed the same kind of gravel. It resembled a formation he had seen in some minning district out west and he decided to bring some of it to Graettinger and have Mr. Weinholzer the jewelers, examine it. Mr. Weinholzer like most jewelers, did not have complete facilities to make the proper test and some indications that were yellow seemed rather flaky. However he sent a pound of the gravel to Thomas J. Dee & Company of Chicago, who are responsible assayists. The report on it showed $21.50 per ton gold and $5.12 per ton silver. Mr. Weinholzer has also sent samples for Mr. Smith to an assay office in Minneapolis and has shipped a small quanity of it to Ames. He is awaiting the resuls of further tests.

Of course there is no ore formations in Iowa that indicate gold values and no rivers or creeks in this section come from locations where there are gold ores. The Des Moines river rises in black soil in southern Minnesota and Jack Creek probably originates a short distance north of Emmet county. Every condition unfavorable for the alleged discovery but when reputable assayists say the gravel contains gold, as shown in there report of Thomas J. Dee & Company, Mr. Smith and Mr. Weinholzer are at least justified in asking for more thorough examination.

Mr. Smith is sinking a well and he went doun nine feet farther on Monday without getting through the kind of gravel he first discovered.

Brother John J. Sullivan of the Times was down from Graettinger Monday evening and he was kind enough to bring a sample of the gravel. We sincerely hope that Thos. J Dee & Company are not mistaken in their report and that Mr. Smith has a valuable proposition. M. L. Brown owns an adjoining farm.—Emmetsburg Democrat.

MODERN DRESS OF WOMEN DEFENDED BY HEALTH EXPERT

Women dress much more sensibly than men with their short skirts and low waists, L. J. Edmunds, executive secretary of the Iowa Tuberculosis Association, told 200 representatives of fourteen Iowa counties last week for the regional conference of social and civil workers.

"Women show intelligence in dress to a far greater degree than do men," he said. "Through exposing their necks they are hardening the neck tissues and getting them acc ustomed to sudden drafts. Short skirts are hygenic and with low necked waists are the best health preservatives I know of."

Break Up Broody Hens.

All broody hens which are not to be set should be broken up immediately, otherwise they will cut down your percentage of egg production. They should be taken off the nest the the very first night they are found there and shut up in a well ventilated broody coop which should have a wire or slatted bottom so that the air can circulate up through it.

Women Make Dress Forms

A total of 360 women of Worth county attended the dress form recently by Mrs. Knut Bjorka and Miss Hilma Paulson, under the auspices of the Farm Bureau. Fourteen demonstrations were held, one in each township and two at Northwood. Each township has selected a committee of local wemon to carry on the work. Up to this time more than 60 dress forms have been made.

START PEST SURVEY BUREAU

Iowa Included in U. S. Work To Schedule All Pests

A bureau for locating and keeping track of all insect pests that are found in Iowa, has been established in Iowa, with F. A. Fenton of the entomology department of the Iowa State College in charge.

This bureau, which is a branch of the Bureau of Entomolgy of the United States Department of Agriculture, will not and report attacks of pests and determine how wide the attack is and the areas affected. With each State reporting these attacts it will enable the U. S. department of agriculture to trace the areas and seasons of attacks and allow the government en tomologists to plan campaigns for their control in advance.

As many counties as possible will enrolled as sub. stations by Mr. Fenton5 so that Iowa will get the full benefit of this service. Many county agents have taken up this work and with many attacks of pests this spring much work has already been done in the survey work.

HOW FAST CAN YOU MAKE A BED

High School Girls Taught To Do It First Class in Five Minutes

Girls attending the Ames High School in Story county have this spring been learning to take care of their own rooms thru the home economics work. They first learned the tchnique of proper bed making, proper room cleaning and then were given a chance to do the practical work at home. Each girl had to make her bed in five minutes and do it according to the best methods. Some of hem were so adept that three minutes was sufficient. As a result of this training many mothers are getting considerable help at home and the girls are getting credit in hom economics at school for cleaning work.

This work is a part of the training given by th teachers training department of Iowa State College and provided for by the Smith-Hughes law.

LOYALTY

Loyalty is a favorite word in business. The employee is enjoined on every hand to be loyal to his employer's interest. And you expect the man you do business with to be loyal to his undertakings.

All this is as it should be. There can be no successful business without loyalty. The employer must be able to rely on his employee's faithfulness if he is going to produce. And unless the man you are doing business with can be relied on to fulfil his obligations, you can not hope to meet your own.

But loyalty has it's demnds, D. Artagnan served Cardinal Richelieu long and faithfully. When Cardinal Mazarin came into power. D'Artagnan, after a while became less enthusiastic in his service. Why Becuse where Richelieu ws open handed, Mazarin was parsimonious. The adventure's reward was illiberal. His interest was not sufficiently appealed to. And his employer's interest suffered.

The same principal that operated in the political intrigue of Dumas' stories of old France operates in modern business. The captain of industry who demands absolute loyalty of his men without giving a proper return finds his industry sufferng. The plan of something for nothing never has worked and never will work.

It is no otherwise in business relations. The manufacturer who wants permanent buyers must give value. And the printer who desires repeat orders will appeal not only to the loyalty of his custumers, but through the quality of his work to their interest.

Let us give service first . Then we may expect loyalty.

Jiggs Gets a Hair-cut

Frank Gruetzmacher had his dog Jiggs considerably remodeled this morning when he had Clark Bredbenner give him a "hair-cut" with a pair of horse clippers. Jiggs was a fine looking purp up until this morning when he lost all his fluffy cotton like hair. He looks like a sick jack rabbit now but Jiggs perhaps is quite willing to sacrifice beauty for comfort during the hot weather.

SPANKING THE PROUD AND RICH

Mr. Frank Crane says. "If you want prosperity abolish the income tax. Substitute for it a sales tax on all goods sold or any one of the other taxes that have been suggested."

Radical thought conceived in the income tax an instrument of punishment, to sober and chastize the Proud and Rich Politicians welcomed it as means of furthering their ambitions through an appeal to the "common people"—the rank and file of the voters. And what was more imporant to them, a opportunity to fatten the treasuries over which they held control.

The latter has been accomplished wih a startling sucess, but anyone who supposes that the proud and rich are bearig the burdens of the Income Tax mus possess a simple faith and a childlike trust in a truly remarkable degree.

The Proud and Rich calmly pass the buck. The poor pay at every turn.

And no fair minded man can find it in his heart to blame the Proud and Rich.

For the Income Tax is neither just nor right, and that which is neither just nor right cannot benifit the majority of the people over a period of time.

To fine the people for being successful and penalize efficiency is the Bolshevist's dream. If that is what we want to do in this country, if we wantto rob business of it's capital, of that which it must have to go on doing business, then we must not complain of poor business, lack of employment and high prices. For eventually where the ability to produce is impaired prices must necessarily advance.

You and I and all the rest of the Let-George-Do-It Club are allowing our politicians to say to the man with capital, "If you dare to invest your money in any enterprises, and should you in spite of the way in which we are trying to run things, become sucessful, we wll rob you of your gains."

"Very well", replies the man with money to invest, "I will sit tight I can invest my money in State and Municipal Securities and in other ways in which the returns may be smaller in gross, but greater in net, Because you will have no opportunity to confiscate them. I can afford to let business stagnate, if the rest of you can.

The rest of us cannot. We depend upon busness for our livelihood Undoubtedly this new administration is now planning relief. There is a good deal of genuine optimism. The Statesmen know what is to be done. But it won't do a bit of harm if the politician is made to realze beyond the shadow of a doubt that a sufficiently large number of intelligent voters in this country are keeping their eyes open, and are in no mood for further foolishness.

Mr. and Mrs. Paul Grange and little daughter came from Webstr City yesterday morning to attend the funeral of N. L. Palmer. Paul was employed with Mr. Palmer for quite a number of years at the lumber yard. He is now in the creamery and ice cream manufacture at Webster City with Mr. E. S. Uben as his partner. They are doing fine there.

NOTICE OF APPOINTMENT OF ADMINISTRATOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Administrator of the estate of Wilbur McGee, deceased. late of Hancock County, State of Iowa.

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowence.

Dated June 6, A. D., 1921.

W. H. MILLER,
Administrator.

William Whistler Attorney. J9-16-23

The war department is said to have bought a superfluous number of halters, but some of them will be needed to lead Congress around with.

Agents are beginning to come around from door to door, but even if you don't want their stuff it is worth the price to get rid of 'em.

Rebecca Lodge Organized Here Last Thursday Night

FIRST METHODIST EPISCOPAL CHURCH.

Preaching service Sunday morning at 10.o'clock. Sundayschool at 11. Union service in the park Sunday-night at 8,o'clock.

Liberty Twp. Sundayschool meets at 10:15. Preaching Services at 11. Epworth League Sundayschool at 8,o'clock, preaching service at the close of Epworth League.

Midweek prayer service each Thursday evening at 7,30.

A. H. Meyer, Pastor.

A Monster Funeral.

GARNER, June 6—The largest funeral in the annals of this community was held here yesterday on the court house grounds in honor of Gifford Olsen, a soldier boy whose body arrived from France Saturday morning. About 500 cars and some 3000 people showed the intense patriotism to this community with a military funeral for its expression.

The solid oak casket draped with an American flag containing the remains was carried from the Olsen home on an improvised caisson drawnby four fine horses, each atten ded by a member of the legion of whom there was 75 in uniforms. The Garner band began the service by playing "Nearer My God to Thee.'

Quartet Sings

The quartet, Messrs Charles and Elmer Martin, Carl Schneider and Floyd Fiero sang "Scatter the Flowers" and were accompanied by Harold Livermore. Rev. S. M. McConnell read the "soldiers psalm"—the 91st. Rev. A. W. Gauger and Rev. William Webb led in prayer.

Rev. A. W. Wiggins, pastor of the family gave a favored and patriotic address in a splendidly carrying voice from the words of Paul, the text, "I have fought a good fight, I have finished my course." Mr. Wiggins said "All life is a battle field and he who meets actual conditions bravely is a good soldier."

Gifford Olson was the first to enlist from Garner. He passed a perfect examination in music at Cedar Rapids, was assignd on April 28, 1917 as a cornetist to the 16th Regimental band which became a unit of the First Division. He sailed for France June 1, 1917. with a contingent from El Paso, Texas. He was in the battle of the Marne and in a number of others. On the 9th of July, 1918, Gifford received a gunshot in his knee and for this he was taken to the hospital at Vichy, in France. During October he underwent two operations for the wound. Late in the month he fell a victim to the flu which developed into pneumonia causing his death on November 7, or just four days before the armistice was signed. He was 24 years and 10 months of age at the time of his death.

The Olson family are grateful to the kind officers in the war department for the respect shown the body of their soldier boy and while it's arrival oppened their sorrow afresh, yet it brings them the satisfaction voiced by the moher when laying her hand on his casket she said. "Now I have my boy back."

Gifford was a fine young man, was a member of the Garner Band before enlisting in the army and was one of the best cornetists in the state and also made a fine record in the army as a musician. He is well known to many people in Klemme as he has played here many times.

Some sixty car loads accompanied the body to its resing place in Elmwood cemetery, at Mason City, where the American Legion payed him the highest military honors at the grave.

One For Edison

If it takes a four months old wood pecker with a rubber bill nine months and thirteen days to peck a hole thru a cypress log that is large enough to make 177 shingles, and it takes 165 shingles to make a bundle worth 93 cents, how long will it take a cross eyed grasshopper with a cork leg to kick all the seeds out of a dill pickle?

People who want perfect equality always find it in the poor house.

REBECCA LODGE ORGANIZED IN KLEMME LAST THURSDAY

Twenty-two Charter Members

A Rebecca Lodge was organized in Klemme last Thursday evening, it being a branch of the Odd Fellows lodge.

Several car loads of men and women drove over from Britt to help put the work on here. They were also assisted by an officer from Cherokee and a lady from Marshalltown.

Twenty-two Klemme ladies and men took the work and thus became charter members of the new fraternity here.

After the degree work a lunch was served and a general good time enjoyed by all.

Klemme has a good live Odd Fellow lodge and no doubt the ladies new organizaion will also be marked with success.

ERECTION OF NEW FISH HATCHERY BUILDING AT CLEAR LAKE COMMENCED

Work on the erection of the new fish hatchery for the state of Iowa was begun at Clear Lake on Wednesday, May 25th, and progress on the preliminery operations ahs been rapid. It is expected that the building will be completed and in service of the state fish and game commission before the end of the summer.

FIND GOLD AT GREATTINGER

Gold has been found on a farm near Greattinger, so it is reported here, and it has caused a great deal of excitement in that neighborhood. The find is located in a gravel bed on a farm owned by a Mr. Smith, as near as we can learn. Samples have been sent away to be assayed and is reported that the gold run about $25 worth to the ton. Samples of gravel are now in the hands of he Iowa State College for another assay.—Ringsted Dispatch.

James Money came in on the night train a few nights ago and went to the Ford Garage to get his car to ride home in. He struck a match to light a cigar, the head of the match flew off and ignited the gas under the Hatterscheid Bros runabout. The fire also caught in one of the big wooden upright supports and burnt of the hose from the pressure tank. Mr Money, by quick work, ran the car out of the garage and then turned the water on the fire inside, quenched it, then put the fire out in the car. The damage was slight.—Corwith Hustler.

SWEET CREAM PAYS BEST

Farmers Get a Better Price For Carefully Handled Cream

Sweet cream is worth as much more to the farmers as extras in the butter business are worth more than ordinary butter says M. Mortensen, head of the dairy department at Iowa State College. Farmers can well afford to take the extra care of the cream and produce sweat cream and get the difference in the prices. They should not listen to the advice of some creamery operators who say that sour cream makes as good butter as sweet cream.

Farmers can watch the New York market and se the difference in the prices of butter. He can have as great a difference for his cream in in price if it is properly handled says Mr. Mortensen.

'Most creameries are today willing to pay several cents more for sweet cream than for sour cream and if a creamery refuses to differentiate between sweet and sour cream, it may be possible to locate a market for it elsewhere. Dairymen cannot afford to sell sour cream when the swee cream will return a yield of several cents per pound of butter fat extra. It requires a little extra work to care for the cream so that it will be kept in a sweet condition for it will be kept in a sweet condition for two or three days and the work is well paid for."

TAXI

An Adventure Romance

By George Agnew Chamberlain

Copyright, The Bobbs-Merrill Company

PART III—Continued.

—9—

"Can't I?" said Miss Thornton, with a new edge to her voice and something in her eyes that made them look as though they were passing in review all the unchaperoned years since first she made her debut as an independent scullery-maid at Mrs. Blunkum's feed-house. "I shall change nothing here," she concluded. "When Randy—Mr. Randolph comes back, he shan't find his place cluttered with females."

Mr. Milyuns turned on her a gaze that was complex with admiration and a realization that he was on the way to biting off more than he could chew. He decided to sidestep.

"Can you be in this afternoon?" he asked.

"Oh, yes," said Pamela, involuntarily glancing at the door and betraying a half-formed intention to watch that portal night and day until death or Mr. Robert Hervey Randolph arrived; "I'll be in. Why?"

"Mrs. Milyuns and my daughter Eileen will call on you at about five," explained Mr. Milyuns. "Just one more matter and I must go," he continued. "Your income amounts to something over eight hundred dollars a month. I shall pay it in advance until you get settled and have a chance to catch up."

"Please send me only half," said Pamela, as she rose to say good-by.

Mr. Milyuns took her hand, dropped it, and started toward the door; but before he got there, he stopped and turned.

"My dear," he said, losing for the moment his birdlike, chirpy pose, "I don't want you to think of me as just your banker. I knew your father and your mother, and their fathers and mothers before them. I am fond, by old usage, of every drop of blood that runs in your veins. You won't forget that, will you?"

Pamela stared at him, swept toward him, threw her arms round his neck, hugged him, dropped her face on his shoulder and wept. Mr. Borden Milyuns stood very erect, his bald head held high, his pink cheeks puffed out, and his eyelids blinking at the rate of fifteen to the dozen in a vain effort to fan back an amazing lachrymatory inundation.

"There, there!" he said, patting Pamela on the back. "Who would have thought it, you adorable, lonely little girl?"

Pamela threw up her head and smiled through the sudden summer shower.

"I know it was ridiculous," she said, "But I couldn't help it. You made me like you all of a sudden, and I just had to, because you've had a bath and you look so clean inside and out." She kissed him as she broke away.

"I see; I see," said the astounded Mr. Milyuns, and beat it.

At two minutes after five the doorbell rang again. In spite of the fact that it was almost exactly the hour which Mr. Milyuns had set for the arrival of his wife and daughter, Pamela couldn't help hoping—but in vain. It was with a slightly resigned air that she received Mrs. and Miss Milyuns instead of Mr. Robert Randolph.

Mrs. Milyuns flew to her, set hands on her shoulders, searched her face with eager shrewd eyes, and said:

"Borden indeed told me the truth about you, my dear. May I kiss you?"

Pamela extended one cheek to the salute while her eyes wandered off to size up the tall, blonde, cool young person that she surmised must answer to the name of Eileen Milyuns. Being the product of two shorts, how on earth had she managed to grow so long? Her face was regularly beautiful, as though it had been carefully made to order like her clothes. She appeared as passive as a Palmer snowscape.

After a little skirmishing for position, the three ladies seated themselves in a triangle, into the center of which the well-trained Tomlinson ran a tea-wagon.

"Now," said Mrs. Milyuns, having emptied and put down her cup, "let's forget the sheer romance of the situation, my dear, and get down to practical problems. The first of all things, as you must realize, is the necessity of getting you a companion. Would you care to be our guest in Madison avenue until you can pick one out?"

"I would put clothes ahead of a housecat," murmured Eileen.

Her mother ignored the remark and kept her eyes fixed on Miss Thornton's perplexed face. That young lady seemed in no lack of something to say but rather in search of words and the plunging courage necessary to the saying. She drew a long breath and delivered herself of the following:

"Really, it's most awfully kind of you, but, as I told Mr. Milyuns, Tomlinson is such a dear that I am going to continue him as my companion."

"'Tomlinson!'" exclaimed Mrs. Milyuns, and then smiled indulgently for the first time during the interview, being under the impression that at last she had run into something appropriately naive in the bearing of her new charge. "Of course you can keep him on, but you must realize that you can't live here without a woman in the house."

"Oh, yes, I can," said Miss Thornton, a little breathlessly. "I have a feeling—I can't explain it exactly—that this apartment is a one-woman setting. As I said to Mr. Milyuns, I don't want to clutter it with females."

A silent laugh crept into the eyes of the marblesque Eileen; something inside of her sat up and took notice. She glanced round the room and murmured:

"Mother, she's absolutely right. I'm for her."

"'Right!' Eileen!" exclaimed Mrs. Milyuns, flushing in her indignation at finding a traitor in the home camp. "I don't know what your generation is coming to. The impossible is never right."

Having taken up her suave cudgel, Eileen was in no haste to lay it down, and may it be pointed out right here that Miss Imogene Pamela Thornton had the rare faculty of enlisting the nearest bystander to assume her battles for her, thenceforth becoming a charmingly interested onlooker, ready to watch the tide of her own fortune from the vantage-point of an entirely impersonal detachment.

"That's where you slipped, mother," continued the quite unruffled Eileen. "There's nothing impossible to our generation. Impossibilities are our food, drink and raiment. We're like those surprising orchid things that defy the usual laws and live on air."

"Yes," remarked Mrs. Milyuns; "any new air. But I didn't bring you here, Eileen, to be a stumbling-block to—to Pamela, who is suddenly faced with problems in the solution of which she deserves our sympathetic assistance."

"You've hit the nail on the head again, mother," parried Eileen. "You're not in sympathy with her, and I am; so you'd better hand over her check, and tomorrow morning at ten I'll be here to help her cash and spend it—if necessary." She turned to Pamela with a twinkle of anticipation in her eyes. "How about it?"

Pamela smiled back her bubbling smile, and then suddenly grew grave.

"Do you think I could order by measure?" she asked, and, remarking the hurt astonishment on Eileen's face, continued in rapid but neverthe-

And Were Soon Involved in an Orgy of Trying On.

less halting explanation: "You see, it's Mr. Randolph. This is really his apartment, and he may be back almost any—any day. I—I don't want to miss him. I—I wouldn't be out when he comes, for anything."

"H'm," interjected Mrs. Milyuns, but before she could make any further progress along that line, Eileen was on her feet and saying good-by among these other things:

"That's all nonsense. If Bobby found you here just as he left you, the first time he decided to turn up, he might never appear again. But if he finds you after two or three unsuccessful calls and just one day's shopping, he will never leave. Tomlinson will have to throw him out."

"Tomlinson couldn't," said Pamela with calm complacency.

Gradually the sure shot made by Miss Milyuns began to take effect. The thought of new clothes—new smart suits, airy evening nothings, filmy undergarments, and solid-silk hosiery—stole Pamela from her intention of eternal vigilance and led her to say:

"After all, I will go with you, if it really isn't asking too much of you."

Thus was Mrs. Milyuns side-tracked for keeps, and on the following morning the two young ladies were wafted down-town in Mr. Milyuns' best limousine and proceeded to open a chain of credit-accounts, on the bare say-so of Eileen and in the name of Miss I. P. Thornton, that spoke volumes for the former's exclusive taste in fashionable purveyors and financial ability to humor it. Possibly the two would have shopped up to the moment of the present writing had it not been for the fact that Pamela knew all about money from the short end.

"I have finished," she suddenly announced.

"Finished what?" asked Eileen.

"Finished shopping," said Pamela. "I've been keeping account, and I've spent almost the whole check."

"'The whole check?'" exclaimed Eileen. "Why, you haven't touched it. That's the beauty of charge accounts. You can keep your checks to look at. I've got some that father gave me three years ago."

Pamela smiled a smile of much wisdom and made for the nearest exit. As a matter of polite formality, when they reached Fifty-ninth street, she asked Eileen to come up for lunch from the bachelor's buffet in the basement, and she could not help a slight feeling of relief at the news that Miss Milyuns had promised herself elsewhere.

"But I'll break away and come for tea at five, if you'll let me," said Eileen. "I simply must help you try them all on."

"All right; do," said Pamela, inwardly pleased that she would have some one beside Tomlinson upon whom to flash the first dazzling vision of her metamorphosis.

The first thing she did when she reached the apartment was to ask if Mr. Randolph had called; the next was to summon the office of Milyuns, Branch & Milyuns on the telephone to know what steps had been taken in the new search. She was somewhat surprised to learn that the entire firm had gone out to lunch in a body, and still more startled at the information, obtained three hours later from the same supercilious voice at the other end of the wire, to the effect that none of them had come back. She was young; she believed it.

There is no doubt that in five minutes more Mr. Gloom would have assumed full sway in the late apartment of Mr. Robert H. Randolph had not a long procession of parcels begun to arrive in the nick of time. Tomlinson brought them into the bedroom, one, two, three at a haul, and Pamela herself cut the knots with Mr. Randolph's best nail-scissors and laid out the goods, filmy fold upon filmy fold.

By the time Eileen turned up the apartment looked like the stateroom de lux of a millionaire young lady returning from Paris with nothing to wear and preparing to swear to it before all the customs officials in Gotham. Tomlinson was ordered to fill the cellar with wrapping-paper, tissue-paper, cardboard boxes and string, burning what was left over in the back yard.

As soon as sufficient space had been cleared for action, the two girls set to work, and were soon involved in such an orgy of "trying on" as only the healthiest stamina of youth could have endured without falling over in a dead faint from exhaustion. Even Eileen divested her person of everything but, and experimented with such dear garments as it seemed impossible Miss Thornton could get round to in the allotted time.

Having tried to show the public how charming was Pamela in and without her cheap clothes, no puerile and gasping effort will be made in these pages to measure the effect upon her of the latest creations of the raiment dream-gods of Fifth avenue. Suffice it to say that, in one hour's twinkling of the eye, she became such a radiant vision as chokes mere words down into the pit of a man's stomach, makes his jaw work like that of a fish on a hot sidewalk, fills his eyes with the pleading light of calf-love and inspires his hands with an overmastering desire to reach for it.

For two, four, six days, a week, two weeks, Pamela lived in breathless anticipation of the moment when she could burst upon the eyesight of one Robert Hervey Randolph, and when all these days—and weeks—passed without any news of him, her lips that were made to smile, to kiss, and to bless the air with words softly spoken and carried on the fragrance of clean young breath began to droop pitifully.

Mr. Milyuns' efforts in several directions had so far proved in vain. He had advertised in every paper in Gotham, from the New York Epoch to the pink Police Gazette; he had offered rewards; he had set traps and was now supporting a large corps of rapidly fattening individuals who called themselves "plain-clothes" men—a name that would have fitted them admirably had the last syllable been omitted. His net results were the information that Mr. Randolph, in a reprehensible state of intoxication and at seven o'clock of the morning of which he had disappeared, had exchanged his swell evening garments at a second-hand emporium on Sixth avenue for a suit of thicks and eighteen dollars in cash, stating, as he left the place, that he was thinking of going South for the rest of the winter.

AUNTIE'S WISH

By GRACE CANFIELD.

(©, 1921, by McClure Newspaper Syndicate.)

"Wish I may,
Wish I might
Have the wish I wish tonight."

The slender, white-haired figure was very still as she fervently repeated the old incantation, and after it the wish, "I want a young man!" Aunt Emmy had not intended to speak aloud, nor was she even aware that she had done so. And so intent was she that she did not hear the gasp of amazement from the other side of the room.

Niece Marjorie retreated hastily to her own room to consider the amazing situation. Aunt Emmy, sixty if she was a day (thus Marjorie, with the unconscious cruelty of youth), and wanting a man! Why, she hated men! It was only with the greatest difficulty that Marjorie could secure her permission to go anywhere with a male escort.

"The old ducky dear," sighed Marjorie to herself. "She has been everything in the world to me for years, and I have been only a selfish brute in return. If she wants a young man she shall certainly have one!"

In the early twilight of the next evening Marjorie again saw her aunt standing in the western window, repeating her wish to Venus. The north window by which Marjorie stood opened on a porch, and as she paused, wondering what to do, she heard a soft whisper from outside the window.

"Marge, can't you come out for a walk?" The girl slipped out of the room and met Eaton at the door.

"You musn't ask me again," she said. "You know auntie doesn't like to have me go out with men."

Marjorie suddenly interrupted his half-uttered complaint.

"Eaton, did you hear what auntie was saying—to the star?" He flushed.

"Yes. I'm sorry. I didn't intend to."

"I'm glad you did," she said quickly. "Eaton, I love my Aunt Emmy, and if she wants a young man, she must have one."

Dimly Eaton perceived that he was about to be sacrificed on the altar of Marjorie's love, and felt still more sorry that he had overheard.

"The only way you can be my friend," she was saying, "is by being nice to Aunt Emmy."

"I'll be nice, but I won't make love," said the lad, rebelliously.

"Silly!" Marjorie flared up. "Of course you wouldn't act as you would with——"

"You," he supplied.

"A girl your own age," she continued with heightened color. "But you can pay her a lot of attention, and make her feel that you care a lot for her."

"Say!" he leaned forward eagerly. "Would I have a better chance with you if——"

"Silly," she scolded again. "You must do it just for Aunt Emmy's sake." It is just possible that the young man saw more in Marjorie's eyes than she cared to say, for his opposition was not so strong from this point on. Finally, though with some reluctance still, he yielded, and went away.

The next day, to Aunt Emmy's unbounded amazement, she received a box of American beauties by the early post.

"Who on earth—the lovely things—Eaton C." She read the card, her breath coming in soft gasps.

This was the first of her surprises, but it was by no means the last. Eaton had determined from the start that if he did this thing he would do it well, and Marjorie was obliged to admit that he responded nobly to her plea. Candy followed flowers, and calls followed the candy, until Aunt Emmy was overwhelmed. She treated Eaton at first with a very stiff courtesy, for she had not approved of him. However, as the young man continued his attentions, completely ignoring Marjorie, the old lady visibly changed her mind, and took him into favor.

Eaton's utter neglect of Marjorie was so marked that finally she began to feel a little piqued. Of course, everyone who knew Aunt Emmy, loved her to death, but he might admit that she had a niece!

It was Aunt Emmy who finally opened the subject.

"Marjorie," she said, "I have a confession to make, and I want your advice." Her niece was a little startled; she had thought confession her own prerogative.

"Do you believe in wishing on stars?" Aunt Emmy's tone was slightly abashed.

"Yes," promptly.

"Well, do you think a wish could ever go wrong?" Aunt Emmy was flushing painfully. Marjorie was puzzled.

"I don't understand." The reply came with a rush.

"I didn't like your friends—but I wanted you to have a young man—so I wished on the stars—for you."

"For me!"

"Yes. But something is wrong. Eaton C. is just the one for you—and—why—he is paying attention to me—at my age!" Aunt Emmy wrung her hands in deep distress. "Oh, what shall I do?"

Marjorie laughed aloud. "Dear Aunt Emmy," she said gently, "are you sure the stars were wrong?"

"Wh-what do you mean?"

"Supposing," Marjorie's voice was almost a whisper, "supposing you leave me alone with Eaton the next time he calls. Perhaps you will find that he was meant for me, after all."

ANCIENT AND MODERN ROME

World-Famous Buildings Occupy Sacred Sites in the Old "Capital of the World."

Ancient Rome was built on the hills south of the River Tiber. Tradition regarded the Palatine as the site of Romulus' Urbs Quadrata. Excavations have brought to light remains of earlier settlement and a pre-historic necropolis. The capitoline was the center of republican and imperial Rome. One of the principal ancient monuments is Hadrian's mausoleum, which, as the castle of St. Angelo, was the citadel of medieval Rome. West of this stood Caligula's circus, in which Nero tortured the Christians; its site is now occupied by St. Peter's, the chief shrine of Roman Catholicism, reputed to be the largest church in the world, occupying 18,000 square yards and measuring 435 feet in its highest part. North of St. Peter's is the Vatican palace, which covers 13½ acres and comprises over 1,000 halls, chapels and rooms. The pantheon, built by Agrippa in 27 B. C. and restored by Hadrian, is said to be the best-preserved ancient building in the city.

Proud of Her Daddy.

Helen was playing out in front of her house Flag day and evidently had noticed the flags that were out in many of the homes. This same day happened to be her dad's birthday but she was not aware of it until she had been let in on the big secret of a surprise that was in store for her dad when he came home for the evening meal and that she was not to tell any one about it.

When given this information she exclaimed, "Is today daddy's birthday?"

When told that it was, she remarked quite decidedly, her big eyes getting larger, "Oh now I know why all the flags are out."

Details Desired.

"He pressed his cheek to hers. The color left her cheek."

"You mean he rubbed it off?"

STEMMING THE TIDE

A farmer is said to have replied to the qustion whether he would not like to live in the city: "Yes if they would move me out into the country. In the light of recent developements in country life, this answer is by no means absurd. The city is moveing ont of the country, not only in the obvious ways by which the crudity and isolation of farm life are being lessened; by improved roads, free mail deliveries, automobiles, sanitary plumbing, electric lighting, and labor saving machinery. but in less tangible ways as well. Easy transportation and increased wealth and liesure are making possible a more varied and significant social life, and no a few neighborhoods are are fostering community activities that have genuine intellectual and cultural value.

The same causes are revolutionizing rural education The little red school house is disappearing. In the state of Iowa, before 1912 but seventeen consolidated schools had been organized. In the nine subsequent years more than four hundred such schools came into existence, two hundred of them in 1920.

Large scale methods of doing business are envading the rural districts There are between 15,000 and 20,000 co-operative societies in the United States, organized by farmers to manufacture butter and cheese, and to sell food products. The farmers own hundreds of telephone lines, elevators, packing plants, and whole sale and retail stores.

The farmer is emerging in politics. His vote can no longer be captured by playing upon local and traditional prejudices. He has awakened to the fact that national and ever international policies affect his pocket book. He is demanding, and is bginning to receive immediate representation of his interests in the councils of the nation. Farmers are organizing in local and national groups to further this end.

If God made the country and man made he town, man is very seriously meddling with God's part of the job. What is taking place before our eyes in these and many other directions, is nothing short of a revolution in the lives of the majority of our population. It does not seem possible that a few years of further progress in moving th city to the country will automatically turn the tide of the rush to the cities which social reformers deplore. Certainly the economic and scientific forces which are working toward the improvement of the conditions of farm life are doing vastly more to stem that tide than the exhortations of the "back to the farm" advocates. —The Grinnell Review.

SPRAY FOR POTATO BUGS

Lead Arsenate and Bordeaux Will Eliminate the Pests.

Potato bugs and leaf hoppers which are exceedingly numerous this spring can be controlled by spraying the plants with Paris green or lead arsenate, according to the entomologists at Iowa State College.

Lead arsenate is the best spray for the patato bugs or Colorado beetles as htey are called. It does not injure the leaves. and is more effective Last summer in a series of 12 tests on potato fields the lead arsenate gave better results in all cases than the paris green. However, leafhoppers and flee beetles are best controlled by bordeaux mixture at the rate of 4 pounds of blue vitriol and 50 gallons of water and then add one and one half to two pounds of dry lead arsenate. This will get all the pests.

Leaf hoppers which are small fly like insects, green in color, are found in large quantities in Iowa. They cause the leaves of the potato to turn yellow and curl as if they were burned. This was previously supposed to be caused by a blight, but last year experiments at the Iowa Agricultural Experiment station showed this ailment to be the result of the attacks of leafhoppers They are found on the undersides of the leaves and are very active. Two broods appear. one in June and July and the other in August and early September. It is desired to get as much as possible of the spray material on the undersides of the leaves.

INDIAN STORY OF CREATION

Menaboshu Made the Earth, According to the Legend—Great Lakes Are Bear Tracks.

Menaboshu, according to the legend of the Chippewa Indians, was the creator of all things. He avowed one day that he would make the earth. But the almighty creator did not find his task easy, for he wanted to make the earth larger than any other thing. Truly he rounded the soil between his powerful hands, until it grew into a great ball; but, freed from their touch, it fell in a heap. In this way he tried again and again; each time he saw the mass crumble. Then Menaboshu mixed water with the soil to form mud; and, besides, moulded it about a great rock, when behold—a still larger ball. The mass, at last, kept the chosen shape.

The creator, pausing to rest from his toil, beheld his matchless work.

Menaboshu next undertook to devise the many living things which dwell on the earth. Before the surface of the giant ball had time to dry, in fact, the lusty god began to make the animals, last of which was man—began to make the animals, one kind after another, on the broad palm of his left hand. Among others he made the bears.

The first bear soon escaped from its maker. The wild beast, with its untried strength, leaped to the earth and bounded straightaway across the continent of North America. But the land where the sprawling bear's huge paws struck the earth was still so fresh and soft that they left deep tracks. All was strangely new.

These deep marks on our continent quickly filled with water. Scarcely had the frightened bear bounded away, when the beautiful lakes—Superior, Michigan, Huron, Ontario and Erie—appeared, full to the brim. They are old as the first bear's tracks.

The creator now hastened to make rain. At sight of the water, filling the lakes, he began to fear, lest the soil again fall in a heap; and he caused the rain to fall from the sky. so long that the lakes overflowed their shores. And the water from Superior, seeking the level, flowed toward Erie, the track of the foot which struck first and settled, under the bear's weight, much lower than the others—the water, on its way to the sea dropped abruptly from Ontario into Erie. And lo! the Falls of Niagara!

And Menaboshu, ending his labors, again beheld his work.

The Power of Silence.

There is nothing in this world which works to greater advantage than to be silent. No one likes to be ignored. It hurts like the mischief to have an antagonist throw up a barricade against which we have no power. The moment the other fellow is silent, that minute all detailed plans of attack are worthless. The only thing one can do is to be silent also, and there you are! Though but an armistice, the action of conflict is over.

The one who refuses to converse may be one you have no use for. Still it bothers you. You are annoyed, your pride is injured at the realization that the one you hold in scorn has the opportunity to ignore you. The moment you resort to tantalizing banter you acknowledge the final defeat. If you fall in line and imitate you compliment. The secret is to steal the thunder first.

If one you love keeps silent it hurts twice. Once because you have no idea how deeply you may have offended to bring down upon your head such punishment, and again because the loved one could ignore you. Just think over the conquering points of this silent weapon.—New York Mail.

Tears Brighten the Eyes.

There is a very widespread belief that the process of crying tends to weaken the eyes and rob them of brightness. Actually, the truth lies in the opposite direction, according to an oculist.

The shedding of tears (provided that the weeping is not overdone) is one of the greatest aids to softness and brightness of the eyes.

The explanation is this: The eyes need a bath just as our bodies do. There is a certain quality in the "tear liquid" which does not exist in water, and that is why a tear bath is of much greater value than a mere bathing with cold or warm water.

There is a possibility that one of the reasons for the superiority of feminine eyes in point of limpidity and brightness over the male optics is the tendency of the gentler sex to indulge in more or less frequent outbreaks of tears.

The moral is that if you want to have what novelists call "eyes like the fishpools of Heshoon," give the eyes a tear bath at least once a week.

Wants a Free Trip.

Railroads require that when a body is shipped to any point the undertaker shall purchase two full tickets, but it is optional whether any one accompany the body.

The following unique proposal was sent to a New York undertaker recently:

"Within the next five weeks I am due at Santa Fe, N. M., and as I understand there are times when the near relatives of one who has passed into hazy oblivion cannot come to New York to take charge of same, I hereby hold myself open at any time within the above named period to accompany said oblivious party to any point in the West or Southwest as a matter of covering my transportation in exchange for said services."

Read what Edward N. Hurtey says about getting your money's Worth

The bargain hunter who spends a whole day trying to save a quarter on a dollar purchase does not show sense of values; neither does anyone who buys something simply besause it is cheap. A ridh young women may pay three times what an article is worth, because she has had so much money she never learns what money is. But on the other hand, a very poor girl may be equally extravagent in buying a shoddy thing rather than waiting another week to buy a better article. She does not know what money is because she has never had any. Neither of them has the ability to get her money's worth.

News For The Farmer

MILLET GOOD FALL FORAGE

Also a Good Fall Hay Crop for Hot Weather Where Moisture is Scarce.

An Iowa millet may be used as a substitute hay crop in case more desirable can be grown for it will make a fair growth in the hot dry part of the summer other land which does not contain sufficient moisture for other forage crops to produce satisfactorily, according to Clyde McKee of the farm crops department of Iowa State College.

The three millets most commonly grown and best suited to this state are of the foxtail type. Common millet is the earliest and should always be used when the seeding is made late in the summer. The Hungarian variety is rathr medium in maturity, while the Golden is considerably later and inclined to make a rather cource growth Either the Golden or Hungarian are recommended for seeding before July 1.

Seedings should not be made until the ground is thoroughly warmed, usually the latter part of may or first half of June, but they may be made as late as July 15. From 24 to 48 pounds of seed per acre drilled or broadcasted is the common rate of seeding.

Millet should be cut for hay before the seed is fully formed, and then shonld not be fed exclusive of of ather roughages on account of the ill effects liable to result, especially when fed to horses. The yield of cured hay varies from 1 to 3 tons per acre.

This is one of Iowa's best forage crops for late planting.

POTATO GROWERS COOPERATE

Experts From Other States To Help in Iowa Work

Due to the increase in the amount of work in potato experiments in Iowa. where there are 122 demonstration patches in 50 counties, C.L. Fitch, patato expert with the extension department of Iowa State College has arranged for help in the inspection. A. G. Tolaas, chief inspector of certification of seed patatoes from the Minnesota Universityfarm, E. P. Gibson, county agent of Duluth, Minn., and an expert on potatoes. and C. P. West, Rinelander Wis., a county agent in Wisconsins best potato area, will visit Iowa between June 15 and 28 to help Mr. Fitch in the inspection work.

"Practically all of our seed is either grown in northern Minnesota or Wisconsin," says Mr. Fitch, "and the work in Iowa will be of more val ue if it is handled under the methods used in potato areas. These experts will again visit the state late in the fall and help us with the work. Each man will visit 10 counties twice during the season. Iowa is rising more potatoes than ever and under the proper conditions a good profit ca be secured from a crop."

NEED PECTIN IN CANNING

This Substance is Necessary for Getting Good Jelly.

Iowa farm wives who have jelly which does not "jell" can get the des ired result by adding pectin, say the home economics experts at Iowa State College. Pectin is a subsance which occurs in all fruits but in larger quantities in quince, apples and citrus fruits. Strawberries, pears and often grapes do not contain enough to give the desired "body" to to the jelly. In such cases the addition of small quanities will produce the desired result in the canned products.

Pectin is easily extracted from fruits and can be kept for use in canning fruits which do have it. Apple pectin is probably the best to use since this gives a fine flavored jelly and does not influence the original flavor of the fruit being canned.

HORSE SALES AN EXCEPTION TO GENERAL BUSINESS

Telegraphic reports from Boston and New York to the Horse Association of America, with headquarters in Chicago, show that the sales of horses in the eleven northestern states,--Pennsylvania. Maryland and states east and north,--are outstanding exceptions to the general trend of sales in other lines.

J. C. Keith of Boston reports his sales of horses for January through April to be over 5,000 head as against approximately 4,000 head in 1920 for the same months. This represents a gain of 25 per-cent. He says that dealers though New England have a brisk demand for good work horses and that sales are considerably increased.

Fiss, Doerr & Carroll of New York wire! "Our records show that for the first five months of this year we sold 14,239 horses as against 11.605 in the same period of last year. Business is gaining. From comments of buyers we are confident of a steadly increasing demand for good wagon horses and horses suitable for general delivery work. Demand for drafters will increase as soon as business; conditions pick up. At present, cartage men are not using their full equiptment."

These figures show a gain of over 22per-cent. Dealers at other Eastern points report greater sales than last year, and that many men who have not bought horses for six or eight years are buying now. With New York and New England transportation users finding it profitable to use horses in city hauling. in spite of heavy freight rates to get them there, what should be the position of the merchants in the middle west, without such freight costs to pay?

HERE'S NEW SALAD PLANT

Chinese Celery Cabbage a Good Midsummer Plant to Grow.

Chinese Celery Cabbage, or Pe Tsia, is a good vegtable for the summer gardens of Iowa, accarding to C. V. Holsinger of the extension department of Iowa State College. Not only does it grow wherever cabbageor lettuce does but it resembles the head lettuce and cabbages but tastes more like celery than like cabbage. which makes it a desirable salad plant.

This plant should not be planted before th summer is well along as it is a hot weather crop. It does the best when the seed is started in a hotbed and then the plants transplanted. It should be put into a soil that is either rich or else has been given a liberal dressing of manure, preferable chicken manure.

After planting, the celery cabbage must be kept growing as fast as possible and irrigation is desirable where water is available. The plants begin to head up naturally about October 1 and do not require any tying They soon become firm, similar to cabbages and are then ready to use. They are subject to frost injury but if taken up and placed in a cool cellar the celery cabbage is easily kept for six or eight weeks.

Mature heads will weigh as much as two to three pounds. The interior leaves will be creamy white and free from fiber and with the celery flavor make desirable salad ingredients.

FERTILIZING VALUE OF FARM MANURE

By P. H. Holden

The annual manure crop of the United States amounts to over $500,000,000. There is no loss over $100,000 000 of this amount because of the careless handling of manure. Manure reprsents fertility which is drawn from the soil by crops and must be returned to it if productiveness is to be maintained. Manure not only adds to the store of plant food fn the soil by returning a large per cent of the nitrogen and potash removed by crops, but it also renders the native plant food of the soil moro available, and adds humas without which no soil will produce good good crops.

No other form of fertilizer can take the place of farm manure. The value of manure is great and yet it is probably wasted to a greater exthan anything else on the farm.

We should carefully conserve all the manure on the farm, and see that it is applied to the soil just as quickly as possible. Thousands of experiments and results proved in actual show conclusively that the manure if not properly applied to the soil will lose from 20 to 30 per cent in fertility value.

Manure should not be put upon the land in piles. It should be carefully spread.

One of the most important agricultural implements today is the manure spreader. It should be on every farm. It will increase the production of the farm by bringing an economical use of farm manure.

NOTICE OF APPOINTMENT OF EXECUTOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Executor of the Estate of Carlena Griffen, deceased, late of Hancock County, State of Iowa. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated. to the undersigned, for allowance.

CUTWORMS ENDANGER CROPS

Attact of Variegated Cutworms Found Over Wide Area of Western Iowa

Iowa's cornfields and clover fields are in danger of severe injury from variegated cutworms, according to reports received from many parts of the state by the entomological section of the Iowa Agricultural Experiment station at Ames. Nearly all of the western sections of the state and the southern tier of counties have reported large swarms of gray moth, about an inch in lenght, which lay eggs that eventually produce the variegated cutworm.

This pest appeared in Iowa two years ago but only in a small way. at tacking the southwestern section of the state.

"These caterpillers," says Fred A. Fenton, entomologist at Iowa State College, "attact clover fields and alfalfa and after ating this material run into corn fields. They operate in a manner similar to army worms. Control is best handled by a poison mash, but in case the outbreak is large a special method is used. All Iowa farmers who suspect this pest should inform the entomology section at once and special control methods will be furnishd."

For small areas, Poison bran bait can be made according to the formula given below, broadcasted over the fields. The following formula has been tried and proven successful

Bran 20 lbs., Paris green 1 lb., salt 1 lb., Molasses (cheap grade) 2 qts.

Amyl acetate three-fourths ounce or if this can not be obtained lemons or oranges finely chopped equal to six fruits.

Enough water to make a crumbly mash, usually 2 to 4 gallons.

Mix the bran and paris green thoroughly together while dry. Then put in the amyl acetate or fruit and salt. Dilute the molasses with water and mix with the poison bran until a mash is formed. The salt is not essential and may be omitted. If it is possible to obtain this, however, it seems to make the bait more attractive and better results are obtained.

Unless wet weather makes a rank growth in clover and alfalfa fields so that the cutworms cannot get the best of them. Iowa will lose much thru the pest this season.

MEETING OF EAST AND WEST

Peculiar Circumstances Under Which American Physician Treated Inmate of Persian Harem.

One day a great-aunt of the shah sent a note to the dispensary, asking me to visit her daughter, who was ill, writes Mary W. Griscom, in Asia Magazine. Her messenger conducted my Armenian nurse, who acted as interpreter, and me through the garden, with its fruit trees and decorative shrubs and marble pool, into the women's quarter. A servant ceremoniously arranged two green velvet armchairs in the exact center of the room for the mother and me.

Soon all the women of the household gathered around us, for a visit from a foreign woman doctor was a most entertaining diversion in the monotonous domestic routine. The patient entered dramatically at the proper moment and sank into a luxurious pile of brocaded cushions beside the kursi (table), which was covered with white velvet stenciled in black. A samovar of hot water was carried in, and two servants brought a silver basin and poured out the water from a slender silver urn for me to wash my hands. Then the patient lay down on the kursi that I might examine her, and all her attendants crowded around her and excitedly and vociferously urged her to be brave and not to worry, until such a pandemonium was raised that I could not hear the interpreter or my own voice.

When they quieted down and I found it possible to proceed with the examination I continued it. I was offered the silver basin again, and served with tea and sweet cakes, while I discussed the case. I decided that an operation was necessary.

A few days later an operating table was brought into the house. In a large reception room, the floor of which was covered with the most beautiful rugs I had ever seen, the operation was performed. The doctor who had arranged for me to visit the Persian lady was asked whether I would rather have a fee or a carpet, and it was decided that I would prefer a carpet. A few days later when I called on the patient, she told me that she had sent her agent to the bazaar to buy me a carpet, and he had returned with word that there was no carpet in all the bazaar honorable enough for the lady doctor. So she invited me to select from her palace any rug that pleased me. My protestations were futile. I had to wander through the great rooms, followed by a procession composed of the ladies of the household, the attendants and servants, and find an honorable carpet. I examined them all and selected a lovely Kurdistan rug with an old-rose background and green border. This was promptly rolled up by the servant and carried to the patient, who said that I must have been accustomed to fine carpets all my life, for I had chosen the rarest rug in her possession. I was much embarrassed and tried to refuse the too princely gift, but she insisted that I must have it—and I carried on to America my most exquisite memory of Persia.

Oh, What a Tangled Web.

I was visiting in the country one summer, and did not bring a wrap. One night it was quite cold, and a friend of mine came to take me for a drive. I was anxious to make a good impression. He insisted that I wear a coat. I said I did not need one.. He was so persistent that finally I told him a friend had borrowed my coat. Then he insisted that we go straight after it. So off we started for the girl's home. I ran up the stairs to her room, resolved that if her coat was not in her room I would stay there rather than come down without it. It was there, however, and I took it and ran downstairs. We didn't get out of the yard soon enough for me, for I was afraid some of the family would see us, and there would be an explanation due.—Chicago Tribune.

Using Waste Gas.

Much of our natural gas in this country is wasted because the wells are too far from industrial centers or their output too small. This is particularly the case in Louisiana, Texas, Wyoming and parts of California.

The United States bureau of mines has been studying the possibilities of utilizing this waste gas for the production of chloroform and other chemicals of value, such as carbon tetrachloride and methyl chloride. The conclusions drawn are highly favorable.

Use of the gas for these products would be restricted to "dry" gases, which are of no value for yielding gasoline. For the the latter purpose "wet" gases from wells in isolated places are profitably available.

Solar Eclipse.

Apropos of the annual eclipse of April 8, 1921, Doctor Crommelin writes in Nature that the occurence of a central solar eclipse within the limits of the British isles is a rare event. There has been no British total solar eclipse since 1724, and the next one will occur in 1927, if we disregard that of January 24, 1925, in which the track of totality merely grazes the Western Hebrides and the eclipse occurs with a very low sun. The last annular eclipse before that of the present year was in 1858 and there will not be another until 2093.—Scientific American.

ACCESSMENT NOTICE

TO WHOM IT MAY CONCERN:

Notice is hereby given:

That a Plat and Schedule have been prepared by the direction of the Town Council of the town of Klemme Iowa, showing the assessments proposed to be made for an account of the construction of Sanitary Sewers on the following streets alleys, avenues etc., to-wit:-

DISPOSAL PLANT

The disposal plant shall be located on a plot of ground approximately 600 feet west and 1500 feet south of the intersection of Iowa and Front Streets and shall consist of septic tank, dosing chamber. filter and sludge beds and connecting pipes there to.

MAIN SEWER

Shall start near above described Disposal Plant Site thence North 650 feet, thence Northeast across outlot 7 approximately 1150 feet to intersection of Iowa and Front Streets, thence on Iowa Street from front to 3rd Streets using 12-in Vitrified Sewer Pipe.

LATERAL SEWERS

On 3rd street from Iowa Street to Jerusalem Street using 10-inch Sewer Pipe.

On Dakota Street from 3rd Street to East Corporation Line.

On State Street from 3rd Street to East Corporation Line.

On Jerusalem Street from 3rd Street west 1500 feet.

On Elder Street from 3rd Street West 200 feet and from 2nd Street west 250 feet. On Day Street from 1st Street East 750 feet. On Main Street from 3rd Street West 1000 feet and from 4th Street East 800 feet. In alley of block nine from 3rd Street East 200 feet, on Iowa Street from 3rd Street to 4th Street,

On Front Street from Hancock Street south 600 feet, on 1st Street from Iowa Street south 600 feet and North 450 feet. On 2nd Street from Jerusalem Street south 170 feet and from Elder Street south 300 feet and from Iowa Street north 450 feet and south 900 feet On 3rd Street from Dakota Street and from Iowa Street to Greutzmacher Street. On 4th Street from Jerusalem Street south 2050 feet. Morningside Road from 4th Street east 250 feet thence south 600 feet On Paul's Drive from it's intersection with Morningside Road east 500 feet. On Arthur's Lane from it's intersection with Morningside Road east 400 feet using 8-inch Sewer Pipe.

That said Plat and Schedule shows the amounts to be assessed against th property abutting on the streets, avenues, alleys, or private ground upon which said improvement was built, and against adjacent property within 300 feet of the nearest line of such streets, avenues, alleys or private ground and against the real estate and personal property of all Railway Campanies whose property lies within the above mentioned limits, and against all the property in Sanitary Sewer District No. 1 and present coroprate limits of the Town of Klemme Iowa.

ASSESSMENT NOTICE NO. 2.

That said Plat and Schedule showing the separate lots, pieces and parcels of ground proposed to be assessed for the cost of said improvement, the names of the owners thereof so far as known and the amount to be assessed against each lot. piece or parcel of ground, and against the Chicago Rock Island & Pacific Railway Company are now on file in the office of the Town Clerk of the Town of Klemme Iowa, and that within twenty days after the first publication of this notice, all objections to such assessment, or to prior proceedings on account of errors, irregularities or inequalities must be made in writing and filed with the said clerk. Any objections not so made will be deemed waived.

Date of first publication June 9 1921
John N. Day
Town Clerk.

What This Oil Stove Will Save YOU

Here is an oil stove that will save you failure a disappointments in your cooking and baking. will save the dirt and bother of a coal or wo stove and the shortcomings of the ordinary stove. Moreover, it will save at least one-third the usual fuel expense.

The stove that will save all this for you is t famous Red Star, Detroit Vapor Oil Stove--the al the-year 'round oil-stove that looks and works li a city gas range.

No other oil stove is like this one. It is an e tirely new-type of wickless burner which gene ates its own gas from kerosene, gasoline or dist ate---giving you 19 hours of intense, perfect he from each gallon of fuel.

And no other stove can be like the Red Star. For this scientific burner is pate ted---can be used on this stove only.

You can fry, roast, boil or bake anything on the

RED STAR
Detroit Vapor Oil Stove

in less time , with less expense and with more certain results. For example, y can roast a three and one half pound chicken in 70 minutes. Layer cake is bu perfectly in 25 minutes. Toast is beautifully browned in 8 minutes. Delicio flaky, biscuits are made in 12 minutes.

Think what a joy this stove will be for you! There is only one way to realize what a great improvement the Red Star is. That is, to come in and see for yourself. We will explain it to you, show you how easy it is to operate and prove to you that this is the most perfect stove on the market. Come in and see it now --- before you forget it.

CO-OPERATIVE MARKET SAVES FOR FARMERS

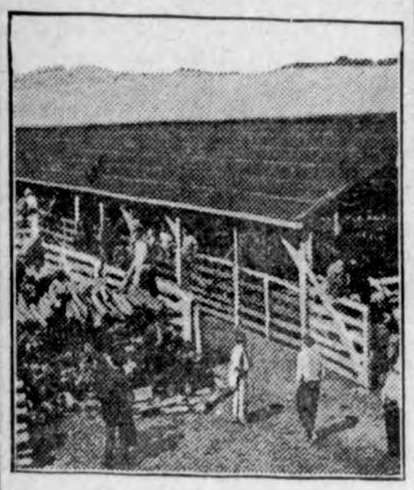
High Proficiency Shown in North Carolina.

Activities Last Season Confined to Purchasing Branded Barrel Covers and Selling Potatoes—Cotton Farmers Gain.

(Prepared by the United States Department of Agriculture.)

During the last year a farmers' exchange in Beauford county, North Carolina, saved its members and the farmers in the community between $75,000 and $100,000, according to a report to the United States Department of Agriculture.

The organization, formed to aid potato growers, has shown high proficiency in co-operation. Last season its



Yards for Live Stock in Southern Community.

activities were confined to the purchasing of branded barrel covers and the selling of potatoes. Thirty-five thousand barrel covers were bought at a saving of $700, and 126 carload lots of potatoes were sold with a saving of $50,000.

A great growth in co-operative marketing and purchasing has been one of the outstanding results of extension work in the South. County agents, assisted by marketing specialists, through marketing demonstrations and by instruction and advice, have aided local and county associations of farmers in the co-operative selling of many kinds of farm produce and live stock, and in the co-operative purchasing of a great variety of farm necessities.

Farmers have gained knowledge of methods and acquired confidence in their ability to do business on a co-operative basis. They are beginning to undertake definite business organizations on a county-wide and even state-wide scale for the marketing of their main cash crops, such as cotton, tobacco and peanuts.

Owing to the co-operative work in cotton grading, classing, and stapling, and information given as to the market value of the various grades and staples by extension workers, it is estimated that between $1,000,000 and $2,000,000 were saved to the cotton farmers of Texas during the year in increased returns.

PRESERVE EGGS IN SOLUTION

Where Sodium Silicate Is Not Handy Lime Water Is Satisfactory and Very Cheap.

Sodium silicate, or water-glass, is the most convenient preservative in which to store eggs for winter use, but where lime is easily procurable, lime water is very satisfactory and much cheaper than water-glass. Lime water is apt to roughen the shells of the eggs slightly, making the eggs somewhat less attractive in appearance than water-glass. Directions for using this lime water are given by the United States Department of Agriculture.

To preserve with lime, dissolve two pounds of unslaked lime in a small quantity of water, and dilute with five gallons of water that has previously been boiled and cooled. Allow the mixture to stand until the lime settles, then skim off, and use the clear liquid. Put clean, fresh, unwashed eggs in a clean earthenware crock or jar and pour the clear lime water into the vessel until the eggs are covered. At least two inches of the solution should cover the top layer of eggs. Keep the receptacle tightly covered to prevent evaporation and also to keep all foreign material out of the solution.

INFORMATION ON SHIPMENTS

Dealers Unable to Give Fair Quotations Because of Lack of Explicit Details.

Many shippers when writing to distributors fail to give sufficient information concerning their respective shipments, says the United States Department of Agriculture. The dealers, therefore, can not give fair quotations on the offered goods. Information, it is pointed out, can not be too explicit or detailed.

MAIN VIRTUE OF SANDY SOIL

Roots of Plants Pass Through It Readily, but It Dries Out Too Quickly.

The chief virtue of sandy soil is that the roots of plants can pass through it readily; its chief fault is that it dries out too quickly. Clay soil holds water well, but it tends to pack and harden. Both types of soil need stable manure—it loosens up clay and helps sand to hold moisture.

USE LABOR TO BEST ADVANTAGE

The Stacker Is a Modern Implement Utilizing Horse Labor for Putting the Hay on the Stack.

(Prepared by the United States Department of Agriculture.)

The hay crop, even when the labor supply is normal, causes more worry, anxiety, and disappointment than any other crop. The time for harvesting is comparatively short. Other crops require attention at the same time. And the weather is to be reckoned with.

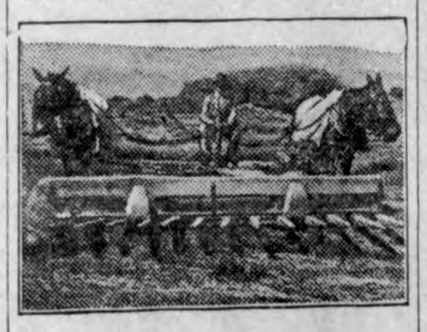
A great deal of labor is wasted every year during hay harvest, say specialists of the United States Department of Agriculture, not because of actual idleness on the part of the workers, but because labor is expended unnecessarily on operations that do not utilize it to the best advantage. If an old method can be superseded by a new one that will enable the same number of men to accomplish more work in the same length of time, or fewer men to accomplish the same work in the same length of time, it will mean more hay saved, more profit to the farmer, and a better condition for the country.

Shift Burden from Man to Horse.

Although there is a scarcity of man labor, there are still plenty of horses on most farms, and herein largely lies the solution of the problem. On farms where considerable hay is grown methods must be adopted by which the greater part of the heavy labor is done by horses. This will necessitate the general use of certain types of labor-saving machinery, some of them not so common in the East, which have been thoroughly tested and proved satisfactory in the western part of the United States. The small hay grower, however, need not make a very heavy investment in new haying apparatus, for by rearranging the working of his crew and using a little more horse labor for the hard work he can add considerably to the efficiency of his crew.

Here are some suggestions made by the specialists for avoiding of labor in haymaking.

Do not run two or more mowers close together. If the front mower has any trouble that causes it to stop, all of the mowers usually wait while repairs are made on one. There is a tendency, also, for drivers to waste



A Four-Wheeled Push Rake.

too much time talking when they stop occasionally to let the teams rest. A good practice when two or more machines are used is for each driver to lay off a "land" for himself and work independently, so there will be no interference from other machines.

Side Delivery Rake Is Best.

Do not turn hay by hand. It is too costly. The cheapest and most efficient way of stirring hay in the windrow is with a two-horse tedder. One man with a tedder will do more work than 12 men stirring with hand forks. It is not even necessary to have a man to run the tedder. A boy big enough to drive a team will do just as much work.

A one-horse rake operated by a man makes raking very costly. A two-horse sulky rake is better, but the side-delivery rake is best. When curing is done in the swath and a hay loader is used, the crew can start taking the hay from the windrow as soon as the side delivery has made one double windrow across the field. If the sulky rake is used, the crew will have to wait until the rake has gone several times across the field. In this matter the extent of the haying operations has to be considered, of course. On very small farms the use of the side-delivery rake might not be economy.

If the weather is clear and the hay is in proper condition, there will be no necessity for hay caps or for further labor till the hay is hauled. But hay caps will pay for themselves in one year when the weather is bad. They are more especially needed with clover, alfalfa, and pea vines, all of which cure slowly.

If hay is to be bunched, the hand method is too expensive. A two-horse sulky rake can bunch 30 acres or more a day and a boy can drive it just as well as a man. Even more labor can be saved, however, by using the push rake to bunch hay after it has been raked into the windrow. It is a good plan to have two men working together to round up the bunches, since more can be accomplished than when each works alone.

It is a waste of time to pitch hay onto a small hayrack on a high-wheeled wagon. Use a large hayrack on a low-wheeled wagon.

Loading hay with pichforks is the hardest, slowest, and most expensive way. The men are working constantly, but the horses are doing nothing most of the time. If a loader is used, the hardest part of the work is done by the horses and the men can handle about 30 per cent more hay.

Save Labor on the Stack.

The push rake furnishes the most economical method of hauling hay to the stack, barn, or hay press if the distance is not much more than one-fourth of a mile. One man, or a boy, with a good push rake and a team used to the work will handle three times as much hay as two men with a small rack on a high-wheeled wagon.

Stacking hay with a push rake and an overshot stacker mounted on wheels eliminates nearly all of the back-breaking work of the old pitchfork method. With a yield of one to one and a half tons to the acre, two men on the stack can easily handle all the hay brought in by three push rakes, accomplishing a vast saving in labor and hay over the pitchfork method. Another method not so good but still vastly better than the pitchfork method is a stacker equipment with a double harpoon fork. The outfit can be made at home and will cost very little compared with the labor it saves, but harder work is necessary to get the hay on the stack than with the overshot stacker.

When hay is to be baled from the field, one man by working in the afternoon, can round up enough hay which has been bunched by push rakes to keep the press going next morning until the dew is gone from the hay in the windrow. When the hay is not thus rounded up the crew will lose two hours or more on mornings when there is a heavy dew.

Carelessness in setting the press may result in loss of labor. When the press is properly set two men can get plenty of hay to it from the stack.

REDUCE LOSSES IN SHIPPING

More Careful Handling in Harvesting and Packing Spinach Is Urged by Specialists.

Losses in long-distance shipments of spinach can be greatly reduced by careful handling in harvesting and packing together with effective refrigeration in transit, according to specialists of the bureau of markets of the United States Department of Agriculture. Decay and deterioration in transit caused by the development of slimy soft rot cause serious losses to shippers in some sections.

"This decay develops rapidly in transit when temperature conditions are favorable," say investigators of the bureau. "It starts at places where the leaves have been bruised or wounded, and it very frequently follows attacks of blight or other field diseases. Other causes of deterioration in transit are yellowing and wilting of the leaves. Prompt handling and shipment at a low temperature largely reduce losses from these causes."

When barrels are used, it is advisable to scatter crushed ice in several layers through the container, a large layer being placed on top of the spinach next to the barrel head. Holes bored in the bottom of the barrel provide drainage. Shipments in baskets or crates carry best with a layer of crushed ice in the center of the container and another layer on top of the spinach just under the cover.

CHIEF CAUSE OF SWARMING

Lack of Ventilation and Space for Queen Bee to Lay Eggs Encourage Restlessness.

The main causes leading to swarming are lack of ventilation, lack of space for the queen bee to lay eggs, insufficient room for storing honey, and over-abundance of drones or a queen bee that has become too old. To prevent swarming therefore, these conditions must be avoided, suggests the Extension Service beekeeping specialist. The queen alone is normally capable of laying eggs, and for this reason swarming is necessary to make new colonies and perpetuate the race. The old queen always comes out with the first swarm.

POULTRY

COMFORT FOR SITTING HENS

Give "Broodies" Nests Where They Will Not Be Disturbed During Period of Incubation.

(Prepared by the United States Department of Agriculture)

There are several ways to tell when a hen is becoming broody and wants to sit. Soft, downy feathers are left in the nest; the hen stays on the nest longer when laying. On being approached she will remain on the nest, making a chucking noise and ruffling her feathers. When one is reasonably sure that the hen is broody, and her breast feels warm to the hand, she is ready to be transferred to the nest previously prepared where she is to sit.

At this time it is advisable to dust the hen thoroughly with insect powder. In doing so hold the hen by the feet with the head down, working the powder well into the feathers, especially those around the vent and under the wings. The sitting hen should be dusted again on or about the eighteenth day of incubation to be sure that no lice are present when the chicks are hatched. Powder should also be sprinkled in the nest. Sodium fluorid may be used for the purpose, say poultry specialists of the United States Department of Agriculture.

When possible the nest should be in some out-of-the-way place, where the hen will not be disturbed. Night is the best time for moving the hen from the regular laying nest to the one she is to sit on. She should be handled carefully. A china egg or two should be placel in the nest, and a board or a covering may be placed over the nest so that the hen will not get off. Toward the end of the second day go quietly to the nest, leave some feed and water, and remove the covering from the top or front of the nest, so that she can come off when ready. The best feed for the sitting hen is whole corn or wheat, or both. Should she return to the nest after feeding, replace the china egg with those to be incubated. The nest should be slightly darkened, as the hen is then not so likely to become restless.

In cool weather it is best not to

Dusting the Sitting Hen With Insect Powder.

put more than 10 eggs under a hen. Later in the spring, however, from 12 to 15 eggs can be set, according to the size of the hen.

When several hens are sitting in the same room they should be separated by partitions and should be kept on the nests and allowed to come off only once each day to receive feed and water. A hen that does not voluntarily come off the nest should be taken off. As a rule hens will return to their nests before there is any danger of the eggs chilling, but if they do not go back in half an hour they should be put back.

Examine and clean the nest carefully, removing any broken eggs and washing those that are soiled. Nesting material soiled by broken eggs should be replaced with clean straw, hay, or chaff. Nests containing broken eggs soon become infested with mites and lice, which will cause the hens to become uneasy and leave the nest. This is likely to be the cause of the loss of valuable sittings of eggs. When a nest is infested with mites, the hen, if fastened in, will often be found standing over rather than sitting on the eggs.

Eggs laid late in winter or early in spring are frequently infertile, and for that reason it is advisable to set several hens at the same time. After from five to seven days' incubation, the time depending somewhat on the color and thickness of the shells, the eggs should be tested, the infertile and dead-germ eggs removed and the fertile ones returned to the hens. Thus in many instances all the eggs remaining under several hens may be placed under one or two, and the hens from which the eggs were taken may be reset. For instance, 30 eggs are set under 3 hens at the same time, that is, 10 under each hen. At the end of 7 days, at which time the eggs should be tested, it may be found that 10 are infertile or have dead germs, leaving only 20 fertile eggs. These 20 eggs can then be put under the two hens, and a new sitting placed under the third hen.

FELT LIKE AN IRON BAND AROUND HEAD

Mrs. Osborne Says She Shudders When She Thinks How She Suffered.

"For years," said Mrs. V. B. Osborne, of 718 Lancaster Ave., Lexington, Ky., "I have been in a run-down condition; nervous, weak and dizzy. I was actually so nervous that any sudden noise or excitement would produce a palpitation of my heart that frightened me. I absolutely could not climb stairs, for to attempt such would thoroughly exhaust me.

"I had nervous headaches and when they came on it seemed that an iron band was drawn tight around my head. I now shudder when I think of those headaches. My stomach was weak and I could not digest the lightest liquid food. Any food of a solid nature caused nausea and the sickening sensation remained for hours.

"My misery was almost unbearable. My sleep was never sound and I was worn out all the time. My condition was indeed a very deplorable one. I finally sought treatment in Cincinnati, but nothing helped me one particle. I was on the verge of giving up in despair when a neighbor pleaded with me to try Tanlac. I obtained a bottle of the medicine and began its use.

"I began improving at once and soon felt my nervousness and dizziness disappearing. Then my headaches left me and I realized my strength had returned. My appetite and digestion improved and I am now so much better in every way. This Tanlac is a wonderful medicine and the only one that ever really helped me. I hope every poor woman who is suffering as I did will try it."

Tanlac is sold by leading druggists everywhere.—Adv.

Calling Teacher.

"Yes," said the teacher, "the egg represents all that is gentlest in creation—the cooing doves, the tuneful song birds and the stately swan. Johnny, what other gentle things are hatched from eggs?"

"Snakes, alligators, sparrow hawks and eagles," said Johhny.—Edinburgh Scotsman.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

In Time.

"We arrived just in time."

"What do you mean?"

"I could tell from the way they acted when they let us into their house that they were just in the midst of a fine little family quarrel."

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

Financial Backing.

"Your friend the reformer seems to be enjoying great prosperity these days."

"He had a stroke of luck."

"What was it?"

"He ran across a very rich person who had a troubled conscience."

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented convenient, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Adv.

Woman Doctor of Music.

The only woman who has ever received the degree of doctor of music from Oxford university is Dr. Emily Daymond, who is a member of the staff of the Royal College of Music.

YOU CAN WALK IN COMFORT

If you Shake Into Your Shoes some ALLEN'S FOOT-EASE, the Antiseptic, Healing powder for shoes that pinch or feet that ache. It takes the friction from the shoe and gives relief to corns and bunions, hot, tired, sweating, swollen feet. Ladies can wear shoes one size smaller by shaking Allen's Foot-Ease in each shoe.—Adv.

The things that delight the heart of the wife are apt to deplete the purse of the husband.

Klemme and Vicinity

Mr. Rob Wilson from Cornelia was transacting business here Tuesday.

Mrs. J. Jorgenson, of Garner was visiting in Klemme today.

Mrs. Harry Forestahl from Belmond was a Klemme caller Tuesday.

Mrs. George Coburn, of Cornelia was a Klemme visitor Tuesday.

Mr. and Mrs. Weigand from Belmond were visitors here yesterday.

Mr. Lyons from Estherville was in Klemme yesterday.

Mr. Rolson from Forest City was in Klemme yesterday.

Hod Lawhorn was over from Garner Friday.

Irwin and George Lau drove to Garner Tuesday on business.

Mrs. Frank Clark of Goodell was visiting in Klemme last Friday.

John Haaf from Garner was a caller here last Thursday on business.

Mr. Purdy o Belmond was a business caller here last Thursday.

Mrs. John Rust from Goodell was a Klemme visitor Saturday.

Mrs. Cal Thomas and daughter of Goodell were visiting here Saturday.

Mrs. Saatoff from Belmond was a caller in this city Monday.

Mrs. G. P. McCullough was a Garner visitor between trains yesterday.

Ed. Yahknke of Buffalo Center was here Tuesday visiting friends.

Miss Clella McCullough of Garner was an over Sunday visitor with her brother Gearold and wife.

Howard Wiles and Wm. Lau drove to Mason City Friday where Wm. had business to look after.

Mr. August Lau went to Garner Friday morning on a business mission.

Mr. Henry Stromer and son Paul went to Garner last Saturday morning on business.

Ottis Smythe left the fore part of the week for Armstrong, Ia., where he will work this summer.

John Hartman and family of Iowa Falls were visiting with Mr. and Mrs. Kahrs Sunday.

Isaac and Harve Sweigard of Garner drove over here Saturday vning for a short visit with old freinds.

There was a barn dance last Saturday evening at the Fred Radloff farm All report a fine time.

Fred Musfelt and daughter, Mrs. Lanahan were Garner visitors Monday between trains.

Mr. and Mrs. August Ridder are visiting their daughter, Mrs. Frank Ward, at Burt, Iowa, this week.

Mr. and Mrs. J. B. Spitler autoed to Clarion Monday. returning Tuesday morning.

Mr. and Mrs. A. G. Koerner and family drove to Britt Tuesday evening.

Joe Smith and wife and Esther Zelman of Meservey were here on business yesterday morning.

Mr. and Mrs. Ira Shoemaker from Mason Cty were Klemme visitors yesterday afternoon.

Mrs. Gee was up from Goodell last Friday for a visit with her daughter, Mrs. Chris Gram.

Mr. E. S. D. Kahrs was a business visitor at Estherville last Thursday between trains.

Mrs. Fred Chase and daughter of Goodell were Klemme shoppers and visitors last Friday.

Will Jurgemeyer is enjoying a visit from his mother who came from Garrison, Iowa, last Friday morning

Mr. George Hall of Charles City, was a business visitor in Klemme last Friday.

Mr. and Mrs. Harthan and family of Ventura were calling in Klemme lass week Thursday.

Ruth and Verna Katter of Garner visited with Klemme relatives last week from Thursday until Monday.

Mrs. Will Gast and daughter, Miss Myrtle f Garner were visiting Klemme friends last Saturday.

Mrs. J. D. G. Houghton of Goodell was a Klemme visitor Saturday between trains.

Mr. and Mrs. Harvey Sweigard of Garner were visiting with Klemme friends last Saturday evning.

Mrs. Wilbur McGe's folks, his father and other relatives were here last Saturday.

Mrs. Wm. Kraus and daughter of Garner were visiting Klemme friends Saturday.

Mrs. Meinderts came over from Meservey Monday for a visit with Klemme relatives and friends.

Mr. and Mrs. John Atherton from Belmond were Klemme callers Monday.

Mrs. George Zelie and Mrs. John Zelie from Goodell were visiting in Klemme Monday.

Walter Yahnke and family of Buffalo Center drove to Klemme Sunday for a visit with relatives and friends.

Harold Gruetzmacher and a young man by the name of Reed were visiting Harolds parents here Sunday.

Mrs. Tony Ahrenkeil and the baby came over from Goodell yesterday for a visit with Klemme folks.

Mr. and Mrs. Joe Wenck and Mrs. Ed. Wenck, of Garner, were visiting in Klemm Wednesday afternoon.

C. W. Wiles of this place and Dick Bamman of Garner returned from a business trip at Sioux City Monday. They drove in Mr. Wiles car.

Miss Mildred Johnson was a passenger to Garner Tuesday morning where she had some dental work done.

Notice—Please return all empty cement sacks as soon as possible. Farmers Lumber Co., Inc., Olof Brynteson, Mgr. J-9-tf.

A number of Klemme Masons drove over to Garner this afternoon to take in the special work in the Council Degree of Masonry.

Mr. and Mrs. Howard Doyle and Miss Glenna Gruetzmacher drove to Britt Tuesday evening to attend the show.

Will Schlichting and daughter of Goodell were visiting in Klemme last Friday. They were accompanied by Miss Thelma Carpenter.

Mr. and Mrs. Henry Church and daughter, Lois, of Garner were visiting with Klemme friends last Friday between trains.

Mr. and Mrs. Chris Jacobs and Mrs. Chas. Papousek, of Garner were visiting with Klemme folks Saturday evening.

FOR SALE—Good seven room house and two lots, good well, located across from the school house. Mrs. Wilbur McGee. J-9-tf

A good crowd turned out for the band concert at the Park last night. The band boys are giving some fine music now.

Mr. and Mrs. Audrey Church of Forest City were Klemme callers on Monday. Mr. Church is a piano tuner.

Chas. Vlau was at Garner Friday on business. Charlie is having a new pair of "store teeth" made so he can eat beef-steak again.

Mrs. J. E. Baumgartner returned from the hospital at Iowa City last Friday morning. She is greatly improved in health.

Fred Blank left for Ward, South Dakota Saurday morning where he has a station with the Rock Island railroad.

Mr. and Mrs. Clifford Swartz are rejoicing over the arrival or a nne eight pound baby boy who arrived at their home Tuesday.

Mrs. A. H. Meyer left today for Flood Creek, Iowa, where she will attend a meeting of the Womans' Foreign Missionary Society.

George Fents and Miss Cary Fents of Eldora, Iowa, drove up here Sunday for a visit with the A. D. Gimer family.

Frank' Carpenter and "Scotty' Irwing shingled the south roof on the Methodist Episcopal church the fore part of the week.

M. O.Hocum and Rev. A. H. Meyer drove over to Mason City Tuesday where the Reverend went to get tents for the camp meeting which will be held at the camp grounds at Garner June 21st to June 26th.

Mrs. T. Davis, of Lincoln, Nebr., and Mrs. H. H. Chapman, of Kansas City, Mo., came last Friday or a visit at the R. A. Jorgenson home. Mrs. Davis is the mother of Mrs. Jorgenson and Mrs. Chapman.

Donald Nssen came from Sioux City, Iowa this morning to spend a few days visiting with the J. N. Day family and other relatives and old friends. Donald is attending Morningside College there.

Joe Johnson and family and th A. D. Gimer family helped celebrate the first wedding anniversary of Mr. and Mrs. Clarence Johnson, their son and daughter. The event took place Sunday.

Mr. and Mrs. D. D. Ross and their daughter Bernice drove over from Garner yesterday afternoon for a visit with relatives and to attend the funeral.

TO ALL TO WHOM IT MAY CONCERN:

The commissioner appointed to vacate a street between Blocks 21 and 22 in Village of Amsterdam Hancock County, Iowa and running through the lands owned by F. A. Gee, has reported in favor of the vacation thereof, and all objections thereto, or claims for damages, must be filed in the auditor's office on or before noon of the 16th day of August 1921 A. D. or such street will be vacated without reference thereto.

Chris Jacobs, County Auditor.

ncock County Farmers Will Have Big Picnic July 4

Farm Bureau Picnic.

ns are well under way for the Bureau Picnic to be held at r at the Camp Grounds July

irman T. R. Riehm, of the Pic- committee, has appointed the ing sub-committees:

rts Committee, whose duty is range for all sports such as shoe pitching. ball games, tug r, and other sports, Clair Pol- Chairman; Ole Grau, Gus

ance Committee, whose duty it take care of paying the bills ork out some plan of financing icnic, J. N. Sprole, Chairman; n Engstler. Frank Oleson, Chas r, Wm. Nall, Atony Baker.

nd Committee, whose duty it e to arrang for the stands and ssions, Chas. Grau, Chairman; Conway, Art Kluckhohn..

gram Committee, whose duty ll be to arrange the program as speakers. music, band, etc., Elling, Chairman; Mrs. E. J. llinger, Mrs. C. H. Moe, Clar- Lawharn, A. W. Anderson.

aker Committee, who is suppos secure the principal speaker, Nutty.

tertainment and Grounds Com- e. whose duty it is to see that rounds are in shape before and the picnic, and also to see that one is entertained Chris Nelson man; J. J. Urich, S. B. Durant Katter, Frank Jakoubek.

vertising Committee, whose it is to see that the picnic is erly advertised, S. A. Barber. man Fred Oxley, Paul Mandler.

itation Committee, who shall hat the people of their respec- towns are extended an invita- everyone to act at his own town Fisher. Britt; E. Valley, Wo- Wilbur Sparks, Crystal Lake; Oxley, Corwith; W. H. Darah, wha E. J. Schneider, Goodell; Arnold. Klemme; George Law- Garner; V. P. Gasperson, Mil- M. C. Lackore, Hayfield; Frank n, . Duncan.

coration Committee, whose it is to decorate the grounds for icnic, Ed. Quintus, A. R. Ross o Hoddens.

is hoped that the chairman of one of these committees will a meeting and make arrange- s at once.

r further information , see Mr. n. Chairman, or the county t.

is hoped that every Farm Bur- member will make an effort to d the picnic and will extend an ation to his neighbor who does happen to be a Farm Bureau ber Every one is welcome y one is welcome whether he is rm Bureau member or not. e will be good speaking and a program, as well as sports,con- for all.

meeting will be called by Chair- Reihm at Garner some time and make final arrangemnts committee men will be notified is meting and should attend.— Farm Bureau Exchange.

e Committees have all been with their respective line of and have arranged some very esting things.

e regular program will be ann- ed later, but it might be well to hat the program Committee has parade led by the band, follow- y the Farm Bureau officials, then by the Farm Bureau mem- of the different townships in r, beginning with the township the largest number of members have also arranged for some interesting entertainments, and secured the Hayfield Band to ish music. The speaker will be unced later.

e Sports Committee has made ngements for a number of in- sting sports.

ball game will be held between er teams of the different town- s.

To Pitch Horse Shoes For Championship.

ne of the biggest events of the along this line will be the Horse Pitching Contest where town- will compete for the County Championship, with the idea of selecting a team to represent this county at the Contest at Des Moines. each township will be allowed to enter one team. It is hoped that those interested in this sport will get together and select their two best men to represent their township. Up to date rules governing the Horse Shoe Pitching can be obtained by writing to the Farm Bureau office.

A Tug-of-War has been arranged for between the East and West sides of the county and many other interesting contests along the sports line will be given, such as greased pig, greased pole, sack races, athletic contests of all kinds, as well as many contests for boys and girls.

Stands will be on the grounds where refreshments can be bought at very reasonable prices, but no regular dinner will be served, and everyone is requested to bring full dinner baskets.

The Committee is expecting one of the largest crouds ever gathered in Hancock County. Everyone is cordially invited to attend whether they are farmers or not.

Coffee will be furnished free, with sugar and cream. Bring your cups. —By Co. Agt. L. T. Nutty.

Klemme Well Reprensented At The D. M. Shrine Conclave

Klemme sent quite a number to the big Shrine Conclave at Des Moines this week. Shriners, Masons and visitors from Klemme were seen on the streets of the capital city.

Those who went to Des Moines were M. O. Hocum and P. M. Griesemer, Shriners; Avis Hocum who visited with her aunt there, and Rev. A. H. Meyer. They went in Hocum's car Monday morning. Another auto load of Masons made up of Dr. Missman, Dr. Thomas, C. G. Waterman and J. N. Day drove down in the former's car Monday noon. Marlin Croner, Mason, and visitors Henry Suckow, Ed. Jacobs and Vern Smith left in Croner's car Wednesday a. m.

All report that Des Moines treated them royally and that the Shrine doings was the biggest and grandest gathering they had ever seen. All amusemens were free and there was something doing all the time.

Famous Rainbow Band ... Coming to Britt

BRITT, Ia., June 16— On June 26, 1921; Morgan's Rainbow Division Band, formerly the 168th Infantry Band, will give two concerts at the fair ground at Britt, Iowa under auspices of Britt Post No. 315, American Legion. The first will be a Matinee commencing at 2:30 P. M. At 7:00 P. M. there will be a street parade, and at 8:00 P. M. concert at the fair grounds.

The grounds and amphitheatre will be brilliantly lighted for the convenience of spectators.

Admission $.55 adults. $.25 children

It will be recalled that this is the same band that gave the concert at Britt last summer which attracted the largest crouds to the fair ground ever known in its history, andwhich pleased all who heard it. The American Legion has received requests from various parts of the country to bring this band back again this year, and in pursuance to these requests, the Legion has again secured this band.

Remember the date -Sunday June 26

Let everybody come and enjoy the carnival of music and aid the American Legion.

Respectively,

BRITT POST NO. 315,

AMERICAN LEGION

The road paving job east of town is going along well considering the weather they have had to contend with of late. There is more or less grading done all along the road from the east limits of Garner to the plant about three miles east of town. —Garner Signal.

Barnyard Golf Rules

NATIONAL RULES FOR HORSE SHOE PITCHING

1—The standard distance shall be 40 feet between pegs.

2—The ground shall be as level as possible. In indoor pitching, contestants will pitch in boxes. Boxes not to exceed 6 in in height.

3—The pitcher's box shall extend three feet on either side, to the rear and in front of the peg. The ground therein shall consist of clay, well dampened and dug up to a depth of six inches, leveled and tamped down A contestant when pitching may anywhere inside the pitchers box. Any pitcher delivering a shoe outside the pitchers box shall forfeit the value of that pitch.

4—The pegs shall be of iron, one inch in diameter, lean one inch toward opposite peg an extent 8 inches above level of the ground.

5—At the beginning of a game the contestants shall toss a coin for first pitch, the winner shall have the choice of first or follow.

6—At the beginning of the second game the loser of preceeding game shall have first pitch.

7—The shoes to be used must not exceed 7 1-2 in. in length or 7 in. in width. No toe or heel calks shall be over 3-4 in. in height. No opening between caulks to exceed 3 1-2 in. inside measurements. No shoe shall exceed 2 lbs. and 8 ounces in weight.

8—In four handed games partners shall have the right to coach each other. Those not in the game are forbidden to coach or molest, or in any way interfere with the pitchers.

9—No contestant shall walk across to the other peg and examine the position of the shoes before he makes his first or final pitch. All contestants must pitch both shoes from the pitcher's box into the opposite pitching box or forfeit a point to his opponent.

10—Wrapping fingers with tape is allowed.

11—A regulation game shall consist of 21 poins, and the contestants first scoring this number shall be declared the winner.

12—The most points that a contestant can score in a single game is 21 points, but all ringers are credited to him.

13—A shoe that does not remain within 8 inches of the peg shall not be counted.

14—All games in national tournament shall consist of 21 points. Each contestant shall pitch each other contestant three consecutive games of 21 points each. The contestant winning the most games will be declared the winner.

15—The closest shoe to the peg shall score one point. If both the shoes are closer than either of an opponent's they shall score two points.

16—A ringer shall score three points. To be a ringer a shoe must encircle the peg far enough to allow a straight rule to touch both caulks, and clear the peg.

17—Two ringers are the highest score a pitcher can make and shall count 6 points.

18—All equals shall be counted as ties. That is, if both contestants have one shoe each equal distance from the peg or against it, or ringers, they are tied, and the next one closest shoe counts.

19—If one contestant should have two ringers, and the other one, the pitcher having the two ringers shall score 3 points.

20—In case of a tie on all four shoes, such as four ringers, or four shoes each 1 inch from the peg, no score shall be recorded, and the contestant who pitched the last shall be awarded the lead.

21—Calipers shall be used for all measurements.

22—In case of any dispute, or where the rules do not specifically cover a disputed point, the referee or committee in charge shall have full and final jurisdicion.

Paste the above rules in your hat and go by them in playing the old sport.

It's a long time between drinks, especially for those lying in the cemetary as a result of poison liquor.

Married Yesterday

SAMPSON—BELSTNER

Yesterday, Wednesday June 15th, at high noon occured the marriage of Miss Viola Pearl Sampson to Mr. William Fred Belstner.

The wedding took place at the home of the bride's parents here, Mr. and Mrs. Louis Sampson, and was officiated by Rev. A. H. Meyer of the First Methodist Church.

The Bride was attired in a pretty gown of fairy spun and carried a Bridal Bouquet. The Groom wore the conventional blue serge.

After the ceremony a bounteous dinner was served at one o'clock. The guests present were nearly all close relatives of the couple and were: the bride's parents, her sister Mrs. Lee Klotchbock and family of this place; Miss Minnie Belstner, a sister of the groom; another sister of the bride Mrs. Chas. Lenz and her little girl from Spooner, Wisconsin; her siser Florence and husband Harry Schmidt and little girl of Ft. Atkinson. Wis.; and Emil Kraus, wife and daughter of this place.

Harry Schmidt and Miss Minnie Belstner attended the Bride and the Groom during the ceremony.

Mrs. Belstner is well known here as she spent most of her life in this city. She is an accomplished young lady. The past year or more she spent at Ft. Atkinson, Wis., where she had a position in a large store and it was while in that city that she became acquainted with Mr. Belstner.

Mr. Belstner is not very well acquained in Klemme, however, he appears to be a very fine young man. He is a molder in a factory at Ft. Atkinson and is a skillful mechanic.

The happy couple left last evening for Ft. Atkinson where they will make their future home.

The Times extends congratulations and joins their friends in wishing them a happy journey through life.

KLEMME BUSINESS BOOSTERS PUT UP HIGHWAY MARKERS

Klemme Arrow Indicators All Over County

The arrow signs showing the direct roads leading to Klemme from a radius of 25 to 30 miles in all directions have been put up. The arrow signs have the word "Klemme" painted in black on a white background and the arrow indicates the number of miles to Klemme. They have been put up at every cross road main roads and by roads nearly all over Hancock County part of Wright and Cerro Gordo counties and will enable all travelers to easily find the road to Klemme for they can follow the arrows and take a direct route to this city from any near point.

Do Not Destroy the Signs

Boys and others are requested to help preserve the signs and not to tear them down or use them for targets. They have been put up for the purpose of helping autoists to find direct routes and good roads and are a help to everybody. The entire cost of putting up and making the signs was borne by the business men and no part of the money was given by the Highway Commission or the county for the work.

Live business men helped to make the signs and the neat work was done by R. M. Thomas of this city. So please help to preserve the signs that are for the benefit of the public as they cost a lot of time and money in general.

Welcome Signs Also Put Up

All gates to our live little city also greet the visitor with a large wel come sign and on his leaving the town will see the words, Good Bye, Good Luck, Come Again." The sign is a forerunner of the spirit of Klemme and all visitors will be cordially welcomed and treated in such a way that they will take home with them a most favorable impression of Klemme.

Rev. Buriff of Klemme, Iowa, preached in the Belmond Methodist church last Sunday, Rev, Edge ,the local pastor, preaching the same day in Klemme. —Belmond Herald Press

Forest City Woman Describes Pueblo's Big Flood

EX-FOREST CITYAN ... DESCRIBES FLOOD

Mrs. Ruby Ellis in Train as Pueblo Water Struck it; Car Turned Over.

FOREST CITY—Mrs. Ruby Ellis, a sister of Frank P. and Emory J. Oleson was in the flood disaster at Pueble, Colorado., Mrs. Ellis was born here but has been away a long time. Her description of the predictament of herself and little girl is graphicly told:

"We were in the car next to the engine and the train pulled out of the passenger station to a point near the river. It seemed as though we were only 25 feet from the river bank. The car turned over gradually, as the water rushed under the bottom.

The other coaches turned over one by one shortly afterwards. The car turned to the right and my little daughter, Mildred Mary, and I were thrown to the bottom of the car in the water. I struggled to the surface and found mattresses and bedding over me. Then I found the little girl and pulled her to the top of the car which was not yet filled with water. We stood on the rods of the upper birth and held to rods on the top side of the car.

"The water arose rapidly, until it had reached my chin, my little girl clnging to my neck. Fortunately the ventilator windows were open and we were able to breathe freely. I had given up hope of life when the water came to my chin. Mildred had not cried or complained up to this time, and she asked: 'What shall I do, mother?' and I told her to pray Then she repeated over and over: 'Jesus, I trust you.' It seemed only a few minutes then until the water began to recede. We made our way to the end of the car where someone had broken out a window frame, and were being helped out side of the coach by the rescuing party, and were taken out and to the Uuckolls packing plant."

Mrs. Ellis account was published in the Register, and she did not know how many were drowned in the two trains, but some who were in her coach she did not see afterwards. She lives at Wichita, Kansas and is in the employe of the Missouri Pacific railroad company.

GARNER LEGION LANDS BIG WRESTLING BOUT

Prehn and Parcaut to Hit the Mat July 1

Dr. G. A. Bemis, post commander of the Legion at Garner, has landed what will undoubtedly be greatest wrestling match in the state of Iowa this year when he finally succeeded in getting a match to take place at Garner on July 1st between the two light heavyweight Kings of the wrestling game in Iowa. Both of the Iowa boys will go on he mat at Garner, won high honors in the army Parcaut winning the light heavy weight for Uncle Sam's boys and Prehn taking all the honors and medals in the middle weight class. Ralph Parcaut is the wrestling coach at the Iowa University and Paul Prehn holds a like position with the University of Illinois. They both claim to be King of this class and the scrap they will put up at Garner will be something out of the ordinary and will attract state wide attention for this match has the "prize meat" for over a dozen wrestling centers of the state who have tried to land the match. Prehn is a Mason City City boy and Parcaut comes from Spencer. Many wrestling fans here have seen these men in action before they anticipate that the match at Garner will be the biggest thing ever pulled off in this state.

BERLE ERWIN COUNTY CLERK

Elected by the Board of Supervisors at Meeting Monday.

Berle Erwin, second son of Mr. and Mrs. Tom Erwin of Britt. was named by the Board of Supervisors Monday as Clerk of the District Court to fill out the unexpired term of A. E. Baumgartner. At the time of Mr. Baumgartner's death Joe Knadler was appointed by the court to serve until the Board meet and made a selection.

There were several candidates for the office. On the first ballot three candidates received one vote each. Meyer voted for Erwin, Lawhorn for Miss Josephine Baumgartner, a daughtr of A. E. Baumgartner, and Berhow voted for Joe Knadler. The vote stood this way for several ballots, when Lawhorn changed his vote to Erwin, electing him.

Mr. Erwin is a fine young man, with a wife and one child. He saw service in the World War, and was oversea for a long time. He is deserving the office. and is no doubt a wise choice. He will move to Garner as soon as he can find a suitable house. Who is his deputy we have not learned definately.— Signal

NO FEAR; COMET IS GOING TO MISS US TEN MILLION MILES

CAMBRIDGE, Mass., June 15 — Winnecke's comet the expected near month has caused much comment, approach of which to the earth this will probably not come within ten million miles, according to the information received at the Harvard college observatory, from astronomers in various parts of the world, who was studying its motion closely.

The comet made its nearest approach to the sun on June 13, and will be at its brighest at about the same time. It is doubtful however, whether it will be visible to the naked eye.

Several astronomers predict a meteoric shower in June 27, as a result of the comet's approach.

Depot Was Robbed at Hayfield

The depot at Hayfield was broken into and robbed on the night of June 6th and money orders and express orders were found missing the next morning by the agent; so we were told by agent M. O. Barr here the other day.

WASHINGTON NEWS ITEMS

WASHINGTON, D. C. June 15 1921

The Curtis Bill increasing the rate on farm loans to five and ond half per cent without increasing the rate to the farmers passed the Senate and was sent to the Committee of Banking and Currency of the House from where it is expected to be reported within the next ten days.

The Budget Bill has been passed by the House and Senate and has been signed by the President.

The Sweet Bill passed the House last night without a dissenting vote This is the bill supported by the American Legion that has to do with the consolidation of all Bureaus affecting relief for disabled soldiers.

John T. Adams of Dubuque, Iowa was elected National Chairman of the Republican party this week at a meeting of the National Committee here in Washington.

Chairman Good of the Appropriations Committee resigned his seat in the House this week to take up the practice of Law with a large firm in Chicago. He was given a great Ovation in the House this morning.

Six Iowa boys will receive their degree of Bachelor of Laws at Georgetown University on the 14th of June. Among them is T. J. Enright of Fort Dodge, Iowa who is Secretary to Mr. L. J. Dickinson. Mr. Dickinson has been very instrumental in teaching Iowa Law to these boys at meetings of their 'Iowa Code Club' in Senator Cummins office.

Editorial Comment

Let's Find Out!

Why—and how—are the prices of foodstuffs tripled between the farmer and the city consumer?

Who gets the difference—and what for?

What share of this increase is due to necessary costs of distribution, to fair profits by middlemen, and what part represents the useless costs and excessive profits?

These questions, often raised but never settled to the satisfaction of either farmer, consumer or dealer, may find an authoriative answer if the special congressional inquiry, proposed by a concurrent resolution now pending in Congress, is approved.

The resolution has been favorably reported by the State committee on agriculture and approved by the rules committee of the House.

Its passage, declares C. S. Barrett, chairof the National Board of Farm Organizations, will be asured if producers and consumers will unite in a demand on Congress for its passage.

"The farmer ought to know why he only collects about 38 cents for every dollar his products bring when sold to the ultimate consumer," says Barrett. On the other hand the consumer ought to know why he has to pay on the average nearly three times as much as the farmer receives."

The creation of this commission would give some reason to believe the answer would be found. If the commission be in earnest and its investigation be thoro, it should be able to put its finger on the persons and institutions that have been collecting unjustly.

—o—

Iowa's Undergroud

"The Underground Railroad in Iowa," writes Jacob Van Elk in the May issue of "Palmimpsest" published by State Historical Society of Iowa, "was only a part of a complete system with trunk lines and branch es which extended thru practically all of the northern states. The main line entered the state in its southwest corner near Tabor, passed thru the towns of Lewis, Des Moines, Grinnell, Iowa City, West Liberty, Tipton, DeWitt, and Low Moor, and crossed the Mississippi river at Clinton to connect with a route in Illinois."

All along the route were men ready to give refuge to escaping slaves and transmitt them when possible to the next station on the road. These way stations or points of temporary refuge were sometimes rooms in a man's house as in the case of the "liberty room" of Josiah B. Grinnell's home, sometimes in attics, or in barns, or in caves in a back yard. Usually the negroes were passed on to the next station by night. Sometimes they were transported in covered wagons beneath piles of produce. Often they took their way under cover of the dark, afoot and alone. Once started on the route, however, they received a hearty welcome at every station, and every assistance possible on their journey toward freedom.

—o—

Kicking at the Cost

Americans are quite given to boasting of their large expenditures for public education. From the point of view relativity the boasting does'nt square with the facts. We spend something less than $1,000,000,000 a year on public education.

In 1920 our tobacco bill was more than double this and for face powder, cosmetics, perfumes, etc., we spent three quarters of a million. For every dollar we spend on public education, we spend 25 cents for ice cream, 50 cents for jewelry, 35 cents for soft drinks and 30 cents for furs.

The $50,000,000 a year we spend for chewing gum is two and a half times the total amount of expenditure for normal schools and almost exactly the same as all state and city appropriations for higher education.

There are those who are fond of saying that our schools and education cost too much but we seldom hear that tobacco costs too much or that cosmetics, soft drinks, ice cream, and alleged entertainments are anything but reasonable.

—o—

Sees European Recovery

Steady, economic improvement in Europe, outside Russia, is indicated by the progress made in repealing restrictions on consumption, Secretary of Commerce Hoover said this week. Food rationing has been abandoned in most European countries, Mr. Hoover said, and within a few months probably can be abandoned in all but Austria.

Clothing is the exception to the general progress toward readjustment, he said.

"The clothing of the people in Central and Eastern Europe is worse than at the armistice," Mr. Hoover declared. "It is reasonable to expect the next step will be improvement in clothing. Such an assumption implies larger consumption and imports of textiles."

Except for the British and Silesian coal strikes, there has been great improvement in production and distribution of coal. Transportation is so far advanced as to approximately serve commercial necessities in the most countries.

—o—

Experience

Observation more than books, experience rather than persons, are the prime educators. Books aid as one has the wit to use them to advantage, persons most when seeming not to serve us. Experience converts us to ourselves when books fail us, and this oftenest against our knowledge and consent. And it remains questionable how far our attainments further or hinder Nature's intentions, the art of education being still so complicated and incalcuable a matter that with the experience of past times to aid us, not a few of the most striking characters have been formed, untrammeled by the schools, under the more direct and potent influences of life and things, operating under the pressure of necessity and seeming accident.—A. Bronson Alcott.

—o—

Wit and Humor

Humor is the describing the ludicrous as it is in itself; wit is the exposing of it, by comparing or contrasting it with something else. Humor is, as it were the growth of nature and accident; wit is the product of art and fancy. Humor, as it is shown in books, is an imitation of the natural or acquired absurdities of mankind, or of the ludicrous in accident, situation, and character: wit is the illustrating and heightening the sense of that absudty by some sudden and unexpected likeness or opposition of one thing to another, which sets off the quality we laugh at or dipise in a still more contemptible or striking point of view.--William Hazlitt.

—o—

When Youth and Inexperience start out to reform the world they are always shocked to discover that the world doesn't want their kind of reform, but Age and Experience, bent on the same mission, try to conceal the fact that they are attempting a reform and by appealing to reason or prejudice sometimes accomplish that which they seek.

—o—

A Swiss has arrived in Paris after traveling around the world on a bicycle. He took seven years for the trip and covered 35,000 miles. But that's too slow for the average American—they will want to do the same stunt in a flying machine in seven days.

—o—

If everybody spent as much time finding reasons for working as he does finding excuses for not working, all of us could loaf about half the time and accomplish as much as now is done.

—o—

When a speaker announces that he only has one more word to say before he quits talking, ever notice how the audience begins to brighten up?

—o—

There Are Many

There are many who talk on from ignorance rather than from knowledge, and who find the former an inexhaustible fund of conversation.

Then there are the theater-goers who are shocked when they go to a theatre and are not shocked.

AUTO TO FEED ITSELF

dison Says They Will Soon Be "Gasless"

OSTON, Mass., June 9.—A pre- on that automobiles within a years would carry individual to produce fuel for their oper- was made last night by Thomas dison, Jr.

Discussing carburation at the graduation excrcises of the Knights of Columbus Automobile school, the son of the inventor said he had himself been seeking a substitute for gas oline for ten years. The problem would be solved, he said by the manufacture of individual distilleries to be attached to cars, the stills to be operated by the heat and motion of the motor, and to produce from petroleum and other ingredients a combustible mixture supplied as constantly as current is generated by electric cars while in motion.

A car of average power, in his opinion, could be equipped to produce sufficient fuel to run itself and enough by products to pay for its maintenance.

The first band concert of the season was given last evening. A good crowd was present. It is the policy of the band leader and committee in charge to start these concerts promptly at 8 o'clock. We heard many compliments last evening for the band and their new director, J. R. Andrews. — Garner Signal.

BAND CONCERT WEDNESDAY NIGHT

FIRST BAND CONCERT ATTRACTS BIG CROWD

Belmond Independent, —The first band concert of the season was held Saturday night, as announced in the Independant last week, and drew a large crowd, many people coming from the towns around. The boys preformed in a very creditable manner, and many complimens were paid them on their playing. The new director appears to be delivering the goods, and the band is an organization of which the town may be proud.

Sheriff Hanson was called by phone from Williams Iowa, about 3:30 yesterday morning, to notify him that the First National Bank of that place had been robbed about two hours previous to that time. He was asked to be on the lookout, but it was not known whether the robbers came this way or not, and there seemed to be no clue as to where they were. The Sheriff did not learn how much the robbers had secured. — Garner Signal.

We Are All Long Eared Brethern!

Says the Britt News-Tribune in last week's issue: "Now comes E. N. Bailey, after first swearing and spitting, and deposes and says that since the courts established the fact that he was a jackass that all editors in Hancock County are in his class and that proof of their nature is not necessary. Therefore, Frank Clark, Ted Tierney, Ray Jorgenson, Howard Africa and S. L. Thompson, prick up your ears and bray accordingly."

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

This Critical World.

It's impossible to please everybody, and if a girl has what we, in our ignorance, consider a good figure the neighbor women say she is bunchy.—Ohio State Journal.

Happiness Not All.

There is in man a higher than love of happiness; he can do without happiness and instead thereof find blessedness.—Carlyle.

EARLY DAYS OF RAILROADING

Horse and "Locomotive Engine" Were Used Indiscriminately on Same Line of Rails.

Certain of the regulations in force on the earliest railways built in Pennsylvania read very queerly in these days. When the commonwealth opened the Philadelphia and Columbus railway, the theory was that the state furnish the roadway and that one who pleased could furnish his own vehicle and motive power, and use the railway whenever he wished by paying the state tolls for its use, just as the turnpikes of the day were used.

It was soon discovered, however, that a certain character of vehicle was needed, and that rules and regulations as to times and manner of using the railways were absolutely necessary to effect their successful operation. Here are some adopted by the canal commission for the regulation of the railway, which may be of interest:

"Section 92. No Car shall carry a greater load than three tons on the Columbia and Philadelphia railway, nor more than three and one-half tons on the Portage railway, nor shall any burden car travel at a greater speed than five miles per hour, unless the car body and load shall be supported on good steel springs.

"Section 108. It shall be the duty of the conductors of cars moving with less speed upon the railways, upon notice by ringing a bell, blowing a horn or otherwise, of the approach of a locomotive engine or other cars moving in the same direction at a greater speed, to proceed with all possible dispatch to the first switch in the course of their passage, and pass off said track until said locomotive engine or other cars moving at a greater speed can pass by. The conductors of the slower cars are directed to open and close the switches so as to leave them in proper order. Any person who shall refuse or neglect to comply with the provisions of this regulation shall, for every offense, forfeit and pay the sum of ten dollars."

It must have been a very interesting sight, indeed, when the horse and the "locomotive engine" were used indiscriminately on the same track, and were struggling for supremacy as the future motive power of our railways, and the approach of a locomotive was heralded by the tooting of a horn. Even at that time the right of way was given to the fast horse.

Putting One Over.

Within a few miles of Indianapolis, a father and son owned adjoining farms. The father, old and experienced in the ways of farming, was in the habit of holding himself up as a model to the son in the way of early production of vegtables for the market.

One summer each had a large field of tomatoes on either side of the highway.

Coming to market early in the season, and seeing some fine tomatoes the son conceived the idea of "fooling" father.

"Taking home a fine big tomato, he got a wire hairpin and pinned the tomato in a most conspicuous place, on a tomato vine whose fruit had not yet begun to ripen.

Soon the father spied it and said, excitedly: "Say, did you know that your tomatoes are getting ripe already?" "Oh, yes," replied the son, unconcernedly, "aren't yours?" The father admitted that his crop had not begun to ripen, and after a moment's silence he said: "By heck, you beat me this time."

Aiding Blinded Soldiers.

More than twenty-three thousand men with damaged sight were discharged from the British army at the end of the war, according to the authorities of St. Dunstan's Hostel for Blinded Soldiers and Sailors. The organization has been working for five years on the problem of rehabilitating these men, and thousands of blinded men have been returned to productive industry.

The men are taught massage, poultry, farming, mat making, basket making, boot repairing, joinery and music. Many efficient stenographers, telephone operators and typists have been trained at St. Dunstan's and are now working at regular employment in London offices.

The stenographers have a special machine which records Braille figures on a tape, which the stenographer later reads in transcribing his notes.

The organization also extends to the colonies, and St. Dunstan's men are now to be found in every part of the world.

France Dooms Wild Boars.

There are still considerable numbers of wild boars and even wolves in France.

This was revealed in a recent discussion in the chamber of deputies on the estimates for the ministry of agriculture. Two deputies affirmed that wild boars cause much damage, while a third constituted himself their champion, asking if it was not intended to leave a few.

Before the war boar hunting was a favorite, although a somewhat dangerous, form of sport, and at Christmas time it was usual for boar steaks to be served in restaurants. Even last Christmas one or two boars made their way to the kitchens of restaurants and hotels.

Economy.

"Oh, daddy! I've got 70 cents in my bank already for Fourth of July!"

"Yuh have, have you? That's fine! Now when Fourth of July comes you hide your bank and make all the noise you want snapping your fingers!"—Richmond Times-Dispatch.

JACK FROST HOLDS SECRET

Yet We May Gather Something of What Must Be Learned If One Would Remain Young.

As if to crown the year, autumn not only brings her mellow fruitfulness and golden days of summer warmth, but occasionally opens the door and lets old winter in. It all happened as predicted, remarks the Minneapolis Journal. No wind played as usual on the hilltop, the stars came out clear and bright, the moon was gorgeous in its round refulgence, but there was an ominous stillness in the air. When the door was left ajar, stinging cold sent her arrow through.

The next morning when the sun arose he had more work than usual on his hands. The frozen forms of sparkling dew hung pendant from the drooping goldenrod and crowned the aster with a beauty new. The smoke rose straight skyward from the many chimneys round about, while the roofs steamed with incense unknown to them for many weeks.

Autumn had simply turned another page to bear witness to her versatility. She announced that time was up for ripening grape or late strawberry blossom. The wondrous drama that had for five months past been staged in every garden was for the season closed, but the mighty color pageant of October still remains to celebrate for days in hill and dale the harvest bounty.

What is the secret of this transformed world in field and pasture? Jack Frost has brought with him invigorating air together with the wine and zest of the whole year. But he has steadily put to sleep the flower fairies of the summer. And he has done it by checking the flow of sap and leaf, stalk and trunk. In place of flexibility there is now rigidity of stem and petal, and where pliability was once the mark of garden life stiffness is now upon her flower children.

Who can fail to see written in the garden a parable for man? All is well for him as long as he keeps his frame plastic and his mind open to new ideas and enthusiasms. Vital interest in new issues and a large openness of mind do much to keep a man young. But once let dogmatism touch him, or let him become crabbed or cocksure, set or opinionated, and the frost touches him to check his growth.

Richard Le Gallienne cites well the secret of the frost in saying that "a man is not old till he ceases to fall in love, carries a pocket mirror to examine his tongue." The frost hits him when "he begins to say that times are changed and begins to speak of young people as a separate and disappointing class." The frost touch of rigidity is the secret of Jack Frost.

No time limit has been set to growth in the garden of the human mind. When a man is so foolish as to stake these limits for himself, then he makes himself liable to the benumbing blight of Jack Frost.

Nervous.

It is the man of many parts who should be careful not to go to pieces.—Cartoons Magazine.

Yank Princess May Be Queen

Widow of Ralph Thomas May See Husband Acclaimed King of Albania.

LOSES HEART TO PRINCE

Princess Vlora is Granddaughter of Eugene Kelly, Millionaire New York Banker—Her First Husband Was Frank Jay Gould.

New York.—Princess Vlora, formerly Mrs. Helen Kelly Gould and more recently Mrs. Ralph Thomas, may be the first American to be addressed as "your majesty."

If she attains the throne of Albania, as seems possible, she bids fair to eclipse socially Princess Anastasia of Greece, formerly Mrs. William B. Leeds, who, through her marriage to Prince Christopher of Greece, has climbed the royal ladder higher than any other American woman.

Princess Vlora is in New York "on business," while her royal consort, Prince Vlora, is at their house in Paris arranging plans to ascend the throne of his grandfather.

The father of Vlora, Ferid Pasha, is prime minister to Abdul Hamid, and is working quietly with Turkish leaders.

She Prefers Paris.

"What will you do in Albania, where most of the men are polygamists and addicted to bloody feuds?" I asked her in her apartment in the Hotel Lenoric.

"I don't know," she said, smiling, "perhaps remain most of the time in my Paris home with my two children—Helen, who's nineteen, and Dorothy, who's seventeen—who are now in school in Switzerland."

The princess was Helen Margaret Kelly, granddaughter of the millionaire New York banker, Eugene Kelly. She was married at eighteen to Frank Jay Gould and after divorcing him married Ralph Thomas, son of the sugar king. After a brief married life, he died suddenly in 1914, leaving her several millions.

During the war she sailed for Paris, where she became a war nurse. While recuperating in Switzerland, she told me, she met Prince Vlora, who was brooding over the fate of Albania and meditating schemes for its restoration.

Loses Her Heart.

"He told me sad stories of Albania," she continued, "of its wild scenery and the picturesqueness of its people. He was a delightful chap and I confess that I lost my heart to him. We were married quietly.

"Whether the prince will become king of Albania is not certain. It is well known in diplomatic circles that the problem of finding a satisfactory ruler is a hard one. The prince is the natural ruler and is mapping out his course in Paris and London now.

"Albania is the roughest country in the Balkans, a country of wild mountains, entirely without railroads. The only towns are situated on the coast of the Adriatic. The entire population is less than 1,500,000.

"The people consist mainly of fierce mountaineers, walking arsenals of rifles and knives. They are Mohammedans in religion and confirmed polygamists."

The princess explained that shortly before the war Prince William of Wied, with German and Austrian backing, succeeded in getting installed as king of Albania at Durazzo. He never succeeded, she said, in winning the allegiance of the mountaineers, because Essad Pasha and local chieftains were hostile to him. So he returned to Germany. Since then the Italians have occupied more of Albania and joined hands with the allies, operating from Saloniki.

"I am here to assist my husband in my own way," Princess Vlora said. "If he wants the throne he can have it.

"I am very much in love with him and will help him all I can, but I think I would prefer to spend most of my time in Paris.

"My mission here is to rest and to see certain friends on certain matters of importance."

Nation's Per Capita Wealth Now $2,800

The per capita wealth of the United States has increased $236 since 1914, it was announced by the Government Loan organization.

It is estimated that on Feb. 1, 1921, the total wealth of the country was $300,000,000,000. This is an increase of $50,000,000,000 during the last seven years.

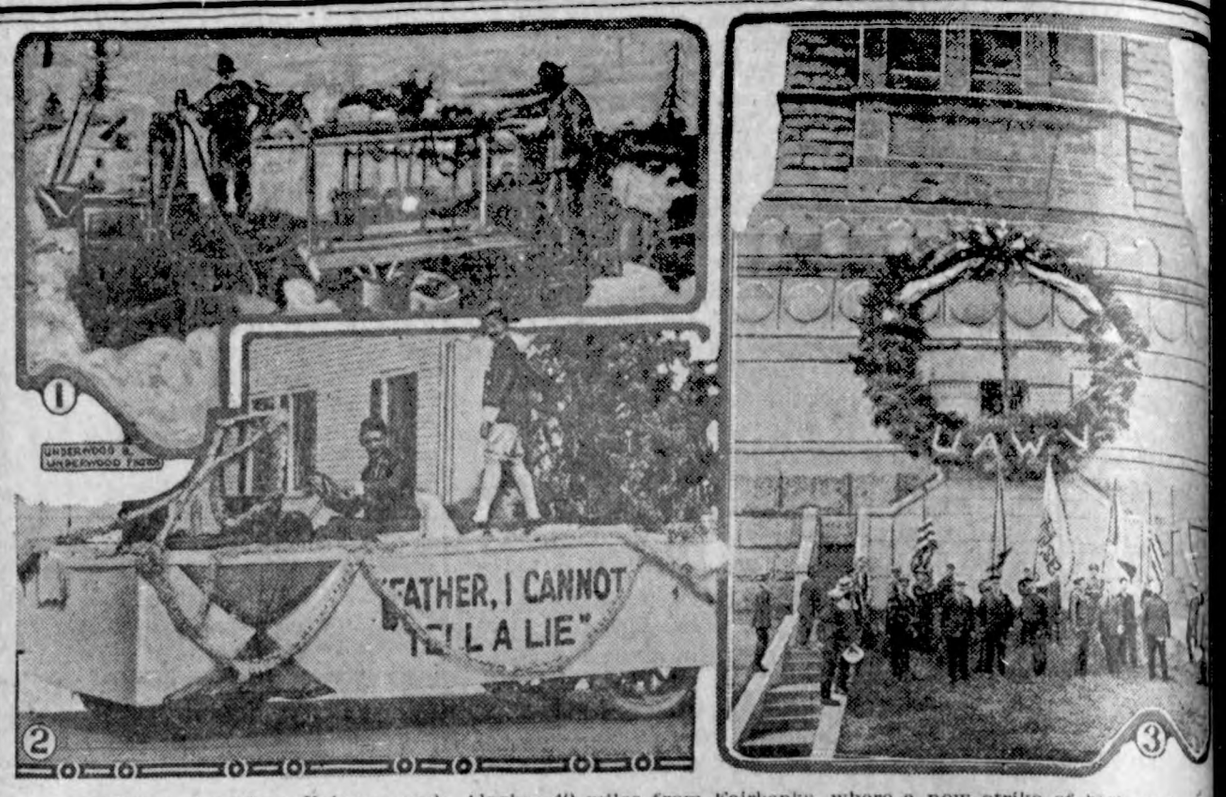
If this wealth were divided equally among the 107,000,000 persons in the country each would have $2,800. In 1914 each would have had $2,564.

The practice of thrift during the war was partly responsible for the increase, according to the Loan organization.

COURT BARS U. S. SPELLING

Australian Chief Justice Rules in Favor of the English Forms.

Melbourne, Victoria. — American forms of spelling have been barred from official documents in the high court. The federal chief justice has announced that he will not allow their introduction and has ordered the spelling of the words "program" and "center" changed to "programme and "centre." He remarked that English spelling was good enough for him.



1.—Miners at work on Kokomo creek, Alaska, 40 miles from Fairbanks, where a new strike of high-grade gold ore has been made. 2—The Washington and cherry tree float in the parade in celebration of the 250th anniversary of Fredericksburg, Va. 3—Giant wreath of poppies with which the Statue of Liberty in New York harbor was decorated Memorial day by the United American War Veterans.

Maneuvers by U. S. Air Craft

Director of Naval Aviation Lays Out Extensive Program for Summer and Fall.

BIG AIRSHIPS TO TAKE PART

Giant Dirigible Purchased From Great Britain Will Take Trip West as Far as Chicago—Maneuvers Also Planned for Pacific.

Washington.—With Atlantic and Pacific fleet air forces mobilized at bases on the two coasts, an intensive program of summer and fall maneuvers is being planned by Capt. William A. Moffatt, director of naval aviation.

Starting with the joint army and navy bombing tests off the Atlantic coast, designed to test the offensive value of aircraft against naval vessels, navy flyers will be put through several months of stiff exercises.

Early in July the naval airship ZR-2, purchased in Great Britain, will fly to this country in charge of an American crew. A great aerial demonstration will mark her arrival. Detachments of seaplanes, flying boats and dirigibles will fly far out to sea to meet the big airship and escort her to a point on the Atlantic coast just north of Boston.

Test Mooring Mast.

The ZR-2 will then skirt the coast southward, passing over the principal cities to Philadelphia, then proceed to the giant navy hangar at Lakehurst, N. J., and be "anchored" to a "mooring mast," the first device of this kind to be erected in this country.

Experts from Great Britain will superintend the erection of the mast which will be a steel structure about 150 feet high with a swiveled bridle at the top to which the nose of the dirigible will be moored, permitting the ship to swing always nose to the wind. The structure will cost about $50,000, and probably be fitted with an elevator to carry the crew of the dirigible to and from the ground.

After being thoroughly overhauled, the ZR-2 will undertake a cross-country cruise to show the ship to the people.

Will Pass Over Many Cities.

Present plans call for a trip to Chicago and return, at least by way of the southern border of the Great Lakes, and if cities west of Chicago provide mooring facilities the cruise may be extended indefinitely. The ship can make a round trip to Chicago without refueling.

Basing on Lakehurst, the ZR-2 is to operate along the coast later and participate in air fleet mobilization and extensive maneuvers and tactical drills.

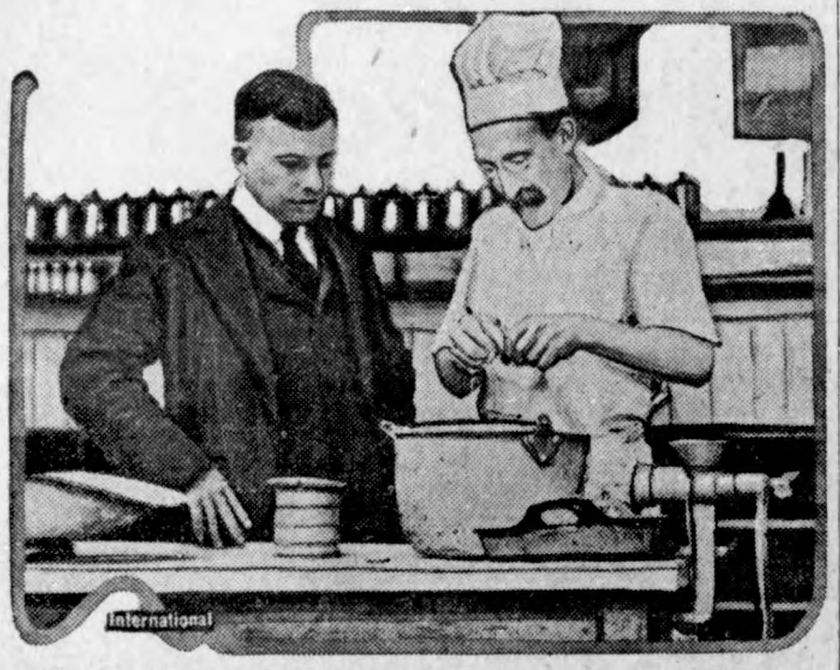
On the Pacific coast similar maneuvers will be conducted in connection with the Pacific fleet. It is possible a squadron of naval aircraft may attempt a trip "around the rim" of the country from a point in Washington state to Maine, during the year, the longest airplane cruise ever attempted.

Plans for a flight from San Diego, Cal., to this city have been abandoned, as Capt. H. C. Mustin, commanding the Pacific fleet air force, who would have led the expedition, cannot be spared from summer exercises of the Pacific air forces.

Dead Hero Made a Marshal.

Paris.—Gen. Gallieni, former minister of war and former military governor of Paris, who sent the army of Paris to the Marne in 1914 in taxicabs and who died in 1916, has been posthumously named a marshal of France in a decree signed by President Millerand. This was in accordance with authorization given by parliament recently.

"Cowless" Milk Made in Boston



Photograph of Dr. E. B. Carr and G. E. Cornforth making "cowless" synthetic milk in the laboratory of a sanitarium near Boston. It is made from oats, peanuts and water. Vegetarians approve it because it contains no animal fats; food experts are inclined to reject it for the same reason.

NEWS REVIEW OF CURRENT EVENTS

Thirty Killed in Race War in Tulsa, Okla.—Whites Burn All Black Belt.

SENATE FIRM FOR BIG NAVY

Passes Appropriation Bill Carrying $494,000,000 — President Harding's Memorial Day Utterance—Railway Wage Reduction Announced —More Fighting in Silesia.

By EDWARD W. PICKARD.

Another of those sudden and terrible race conflicts which make all decent Americans blush with shame occurred last week, this time in Tulsa, Okla. Before the state troops that were called to assist the police had restored order at least thirty persons had been killed, hundreds had been wounded and the negro quarter of the city was in ashes. More than 5,000 negroes were rendered homeless and the property damage was estimated to be in excess of a million and a half dollars.

As so often is the case, the riots were due to an attack on a white girl by a negro. The offender was arrested and then someone started the rumor that he was to be lynched. Several hundred armed blacks gathered about the courthouse and jail, and one of them was killed by a police officer. That started the fighting, and within a few hours the city had become an armed camp. Both whites and blacks looted the stores for guns, and the negroes entrenched themselves in their quarter. An army of whites soon began the invasion of that region and, driving back the blacks, set fire to the buildings as they advanced. Men, women and children were shot down mercilessly as they fled from their burning homes. Three local units of the Oklahoma National Guard were ordered out by the governor, and they, with the help of the police and members of the American Legion, at last succeeded in controlling the situation. They were able to protect the business and railroad districts from further destruction, but the "black belt" was a smoking ruin.

The same old cries of "Shame!" will be heard, and Tulsa will be thoroughly scolded for this shocking affair; but the same causes will bring about the same results ever and again, almost anywhere in the United States, and the wisest social economists do not know where the remedy lies.

If the house can be brought around to the senate's way of thinking, we will have the greatest navy in the world. But the difference of view of the two chambers is represented just now by some $98,000,000, and it may be a long time before an agreement is reached. By a vote of 54 to 17 the senate passed the naval appropriation bill carrying a total of $494,000,000. For several weeks the small navy men had fought hard, but they secured a reduction of only $2,500,000 from the total recommended by the naval committee. Their leader, Senator Borah, voted for the bill because, as he explained, he had high hopes of results from his amendment requesting the President to invite Great Britain and Japan to join with the United States in curtailing naval construction. That Mr. Harding takes the Borah plan seriously is indicated by the report that our representatives in London and Tokyo already are "feeling out" the sentiment in the governments to which they are accredited.

The bill as passed by the senate carries $105,000,000 for construction of ships, including an item of $15,000,000 for the beginning of work on two airplane carriers at a limit cost of $52,000,000; $18,000,000 for aviation, and funds for 120,000 men. Several millions of dollars are allowed for strengthening the Pacific Coast defenses, and money is provided for further work on the Charleston navy yard, the majority having relented in that matter.

Memorial day not only was celebrated fittingly all over the United States, but in England and France as well, where many of our dead warriors still lie. In this country, of course, the most notable observance of the day was in the national cemetery at Arlington, where the President delivered the address. Mr. Harding took advantage of the occasion to declare that America must and will do her full part in helping to stabilize the world, to restrain ambition for empire and to prevent the disaster to civilization that would come from a denial of the equality of sovereign states or persons. The United States, he asserted, will neither pursue a policy of isolation nor surrender any of its independence of action, but will stand ready to accept leadership in the restoration of normalcy in the world.

In a Memorial day address in a Chicago suburb, former Senator James Hamilton Lewis predicted a war with Japan in which America will stand alone. "Not one country in Europe is truly the friend of the United States," he said. "The time is coming when we shall have to protect ourselves against an invasion of the Asiatics." England, France, and Italy, he said, will be appealed to by Japan to force the United States to grant the Japanese the same privileges as they enjoy in Europe.

The federal railway labor board has announced the wage reduction that goes into effect on July 1, when the national agreements are abrogated. The average wage cut is to be 12 per cent and this eventually will reduce the pay rolls of the 104 roads affected by $400,000,000 a year. The board in its decision sets up new uniform wage scales for all groups of employees, and these will later apply to every road in the country. The abrogation of the national agreements, it is believed, may save the roads an additional $300,000,000 yearly. In labor circles it had been feared a greater wage reduction would be ordered by the board; hence it is predicted the action may arouse little open opposition. The chiefs of the railway unions reserved comment.

The day after the board's ruling was made public President Harding surprised the interstate commerce commission by calling at its office for a conference on freight rate reduction, which he deems of vital importance in the restoration of business. He made clear his desire in this line, but it was evident that he would have to overcome strong opposition. The cabinet agrees with the President that prohibitive transportation rates largely account for the stagnation of business and the continued high price of the necessities of life.

Chairman Clark of the interstate commerce commission and Senator Cummins, chairman of the senate committee on interstate commerce, agree, however, with the railroad executives, who contend that rates cannot be reduced generally until it has been proved that railroad expenses can be cut to a point assuring an adequate return on the investment.

Aviation in America is hard hit by disaster and economies. The country was shocked by the accident near Washington in which an army plane, caught in a fierce electrical storm, was destroyed and all its seven occupants killed. The victims included several aviation officers and former Congressman Maurice Connolly. Blame for the accident, if there is any, is hard to place though it is felt that the establishment of altitude observation stations would do much to avert similar disasters.

At the government proving ground at Aberdeen, Md., where rehearsals for the army and navy maneuvers in Chesapeake bay were taking place, a 50-pound bomb filled with TNT fell from a plane and the explosion killed five men and injured twelve. Apparently the mechanism of the bomb-carrying rack was defective.

All the air mail routes established with so much flourish, except the transcontinental line from New York to San Francisco have been abandoned, Postmaster General Hays saying this is due to lack of money and to difficulties of operation. The St. Paul-Chicago and St. Louis-Chicago routes were the last to be discontinued. This action may be linked with the charges of inefficiency, carelessness and misconduct made against certain of the operating force of the air mail in the Middle West. Investigation has resulted in the temporary suspension of R. W. Majors, superintendent of the Omaha-Cleveland division, and of four of his subordinates and one mechanic. Mr. Majors and the pilots in his division deny the charge made by a discharged pilot, that the deaths of several air mail carriers were due to criminal carelessness of the executive and mechanical forces. The investigation is not yet completed.

The Poles and Germans in Upper Silesia did not observe their truce for many hours. The Germans renewed the attacks and the fighting has been continuous ever since, despite the efforts of the allied plebiscite forces, which have been reinforced by a body of British troops. In general the Poles seem to be getting the worst of the fighting, for the Germans were well organized secretly and are fully armed. There was a serious outbreak in Beuthen, where the German inhabitants attacked the French garrison. The latter used tanks with deadly effect and routed the Germans, killing many. With the arrival of the British forces it appeared likely that Korfanty's insurgent Poles would be driven out of much of the disputed territory which they had seized.

Chancellor Wirth apparently is determined to force Germany to fulfill her obligations to the allies. In a speech before the reichstag he set forth the economic rules and policies through which, he believes, the German nation can pay its debts and yet maintain economic stability and independence. He intends not only to keep up with the payments as they fall due, but to keep ahead of them.

"The sums to be paid in reparations," he declared, "can be extracted only by creating an economic balance. We must increase our production and reduce our expenses to the utmost in our manufactures. We must limit all imports, especially luxuries, as far as possible through customs tax measure. To this end we should have sovereignty over our customs borders.

"Agriculture must be brought to its highest capacity, systematically. Animals must be replaced by motors, saving fodder. Acreage must be increased, and the cultivation of swamps and deserts must be undertaken at the earliest moment, thus providing work for those out of employment. The sword has been broken. We must work."

The chancellor foreshadowed a higher corporation tax, a bourse tax, an inheritance tax, a landed property tax and a tax on certain securities, in addition to an increase in direct taxes.

Before the congress of the Communist party in Moscow Premier Lenin laid his economic program, which was supported by Minister of Agriculture Miliutin and approved by the gathering. The policy as outlined includes:

1. Collection from the peasants of a fixed amount of grain by a system of tax in kind, estimated by Miliutin to amount to about one-third of the crop. The other two-thirds of the crop is to remain at the disposal of the peasant for grading through the newly restored co-operatives, whose power is to be extended.

2. Retention in the hands of the state of the largest industries and means of transportation, particularly the leather, salt and textile industries. These latter are turning out manufactured goods now most needed by the peasants. They are to be speeded up in order to satisfy the peasants' needs, and the workmen are to be encouraged by a bonus system and other inducements which will increase production. Supervision is to be under the trade unions, who will fix the rates of pay instead of the government as heretofore.

3. Encouragement of small and medium co-operatives and private industries. Factories will be leased to these smaller industries, and even financial assistance will be given. The trades unions will fix wages.

Seek Navy Students

Marine Corps Is Authorized to Assist in Recuiting.

Stations Will Accept Enlistments for Midshipmen at the Annapolis Academy.

Washington.—Youngsters between the ages of eighteen and nineteen years, with ambitions to become midshipmen at the United States Naval academy, now will be accepted for enlistment at all marine corps recruiting stations.

One hundred enlisted men are appointed to the Naval academy each year, after a competitive examination given enlisted men of the navy and marine corps. They must not be more than twenty years of age on April 1 of the year it is desired to enter, and must have been in the service at least one year by August 15 of that year.

Adhering to its policy of rewarding meritorious members of its enlisted personnel with commissions, the marine corps will open an officers' training school in or near Washington this summer to fill over a hundred vacancies in the commissioned personnel of the corps.

During the war more than 800 enlisted men were commissioned in this country and France. The highest rank so far attained by an enlisted man who received his commission as a reward for meritorious service is that of a senior colonel.

The order recently issued by the major general commandant specifies that no noncommissioned officer will be considered for such advancement who shall have had less than one year's service in the army, navy or marine corps, of which not less than six months shall have been in the marine corps. Only men between the ages of twenty-one and twenty-seven years will be considered.

Pet Snakes Protect Home, Says Editor

Middletown, N. Y.—Have you a little snake in your home?

They make fine watchdogs and pets for the children, according to Editor William Hones, who runs a country newspaper and is known as Theodore Roosevelt's double.

He says the snake is one of man's best friends and should be in every home.

Snakes destroy rats, mice and other pests, he declares, purge the house walls of infections and protect the sleeping household.

PLAN TO ERADICATE CHOLERA

Swine Breeders of Indiana County Working to Stamp Out All Traces of Disease.

(Prepared by the United States Department of Agriculture.)

A county free from hog cholera this year is the goal to which swine breeders in Steuben county, Ind., are working under the guidance of the local county agent and the district veterinarian of the United States Department of Agriculture. As a result of a persistent campaign for the control

County Agent Inoculating Pigs With Hog Cholera Serum.

of cholera and strict organized effort to eradicate it, there has been a remarkable decrease in the disease in the county during the last two years. In 1917 the loss from cholera in the county, according to the county agent, was about $10,000. In 1918 it was a little less than $5,000, and in 1919 it was about the same. In 1920, however, only three cases occurred in the county, which leads the swine breeders to believe that if their efforts to control the disease are continued cholera can be practically eradicated.

CLUB MEMBERS SECURE PIGS

Registered Animals Given to Boys and Girls in Mississippi—Scholarship at End.

A public-spirited man in Fayette county, Mississippi, gave six registered pigs to the boys' and girls' pig-club work last year, with the understanding that each one who received a pig was to give back to the club one pig from the first litter and one from the second. The donated animals were drawn for by members from each beat and one from the county at large. The recipients were very proud of their pigs. The six from the first litters were distributed in December. If the plan is continued for five years it is estimated that 204 registered pigs will be given away at the close of that time, and it is hoped that purebred hogs will be found on every farm in the county. If these plans mature as is hoped, the 204 which will be available for gifts at the end of the five years will be put up at auction and the proceeds used for a scholarship to the State Agricultural and Mechanical college, which will be awarded yearly to the winner of the county pig-club championship.

ALFALFA AS HORSE ROUGHAGE

Plant Is High in Protein and Minerals and Is Especially Good for Young Stock.

Alfalfa receives great favor as a horse roughage. It is high in minerals and protein and is especially good for young stock. Because it is laxative in effect and high in protein, it is always best to limit the amount of alfalfa to one-half or two-thirds of the total hay ration. The rest may be timothy hay. Use alfalfa with a ration that is low in protein. Corn as a grain and alfalfa as a roughage make a balanced ration.

BEST LIVE STOCK CHEAPEST

Opinion of Virginia Farmer Who Thinks Breeders Are Aiming to Procure Purebreds.

"From 30 years' experience in breeding thoroughbred horses and later dairy cattle, I have found that the best is the cheapest." This is the opinion of a Virginia farmer in a statement to the United States Department of Agriculture. "I think all raisers of live stock in Virginia are aiming to procure purebred sires."

Good Mixture for Hogs.

It is good policy, where possible, to keep charcoal, wood ashes, slaked lime and salt in a sheltered trough where hogs can have access to same at will.

Silage for Horses.

Silage should not be considered as a mainstay for horses, as its use is preferable only in limited amounts as a small supplement to the regular ration.

Important in Sow's Ration.

High content of protein and mineral matter is required in the sow's ration, because her milk is high in these materials which form the bone and muscle of the young pigs.

DAIRY FACTS

RULES FOR FEEDING CALVES

Desired Nutrients Furnished by Giving Young Animal Variety—Avoid Sudden Changes.

(Prepared by the United States Department of Agriculture.)

Feeding is an important factor in developing a good breeding animal, or a favorite in the show ring. There are many points to be remembered. These points may be called rules of feeding, among which specialists of the United States Department of Agriculture give the following:

1. Provide a variety of feeds at all times, if possible. It is easier to supply the proper amounts of the desired nutrients which the calf needs if several different feeds are used. The ration will also be more palatable.

2. Do not make sudden changes in the feeds used or in the amounts given. If it becomes necessary to change feeds from, say, clover to alfalfa hay,

Grain in Medium Amount, Fresh Water and Pasture Are Necessary for Success With Calves.

feed part clover and part alfalfa for a few days. Gradually reduce the amount of clover and at the same time increase the alfalfa.

3. Do not overfeed the calf. Feed as much grain as it will clean up in 30 minutes and wish it had just a little more. Feed left in the trough to be breathed over is worse than wasted. If any remains it should be removed and less given the next time. Digestive disorders occur from feeding too much rather than too little.

4. Do not underfeed the calf. It should make a continuous gain. If it does not grow each day the feed given it is about the same as wasted. It never pays to starve a calf. In fact, the calf does not begin to pay for feed until it is given more than enough to make some gain.

5. Do not annoy or disturb the calf unnecessarily. It requires more feed to keep it growing while standing or moving about than while lying down at rest.

6. Do not feed moldy, musty, or spoiled feeds. To do so may cause serious digestive disorders. All hays should be bright, well cured, and free from mustiness, dirt, and coarse weeds. The grain also should be free from dirt, mold, and mustiness. If ground feeds get wet they are likely to mold. This is especially true of cottonseed meal and ground corn.

7. Do not waste time in feeding the calf, or in preparing feed, since wasted time needlessly increases the cost of gains. Grain should be fed whole except when teaching the calf to eat and possibly also near the end of the fitting or finishing period. Whole grain as a rule is more palatable than ground feeds. Ear corn may be shelled, broken, or chopped up in the feed box rather than ground. Husks on snapped corn need not be removed for this purpose. It rarely pays to shred stover or to cut or chaff hay for the calf. It need not be fed three times a day when twice a day will do as well, although the former may be practiced when fitting the animal for show or sale. Do not go to the expense of buying prepared "stock feeds" or "remedies." Home-mixed feeds are cheaper and equally, if not more, satisfactory. A healthy calf does not need condition powders.

ENCOURAGE FENCE JUMPERS

Dilapidated Fencing Is Source of Constant Trouble for Owner of Dairy Herd.

Half broken down fences help to teach the cows to be fence jumpers. Heifers that are constantly jumping the fences in easy places are difficult to break in later life and nothing is more wasteful of time and patience than constantly chasing your cattle out of your neighbor's crops or your own. Good fencing is necessary equipment for the dairyman and poor fencing is a constant risk.

GIVING YOUNG CALVES MILK

Care Should Be Taken That Temperature Is Uniform—When Poor in Quality, Give Less.

Care should be taken to see that any milk fed to the young calves is of uniform temperature of about 90 degrees Fahrenheit. Many feeders attempt to overcome poor quality in the feed by increasing the quantity. This is radically wrong. When on account of age, souring, dirt, etc., the quality of the milk is poor, the quantity should be reduced rather than increased.

Home Town Helps

LOOK TO FUTURE EXPANSION

Civic Bodies of Kansas City Are Showing a Spirit Well Worthy of Emulation.

Just how valuable it may be to prepare for the orderly development of a city industrially is indicated in a piece of work which is now being undertaken by the city-planning commission and the chamber of commerce of Kansas City. The industrial department of the chamber aims to make a survey of industrial conditions in Kansas City which it may use in its own work, and the planning commission will seek much additional data through the survey which may be used to excellent purpose by various committees of the commission, by the industries themselves and by other agencies concerned with the most businesslike and systematic expansion of the entire city.

What the planning commission desires to ascertain in this respect is just what the most progressive and far-seeing business man would have in order to make possible the best development of his interests. The commission already has committees at work obtaining facts about Kansas City's present status and probable future expansion in respect to commercial, residential and industrial districts; recreation facilities, highways and transportation conditions; and it has prepared a basic map which makes zoning of the city possible. But the necessity of obtaining such facts as these about the city's industries, as well as the value of the facts, is at once evident:

What industries has the city?

What is likely to be the expansion of these periods of ten, twenty or thirty years?

Where will the expansion be?

What additional industries is Kansas City likely to have?

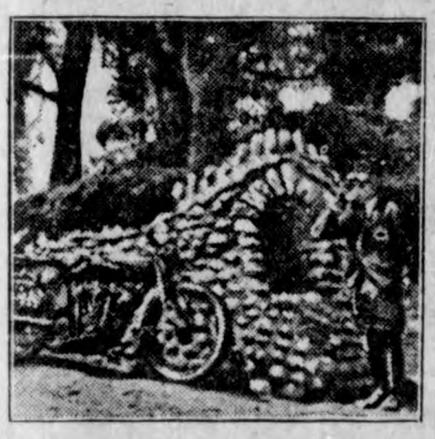
Where will they be placed?

Where will the additional employees live?

HOW CITY CONSERVED TREES

Los Angeles Built "Island" Around Unusually Fine Cluster in Path of Grading.

When the city of Los Angeles recently cut North Broadway through Holgate square there was a clump of fine old pepper trees directly in the path of the grading. So the city, rather than cut the trees down, built an "island" around them. An unusual feature of the island is an ornamental drinking fountain which



This Fountain Is a By-Product of Saving the Trees From Destruction by Building an "Island" Around Them.

was built for the purpose of supplying thirsty motorists and pedestrians with a refreshing draught of Adam's ale. The water is piped to the fountain from a street main.—Popular Science Monthly.

School Gardens.

Is there ground available for school gardens? Some schools have rented vacant lots and fields near the school house for their gardens and have succeeded in earning money on them, which has been used for other school projects or equipment. A certain school has an orchard of 100 trees, in which the children are given practical instruction on the care of fruit trees; the profit from the sale of the fruit goes to the school; and the orchard serves as a model for the community.

Is it possible or advisable in your school to have gardens and orchards so managed that they will make substantial contributions to the upkeep of various school activities, and at the same time provide valuable practical laboratory training for the pupils? This is a community problem, which may be solved best, perhaps, by general discussion.

"City Plan" Works Well.

The city plan has been tried in many cities with success. St. Louis and Milwaukee are examples. Under such a plan the city does not repeat obvious mistakes. At present the man who builds a home has no assurance that a filling station will not be his next-door neighbor tomorrow. He may move into another district and later see a factory shut off his light and air. The city plan idea, summed up, is that there is a place for everything and that everything should be in its place. The only way that idea can be made effective is through laws giving the planners the legal right to act.—Exchange.

ASPIRIN

Name "Bayer" on Genuine

say BAYER

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Line the Linoleum.

When purchasing linoleum for the floor it is a good idea to order a lining of felt. This precaution will probably prolong the use of the linoleum. It also deadens sound and makes the floor warmer in winter. It prevents the linoleum from expanding or contracting and it gives a softer tread, all advantages worth considering.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

WAS FAMILIAR WITH CHROMO

Mrs. Newly Rich Somewhat Too Anxious to Air Her Knowledge, and Her Ignorance.

Harvey Maitland Watts, a Philadelphia art critic, said at a dinner in Rittenhouse square:

"The ignorance of the new rich in art matters is quite incredible. The wife of a new rich profiteer was buying pictures in a Walnut street shop the other day. After she had bought a number of costly pictures she said:

"'Now show me something a little cheaper for the back hall. It's dark there.'

"The salesman brought out another picture.

"'This, madam,' he said, 'is only a chromo, and we could let you have it for nearly nothing.'

"The new rich lady nodded in a sage way.

"'Yes, of course,' she said, 'Chromo is a struggling and obscure artist, and he can't expect to command good prices till he makes a popular hit, can he?'"

Intelligent.

You may not believe it, but we have this on creditable authority:

A marine reported the loss of his gun.

"Was there any mark on it," asked the corporal, "by which you might recognize it?"

"No, I think not," answered the marine.

"Sure?"

"Well, come to think of it, there was a name on it?"

"What?"

"Springfield."—The Tennessee Tar.

No Workers.

"How many daughters has she?"

"Three. And not a dish washer among them."

Four Million Shy.

France's population was reduced 4,000,000 by the war.

Hot Springs Waters Wonderfully Successful in the Treatment of Rheumatism

THE peculiar properties of the waters of the Hot Springs of Arkansas are due to radio activity, found in them to an exceptionally marked degree, and their equal has never been known in the treatment of rheumatism and all uric acid troubles. These springs are owned and controlled by the U. S. Government.

The cost of living at Hot Springs may be regulated to suit any purse, accommodations varying from moderate priced boarding houses, up to the most fashionable hostelries.

BIRDS AS STREET CLEANERS

Vultures Employed for the Purpose in Costa Rica, and Traveler Says They Are Efficient.

Garbage collectors in Costa Rica enjoy their occupation, because they eat what they find. In his book, "Sailing South," Philip S. Marden writes as follows:

"I was awakened on the first morning in town by a sound of wheels in the street below, and looked out. It was an impressive sight. The garbage man was abroad on his scavenging rounds. Ahead of his open wagon walked in a sober platoon four enormous vultures, all in sable and maintaining the chastened demeanor of undertakers at an open grave. Behind the wagon walked half a dozen other vultures similarly sedate. And around the rim of the cart, perched in solemn row, sat twenty-one other birds of the same species and same somber hue. I would fain have immortalized the scene, but the camera, alas, wasn't loaded. I began to understand why the streets of San Jose, which leave much to be desired in other respects, are at least so notably clean. The buzzards attend to that!"

Law Was Obeyed.

"I see it was against the old blue laws to kiss your wife on a Sunday."

"True."

"What was the penalty?"

"Dunno. No husband was ever brought up on charges."—Louisville Courier-Journal.

LIVES IN HISTORY

City of Alexandria, Virginia, Is Immortal.

With Its Memories of the Greatest American, It Yields Place Only to the National Capital.

Economic clocks cease their ticking, industrial enterprises stop their whirr, and America celebrates each twenty-second day of February in honor of George Washington.

"Across the Potomac from the city which perhaps is the most elaborate and enduring monument that perpetuates the name of any human being is a smaller, older, but up-to-date city, which reverently pays her tribute to the great man who surveyed its town lots. He also commanded its troops, sat in its historic Christ church while President of the United States, and tripped the stately minuet in its parlors," says a bulletin from the Washington, D. C., headquarters of the National Geographic society.

"Alexandria, Virginia, which was so promising at the close of the Revolutionary war that it was considered a possible seat for the infant national government, and which indeed might have had the honor, so the story goes, if the great man who lived within a stone's throw of its borders had thought it fair to use his influence in its behalf, is today an up-and-doing city. A naval torpedo plant is being constructed there at the present time, and during the World war it had a fully equipped shipbuilding plant.

"The first ship built at this plant was the Gunston Hall, named after the home of George Mason, father of the Virginia declaration of rights, at that time probably the most complete statement of the rights of man.

"This shipbuilding plant which now stands idle awaiting the development of new plans concerning our merchant shipping covers 46 acres of land along a river which measures 40 feet in depth at the city pier. At no point in its course to the ocean is the channel less than 30 feet in depth.

"The coal fields of the Cumberland are but 40 miles away, and the cheapness of transportation to the city adds another commercial asset. The inhabitants in the decade between 1830 and 1840 foresaw the power which was coming into being to the west of them, and expended large amounts of money in building the Alexandria canal and in contributions to the Chesapeake and Ohio canal.

"The Lee highway from New York to San Francisco, now being constructed, passes through Alexandria and westward through the beautiful and historic Valley of Virginia. Very aptly might Alexandria, from its geographical position, be given the soubriquet, 'The Gateway to the South.'

"Tourists to the Capital city—and everyone feels that sooner or later he must see the capitol, the White House and the Monument—usually find a few hours, if no more, to cross the Potomac and sit in the silence of the quaint little church in its pretty green churchyard where Washington advocated before the townspeople in 1774 resistance to Great Britain, and where Robert E. Lee agreed to take command of the Virginia troops at the beginning of the Civil war in 1861. Washington's pew is marked today, but unfortunately the high backs of the seats, which in former days kept the President from seeing exactly what kinds of lace the bewigged gentlemen in front of him had at their throats, were cut down by a subsequent rector who wanted his church to keep apace of the times. It is said that Washington and the famous and devoted Martha always rode from Mt. Vernon in a handsome cream-colored coach to attend the services.

"The seeker for excellent examples of Colonial architecture can heave a sigh of satisfaction when he catches his first glimpse of Carlyle house, as this home in which the illustrious gentlemen and charming women of old colony days discussed state questions and tripped a measure or two is considered one of the best specimens of Eighteenth century architecture in existence. Maj. John Carlyle, who built it in 1752, provided a means of escape for his family, in case of attack by the Indians, in a subterranean passage that leads from the house through the fort on which the house is located to the Potomac. Here they could get into boats and sail down the river to safety."

Couldn't Stand Motor Traffic.

Few Americans traveling from Durham to London, more than 200 miles, realize that the road on which their car is moving was originally surveyed and constructed by the Romans. It was called Watling street, and it ran north to that Roman wall along the Cheviot hills which kept out the invading Picts and Scots.

Having a perfect foundation, the road was easily surfaced and maintained through all those centuries. But the motor car made necessary its complete reconstruction. It was the same with the more famous Appian Way out of Rome. The destructive suction of rubber tires demolished in ten years a monument which had stood up under the wheel traffic of 2,000 years.—Wall Street Journal.

Music Increases Output.

Some English firms are trying the effect of a gramophone or a piano player upon their workpeople. It is found that fingers soon seize the rhythm, figures sway and the output is increased. Waltzes bring good results and jazz music bad results.

GOLDFIELD HOG SHOULD HAVE MEDAL FOR LONGEST FAST

Some time during the first part of March a very valuable male hog belonging to Eddie Thompson disappeared and a thorough search failed to reveal the location of the hog. It seems that a large water tank that was put on one of the feed bunks and had been used for storing corn blew over and had just happened to light where the hog happened to be and thus completely covered up, and clear out of sight. One day last week Eddie was walkingby the tank and hearing a pecuiiar noise he lifted up the end of the tank and said lost hog came out looking rather thin, but yet able to get around after three months of imprisionment under the tank.
—Goldfield Cronicle.

A Dangerous "Nut" at Wesley

Marshal Leobig was called out to the Jake Hanig farm on Monday morning to take a man into charge that sure had bats in the belfry. About three o'clock Monday morning Jake and wife were suddenly awakened by a man who was standing at the foot of their bed calling for a knife or gun that someone was after him. They finally got him quieted and kept him there until the next morning. It seems that he had been working for Jack Ragan tiling south of town and until Saturday morning appeared sane. At noon Saturday he told Jack that they had better get a gun or knife as his mother told him that there were men out in that cave that were going to get him. There is no cave near where were tiling nor does anyone where his mother lives. He of sinking a boat and of $200.00, what he got the for the marshal could't On the way back from the where they had taken him to clothes, all at once he said marshal and Bert Ash, "did his white stockings laying stone," and then he denied that were his stockings and it that done it. What he meant stockings and that he didn't a mystery. When they were him out of town he said as they leaving, we will sink her stones. It is quite evident that man has committed some crime that is working on his --Wesley News World.

Salt Tells of Storm's Approach

Salt is extremely sensitive to changes. A very pretty, cheap effective barometer can be made a bunch of colored ribbons or a of flowers. Soak your ribbons flowers in strong salt water, them on the hat stand in the Your ribbons or flowers will and crisp when weather pro are good. But when your ba er becomes moist and limp you soon need your umbrella.

"Scoop" Larsen returned Tu morning from Webster City he has been a guest at Margue home. And some of these time presume Marguerite will return him. There is a great range in price of wedding announcements we carry all kinds.

Any objections not so made will be deemed waived.

Date of first publication June 9 1921

John N. Day
Town Clerk.

NOTICE OF APPOINTMENT OF ADMINISTRATOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Administrator of the estate of Wilbur McGee, deceased. late of Hancock County, State of Iowa.

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowence.

Dated June 6, A. D., 1921.

W. H. MILLER,
Administrator.

William Whistler Attorney. J9-16-23

No wonder people won,t go to church, as the minister might give out hymes with so absolete sentiments as "Work for the night is coming."

Doubt if John Barleycorn is really dead, but anyway he has been put as far under ground as the cellar

News For The Farmer

NOTHING CAN TAKE THE.. PLACE OF MANURE

No substitute at present known is capable of completely filling the place of farm manure. Notwith standing it's grat value there is probably no material on the farm in which so great and needles waste occurs. It is a common sight in almost any section to see stables and feed lots situated upon the bank of a stream or ditch where the most valuable portion of the manure will pass into the stream.

There is no soil so fertile that it's producing power cannot eventually exhausted by continued cropping which takes fertilty and returns nothing. We must not forget that the manure crop does not belong to the farmer but to the soil, and must be returned to the soil.

On many farms it appears as though well-laid plans had ben carried out for wasting stable manure.

Manure is lost by weathering, leaching, heating, rotting, by piling in heaps in the field and letting stand before spreading. If you cannot spread it soon after it is produced, store it in a pit, or manure shed. Don't pile it in heapsin the field.

Of all the ways in which manure is handled, piling it in heaps in the field is the most wastefull. It is worse than leaving it under the barn eaves and letting it leach out there, because of the waste of labor involved in hauling it to the field to be thrown away.

HOPE TO EQUALIZE LAND TAXES

Representatives of the Iowa Farm Bureau Federation will meet with the Executive Council in July when the body will sit on the board of equalization of land values for purposes of taxation.

In order to have accurate working information for the occasion the Federation is conducting a carefull state wide survey to determine the present values as compared with those of two years ago when speculation was rampant and prices seeking new levels every day.

Some of the older counties of the state were not so upset by the late land boom. Values remained fairly conservative, with taxes in proportion. But in most counties prices soared to the skies, and now, with a marked reaction in progress, leaving taxes based upon the maximum figures reached, the problem has become destressing.

The Federation officials realize perfectly that an equitable apportionment and distribution, one county with another, is about the hardest thing on earth to accomplish and dependable, first hand data is absolutly necessary if the Executive Council is to act intelligently and with anything approaching fairness to all.

This information the Federation proposes to furnish. When completed the survey will show land values by counties, both in 1919 and 1921; it will show whether the inflation experienced two years ago has been discounted and to what extent; it will show the percentage of bankruptcies resulting from the boom. the proportion of cases where owners have been compelled to take back farms that could not be paid for and much other information of a similar nature.

BANKERS TO MAP OUT PLAN TO TO AID LIVE STOCK RAISERS

WASHINGTON, June 15—Secreary Mellon announced today that a number of bankers in the livestock growing sections of the country had been asked to confer in Chicago next Wednesday to decide upon the bes methods for meeting the livestock loan situation.

This action was decided upon at a recent conference by the secretary of he treasury, members of the federal reserve board, the govnors of the federal reserve banks at New York and Kansas City and the managing director of the war finance corporation. The secretary discussed the situation yesterday with J. P. Morggan and a number of senaors. John R. Mitchell, of the federal reserve board, and Eugene Meyer, Jr., managging director of the war finance corporation, will represent the treasury at the Chicago meeting.

It is undrstood that the Chicago conference will consider the feasibiliy in forming a policy to extend credit to the cattle industry.

The people who claim the dollar is worth only 50 cents, are probably of patronizing advertised stores.

The bible tells about beating swords into plowshares, but the American people seem more inclined to beat them into jazz instruments.

Miss Roxanna Schaper came from Illinois this morning to look after business matters and also for a visit with relatives and friends.

Mrs. John Josten returned Monday from Flood Creek, Iowa, where she had been attending a missionary convention for the past week.

Mrs. Tom Greenland and litle girls from Belmond came Monday for a visit with Mrs. Stearnes for a few days.

FOR SALE—Good seven room house and two lots, good well, located across from the school house. Mrs. Wilbur McGee. J-9-tf

Mr. and Mrs. John Alberts went to Buffalo Center Tuesday for a few days visit with her brother and other relatives and friends.

Mrs. Palmer Ospty and daughter from Forest City visited at the F. Kluckhohn home from Saturday until Monday.

Mrs. Chas. Lenz and daughter of Spooner, Wis., came Saturday for a visit with Klemme relatives and frjends.

Notice—Please return all empty cement sacks as soon as possible. Farmers Lumber Co., Inc., Olof Brynteson, Mgr. J-9-tf.

Ben Coobs returned to Ames Tuesday night after visiting with Klemme relatives and friends for a few days. Ben is takingg a mechanical course at Ames this year.

Grandpa Shaefer came from Garner last week for a visit with his daughter, Mrs. John Gruetzmacher, and other Klemme relatives and old friends.

Harold Gruetzmacher came from Ames, Iowa, last Saturday for a visit with his folks here during his vacation. Miss Mae Warnock accompanied him from Iowa Falls for a visit of a few days here.

Last week we stated that Donald Nissen came from Sioux City to be a Klemme visitor for a few days. We erred as he will remain here all summer and will clerk at the J. N. Day store.

FOR SALE—Good seven room house. good baement with furnace, 3 1-2 lots, shade trees, fruit trees, 1 block north of park and 3 blocks from Main St. Inquire at Times for particulars. J16-23-30-J7-pd.

Mrs. R. A. Jorgenson, and son R. A. Junior, Mrs. Davis, her mother, and Mrs. H. H. Chapman her sister who are visiting in Klemme, all went to Garner Saturday morning for a visit with relatives.

Miss Mabel Waterman came from Iowa City yesterday morning to be at home during the summer vacation. She is attending the Iowa University and will be in the Sophomore class next term.

Mr. and Mrs. Riddenoar of Dysart, and Mr. and Mrs. Willis Dows and Mr. and Mrs. E. M. Pavey of Mount Auborn took supper with Mr. and Mrs. W. F. Pavey and family here Sunday evening.

Dr. H. D. Mereness and daughter from Dolliver, Iowa, camelast week Friday and remained until Saturday afternoon visiting at the E. S. D. Kahrs home.

Mrs. A. H. Meyer returned today from Flood Creek, Iowa, where she went to attend a missionary convention.

Arnold Tice of Mason City is here visiting at the Clarence Arnold home.

Mr. and Mrs. C. A. Arnold visited at the Dr. C. B. Tice home at Mason City Sunday.

Chris Jacobs came over from Garner last night to assist in the store.

TO ALL TO WHOM IT MAY CONCERN:

The commissioner appointed to vacate a street between Blocks 21 and 22 in Village of Amsterdam Hancock County, Iowa and running through the lands owned by F. A. Gee, has reported in favor of the vacation thereof, and all objections thereto, or claims for damages, must be filed in the auditor's office on or before noon of the 16th day of August 1921 A. D. or such street will be vacated without reference thereto.

Chris Jacobs, County Auditor.

...t Dollar Returned for ... Dollar Spent.

...re days when economy in ...t as in individual, priv... ate business is a first essential. We must have at least a dollar of return for every dollar of expenditure. No board of directors in any company would proceed to vast expenditures until every factor has been carefully weighed, the need of the whole considered. How much more important is it then, that in a govermental undertaking of this magnitude, we have first a board of forward looking able men, responsible directly to the president, to sense this problem and second a policy from them which will see to it that the first step is the improvement of those main market highways which by virtue of the service rendered in terms of transport, are of the greatest importance to the greatest number.

"In the days to come an awakened public will make available vast sums for highway construction, maintenance, transportation. Unless those sums are administered with clear vision, a reaction is inevitable. Clearly this is a public trust of first magnitude which should be met now by legislation such as the president has called for.

TO COMPARE WINTER WHEATS

Four Famous Varieties to Be Shown Day, June 29.

At Farm Crops and Soils Field

Iowa farmers will be given an opportunity to inspect the favorite winter wheats developed at four leading agricultural colleges during the annual farm crops and soils day at Iowa State College, June 29.

The Iowa, Minnesota, Kansas, and Nebraska stations have each developed a high pielding, harty variety of winter wheat. Kanred originated at the Kansas station Iowa 327 at Ames Nebraska 61 at Lincoln and Minnhardi at Saint Paul. Samples of these four varieties are growing side by side in the farm crops demonstration plots at Ames.

Iowa 327 was foud and distributed six years ago by L. C. Burnett, crop breeder at Ames. "The variety did not do so well the first year," says Mr. Burnett. "More than likely the poor showing was due to climatic conditions. During the last five years, however, when it has been subjected to different climatic conditions, the variety has done well. More seed of this wheat will be distributed this season."

Kanrad wass selected at the Kansas station in 1906 from a strain of Turkey Red. Last year 500,000 acres of Kanred were sown in Kansas alone. It is claimed that this new variety is not only more winter hardy and higher yielding than other winter wheats, but that it is also resistant to some forms of both stem and leaf rust. It has been grown with sucess in Iowa.

Nebraska 61 has averaged 35 bushels an acre in the tests made at Lincoln. It and Kanrad have yielded practically the same although Kanrad is a trifle earlier. The Nebraska station plans to distribute several thousand bushels of their new variety.

Minnhardi has been found winter hardy as far north as Saint Paul Minn. Crop breeders feel that a high yielding winter wheat that a extremely winter hardy would be of great value to Iowa farmers.

Mr. Burnett urges every Iowa wheat grower to visit the experiment station June 29 to see those well known winter wheats growing under similar conditions. It will be possible also to inspect many other tests that are being made with small grains.

Newly-weds Visiting In Klemme This Week

Mr. and Mrs. Henry Wille went to Colesburg, Iowa, last week Tuesday where they went to attend a wedding on Wednesday, of Miss Emma Hartbeck, daughter of Mr. and Mrs. B. S. Hartbeck. to Mr Edward Brookmier.

The newly-weds drove to Klemme Saturday and were accompanied here by Mr. and Mrs. Wille and are at present visiting Klemme relatives and friends and spending their honey moon here. The Times extends congratulations.

IN JUNGLE'S GRIP

Writer Tells of Varieties of Tropical Tramps.

Three Distinct Types Encountered In the Wilderness, Far From Any Habitation of White Men.

The more one wanders in the tropics, the stronger grows the call of the wanderlust, writes Harry L. Foster in Leslie's.

It makes tropical tramps. I have met many of them. Some were bums; some were railroad superintendents or managers of mining camps. Their one common failing was the foot itch.

When two Protestant missionaries passed through Lima on their way across the jungles to the Amazon to see whether the cannibals would take kindly to conversion, I left the embassy and joined them. We traveled by mule over the Andes and down the headwaters of the big rivers. Then we paddled down in a dugout canoe, sleeping at night on mosquito-infested sandbars, eating turtle eggs and monkey meat.

I had met one class of T. T.'s in the mining camps—the kind that travel from camp to camp, making enough at one mine to carry them on to the next. Down in the jungle I met another type.

The first of them was Lloyd. He owned a coffee plantation down at the beginning of the trail. A graduate of Oxford university, he had retired into the woods with his books and had not been out for 20 years.

"How do you manage to live?" I asked him.

"Do you see that grove of orange trees? Well, the oranges I can't eat fall off the trees and the hogs eat them, and I eat the hogs."

"But don't you get tired of the place?"

He merely laughed. For hours he talked to me about the Indians and their customs. Savage Indians, down here. In the forest he knew the habits of every animal, and the name of every vine or tree or shrub.

"Do you think I'd go back home and break my neck riding in subways, trying to get to an office at a certain hour? No, sir!"

Farther in the interior, on the Pichis river, I met Crawford, an Irishman, once a rubber baron, with 300 Indians working for him. He had lost his fortune when rubber fell in value, and was living on a small farm in the wilderness. He has been in the interior 26 years, miles from the habitation of another white man.

"Is it lonesome I am?" he repeated. "Sure an' with all these mosquitoes here, I am not."

Still farther in the interior I met a third type—Palmer. While pursuing adventure through the jungle he had found an old Indian squaw who owned a handful of gold nuggets. No amount of coaxing would persuade her to reveal the source of the mineral. Palmer, however, settled there, opened a small farm, employed the squaw as his housekeeper, and patiently sought to win her confidence. When I met him he had been there for five years.

"I ain't learned it yet," he told me, "but she's gettin' more 'n' more confidential every day."

His remark sounds like "sour grapes" to most of us, but I believe it.

Singing Frogs.

Frozen frogs are poultry. Ergo, live frogs must be birds.

Such is the reasoning of the United States customs service.

Lem Louie Wing, cook on the Persia Maru, brought a pair of singing frogs all the way from China as pets for his little niece up in Chinatown.

Being honest, Lem Louie visited the customs house and declared his intention of bringing into the United States two frogs.

Now, according to customs rules, everything entering the port must come under its proper classification.

The tomes of the office were searched and no classification of frogs was found.

It looked like Lem Louie's little niece would have to get along without her pets.

Then Deputy Surveyor Cook had a bright idea. Reference to the appraisal lists under the heading of "poultry" showed that frozen frogs may enter as "poultry."

Such being the case, Collector Irby was called upon to rule whether live frogs might not enter as "birds."

"The reasoning is clear," he ruled. "If the general appraisal board can classify them as poultry when dead, frogs must have a legitimate claim to being birds when they are alive."

"That's light," chimed in Lem Louie. "Thelse flogs sling alle timee."—San Francisco Chronicle.

Ed. Rice returned from Cedar Rapids last Saturday. He had been there visiting relatives and friends.

BEAUTY ITS LURE

Under Wonderful Charm Zanzibar Conceals Deadly Rage.

Great Metropolis of East Coast of Africa Attracts Wanderers From All Civilized Countries.

Aden, from which I had but recently departed, is a man grown gaunt and rugged in honest strife; but Zanzibar is a courtezan, whimsical, gay, sullen, presenting many aspects, writes William Ashley Anderson in Harper's Magazine.

Warm, rich, beautiful, concealing with dissembling art its sinister spots, it lavishes its charms, intoxicates with its beauty, smothers with its opulence; or suddenly, after a smoldering silence, it rends itself with rage. The screaming tornado rips its garments of verdure to tatters, bony-fingered pestilence goes leering down its dark alley ways, fever shakes the life out of its victims. And afterward, the bright sun sparkles upon the rain-washed foliage, and the island smiles again with the innocent radiance of a maiden.

Zanzibar town is the metropolis of the east coast It is Rome to the dusky pilgrim; it is Paris to the reckless wanderers from the Bantu folk of Cape Delado to the sons of the corsairs of Oman. Its clubs; its coffee shops; its cinemas; its dark, arched rooms where dusky belles from India, Arabia, the Somali coast, and Zanzibar giggle and shrill and dance monotonous dances; its spreading mango trees under whose shelter the torches burn, and the tom toms beat the measure of night-long ngomai; its shops tumbling with riches of roughly carved ivory and ebony, or hammered Cingalese silver and gems; its bazaars, gaudy with cheap cloth—kikovs, hodrunks, kanzas—bright with prints of flags and ships and emblems of royalty; the great ships lying in its roads, pouring into the lap of black Africa the increasing luxuries of Europe; the dhows bearing commerce from the Persian gulf, the Seychelles, and Madagascar—all, all and more, contribute to the renown and lure of Zanzibar.

My huge old Arab house had the reputation of being haunted. Unfortunately, I cannot prove this; but every night at two in the morning I awakened and lay for many minutes listening to the few faint sounds that tapped musically upon the bell of silence—the everlasting whispers and laughter of the waves upon the beach, the tap-tap-tap of death's head beetles in the berities of the ceiling, the rustling movement of rats, the clear silver tinkle of ships' bells in the harbor, the unexpected rattle of a chain far off the plaintive shriek of a lemur, the stirring of palm fronds outside my window.

Turning my head, I could look out through the porticos across the water, silvery under the moon, with red and white and green lights glowing from the gray shadows of ships. A pale brooding moon sometimes gazed at me from behind a fan of palms; and then ghosts would truly steal about me, tender, ministering ghosts—memories of other days and dim dreams that may yet come true. In their arms I'd sink again to sleep.

Youthful Soldier of Fortune.

A real soldier of fortune who became a commissioned officer in the Polish army at the age of sixteen, after having returned only five months ago to the United States and "civies," could no longer resist the call of the khaki and the bugle, and in consequence enlisted as a "buck' private at the United States army recruiting headquarters. This youthful hero of campaigns against the Germans and Bolsheviki is Josef Zalot, nineteen years old. In 1917 he joined the Polish volunteers, after being educated in Philadelphia his native city, and was commissioned a second lieutenant at Camp Niagara, Ontario, Canada. After considerable fighting at Rheims and the Champagne country, followed by the armistice, he studied at a French school of arms. He accompanied General Haller' army in the spring of 1919 to the Polish front to fight against the Russians, and at the end of that campaign returned home. He is now a buck private in the Eighteenth infantry at Camp Dix, New Jersey, studying for examination as a second lieutenant.

G. W. Kluckhohn, Henry Lewis, August Baack, Fred Kluckhohn the two Turgeson boys and Andrew Welemeyer made up an auto party to a lake in Minnesota where the above bunch fished last week Thursday. They all report a good time and as evidence of the excellent fishing up there had a fine string of fish to display to the natives here.

County Eighth Graders Graduated Tuesday; Large Class

HANCOCK COUNTY HAS THREE AMES GRADUATES THIS YEAR

Ames, Iowa, June 23—Three of Hancock County's young people were among the 475 graduates who completed their college work last Wednesday and received their degrees in the fiftieth commencement of the college. The great majority of the graduates were from Iowa, but 29 other states and 8 foreign countries were also represented in the list. The commencement address was delivered by Mrs. Carrie Chapman Catt, world famous leader of the women's suffrage movement and herself a graduate of Iowa State College in the class of 1880.

D. D. Murphy, president of the state board of education spoke briefly to the graduates and President R. A. Pearson of the college presented the diplomas.

Following are the names of the graduates from this county:

Harold B. Schneider, Bachelor of Science in Electrical Engineering, of Garner; Oscar C. Eliason, Bachelor of Science in Electrical Engineering, of Kanawha, and Miss Gladys Wiegman. Bachelor of Science in Home Economics, of Garner.

Many Attend Camp Meeting At Garner This Week

The Camp Meeting began at Garner camp grounds Tuesday and each day there are large numbers from here and vicinity who attend.

It is reported that the meetings are better than ever this year.

Many who can not find the time to attend during the week are planning to go Sunday, which will be the biggest day of the meeting.

Currents in the Maine Gulf.

Some interesting explorations have recently been made in the so-called Gulf of Maine. Three hundred and thirty drift bottles were set out in the bay and 16 of these were picked up off the bay shores of the Gulf of Maine. Each bottle contained a Canadian post card to be sent to the biological station with the offer of a reward to the finder who wrote the time and place of finding and posted the card. The larger bottles had a galvanized iron drag which was attached so that the bottle was hung at a depth of three fathoms. This was done to minimize the effect of the wind. Seven out of the 11 bottles which went to Cape Cod were found between seventy and eighty days after being sent out. The distance from the Bay of Fundy is about 300 nautical miles; therefore, the rate of drift was about four nautical miles per day. There was a map of the course of the drift bottles published in a recent issue of Science.—Scientific American.

Big Submarines Are Ineffective.

In a contribution to the submarine vs. battleship controversy, Admiral Sir H. Bacon states that because of the constructional conditions attending submarine design, a craft which navigates below water loses a large per cent of her surface fighting efficiency. Ton for ton, the fighting and scouting efficiency of a submersible craft of whatever size is only about 15 per cent of that of the surface vessel. Sir George Owens Thurston, naval director of Vickers, Limited, gives figures to show that a submarine of 5,450 tons, having a surface speed of 30 knots, could mount an armament of only one 5.5-inch and one 3-inch gun.

SCHOOLS MUST PUBLISH REPORTS TWICE EACH YEAR

Britt News-Tribune: Under a bill introduced by Senator Fosdick of Page County and passed by both the houses, Independent and Consolidated School Districts must publish reports or statements of their financial condition twice a year. The law provides for a report of the receipts and disbursements and for what purposes, and takes away from school boards the secrecy that has prevailed for years regarding the greatest part of the tax money spent in this state for the public welfare.

Failure to comply with this law, we believe, is equivalent to a misdemeanor, the same as where town council proceedings are not published according to law.

Fred Barz went to Garner Monday morning on matters of business.

COUNTY EIGTH GRADE GRADUATION EXERCISES HELD AT GARNER TUESDAY

Many From This Township In Class

The County Eight Grade Graduation Exercises which were held at the county seat Tuesday drew a large crowd from near here.

There were about 125 pupils in the class who will be eligible for the freshman class next fall.

The exercises were held at the M. E. Church at Garner and the address was delivered by Rev. S. M. McConnell of that place. Those who heard the address say it was the best that had ever been delivered in Garner. He likened the game of life to a ball game and brought out some wonderful points.

County Supt. J. R. Baggs gave a short talk and then presented the diplomas to the graduates.

The class then went to the court house lawn where they had their pictures taken.

Following is the list of the graduates from the townships here and near by—

Ell Township

Harvey Barz, John Baumgartner, Stella Bock, Glenn Busch, Alvin Cross, Wm. DeWitt, Viola Goll, Hillary Grieman, Ewald Josten, Gerald Koerner, Lena Lau, Glenn Minike, Leota Ridder, Albert Priebe, Ruth Quintus Adella Schoeder Lloyd Smith, Sylvanius Walker, Aaron Stromer, and Andrew Wellemeyer.

Liberty Township

Faith Ax, Ethel Ax, Francis Haberkamp, Ella Kahlstorf, Selma Kohlstorf, Caryl Lau. Ruth Lau, Abbie Ptacek, Dorris Schaefer, Hilda Schafer.

Twin Lakes

Selma McCorkle, Arched Nelson, Gladys Peterson, Julia Peterson, Viola Rust.

Avery Township

Edith Halfpop and Helen Siewwen.

EXCITEMENT HIGH IN IOWA "KLONDIKE"

Graettenger, Iowa, June 23—Gold excitement is running high here.

The report from Thomas J. Dee company of Chicago today shows the gravel deposits on the Herke farm run $14 per ton. A recent report from the same firm on the Smith farm deposits gave a $27 test.

Jorgen Anderson's farm samples gave $10.

The Herke farm is located a mile and a half southeast of Graettenger, the Smith farm about a mile southeast. and the Anderson farm two miles north of Graettenger.

Graettenger, therefore, seems to be built over a gold mine.

The report of state Chemist Kinney has not yet been made public.

Rooster At Jacobs Store Furnished A Lot of Fun Yesterday

As advertised in the Times last week Jacobs & Son would have a guessing contest at their store Wednesday. A rooster was starved for 12 hours and then fed all the corn he could eat. Everybody was given one guess as to how many kernels he would eat. The lady and gentleman guessing nearest would get a prize. The rooster when turned on the corn ate 171 kernels.

Mrs. Lynch guessed nearest. Her guess was 175 and she received a two burner oil stove oven. Clarence Bachman and W. F. Pavey each had a guess just as close and so they drew straws for the prize. Clarence Bachman received a pearl handled knife. His guess was 186 and W. F. Pavey guessed 156 and so they were each just the same number of points off. There were 73 men who registered and 40 ladies who entered a guess.

John McElligott, of Evanston, Ill., was here on business the latter part of last week. He is connected with the company who put in the sewer system here.

TAXI

An Adventure Romance

By

GEORGE AGNEW CHAMBERLAIN

COPYRIGHT THE·BOBBS-MERRILL·COMPANY

PART III—Continued.

—10—

After a minute and leisurely study of all the exits from Manhattan, the plain-clothes men had given it as their united opinion that Mr. Randolph had been speaking facetiously in his last-known remark and had probably not voyaged farther south than Canal street. They said if he would only try to leave New York they could find him at once, and settled down on a policy of watchful waiting for that event.

The efforts made by Mr. Milyuns in the direction of springing Miss Thornton on society went equally awry, but were not quite so fruitless. His natural love of a smooth-running establishment on the slippery crust of Gotham's social plane would have been saved a severe bump if American parents were as careful to look up their guests' moral records as they are to study their ratings in Bradstreetum's.

Unfortunately for Mr. Milyuns, it happened that a certain young scion of a once gentlemanly house was included in the first large dinner-box-party given to meet Miss Imogene Pamela Thornton. In the natural course of such events, the pasty youth stepped up for presentation, registering in his protuberant eyes a gleam of dubious surprise. What if he should say, "Hello, Vivienne!" Would it create a sensation?

Something else did; namely, Miss Thornton's modulated but terribly clear voice.

"I met Mr. Beamer," said Pamela, drawing back quickly her half-extended hand, "when I was a chorus-girl." She turned with a winning smile to her recently beaming hostess. "I don't care to know him in pleasanter surroundings."

For one breathless second there threatened one of those silences that spell social disaster. Eileen took it upon herself to mash it in its extreme youth with a soft tap of her efficient hammer.

"Oh, must you really go?" she remarked to Mr. Beamer.

Did this spectacular debut strike the name of Imogene Pamela from the lists of the matronly elite of Manhattan? It did not. Invitations rained on her and found her unresponsive. Her would-be hostesses would have gone the length of submitting rostrums of proposed guests as though to royalty, except for the fact that each and every one of them wished to put her own nearest and dearest to the test of a sudden meeting with the most exclusive of New York's latest crop of buds.

Pamela refused and accepted these bids for the latest thing in sensations in the most erratic manner. No one could fathom just why she said, "No," and much less why she occasionally said, "Yes." The mystery only added to the demands for her company and the Nays soon began to show an overwhelming preponderance over the Ayes. Why? Simply because it was not in the power of any of the hostesses to call up the moody girl and say: "My dear, we are going to have just pork and beans for dinner tonight. Won't you join us? Mr. Robert Hervey Randolph said he would drop in for pot-luck."

Yes; every time Pamela had accepted an invitation, it was in the rapidly waning hope that Mr. Randolph, beloved and once at the beck and call of these very people, would appear and come into his own. Could she have surmised that on two separate occasions the knight errant of her thoughts had actually seen her in her most ravishing bibless evening tucker, had driven her to two familiar doors, taken her money with averted face and without inspecting the "clock," and had passed on to some quiet stand to dream over her new glory and read the latest batch of ads crying for news of the whereabouts and welfare of self—could she have known these apparently insignificant items in the daily life of the great city, she would have wept her lovely eyes out twice over.

Such being her state of heart, imagine her excitement when Mr. Milyuns called by appointment and retailed word for word the following conversation which he had participated in that very morning with Miss Madge Van Tellier of East Ninth street:

"Oh, Mr. Milyuns, are you doing all that advertising for Bobby Randolph?"

"Yes, Madge; I certainly am, and if it doesn't bear fruit pretty soon I'll have to give up tobacco."

"Are you advertising for his own good? I mean is it important to him—not to you—for you to find him? Would he be really and truly glad to be found even against his will?"

"Er—yes—er—it is—er—he would—er—if he isn't sixteen kinds of a fool. I think I caught them all, my dear, but if I left any out, please repeat."

"Yes," admitted the lady question-mark; "your legal mind answered them all. Now tell me just your human self—if you were in Bobby's place, would you want to be found by you for the purpose that you want to find him for?"

Mr. Milyuns did not pretend for one second that he did not understand the preposterously worded query.

"You bet I would!" he answered promptly and emphatically. "Now tell me what you've got up your sleeve. Please, Madge; that's a dear girl! If you only knew how I'm worried seven times a day—"

"I'm trying to tell you," broke in Miss Van Tellier, "but you talk so much I can't get in anywhere. Last night, a taxi brought me home from—er—from a drive, and the cabman was Bobby, looking simply stunning in one of those awfully high-collared, khaki, waist-effect woolly coats, chauffeur's cap, tan puttees, boots, and all—"

"Yes, yes," interrupted Mr. Milyuns; "I know now just how he looked. What was the license-number of the car, and to which company did it belong?"

A long pause.

"Why, I didn't notice."

"Thanks awfully, my dear."

Sound of hanging up the receiver.

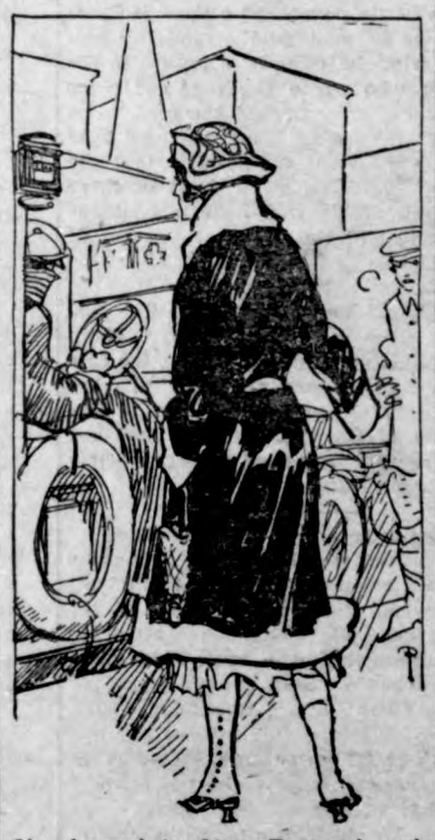
"So there you are," said Mr. Milyuns to the very much excited Pamela. "We've got this far and, by a fluke entirely unconnected with the twenty-two sleuths I have been pensioning in advance of their lifelong service, Robert is driving one of the sixty-three thousand taxicabs that infest the streets of New York."

"Poor dear!" said Pamela, tears rising to her adorable eyes. Then she dismissed Mr. Milyuns, who would gladly have lingered. "I have to go out now. I'm so sorry, but thank you very, very much."

"Can't I drop you wherever you're going?" asked the very human mind of the leading legal authority on corporation hedge-rows and byways.

"Oh, no," said Pamela, translucent as love itself; "I shall go in taxis."

How many vulgar vehicles for hire were blessed by the transient presence of Miss Thornton during the next seven hours is a matter of gross mathematics and consequently beneath the ken of an intelligence that can chat along about nice things like Pamela and Rob-



She Longed to Step Forward and Raise the Veiling Headgear.

ert Randolph for pure pleasure and subsequently sell the remarks for cold cash. Five minutes to spot a lively cab, five minutes to ticket the driver and pile him on the discard, two more to find her purse, three more to look innocent; then start all over again. Divide seven times sixty minutes by all that, and you've got her number.

Let us leave the statistical fiend and pass on to seven o'clock of the near-Christmas evening when Miss Thornton was momentarily out of a cab and strolling down the slope of the hump in West Fifty-seventh street. A mushy snow-rain had just begun to fall, giving anyone with the price a splendid excuse for taking a cab anywhere for anywhere. Before the portal of the Great Northern Lights squatted four taxis in a line. In the driver's seat of the rearmost of these, and consequently the last on the rank, a lank human being was buried in an enormous turned-up collar roofed by a chauffeur's cap set at an angle of slumber.

Pamela, the very moment her eyes fell on the recumbent figure, felt that short quick leap of the blood in her veins which is ordinarily termed a "hunch." She longed to step forward and raise the veiling headgear, but she dared not, for not only was the hotel-starter on the job but also the window-shades of the Poppy club next door were still elevated by special request, owing to the slippery state of the sidewalk in conjunction with the homeward-bound stream of dress-models.

As a consequence, she was necessarily content with opening the car door for herself and stepping in. The starter politely begged her to pass to the taxi at the head of the rank and just as politely she informed him that her feet were wet enough as it was. In the meantime, even her light weight on the running-board had startled the driver into wakefulness and, without going through any motions, he had heard the unforgettable tones of her voice.

The starter shrugged his shoulders, barked out an address in Fifty-ninth street and kindly offered to "turn her over for him." The driver laid trembling hands on the wheel and cautiously drew himself up to a sitting position without disturbing the shielding angle of his cap. Far from his troubled mind were thoughts of snow, the slush and skidding. He threw in his clutch, started her with a jerk, rounded the cab in front successfully, skidded mightily thereafter, straightened her out, skidded again, and crashed, with a great splintering of spokes, broadside front on the curb directly before the delighted windows of the Poppy club.

Nothing would have happened to Miss Thornton had she been sitting back in a ladylike manner, but at the moment of the cab's collision with the imperturbable curb, she was otherwise occupied; in short, the glass being a bit frosted, she was standing up and trying to peek through the speaking-slot. As a consequence, when the door flew open with the shock, she also flew and volplaned to a landing on hands and knees in the very middle of the very wide sidewalk.

With a cry of, "Oh, miss!" the driver sprang toward her, but when, still on hands and knees, she looked up and gasped, "Oh, Randy—Mr. Randolph!" he turned and fled down the hill.

"Hi! You Slim Hervey!" yelled the starter. "Come back here an' sign up for the junk!"

In the meantime, which wasn't much more than the twinkling of an eye, three perennial near-youths dashed down the steps of the Poppy club to the assistance of the loveliest trouble that had ever sent out an S. O. S. signal in the face of ready help to the falling. Individually and collectively, they raised the curly-haired vision to its feet.

"It was Mr. Randolph," gasped the maiden, in evident distress, "and I've been looking for him for weeks."

"Not Bobby!" exclaimed Mr. Nearton.

"Not Herv!" ejaculated Mr. Verries.

"Not Randy!" interjected Mr. Berry.

Pamela nodded three times, but her eyes failed to show wonder. Nowadays everybody she ran into seemed to know everybody she knew by his first name.

"Excuse me," said Mr. Nearton, intent on getting there first with a remark—any remark; "does he owe you money, too?"

The effect was electrical. Miss Thornton assumed a freezing dignity. She fixed Mr. Nearton with steady eyes.

"How much does Mr. Randolph owe you?" she asked.

"Only tw-twenty," babbled Mr. Nearton.

"Well, here it is," said Pamela, drawing a yellowback from her chatelaine and thrusting it into Mr. Nearton's nerveless hand. "I happen to owe Mr. Randolph a great deal more than that." Wherewith she turned and made for the corner and the nearest telephone booth.

Pamela was short of breath when she reached the telephone, but she managed to get Mr. Milyuns' residence on the wire and learned that he was detained at the office. She called up that safe den of the would-be undisturbed and connected with a new and strange drawl.

"You've got the wrong number, lady. This Mr. Milyuns went home early to celebrate his silver wedding."

"Will you put me through to Mr. Borden Milyuns," asked Pamela, in a sugar-sweet voice, "or do you really want to start looking for another job?"

"How do I know you know him—Miss Hurry, did you say? The office-boy ain't here, so I can't ask him. Leave me your number, an' I'll have him call you."

"Know him!" gulped Pamela, in a rage. "Why, I've k-kissed him!"

"Kissed Mr. Milyuns!" responded the voice, taking sudden notice. "Well, dearie, why didn't you say so? I thought you was one of them high-brow dames. If it's a matter of kissin' the boss over the wire, why just you go to it. I won't listen—oh, no!"

And a moment later, Pamela, in a streamline body:

"Oh, Mr. Milyuns, this is Pamela and I've found him! . . . Yes; Randy—Mr. Randolph. . . . No; he got away! . . . Yes. He's going under the name of Slim Hervey and he was driving the Village Cab company's No. 1898, and he smashed it on the curb just in front of that horrid Poppy club, and when he saw me, he ran. . . . Oh, you will get him, won't you? Please hurry. And now, if you'll hang up, I have a few words to say to that new telephone girl of yours. . . . Oh, no! you needn't tell her; I can feel her sagging on the wire. . . . Oh, will you? Oh, thank you! It isn't as if she didn't deserve it."

(TO BE CONTINUED.)

New Use for Wood Pulp Waste.

By carrying a step further the process of recovering sulphite spirit from the waste of wood pulp factories, by evaporation, it has been discovered that a new and valuable fuel may be produced, says Popular Mechanics Magazine. The process precipitates the organic contents of the lye in the form of powdered coal.

FEARLESS GINNY

By JACK LAWTON.

(©, 1921, Western Newspaper Union.)

Stewart's aunt was the solver of most of his problems. When either his bachelor household or his literary labors were going agiee, he went to Aunt Sue for advice, and found it. His latest trouble was a failure to concentrate in the noisy apartment he had recently rented. When phonographs or pianos were at peace, other distractions would arise claiming his annoyed attention.

"I'll quit the place soon as I can find other quarters," Stewart said. "But in the meantime—"

"In the meantime," Auht Sue interrupted, "you shall go on with the writing of your book in Doctor Jessup's suburban bungalow. Doctor has long been a friend of mine and left the key of the place with me, while attending some medical convention. It's the very spot for quiet work, beautifully isolated in a walled garden."

As usual, Aunt Sue's solution was a wise one. Stewart Ogden felt a sense of relaxation the moment he entered the silent, tasteful living room.

Stewart's book grew steadily in volume and interest, as the evening passed. He was enjoying himself immensely.

"Only twelve," he mused as a chime caught his ear. "I shall be able to work on for two hours yet."

Then Stewart beheld a strange tableau. It was as though he, in the shadowy living room, with its shaded light above the desk, were gazing at a movie screen, with actors registered there, instead of into the severe white laboratory. For into this laboratory came suddenly a man stockily built, with a cap drawn down on his face, and as, instinctively, Stewart snapped off the solitary light, the capped and cloaked figure sank to the floor before the safe, and began with directed torch to study its casings. Stewart, breathlessly observing, could read the inscription "Doctor Jessup" on the safe; noiselessly he slipped into the square opening beneath the desk and awaited developments. The next move of the picture was more surprising. A girl came swiftly into the square of light, and as the man worked on at the safe's combination she made quick inventory of both office and living room. Her cursory glance about both momentarily lighted apartments apparently reassured her.

"You were right, Steve," she said. "There is no one here. I looked through the rest of the house as I came. Now, hurry!"

The man jumped to his feet impatiently.

"I can't make it," he grumbled. "Must have mixed the numbers. Try it, Ginny, and—hurry yourself!"

Instantly the girl was upon her knees. She laughed a triumphant, whispered sort of laugh as the safe-door responded. Skillfully she drew from the interior various packages.

"There you are, Steve," she murmured. "And that had better be all for tonight. Get on your way quickly!"

The man stood looking down upon her as she dropped the securities into a bag he held.

"Please, come along, Ginny," he said.

"Silly!" she exclaimed. "You will be able to make that train easier if I am not with you. And if you cannot get back all right, I am not afraid of anything."

"Fearless Ginny, you know," she quoted to him.

Reluctantly, the big fellow lingered.

"Sometimes," he complained, "I wish you would be afraid, Ginny."

Before Stewart in his hiding place could realize what to do, the girl had pressed her companion out through the door and locked it after him.

Stewart's decision was promptly made. Though the actual culprit had been allowed to escape, he determined now to hold safely the accomplice; to him "Fearless Ginny" should make both explanation and restoration. When his arms closed swiftly about her, after one sharp glance into his face, Fearless Ginny bore out her name. Calmly she rested against Stewart's shoulder.

"Well," she asked amusedly, "what are you going to do with me?"

"I am going," he decidedly answered, "to telephone the police."

"The police have no terror for me," she mocked. "In two minutes I can make them believe me innocent."

She looked up at him saucily.

"They'd be more likely to suspect you," she said.

Awkwardly, Stewart Ogden led his charge over to the divan; the telephone was within reach. The girl curled her fingers in friendly manner through his detaining arm.

"I would not call up if I were you, Mr. Author," she advised. "I'm not such a desperate character after all. Fearless Ginny is just brother Steve's name for me. To your dear Aunt Sue I am known as Miss Doctor Virginia Jessup. Returned unexpectedly from a medical convention. Brother Steve scolded me about leaving all that money in my office safe. He intends to take it on to his own house until morning.

"I recognized you at once, Mr. Ogden," smiled young Doctor Jessup, "from the pictures your Aunt Sue has shown me."

The most nutritious root crop, after the potato, is the beet root, which contains 12 per cent of sugar.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

The Change.

To some women a man is considered a possibility for a time. After that he becomes a curiosity.

A pompous manner is sure to stir up a mischievous desire to flout it.

ABLE TO FOLLOW ANY TRAIL

Ahnds, East Indian Sect, Are Among the Most Skillful Trackers in the World.

The Ahnds, natives of Jaum, India, are among the most skilled animal trackers in the world, according to R. G. Burton, writing in the Field. They track bears, panthers and other jungle creatures by a mere shadow of a footprint and also by "marking," a system of watching.

When "marking" animals the natives turn out before sunrise and watch the animals as they slink back to their lairs. Then when the hunters take a position of vantage the marker's aids surround the animal on three sides, and drive it out from cover.

The Ahnds often track bears across solid rock, where the creatures' claws, scratching the surface, leave a mark. The panther's tread is so soft that no impress is made, save where the ground is soft enough to take the pug of the pussyfoot, and yet they track these wary animals when they show near the village.

Going to School in the Woods.

To go to school in the woods, to assign one's own lessons, to gain first-hand information in local mills, stock yards and stores—it is a part of the new plan for a summer school for boys and girls at the Kansas State Normal school. Scoutcraft will be taught on trips to the woods, and local industries will be observed by the classes. Questions raised on each trip will be taken up in the classroom the next day. Swimming in a pool twice a week will be a feature.

In looking for happiness, a man's eyes should be in his heart.

Mr. and Mrs. J. N. Day and son Dorance drove to Garner yesterday morning.

Mrs. Anna Fuller is visiting in Minnesota at the Henry Yahnke home.

Mr. and Mrs. Frank Urick and sons from Garner were Klemme visitors yesterday.

C. C. Tessier and Joe Hejlek drove over from Garner last night to hear the band concert here.

GERMAN WAR PLOT

Plan to Wreck Machinery in Chilean Nitrate Fields.

Had the Scheme Succeeded the Great War Might Have Had a Vastly Different Ending.

War depends upon explosive ammunition. Explosive ammunition depends absolutely upon nitric acid, and the huge supply of nitric acid which is necessary comes almost entirely from the nitrate fields of Chile. The sodium nitrate of the Chilean pampas makes it possible for the guns of the world to speak.

The most colossal war in the world's history depended upon a little strip of desert in northern Chile, writes Willard Price in the Christian Herald. Germany well understood this fact. For years before the war she purchased annually 42 per cent of Chile's total production of nitrate. This enormous quantity was bought ostensibly to be used as fertilizer, and, in fact, much of it was so used. But also much of it was systematically stored away for the manufacture of ammunition; so that, when the cloudburst came, Germany had on hand a vast supply of explosives and of nitrates from which explosives could be made.

With the beginning of war she was, of course, promptly cut off from communication with Chile. Since it was impossible for her to get more Chilean nitrate, she would make it also impossible for the allies to get it. The outcome of this reasoning was a plot, the story of which never got to most North Americans, but which I found to be widely known in South America. But for the telltale wagging of a drunken man's tongue, the war might have come to a conclusion of a sort far more pleasing to the kaiser.

One day in February of 1917 a Chilean miner came down from the nitrate pampas to the coast town of Antofagasta. He had money. He visited a cantina and in time became drunkenly garrulous. His babblings made his listeners sit up sharply and exchange glances, and later report to the authorities.

An investigation followed and a stupendous German plot was revealed, having for its object nothing less than the destruction of the machinery in all the nitrate oficinas of Chile.

The plot was to be consummated on February 26 (the same date as that set for the attempt, which proved futile, to steal the Peruvian submarines). Charges well placed under boilers and at other vulnerable points would have wrecked machinery that it would have taken at least a year and a half to replace.

Of course, guards were immediately detailed and the plan was abandoned. But if the plot had succeeded—what then? In a few months the existing supply of nitrate in the hands of the allies would have been exhausted. The manufacture of ammunition, except in Germany, would have stopped.

Women on Juries Old Stuff.

While considerable ink is flowing relative to women serving as jurors, the theme is rather old in Chester, Pa. It has been proved that this city had the first jury of women empaneled in this country, and that was in 1689.

The history of the Carter family, one of the early settlers of Pennsylvania, has the following to say about the public service of one of its members:

"Mary Carter was one of a jury of women empaneled in Chester in 1689 to examine a female convict and report whether she should endure the punishment the court had ordered."

The appointment of this jury was made in conformance with a rule laid down by William Penn who, with his prejudice against capital punishment and undue penal servitude, gave his erring subjects much opportunity to escape the fruits of their misdeeds.

Two hundred and thirty-one years after Mary Carter served on a jury other Chester women's names have been placed in the jury wheel for service at the next term of court.

Good Record for Colleges.

Thirty-six per cent of the members of congress, 55 per cent of the Presidents of the United States, and 54 per cent of the vice Presidents have been college graduates, according to an announcement made by Dr. G. Borst, dean of education of the Valparaiso (Ind.) university.

Doctor Borst also made the statement that there is only 1 per cent of college graduates in our male population of graduate age.

"Nearly 55 per cent of all cabinet members, 69 per cent of the justices of the supreme court and 85 per cent of the chief justices have also been furnished from this 1 per cent," said Doctor Borst.

Chorus Girls' Wages.

The wages of chorus girls in New York range as high as $100 a week, according to their good looks. The average pay, however, is nearer $25 a week. The minimum wage for chorus girls in England, as fixed by the Actors' association, is $15 a week, although in a few cases, as high as $25 is given.

Situation Wanted.

"Mamma, what did you say papa did all day?"

"Why, he samples coffee, dear—that is, tastes it."

A pause.

"Mamma, do they ever hire ice cream samplers?"—Chicago Tribune.

Mr. and Mrs. Henry Church and children were here from Garner on Tuesday visiting Klemme friends.

Miss Opal Griewe from Rudd, Ia., is visiting with Klemme relatives this week.

A. D. White and family and Mrs. Hughes drove over from Goodell on Wednesday of this week.

Miss Myrtle Bell went to Belmond yesterday to have some dental work done.

Frank Dominy and family from Goodell were shopping here last evening.

Mrs. Homer Butcher and children went to Forest City today for a visit with relatives.

Mr. and Mrs. Marlin Croner and Mrs. Schroeder, drove to Mason City Monday on business.

M. O. Hocum and Marlin Croner drove over to Mason City on business Saturday afternoon.

D. D. Ross of Garner spent several days the past week on his farm near here.

George Ulrich and wife went to Janesville, Iowa, the other day to attend a family reunion of the Ulrich, Plank and Suttor families.

Marlin Croner and C. W. Wiles left this moring in the former's car for Chicago where they will look after business matters.

Wellemeyer's Department Store has a large sign painted on the rear which shows up from a long ways down the street.

Mrs. J. E. Baumgartner and son, Johnny, went to Garner Tuesday morning. John graduated from the eigth grade there that day.

Mrs. Harold Jenison and Mrs. B. Jenison and daughter Cloe, of Belmond were shopping in Klemme on Saturday.

Chas. Busch and Son Glenn went to Garner Tuesday morning as Glenn was one of the graduates in the county eigth grade graduation exercises.

The John Bock familiy drove to Garner Tuesday morning as their daughter Stella was one of the gradu ates in the county eight grade class.

Art Wellemeyer and family drove to Charles City Sunday for a visit with his mother who has just returned from the south.

Rev. Griewe, of Rudd, Iowa, was here Tuesday evening. He had been attending the camp meeting at Garner.

Mr. and Mrs. B. A. Reemstma are rejoicing over the arrival of a fine baby girl who arrived at their home last Friday. This is their first child and Ben is more than stepping high.

Mrs. C. M. Bredbenner and daughter, Novella, went to Garner Tuesday morning where they went to attend the county eigth grade graduating exercises.

Mr. and Mrs. Lenz and daughter, Ruth, of Tomah, Wisconsin, arrived in Klemme Monday evening for a visit with Rev. and Mrs. A. H. Meyer. Mrs. Meyer is their daughter.

Mr. and Mrs. Albert Josten are rejoicing over the arrival of a fine nine and a half pound baby boy who arrived at their home yesterday (Wednesday) morning.

George Ulrich and family will be moving to town one of these days now. George has purchased the Lee Klotchbock residence and will soon be a regular town guy.

Town Clerk.
(SEAL)

This Ordinance is hereby approved this 15th day of June 1921.
F. J. Wenck
Mayor.
Attest John N. Day
Town Clerk.
(SEAL)

The foregoing Ordinance was officially published on the 23rd day of June 1921, in the "Klemme Times", a legal newspaper, published in said Town.

John N. Day
Town Clerk.
(Publish June 23-30)

ORDINANCE NO. 39

An ordinance defining the method of connecting with the sanitary Sewers in the Incorporated Town of Klemme, Iowa, regulating the use of the same and requirements in connection therewith, and fixing a penalty for a violation hereof.

Be it Ordained by the Town Council of the Incorporated Town of Klemme, Iowa;

Section 1. Before any person, firm or corporation shall make any connection with a sanitary sewer laid anr constructed within the Town of Klemme they shall make a application for and receive a permit therefor from the Mayor of the said Town, said application setting forth all of the use the applicant intends to make of the said sewer, the number of the lot and block, which application shall be accompanied by specifications describing the drainage of the building on blanks furnished for that purpose, showing the kind and size of pipe to be used, the traps, closets and fixtures to be used, which shall be furnished by the owner or his agent and kept on file in the office of the Mayor.

If the publication for the sewer connection is in no way in violation of the sanitary rules and ordinances of the Town nor of the Laws of the State o Iowa, and the fee required herein shall be paid than the Mayor shall issue such permit in the name of the owner of the said lot.

Section 2. The construction and maintainance of all sewers and sewer connections in the said town shall be under the supervision of some competent person to be named or appointed by the Town Council and in case no such person be so appointed or designated, then under the supervision and direction of the Mayor; and it shall be his duty to inspect the sewers and sewer connections from time to time and when cleaning, flushing or other repairs are necessary to employ some suitable person to make such repairs and report the cost thereof to the Council.

Section 3. The Mayor or Sewer inspecter appointed by the Town Council shall prescribe the mode of laying house drains and connecting the same with the sewer system of Said Town, and shall make rules and regulations not inconsistent with any ordinance of the Town defining the kind and quality of the material to be used and the manner of laying and extending the same, and all fixtures connected therewith, which rules and regulations and the specifications therefor, upon the approval of the Town Council shall have the same force and effect as though set forth specifically threin, and all work done in constructing or connecting such sewers shall conform in all respects thereto and all work and material so done and used shall be subject to the inspection of the said Mayor or Sewer Inspector and all faulty and defective work or material which may at any time be discovered shall be corrected to comply with the rules and ordinances of the Town relating thereto.

Section 4. No house drain shall be extended from work already in place, and which has been duly inspected and approved, nor shall any additions or new connections be made therewith. except upon a permit duly granted therefor the same as required for the original construction and shall be made only under the supervision of the Mayor or the Sewer Inspector appointed for that purpose.

Section 5. Each and every house must make direct connection with the main sewer in the street, and no two or more houses will be permitted to make such connection through one pipe, nor carry their drainage in pipes laid beneath or through adjoining property, except by special permission of the Town Council, the Mayor or Sewer Inspector.

Section 6. The main drain of every house or building connecting with the Town Sewer shall be constructed, from a point three (3) feet outside of the wall of the main sewer, of vitrified sewer pipe of the same quality as that used in the Town Sewer sewers and not less than six (6) inches in size. such pipe to be glazed on both sides or of such other material as shall be approved by the Town Council.

Sec. 7. The pipe used in making connections with sewer must be of the best quality of salt glazed sewer pipe with bell and spigot joints, all joints must be connected and laid with oakum and portland cement mortar, one part cement and two parts clean sharp sand; the joints must be carefully wiped and jointed and the pipe left clean and smooth throughout.

Section 8. The main soil pipe in the building and under the foundation wall from a distance of three feet outside thereof shall be of cast iron pipe with joints well caulked and leaded and of the weight known as extra heavy and shall be not less than four (4) inches in diameter and the fall shall not be less than one fourth (1-4) of an inch to the foot and of a uniform grade.

Section 9. Every vertical soil pipe shall extend not less than a foot above the roof and at least one foot above the windows in adjacent buildings and shall be of undiminished size of not less than four inches with outlet uncovered; such soil pipe shall not open near a window or an airshaft, and in no case shall a smaller pipe than four inches in diameter be allowed to project through a roof for ventilation.

Section 10. No sewer pipe trap will be permitted to be placed at the foot of a ventilating shaft or soil pipe.

Section 11. No connection shall be permitted to be made with the sewer at any point other than where the junction piece or Wye has been inserted for that purpose; In case it should be found impossible to make the connection with the sewer in the street at the place fixed therefor then the Council may by a proper resolution, permit a new Wye or place for such connection to be inserted in the street sewer which new connection shall be placed therein by the Sewer Inspector or the Mayor but in no case shall any other person be permitted to insert such new connection in the sewer, or break into the sewer.

Section 12. In case the plumbing or fixtures in any building connecting with the sewer shall become faulty or out of repair, the Sewer Inspector shall call upon the owner or occupant of the building to repair the same and if not so done by such owner or occupant within three days then such Sewer Inspector shall cause such repairs to be made and report the cost thereof to the Council and such cost shall be levied and become a tax against the said property and if not paid shall be certified to the County Auditor and collected as other taxes.

Section 13. Should water, gas or other pipes or drains be encountered in the direct line of a house drain or connection, the question of carrying such sewer drain or connection under. over or around such or similar obstructions, or of doing anything involving a deviation from the proper line or standard grade, shall be determined only by the Sewer Inspector or Mayor acting as such.

Section 14. Whenever it may be found necessary to pass through or in any wise disturb an existing house drain or sewer connection in actual use, such drainage pipe or private sewer shall not be interfered with nor cut through nor connected in any way without the consent of the Sewer Inspector having been previously obtained therefor.

Section 15. All connections between the main sewers and slaughter houses, lard rendering establishments, butcher shops packing houses hotels, resturants, creameries, manufacturing establishments, etc., shall be made through intervening receiving basins, built in brick masonry in whose number, dimensions and form shall be perscribed by the Sewer Inspector by the resolution of the Council.

Section 16. All openings made in the sidewalks or roadways for the purpose of constructing house drains or connections, shall be surrounded and efficently protected at all hours by ample and sufficient barriers, on which red signal lights shall be placed and maintained at night time together with such additional precautions as may be deemed necessary for the protection of the traveling tract for which such connection is public, and the owner of the lot or made shall be liable for all damages resulting from a failure to sufficiently protect such openings.

Section 17. No person shall uncover or excavate around any catch basin, man-hole, flush tank, brick or pipe sewers within the town for any purpose whatever, except upon the written consent or permission of the Sewer Inspector or the Mayor acting as such.

Section 18. The Sewer Inspector or the Mayor acting as such or any person properly employed by such persons shall have free and unobstructed access to any part of any premises where house drains or sewer connection, cess pools or water closets, connected with any brick or pipe sewer are laid for the purpose of examining into the construction, condition and usage of the same, and making necessary alterations and repairs, at any time between the hours of 7 o'clock A. M. and 6 o'clock P. M., and the owner or occupant of such premises shall aid such officer in the performance of such duty and shall correct any fault or inquiry to any such drain, connections or other fixtures connected with the said sewers upon the direction of such Inspector or his agent.

Section 19. There shall be paid to the Mayor for the use of the Town of Klemme, Iowa, the following sums for the granting of any and all permits provided for herein, viz:-

For a permit to connect with the main sewers the sum of Two Dollars, For a permit to construct, alter, change or repair any sewer drain or connection with the said Town Sewer the sum of Two Dollars.

Section 20. Any person violating any provision of this ordinance shall be deemed guilty of a misdemeanor and when convicted thereof shall pay a fine of not less than Five Dollars nor more than One Hundred Dollars.

Section 21. All ordinances or parts of ordinances in conflict herewith are hereby repealed.

Section 22. This ordinance shall be inforce from and after its passage approval and publication in the Klemme Times as provided by law.

Passed, adopted and approved this 20th day of June A. D. 1921.
F. J. Wenck
Mayor.
Attest
John N. Day
Clerk.

ED YAHNKE MARRIED AT GRAETTENGER LAST WEEK

Cards were received in Klemme Saturday announcing the marriage of Miss Cynthia Cameron, of Graettinger, Iowa, to Mr. Ed. A. Yahnke at the home of the Bride's parents, Mr. and Mrs. D. W. Cameron at Graettenger, Iowa, last Wednesday June 15th.

The groom is well known here and is one of the prosperous farmers at Buffalo Center, Iowa. The Bride. we are told is a fine young lady who formerly taught school at Buffalo Center, where Mr. Yahnke met her.

The Times joins the many friends of the happy couple in extending congratulations.

Kanawha Has Creamery Day Celebration Today

There are big doings at Kanawha today, Thursday. They are having a Creamery Picnic and a celebration. A carnival company is there to help them out, as well as many other attractions such as a ball game, the Eldora Industrial School Band of pieces besides other things. The band from Kanawha and some of the business men were in Klemme and other nearby towns Monday advertising the event.

NOTICE TO CONTRACTORS

For the Construction of Drainage Disctrict No. 101, Hancock County, Iowa

Notice is hereby given that the Board of Supervisors of Hancock County, will meet at the Court House in Garner, Iowa, on the 15th day of July, A. D. 1921, at one thirty o'clock to let to the lowest responsible bidder the contract for the work and construction of Drainage District No. 101 of Hancock County, Iowa, said work to be let specifying the work to be done and the time fixed for the commencement and completion of the same, to-wit:

SECTION 1.

Main Line

Length	Size	Av. Depth
200 feet	4' base open ditch 100 cu. yds.	
600 feet	32"	6.00
1500 feet	24"	5.40
1000 feet	18"	5.60
1200 feet	12"	5.20
1000 feet	10"	5.40
300 feet	8"	4.60
1 Bulkhead	15 cubic yds.	
3 Brick Manholes	with iron covers.	
2 Sewer Pipe Inlets	8" with 15" top.	

Lateral 8

40 feet	18"	3 feet

Lateral 23

286 feet	18"	4.50
1 Sewer Pipe Inlet	8" with 15"	

Lateral 28—50

800 feet	8"	4.40
300 feet	8" S. Pipe	4.40
2 Sewer Pipe Inlets	8" with 15" top.	

Lateral 47—55

42 feet	8"	3.90
1 Sewer Pipe Inlet	8" with 15" top.	

1. All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2. All tile must pass the specifications for drain tile of the American Society for Testing Materials. Tile in sizes 8" to 12" to be 2' long. Tile in sizes 12" to 32" must pass the specifications for Standard Drain Tile. Concrete tile will be allowed only in size 24" to 32".

3. Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to back fill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specifications are on file with the County Auditor.

5. Work to be commenced thirty days from date of letting of Contract. Contract will be completed by May 1, 1922.

All ditches and drains to be constructed in all respects in accordance with the plat, profile. and specifications of the District filed by the Engineer in the Auditor's Office subject only to such changes and alterations as may be made provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1:30 o'clock P. M. of the 15th day of July, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids must specify prices for tile alone, for construction work alone, or for both tile and construction.

The Board will. at their decision, let the work as a whole to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENTS WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof, and shall also file with County Auditor a bond subject to his approval for a sum equal to twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 101, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty four hours after demand. and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By Order of the Board of Supervisors.

Dated at Garner, Iowa, this 21st day of June, 1921.

CHRIS JACOBS,
County Auditor.

MANURE AIDS PROTECTION

By P. G. Holden

No soil is so fertile that its producing power is not decreased by continued cropping, which takes away fertility and returns nothing. Every crop removes from soil plant food which must in some manner, be returned.

Manure increases the supply of humas in the soil.

It adds plant food.

It makes the plant food in the soil more available.

It makes the soil warm.

It enables the soil to receive and retain more water and to gradually it up to growing crops.

It improves soil ventilation.

It aids in the developement of bacteria.

It helps to prevent washing.

Experiments have shown that practically 80 per cent of the plant food eliments in feed is returned in the manure.

Yet, despite its great importance as fertilizer, manure valued at hundreds of millions of dollars is lost every year by reasons of careless handling.

Manure is lost by being exposed to the weather, by leaching, by heating, by rotting and by being piled in heaps in the field and allowed to stand before spreading.

The only way to save manure is to spread it when fresh with a manure spreader. The manure spreader saves labor, it prevents the wasting away of valuable plant food. It is one of the most important of agricultural implements. No farmer can afford to be without a manure spreader.

Dangers of Other Centuries.

A good many hundred thousand years ago there were various queer animals on this earth, and one of the queerest was a creature that is known today under the pleasant title of plesiosaurus dolichodeirus, or long-necked sea lizard. These far from pretty animals had a body shaped somewhat like a cigar, with a snake-like neck and a head that resembled a duck's, while it was thrust through the water by four flappers and a short tail.

An idea of their size can be gathered when it is known that a single tooth was a foot or more in length, and its head, the smallest part of its anatomy, was six feet long. A total length of 60 feet would not be a giant by any means, and there is reason to believe its strength was so great that a single snap of the jaws would be powerful enough to cut through a tree with a 36-inch circumference. It lived almost all of the time in the sea, and dined off fish and other marine food. Its battles must have been terrific, as skeletons have been found where great pieces of vertebrae have been torn out, evidently from the living creature.

End to Everything.

It was a sorority dance, formal, of course. He was not a finished dancer, and was exceedingly sensitive about being seen. After months of urging she had convinced him that he should attend. As he broke into the spirit of the affair he grew less fearful, and as they glided across the floor he glanced down at her face and said:

"Darling, I believe I could dance with you forever—just like this. Could you?"

"Yes, dear; but even a sidewalk will wear out some time," she answered.

Good Timber.

"Are you the president-elect?"

"Yes, my friend. What can I do for you?"

"Not a thing. I don't want an office. Don't even want to offer you any good advice."

"My friend, I'm sorry the cabinet appointments have been made up."—Louisville Courier-Journal.

There was a ball game at West Lake Sunday to which a number of Klemme people went to see. Belmond and Kanawha crossed bats on that date resulting in the victory for Belmond 6 to 5.

A number of young people from here went to Belmond last Friday evening to attend a dance given by the American Legion. A Ford Coupe was raffled away and was won by Rich Thompson, of Belmond.

Mr. and Mrs. Lew Lewis returned last week from Hayfield, Minnesota, where they went to visit their son, Verner and family. They also visited the Henry Yahnke family while in Minnesota.

Mrs. Chas. Lenz, son and daughter left Monday morning for their home at Spooner, Wisconsin, after a week's visit with Klemme relatives and friends. They came here to attend the wedding of her sister, Miss Viola Sampson.

Mrs. N. L. Palmer left yesterday morning for Algona for a week's visit with relatives and friends and from there she will go to Topeka, Kansas for a few week's visit with relatives.

The intense heat last Friday and Saturday is reported to have killed a number of horses in near by localities. Four or five horses are reported to have been overcome near Garner and a like number near our other neighboring town of Goodell.

Mr. and Mrs. John George, and Mr. and Mrs. Will George, drove to Klemme from Minneapolis Saturday for a visit of a few days with Mr. and Mrs. Louis Sampson and other relatives here. Mrs. Sampson is a sister of the George brothers. They returned to their home in the northern city yesterday.

$100 in Gold given away every Sunday at Bayside Amusement Park. Come get your share and see the fun. Free picnic grounds, Boating, Bathing, Fishing, better than ever. J23tf

$100 in Gold given away every Sunday at Bayside Amusement Park. Come get your share and see the fun. Free picnic grounds, Boating, Bathing, Fishing, better than ever. J23tf

W. F. Hathaway, who is connected with the Bayside Park at Clear Lake was calling at our office yesterday. He informed us that two Klemme people drew prizes at the park last Sunday when the park company gave away $100 in gold. Art Kuck drew a lucky number and received a $10 gold piece. Mrs. C. M. Gram was the other lucky Klemme person and she also received a $10 gold coin. Mr. Hathaway said they are going to give away $100 each Sunday instead of spending the money for other attractions.

LIBERTY TOWNSHIP NEWS

Quite a number from this vicinity attended the ball game at Twin Lake last Sunday afternoon.

Many are attending the meetings which are being staged at the Camp Grounds both in the evening and day time.

The Western Union Thresher Co., held a meeting at school house No. 9, Monday evening for the purpose of hiring their machine men and conducting other necessary business.

A. Carolus has been shelling corn the past few days. They have been hauling corn to town with two Fordson tractors, pulling two loads with each tractor.

Those who have observed probably have noticed that Emery Schaefer's contenence beams much brighter since last Sunday evening. Congratulations "Abe."

AVERY TOWNSHIP NEWS

Verner Nelson visited at the Harlow Helps home Sunday.

Fred Bell visited at the home of Elko Buss last Saturday.

Russel Bell was a visitor at the Fred Bachman home Sunday.

Clyde Hoffman and his friends attended a dance last Saturday night near Ventura.

Mr. and Mrs. Robert Roth, and Mr. and Mrs. Ed. Bachman and children, visited with Goodell friends Sunday.

Lucky Catch Preserved Lives of Surveyors.

On the Verge of Starvation in Canadian Wilds, Small Creature Was Godsend to Men and Dogs.

The flying survey that the engineers of the Grand Trunk Pacific railway made through the unexplored forests and mountains of Canada was attended by all manner of hardships and adventures. It is remarkable that so few men lost their lives, for the work, which was pushed forward winter and summer, was always filled with dangers. An experience related in Mr. F. A. Talbot's book, "The Making of a Great Canadian Railway," affords a graphic idea of the pains and penalties that many surveyors endured in that silent, unpopulated country:

In the depths of winter I was out with one of the surveyors on an exploration trip. We had four dogs and a couple of sleighs not heavily laden. Somehow or other, owing to the blinding snow, we were delayed and lost our way. The dogs had to go without food and we ourselves did not taste a bite for three days; nor did we catch sight of the smallest specimen of game. One thing after another was thrown off the sleighs to ease the plight of the dogs, grown so thin from want of food that their ribs showed through their skins. Only our sleeping bags were retained. Through the day we stumbled along on our snowshoes, constantly falling over obstacles and bruising ourselves against the trees. At night we lay down by our camp fire, utterly exhausted and faint from hunger and cold.

It was on the third morning that I descried the faint footprints of a jack rabbit. It was the first sign of game that we had seen for three days. I drew my companion's attention to the tracks.

"Stop right here and light a fire. We'll have something to eat this morning or else I won't come back again!" I cried excitedly as I grabbed my gun.

I sped off with my eyes glued to those scarcely discernible footprints. But it was weary tracking; the trail was as elusive a will-o'-the-wisp as anyone could find in the forest. For three solid hours I followed it relentlessly, stumbling and falling wildly, bruising my shins and tearing my hands through the bush.

At last it disappeared into a willow shrub. Crawling up warily, I searched the thicket, and there spied the quarry. Fearful that in my excitement I might take too hurried an aim with my rifle, miss, frighten, and lose the animal, I crawled steadily forward on my hands and knees. When within an arm's reach I made a sudden spring and caught it by the scruff of the neck. In a trice it was dead; but I had captured a sorry prize. Like ourselves, it was in sore need of food, for it could obtain but slender sustenance from the snow-covered ground.

I retraced my footsteps as hurriedly as I could. I found my comrade sitting before the fire holding his head in his hands between his knees—an abject picture of misery and despair.

In a few minutes the rabbit was skinned and spitting merrily on an improvised roasting jack. The skin was cut into four equal parts and given to the dogs. They devoured it ravenously. Not an atom of that rabbit was wasted. The little bit of food put new life into us and we pressed on through the forest until finally we reached our camp.

Repairing Stonehenge.

Stonehenge, the prehistoric group of huge standing stones near Salisbury, in southern England, has been set in order for the first time in three or four thousand years. A single stone was straightened in 1901, says Popular Mechanics Magazine, but a thorough overhauling was made impossible by the government and during the war was the center of a large, permanent encampment. Artillery range and mine experiment stations were established close enough to jar the uprights and the remaining lintels. One lintel was moved outward to such a degree that it became a menace to visitors. The government put up cranes and winches to restore that stone and has set firm the stones that are still erect.

Kept on the Keen Jump.

"I reckon you had a right lively time in Kansas City?" insinuated an acquaintance.

"Tollable," replied Gabe Gosnell of Grudge, "but nothing like what I probably would have had if I wasn't considerable lively on my feet. You see, up in Kay See, if you meet a respectable-looking man after 4 o'clock in the afternoon, anywhere the least bit off to one side, he's a hold-up and robs you.

"And if you meet one that don't look respectable, he's a plain clothes policeman, and pounds you because he thinks you're a hold-up. So I was practically on the keen jump all the time I was there, dodging the one or the other."—Kansas City Star.

Fine Pictures of the Aurora.

In the last 10 years, Prof. Carl Stormer, in Norway, has obtained more than 300 successful pairs of simultaneous pictures of the aurora, besides 200 single pictures, and the brilliant display of March 22-23 last was photographed at seven stations, separated from 16 to 55 miles. A height of more than 300 miles is indicated for the last aurora, no earlier measurement having reached 200 miles.

ALL A "SIMPLE MAN" KNEW

But His Cheery Greeting Caused Many To Take More Hopeful View of Life.

Used to have a man down our way that some folks called "short" in his upper story. We never looked for him to say a sensible thing or do one. He couldn't if he tried with all his might. He was the neighborhood fool, says a writer in Farm Life.

But one thing that man did know, and that was that God never made a day that was not all right. Whether it rained or snowed or blew or shone, it was a fine day with him. Meet him anywhere and you would never catch him without a smile on his face and a cheery, "Nice day!" on his lips.

And this man who was short in the upper story did more to make folks feel good inside of them and inspire them to look on the bright side of life than any other farmer in the neighborhood. We all went on after we had met him in the road with a warmer feeling in our hearts, thinking: "Now, maybe it really is a better day than I had thought it was."

No man could have spoken a greater truth than our good old friend of the cheery smile and the optimistic thought. Edward Everett, the great orator, went far across the country once to speak at the dedication of a great public institution. It was a stormy day and people did not look very happy as they stood around under their dripping umbrellas. Watching the expression on their faces, Mr. Everett said with a big smile all over his face: "This is a fine day. God made it, and He never made a day that was not just the best He could make it."

Sometimes it seems to us that things in this old world of ours are pretty badly mixed up these days. It is quite fashionable to say: "We never saw anything like this." Things might be a great deal worse with us than they are. And everything is coming out all right, but you and I must bring them out right, or they never will be right.

All our friend knew was that all the days are simply fine. He could not have known a greater thing.

What, Indeed.

Alabam—They tell me that up no'th the Yankees put signs on their cemeteries, "No autos allowed."

Mississippi—Huh! Then tell me what they do when their engine dies on them?—Exchange.

To Relieve the Plainness.

Guest—It's curious to me that your other daughters have married into large mercantile houses and your youngest daughter to a poet.

Host—Yes, I allowed it. The family needs him as an adornment.

BAND CONCERT WEDNESDAY NIGHT

Uncle Eben.

"Givin' advice," said Uncle Eben, "is often a roundabout way of blatin' to a man dat you don't think he's got as much sense as you have."

Daily Thought.

I go on with what I am about as if there were nothing else in the world for the time being. That is the secret of all hard-working men.—Kingsley.

ING HOGS FOR CHOLERA

Are Inevitable Unless Early on Is Taken and Proper Remedies Applied.

d by the United States Department of Agriculture.)
early action is taken to diagcases and apply proper treatthen disease appears in your erds, losses are inevitable. The are many that the trouble is and under such circumstances dangerous, for when that dis- spread and progressed in the e loss of many hogs may be d.

attention in an outbreak of olera is essential for the suctreatment of the herd. It has d repeatedly that anti-hog-cholum is not a cure; its use is ly intended as a preventive gainst cholera, and as such it ersally recognized as the only treatment. While the serum ly has had some favorable efhen administered to sick hogs very early stage of the disease, owners should not depend upon oduct to save any number of after they have developed symptoms of hog cholera.

Farmers' Bulletin 834 (revised) on is called to the fact that the is most efficacious when admin- as a preventive. "While the is regarded as most efficacious dministered as a preventive," lletin points out, "it seems to ome curative value, provided it inistered when hogs are in the arly stages of the disease. But little benefit can be expected he treatment of hogs that are sick."

rum should be used with the unnding that it is a preventive than a curative agent." "It has tated that serum alone has some in treating sick hogs. This is within a certain limitation. Ordit is efficacious only in the very stage of the disease, before the how visible signs of sickness."

bulletin issued recently by Dr. Reed, chief of animal industry,

Cleaning Up the Hoghouse.

land state board of agriculture. ars the following: "An analysis e data obtained from sick herds, inated in Maryland during 1919, s that over one-fifth of the swine died or were too sick to treat be- the herds were immunized." Ination from other states where rol work has recently been conted points to a similar lack of ppt attention in reporting outks of hog cholera. Much of the cism and unfavorable comment nst anti-hog-cholera serum are due he fact that farmers delay the use he product for too long a period r cholera has reached the herd. en many of the animals show ptoms of the disease and the temture reveals a high fever, it is reasonable to suppose that serum do much toward limiting losses. refore, the warning is again given reat the animals at the very first of cholera in the herd.

r better still, if there are reasons uspect that the hogs have been or exposed to infection, they should immunized before they have fallen ims. In sections where there are known outbreaks of cholera there s not seem to be any need for the of an expensive treatment, but en the disease makes its appearance the vicinity no time should be lost having all susceptible hogs given serum treatment.

Reports indicate that farmers and me owners are remiss in guarding inst the introduction of infection, d are generally inclined to expect much of anti-hog-cholera serum as rurative agent.

SIZE OF FARM A SUCCESS FACTOR

Results of Survey Conducted by Department of Agriculture in Ozark Region.

ADVANTAGE OF VALLEY LANDS

Dairy Industry Would Become More Profitable if Cows of Greater Productive Capacity Were Introduced by Farmers.

(Prepared by the United States Department of Agriculture.)

That the size of the farm has much to do with the success of the owner is shown by results of a survey conducted by the United States Department of Agriculture in five counties in the south and southeastern Ozark region of Missouri. The operation of a general farm in the Ozarks with much less than 40 acres of land for crops is exceedingly unsatisfactory, regardless of the location of the farm, whether among the valleys or the hills.

Study Many Kinds of Farms.

The report of the survey published by the department as Department Bulletin 941, entitled "Farm Management in the Ozark Region of Missouri," is based on the study of the organization and management of 79 farms, 31 of which are representative of conditions of rolling and hilly uplands, and 48 of valley and level uplands. The topographical structure to a large extent determines the agricultural value of the land, says the report. As a rule the operator of a valley or level upland farm has a decided advantage over the operator of the rough farm. After deducting from their total receipts the year's operating expenses, including the value of family labor and allowing 5 per cent interest on the capital invested, the survey shows that the operators of rolling and hilly farms had, in 1917, an average labor income of $309, and those operating valley or level upland farms an average of $646.

Of the 79 farms studied, 20 per cent had no labor income after allowing for the deductions referred to, and 21 per cent had a labor income above $1,000. Labor incomes earned by typical operators indicate that one having much less than 40 acres of crop land for a general live-stock farm has a rather poor chance of financial success.

Better Cows Would Increase Income.

Live-stock farming is the principal agricultural industry of the region. The use of cows for dairy purposes is increasing. The average annual production per cow of 78 cows on the better class of dairy farms in the area covered by the survey was 142 pounds of butterfat. This industry, says the report, would become more profitable if cows of greater productive capacity were introduced, and the production would be increased if the feeding of

Typical Dairy Herd in Ozark Region.

better-balanced rations was practiced more generally. Pasturage is the foundation of a live-stock industry, but natural pastures can be greatly improved by thinning out woodland areas, keeping the underbrush down, and sowing tame grasses.

For greater assurance of live-stock feeds during the summer droughts, to which the section is liable, many farmers plant sorghum, millet and kafir corn as auxiliary hay crops. On better-managed farms silage is also produced for winter feed and sometimes to supplement the pasture during summer droughts. With proper care alfalfa, clover, soy beans and cowpeas are grown, the possibility of these crops, both for hay and grazing, being clearly recognized.

The soils of the region have a wide variation in natural fertility and productiveness. They are usually porous, owing to the large content of stone and gravel. As a result, air and water circulate through them freely, and when they are put under cultivation the humus content is quickly lost unless a system of farming is adopted in which provision is made to replenish the supply. If the humus content is lost the water-holding capacity of the soils is greatly reduced, and, as a result, crops suffer severely during the summer droughts and profitable yields are then almost impossible.

SANE AND ECONOMICAL FEED

Feeder Must Know How Many Pounds of Milk Cow Has Produced to Feed Properly.

Before a cow can be fed what she needs and no more, and that is the only sane and economical way of feeding, the feeder must know how many pounds of milk she produced and how much butter fat was in the milk.

DEHORNED STEER IS EASILY CONTROLLED

Insures Animal More Equal Chance at Feed Trough.

Renders Animal Less Dangerous to Attendants and Prevents Trouble in Shipping—Treat Calves When Very Young.

(Prepared by the United States Department of Agriculture.)

Dehorning cattle makes it easier to handle the animals and insures that each one will have a more equal chance at the feed trough. It renders the animals less dangerous to attendants and prevents them from goring one another in the feed lot or in transit to market. The practice of dehorning is almost universal so far as high grade beef steers are concerned.

Animal in Dehorning Crate Ready for Operation.

It is often desirable to dehorn the heifers as well as the steers, especially when they are to be fed in troughs for a part of the year.

Calves may be dehorned when a few days old by treating the undeveloped horns with caustic soda or caustic potash, taking care that it does not wash into the eyes.

If the horns are allowed to develop, it becomes necessary to cut them off. Clippers made for the purpose may be used on the younger animals. With older cattle a saw is best, as it prevents crushing, and the friction of the blade causes the blood vessels to clot and heal quickly. The work should not be done in warm weather, as the wound may become infested with screw worms. Where there is danger of flies, a fly-repellent should be applied.

PORK DAY IS ANNUAL EVENT

Hog Producer Witnesses Sale of His Animals and Learns Reason for Different Prices.

Pork day is one of the big annual events of Kings county, California. It comes in October usually. In this contest the farm bureau center is the unit, and every farm bureau in the contest advances one carload of hogs to be exhibited and rated by an expert judge. Every farm bureau center must have at least six consignors to the load, thus preventing any big concern from exhibiting a carload. In the contest last fall six farm bureau centers as well as a boys' pig club took part in the contest. Ten carloads were auctioned in addition to seven cars that had been in the contest.

The county agent leader says in his annual report to the United States Department of Agriculture: "There seems to be no more convincing argument to a hog producer than to see the actual sales of his animals take place and to know the difference in price paid for a superior quality animal.

Farm bureau sales of this kind were started in California in 1916 on the initiative of the county agent of Kern county. They are now becoming common in all pork-producing counties of the state. There were 175 such sales in 1920, with sales aggregating $1,400,000.

LOSS OF VIRGIN FERTILITY

Sufficient Quantities of Plantfood Necessary in Soils to Maintain Productiveness.

To maintain the productiveness of a soil it is necessary to preserve within the soil sufficient quantities of available plant food at least to prevent the yield from falling off after a period of cropping. Hundreds of field experiments have demonstrated that the best soils will gradually lose their virgin fertility unless more than ordinary care is given to the cropping system and the return of plant foods.

POULTRY MANURE IS RICHEST

On Ordinary Farm Not Much Attention Is Paid to It on Account of Small Amount Made.

Poultry manure is the richest manure made on the farm, but on the ordinary farm not much attention is given it, simply because of the small amount usually made. Poultry manure is valuable chiefly for its large amounts of nitrogen and phosphoric acid, as it contains about three times as much nitrogen and five or six times as much phosphoric acid as ordinary farm manure.

MEANS BIG CROP

Wheat in Western Canada Has Excellent Start.

Germination, in the Rich Soil of That Country, Is Speedy—Farmers on Road to Wealth.

It was on the 18th of May that the writer received a letter from a friend in Western Canada dated the 15th of the same month. Information was conveyed in the letter that its author had traveled over a considerable portion of Western Canada. He had covered most of the settled portions, and from those he had not covered he had secured information that amplified his own observations of conditions throughout all the vast area of that country. He found seeding of wheat practically completed, and placed in a bed of earth that was in a condition that warranted speedy and healthy germination. This was borne out by evidence that he was a witness of wheat that had been in the ground four days that was already breaking through, and that which had been seeded for a week was well above the ground, the field being as green as a new pasture plot. Everywhere this condition existed. It will be pleasing information for those who have friends in Western Canada—in any part of it, no matter where they may be—to learn that conditions have opened up in such a splendid way, and to be advised that the prospects were never brighter than now. When it becomes known that conditions are so satisfactory, many who were waiting, uncertain what to do in the matter of moving, will doubtless now come to a decision. With the opening of thousands of homesteads, which took place on the 1st of May, there was a rush to take advantage of the opportunity to secure 160 acres of excellent land free, within speaking distance of a railroad. The low railway rates granted by means of a certificate issued by Canadian government agents, located at different points in the States, make it possible to make a trip of inspection at small cost.

Oat and barley farming are branches that add considerable to the wealth of the farmer who desires to make money quickly. That these grains can be grown so successfully, and easily, makes it possible to go into other branches of farming industry, that give stability to it, wherever they are carried on. They are dairying and cattle-raising. There is an excellent market for the product, and the climate aids materially in assisting it, while the native grasses, as well as cultivated varieties, bring the cost of production to a much lower figure than is possible on lands that are much higher in price, with no better yielding qualities. Then, again, it is amply shown that fodder corn can be grown with great success, and that sunflowers, which it has been fully proven are little behind, if any, in food quality, thrive wonderfully. In fact, these two fodders, in addition to which may be added that of alfalfa and sweet clover, in which Western Canada farmers are well apace with growers elsewhere, have brought about a period of silo-building which promises to eclipse any effort in this line made anywhere on the continent. In Manitoba alone, one firm is building two hundred this year. In Saskatchewan, many orders have been placed; in one small district in Alberta, where fifty were erected last year, another fifty will be built this summer. That there will be a thousand silos erected in the three provinces this year seems to be a conservative estimate. To the farmer in the States, who knows the advantage of the silos, who is interested in the fodder to be grown to fill them, what does this mean?—Advertisement.

He Had a Remedy.

"Tell me a tale about an elephant," demanded the young man of his favorite aunt.

"What, on Sunday? I am surprised at you. Little boys ought not to want to hear tales about animals on a Sunday."

The point seemed to be worth considering, and Bobby was silent for a while. Then he askel: "Is it Sunday in Australia?"

Auntie thought it was not.

"Well, then, tell me a story about a kangaroo."

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum.

They Begin Early Now.

A little boy, the youngest member of a large family, was taken to see his married sister's new baby.

He seemed more interested in the contents of the baby's basket than in the baby, and after examining several pretty trifles, picked up a powder-puff.

Much surprised at his discovery, and looking quite shocked, he said: "Isn't she rather young for that sort of thing?"—London Tit-Bits.

SAVE SHOES AND STOCKINGS

They will last twice as long if you Shake Into Your Shoes ALLEN'S FOOT-EASE, the powder for the feet. It takes the friction from the shoe and gives quick relief to Corns, Bunions, Callouses, sore, aching, swollen, tender feet. Shake Allen's Foot-Ease into your shoes and enjoy the bliss of feet without an ache.

Undoubtedly.

"A ouija board," said Jud Tunkins, "the same as a checker board, gives a certain amount of advantage to the person who gets the first move."—Washington Star.

DAIRY FACTS

DISPOSING OF MILK SURPLUS

Conditions Likely to Exist in Well-Developed Dairy Districts During Summer.

(Prepared by the United States Department of Agriculture.)

For the first time since the beginning of the World war there is developing in this country a surplus of milk, according to reports recently received by the United States Department of Agriculture. Specialists of the department state that this condition probably will be only temporary during the "flush" of the season, and that it is most apparent in well-developed dairy districts. It may continue during the summer months, but is expected to adjust itself by fall, when demand will overtake the surplus of supply. The situation is largely due to the falling off in the demand for milk in the manufacture of condensed products, milk powders, casein, and similar products, for which there was a large export outlet.

The department points out the advisability of using as much milk as possible, in fluid form and otherwise, as a human food. Within the last generation an increased knowledge of the value of milk in the diet has resulted in an almost doubled per capita consumption of milk, and consumers who purchase milk freely thereby encourage production. This is believed to be the best safeguard against a milk shortage and high prices resulting from the withdrawal of dairymen from the business during periods of large production and low farm prices for milk.

But when the limit of human utilization is reached dairy producers necessarily must decide how to dispose of the remainder. In many cases this will be a decision between selling whole milk, selling cream, or even to use a moderate quantity of whole milk for feeding, especially to young animals. In any event, a more liberal use of milk on farms should reduce the surplus, even though not solving the problem entirely.

As a guide to persons deciding to utilize surplus milk as a live stock feed, the department makes the following recommendations, which may be supplemented with literature issued by the department:

Milk from a dairy herd which is not definitely known to be free from tuberculosis should be scalded before being fed. An ordinary feed cooker is a practical means for scalding milk. This process is approximately equiv-

Typical Dairy Herd in Some Sections.

alent to pasteurization, which most large cities require as a safeguard to public health. Metal pails that can be kept clean by washing and scalding are preferable to wooden containers or others that are difficult to clean.

In calf feeding it usually pays well to feed one pound of whole milk for each ten pounds that the calf weighs, for a period of two weeks, and at the end of that time to change gradually to an equal amount of skim milk. The skim milk should be gradually increased as the calf grows until about 15 pounds per day is fed at the end of three months. Feed the milk warm and regulate the quantity according to size and vigor of the calf.

For pigs three weeks old or more, three parts of skim milk mixed with one part of shorts, is useful in keeping them growing. Skim milk may be fed with corn and other hog feeds in various practical combinations.

In poultry feeding both skim milk and buttermilk are excellent feeds, and can now also be purchased as a nonperishable commercial feed, which is sold in large barrels as semisolid buttermilk. Skim milk and buttermilk may be fed alone or mixed with other feeds, but feeders should observe their flocks carefully to avoid giving too much milk, or bowel trouble may result. This is caused principally by fowls eating spoiled clabbered milk remaining from a previous feeding.

While to live stock owners unaccustomed to the use of milk as a stock feed it may appear somewhat expensive, there are advantages which milk feeders quickly recognize. In addition to utilizing the surplus milk that would otherwise be wasted, young stock generally make a very rapid growth. This means early maturity and early usefulness, compared with stock that have developed more slowly. At least as a temporary measure there is a real opportunity to improve farm live stock, in addition to relieving a local milk surplus, by using skim milk rather liberally in proper combination with other feeds.

EVERYBODY SEES A CHANGE IN FATHER

Grateful Son Says His Father Looks Like Different Man Since Taking Tanlac.

"My father has suffered from chronic stomach trouble for over twenty years and has paid out thousands of dollars for medicines and doctors," said G. W. Slayton, a well-known Cobb County farmer, living a short distance out of Atlanta, Ga.

"We tried nearly everything trying to cure him and he went off to the Springs, thinking maybe the water might help him, but it just looked like nothing would reach his trouble. Then he tried dieting and lived on liquid food until he almost starved, but even that failed to do him any good and he just kept going from bad to worse.

"I don't guess there ever was a case as stubborn as his, and if there ever was a confirmed dyspeptic he was one of them, and I guess he would have been one yet if it hadn't been for this Tanlac.

"The first we heard of this medicine was when my father saw an advertisement in the papers from parties he knew in Tennessee, who were friends of his and he knew what they said about it was the truth, so he got it right away and began taking it. Well, sir, it acted just like magic—everybody notices the change in father. Why, he is just like a different man and sits down to the table and eats like a farmhand. Only yesterday he ate pork and turnips for his dinner and ate so much we were actually afraid he was going to overdo the thing, but he laughed and said nothing hurt him now and that he was hungry and expected to eat and make up for lost time.

"Now, when a medicine will do things like that I think people ought to know about it, and I want to say right now that I would not give one bottle of Tanlac for all the other medicines and health resorts in the country put together."

Tanlac is sold by leading druggists everywhere.—Advertisement.

Sensitive Bird.

Bird Dealer (to customer who has bought a parrot on credit)—Here's your bill. Are you going to pay for it or not?

Customer—I've had the parrot one whole month and he's never said a word.

Bird Dealer—Well, you see, this polly is so very sensitive it never speaks until it has seen the receipted bill showing it has been paid for."

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.

Americanized.

He was a Chinaman. He ran a laundry and no one ever heard him speak a word of English. I often wondered why he had not learned our beautiful language. But to my queries he only shook his read.

One day when I paid for my weekly wash he returned less change than usual. "You've short-changed me, Ping Pong!" I cried.

Ping Pong smiled blandly, showed me his Americanization of foreign merchants' certificate and, speaking for the first time in faultless English, replied: "No, I've raised."—From Wroe's Writings.

News For The Farmer

FARMING THE FARMER
By C. D. Hagerty.

Being a little brochure in which are presented certain excerts from Minutes of Meetings of the United States Grain Growers, Inc.. this spring, as presented to the House of Representatives of the Illinois Assembly on May 31, 1921, at a hearingon the Lantz Bills, by Joseph P. Griffin, President of the Chicago Board of Trade.

The United States Grain Growers Inc., was designed by the Marketing Committee of Seventeen for the avowed purpose of marketing the grain grown by members "More economically" than by present methods. Herbert Hoover after investigation, declared the Chicago Board of Trade to be the most economical system of distributing grain in the world, and he made the fullest use of its members and machinery during the World War. It is therefore of interest to note the compensation voted to themselves by the organizers of the United States Grain Growers Inc., in view of Mr. Griffin's statement that neither the President or directors of the Board of Trade receive any compensation, despite the great demand made on their time by their official duties.

Following are the salaries paid by the United States Grain Growers Inc.

C. H. Gustafson, President	$16,000
Frank M. Meyers, Secretary	$12,000
Wm. G. Eckhardt, treas.	15,000
Clifford Thorne, General Counsel	15,000
U. L. Burdick, Asst. Genl. Counsel	7,500
All directors, each	$25 per diem
Members Executive Committee	$25 per diem for 90 days
Leo Moser, Director Information	$6,000
Organizers	$3,600

There are other odds and ends of expense but these alone, Mr. Griffin in his address pointed out, would eat up the entire assessments of many thousands of farmers. Farmers are asked to pay an assessment of $15.00 a year, from which it may readily be seen that 1000 of them will be required to take care of Mr. Thorne alone. Five hundred farmers will be enough to purchase the friendly offices of Mr Burdick, while another thousand assures the disinterested efforts of Mr. Eckhardt, and a few more will keep President Gustafson in the style to which he was accustomed, for he was for many years a farmer himself.

A little item of $300.00 a month for organizers appear quite modest by contrast, until further along in the minutes one reads that they are to travel in crews of ten. Here then is an item of $3,000.000 a month, or $36,000.00 a year for one crew. It will take the annual dues of only 2,400 farmers to pay the salaries of one of these gangs of organizers, whose duty it is to travel about and collect that $15.00 from each farmer

"Mr. Thorne is considered an authority on the legal aspect of transportation problems but he knows virtually nothing of practical grain marketing. Yet he is paid $15,000.00 by his outfit. which is preaching economy, while the Board of Trade pays only $12,000.00 to the greatest legal authority there is in the country on marketing, for his services, said Mr. Griffin.

The eagerness to render unselfish service to the farmers shows its modest head still further in the Minutes in a report of the Legal Committee. This committee in April reported in favor of the employment of Mr. Thorne, but a minority report was brought in by Mr. Burdick a member of the committee and himself a lawyer. Mr. Burdick's minority report is quoted in the Minutes as follows:

"I will not recommend the employment of Mr. Thorne as General Counsel for the United States Grain Growers for a period of one year or any other period of time. I know him to be an expert transportation statistical rate lawyer and I also know he is not generally considered a great lawyer outside of his department just named. Further than that, Mr. Thorne was a member of the committee of seventeen and took a very decided stand in shaping the policy of the committees findings. Since sitting with us as legal council he has demonstrated that he does not even recognize the province of a legal councilor, but takes a decided stand in shaping the policy of our proceedings. In regard to the balance of the majority report. I wish to concur."

Further along the Minutes is to be found another report of the Legal Committee, in which apparently is recognized the principal that a prophet should not be without profit even in the uplift.

The report of the Legal Committee has this to say:

"The Legal Committee would like to submit for your consideration the employment of Mr Burdick as assistant Council for this Association, he is to move to Chicago and to work under Mr. Thorne. He has agreed to a price, if we can see our way clear to pay it. We believe, from what we have found out about Mr. Burdick, that he would make us a valuable man. Here is the proposition:

"He is willing to move to Chicago and give full time for $7,500 a year. The Association is to pay his moving expenses and pay him $25.00 per day when the Board is in session for Board meetings. This would amdunt to about $8,000 per year."

Thus was the matter of Mr. Burdick simply adjusted and no farther opposition from him to the employment of Mr. Thorne to be observed in the Minutes. All a $3.000 a month organizing crew would have to do was to round up 533 new members at $15.00 a head to assure the compensation of Mr. Burdick.

The organizers will have to hustle somewhat to round up enough members to take care of the Executive Committee. There are 9 members on this committee, and according to the Minutes, they are entitled to compensation at the rate of $25.00 per day for 90 days. That means the annual dues from 1350 farmers. It must not be forgotten that the directors also voted $25.00 a day, but it is not specified that they are to get it for 90 days.

It seems to have been anticipated that a great many organizers would be needed, as there was at least discussion, if not, indeed, action looking to a school for organizers, to be located with peculiar fittness in North Dakota. where Mr. Townley brought organization to such a fine point that the State cannot sell its bonds.

Everybody gets traveling expenses but in one spot to move towards econony is noticed; meals are not to cost more than $3.00 a day except on railroad dinning cars. Perhaps the following resolution also has economy in mind, for it does not propose that any position paying more than $10,000 shall be lightly handed about:

"Resolved that the Executive Committee shall be authorized to employ help for the United States Grain Growers, Inc., until the next annual meeting and any salary they may arrange for, provided that where the salary of anyone so employed is for the amount of $10,000 or more. the action of the Executive Committee shall be submitted to the Board of Directors at their next meeting for approval."

At one of the meetings it is moved seconded and carried that the President (Mr. Gustafson) be instructed to draft a telegram to Mr. (Barney) Baruch saying that the finance Committee would be glad to see him in Chicago on Monday, April 23, 1921." There is no further reference in the Minutes to this financier.

As it has been said, the Chicago Board of Trade has none of the expenses enumerated in the foregoing.

The Minutes show that the finance Committee of the Grain Growers found itself in need of a million dollars which it proposed to borrow on notes secured, where necessary by the signatures of individual members. Just how heavy a burden this seemed, is apparently disclosed when the Finance Committee proposes to use one-half of the proceeds derived from the sail of memberships in the Grain Growers to retire these notes. The membership fee simply entitles a farmer to membership and corresponds to an initiation fee in a club. It was fixed at $10.00 and is distinct from the annual dues.

The selling plan did not contemplate membership on any Board of Trade. The country was to be divided up into seven zones, each with a general office and each with several branches, probably 25 or 30 in all The Minutes show that New York City was destignated as Zone No. 8 for the purpose of looking after export trade. The zones are laid out were tentative but the scheme absolutely sews up the farmers grain.

It is provided that 25,000,000 bushels shall go into the pool for each zone. Of this the farmer retains no control. It can be sold or held by the pool and the farmer can take whatever price the pool gives him. The recommendation on this poin reads.

"We recommend that before a general sales office is established approximately 25,000,000 bushels of grain must be contracted for as per contract of the corporation in the trade territory tributary to such zone market."

The resolutions provided for further expense in the form of a general sales manager for each zone, and such assistance as salesman, clerks and other help that may be necessary.

Mr. Griffin could find nothing in the scheme which would give the Illinois farmer any advantage due to his geographical position near a great central market. The Illinois farmer apparently would receive the same price for his grain as the grower of distinct markets as the plan seems to take no cognizance of the difference in freight rates. The Illinois growers' proximity to the market ought to bring him 20 cents to 25 cents a bushel more for his grain than is received by farmers at more distant points.

Mr. Griffin denominated the plan of the Grain Growers as one which. while promising prosperity to the farmers, if it ever got into operation, brought a very pleasent prosperity to the organizers. He said he had the opinion of two of the very best lawyers in Chicago that the officers of the Grain Growers are self-perpetuating. He based this opinion on the fact that while the officers are elected "until their successors are chosen" no method for choosing successors is provided, nor any time set.

Room At Farm Picnic In Charge Of County Nurse

Red Cross Tent Rest Room in
e of County Nurse, Miss Ferle-
will be a feature of the Farm
u Picnic which will be a great convenience and enjoyed by mothers present at the picnic Monday.

Miss Ferleman invites the mothers to come to the tent to care for their babies or leave them with her while they visit. Cold, fresh milk will be served at the Red Cross Rest tent to the children.

Miss Ferleman also announces she will have a scale at the tent and will measure and weigh babies and children and give other information to those who so desire. This service is free to all mothers.

ODE TO THE GIRLS

Little girl you look so small,
Don't you wear no clothes at all?
Don't you wear no shimmy shirt?
Don't you wear no petty skirt?
Just your corset and your hose
Are those all your underclothes?

Little girl you look so slight,
When I see you in the light;
With your skirts cut rather high,
Won't you catch a cold and die?
Aint you 'fraid to show your calf?
It must make the fellows laugh.

Little girl what is the cause,
Why your clothes are made of gauze?
Don't you wear no undervest
When you go out fully dressed?
Do you like those peek-a boos?
'Stead of normal underclothes?

Little girl your splendors show,
When the sunshine plays on you
I can see your tinted flesh
Through your thinnest gown of mesh.
Is it modest, do you 'spose
Not to wear no underclothes?

Little girl I see your chest,
'Cause you go around half dressed
Yes I see 'way past your throat;
To a region most remote.
'Taint my fault. now don' suppose
Why not wear some underclothes?

Little girl, your sox has shoals
Of those little tiny holes,
Why you want to show your limb,
I don't know—is it a whim?
Do you want to catch the eye
Of each fellow passing by?

Little girl where is the charm,
In your long uncovered arm?
In the V behind the neck,
Is it for the birds to peck?
Little girl I tell you those
Ain't as nice as underclothes.

Little girl, now listen here
You would be just twice as dear,
If you covered up those charms
Neck, back. legs and both arms.
I would take you out to some shows,
If you'd wear some underclothes.

Little girl your mystery,
Luring charms and modesty,
Is what makes us fellows keen,
But no lover—goodness knows—
Wants a girl "sans" underclothes.

'Spose I wandered down the street,
With a loin cloth round my feet;
Or no shirt like all my aunts,
Or a ringlet through my nose,
They'd arrest me. don't you 'spose?

I wear a coat of mail,
Clothed from head to big toe nail,
I must cover up my form,
Even when the weather's warm,
Can't enjoy the summer throes
Less I garb in underclothes.

Little girl, take this advice,
And you'll look just twice as nice---
Wear a Chemise, petticoat,
Close worked six. et aursi l'outre---
Those unspeakable, you see?
There's a charm in lingerie.

THE FLAG

By J. W. Richardson

Our flag ever grows like the Union it symbolizes; and on April 4, 1818, Congress made permanant provision for its growth by providing for the addition of a new star whenever a new state should be born, so that the number of stars would ever correspond to the number of our states. while retaining the original thirteen stripes to recall and emortalize the original thirteen American states. The flag, as thus revised in scheme, "spoke a parable," wrote the late American historian James Schouler. "That spangled host, soon to be increased in number, spoke a Union to be progressive and perpetual, while the thirteen stripes recalled founders whose memory must ever be cherished."

Or to put in another way, the stripes signify permanancy of the principles, while the stars indicate progressiveness and application of the principles. of our national federal systems the stripes spell the perennial American idea of political interdependence as the basis of our national system of interdemocracy, while the glorious stars, like those of heavens, proclaim that there is no fixed limit to the reach of the system or of which each forms a part. Our flag is destined to represent Americanism as well as America, and it proclaims that Americanism is a thing of enduring political kind, as well as ever developing thing.

We do not, we cannot know how completely the federal principle may come to be applied by Americans in the decades and centuries to come. It may come for example, to be applied to our greater cities. in the shape of municipal unions, wherein each federal member within the city will bear some relations toward its peers, the other sectionsof the city, and toward the city government as a whole, as each of our states now maintain toward their sister states and toward our national Union as a whole. Or it may even come to be applied to the nation in some new additional way, necessitating constitutional changes, which will develop and newly vindicate the principles of the old provisions.

We cannot know the future. We cannot know the forms of progressive application of Americanism the future may hold and which the progressive stars on Old Glory are destined to fortell. But we do know that however great or complex may become our national house, it will ever rest on the sure foundations laid by the men of the original thirteen states.

OLD SETTLERS HELD ANNUAL PICNIC AT MABEN'S GROVE LAST FRIDAY.

The Old Settlers of Hancock and Winnebago Counties held their annual picnic at O. K. Maben's grove northeast of Miller last Friday. This has become an annual affair that is eagerly looked forward to by old settlers of the county and many others. This year the picnic was a great success in every way. Hayfield's thirty piece band furnished the music for the occasion. Major Glenn Hayes. State Auditor was the speaker for the day.

LIBERTY TOWNSHIP FARMERS WILL GIVE PROGRAM PULY 7

The farmers in Liberty Township will have a big time the evening of July 7 when they will meet at school No. 8 and will give a program and general good time.

They have some good numbers on the program and have a quartet who are slated for several numbers. Some of the young ladies of the township will give humerous readings. Mr. H. J. Stille is the speaker for the occasion and will give a talk on farm organization.

County Recorder, Mrs. Aldridge, has three old newspapers that she prizes highly. Two of them are issues of te Philidelphia Enquirer of dates April 20 and 21, 1865 both containing the accounts of the funeral of Abraham Lincoln. The other is a copy of the New York Herald of April 15th, telling of the assination of Lincoln. There are numerous reproductions of the papers of those dates but originals are few. At the time the papers were published, Mrs. Aldridge's husband's mother stored them away and they remained in her keeping until the time of her death. —Garner Leader

DIES FROM OVERDOSE

Mason City Dope Fiend Dies In Local Jail.

An overdose of cocaine was the cause given for the death of Earl G. Welsh, who died in the county jail last Saturday. Welsh was arrested Saturday afternoon at the Central Cafe on complaint that he had driven everyone from the place and was disturbing the people in rooms above

Sheriff Atkinson had been in Welch's cell about 5:00 o'clock and the man seemed to be recovering from the effects of the drug. but when he entered the cell again, about 7:00 o'clock, the lifeless body of the man was found.

Welch, was about thirty years old was a telegraph operaor at Mason City and had been employed off and on by the Western Union Company however, his addication for dope made him unreliable and he was often out of a job. He had been arrested several times at Mason City for using the dispensing cocaine.

Relatives from Mason City were here Monday and made the necessary arrangements for the shipment of the body to the place of burial. —Hampton Cronicle.

SMALL BOY GORED BY COW

The five year old son of Nels Bortvedt, living west of town, was gored by an angry cow in the cow yard early Sunday Morning and but for the bravery of his eleven year old brother would probably have been killed.

The cow had dropped a calf during the night unknown to Mr. Bortvedt. He sent the boys down to drive the cows out of the yard. The older boy entered the yard and the cow took after him but he picked up a stick and drove her off. In themean time the smaller boy had entered the yard and his brother told him to run and get out. when the little fellow ran the cow took after him, knocked him down, tried to gore him and while holding him down with her head she trampled him with her feet. The older boy rushed to the rescue, dragged him through the fence and both escaped. Dr. Rhonalt who gave him a careful examination but he found nothing but a number of severe bruises. He was badly scratched on his limbs and face but was able to run around and play Monday morning. The cow had no horns which was very fortunate in this instance.
——Ringsted Dispatch.

FIGHT DEVIL WITH ADS IN NEWSPAPER. ADVICE OF BISHOP

CHICAGO, June 29. — "The daily and weekly newspapers furnish the best mediums for general publicity." Bishop Joseph F. Berry, Philidelphia, declare in the christian Advocate. Bishop Garry is chairman of the executive committee and on conservation and advance, Methodist Episcopal church, He said:

"The daily and weekly papers furnish the best medium for church publicity. I do not see why the church should expect to get its advertising free. It includes in its budget various items of expence such as the minister's salary, the janitor, lights heat, insurance, repairs and often the salary of the organist and some special singers. Why should not advertising be properly added to this list?

"The world. the flesh and the devil do lots of advertising in these days It seems to pay the injquitous combination pretty well. Should the church be less anxious to speak strongly and winsomely to the community?"

M. and Mrs. Walter Lau Entertain

Last Thursday evening Mr. and Mrs. Walter F. Lau entertained at a "Buneo" party in honor of their guest. Miss Gustafason of Chicago, who has been visiting here.

Those who were present at the entertainment were, Mr. and Mrs. Clarence Waerman, Mr. and Mrs. Fred Kluckhohn, Mr. and Mrs. G. P. McCullough, Miss Minnie Lau, Miss Mabel Waterman, Mr. Bert Mathews and Mr. Donald Nissen.

Mrs. G. P. McCullough took the prize for high score of the evening while Bert Mathews came in at the bottom of the list and captured the "booby" prize.

At the close of the evening's entertainment dainty refreshments were served by the hostess.

All report a most enjoyable time.

Rain Tuesday Was Big Benefit To Crops Here

KEEP YOUR WORD

You'll be rated as a bird, in the busy haunts of trade, if you always keep your word, never let a promise fade. If you promise you will pay for a wagonload of lime on the twenty-ninth of May, do your paying right on time. Then the smiling merchant prince will remark, with beaming eye, "It is many ages since I have seen so prompt a guy." And the merchant will say to the other princes near, "There is no more honest jay from Dansheba clear to Beer.' If you promise you will meet James Arthur Mix on the corner of the street at ten minutes after six. do not make Aurthur wait for the fraction of an hour, he'll think you are a skate, and his spirit will be cour. And upon a future day, when you need him in your biz, and approach him he will say, "Holly Moses and Gee Whiz! Once I had a date with you, and you kept it in a horn; so I naturally view you and all your work with a scorn." One has great renown for wit, one can wrestle like a Gotch, and another makes a hit when he warbles "Larboard Watch"; one can write a classy ode. one can rear up and orate, one can scorch along the road at a Barney Oldfield Gate. There are many kinds of fame, and some samples are absurd; but we all admire the game of the man who keeps his word. He is loaded to the guards with the laurel wreaths he's won, when the statesman and the bards retail at ten cents a ton.

— Walt Mason.

Where Will You Celebrate the Fourth

Where will you celebrate the Fourth? That is the question before many of our people now. For your information we will tell you where some will celebrate in this vicinity. Clarian has a celebration there is one at Hampton and of course Clear Lake is pulling the same old stuff this year by claiming to put on a celebration but they are getting to be a joke. These towns are all to far from home in case it rains --- so we advise you to take in the farmers picnic at the camp grounds the fourth.

FIND NO GOLD AT GRAETTINGER

John J. Sullivan of Graettinger, who was in Emmetsburg Saturday, evening informed our reporter that the gold excitement in his home community had subsided some. The samples of gravel and sand sent to Prof. Kinney of Des Moines, who was for many years the state chemist was examined by him and he found that it did not contain any gold and but a slight trace of silver. Samples had also been sent to Minneapolis, Denver and Philidelphia. Word was received that the offices at Denver and Philidelphia did not do essaying, and that the Minneapolis firm did not give special attention to such matters. No report has yet been received on the sample shipped to Ames.

A few days ago Chas. McCoy, who lives a couple of miles southwest of town, brought several samples of sand and gravel to this city that were equally as good, if not better, than the specimans taken from Mr. Smith place northwest of Osgood. They have been sent to one of the best assayers in the United States and if they contain any mineral value Mr. McCoy will be more than satisfied. There are perhaps dozens of places in the Des Moines valley that have the same kind of gravel that is found between Graettinger and Osgood. A few years ago Mr. Chamberlain, one of the leading capitalists in Des Moines, told Mayor Saunders that there was gold in the vicinity of Graettinger. He did not know whether there was enough to warrant people in mining for it but he felt confident that strong traces of the yellow metal could be secured. However Mr. Saunders never gave serious attention to his remark. There is no likelihood that gold in paying quantities can be found in our state. —Emmetsburg Democrat.

FOR SALE— Good bicycle at a very reasonable price. See the Times Office.

Fine Rain Here Tuesday P. M.

This vicinity was visited by a fine rain Tuesday afternoon, crops here were badly in need of rain and it seemed to come just in the nick of time. Heavy wind proceeded the rain and is said to have done some damage to the crops.

Wind Tuesday Did Damage

The wind and rain Tuesday caused some damage around here, according to the farmers. The rain was very welcome as the crops were badly in need of a good soaking but the rain was accompanied by a high wind which knockd down the oats and corn. Some hail is also reported in this vicinity that day.

BUST OF HARDING IS UNVEILED AT NILES, O.

Impressive ceremonies marked the unveiling last Saturday night at Niles, Ohio, the birthplace of McKinley, of the blond bust of President warren G. Harding, the work of J. Massey Rhind, at the McKinley Memorial.

From a platform in front of the memorial, addresses were made by Vice President Coolidge, James J. Davis, Secretary of Labor; Gov. Hardry L. Davis, of Ohio, and representative John L. Cooper, of Youngstown.

The bust of the President. veiled by a large American flag, stood at the entrance of the pergola, the large marble statue of the late President McKinley forming an impressive background. After the address by the Vice President, Mrs. J. D. Waddell, wife of the President of the Niles Chamber of Comerce, pulled the cord that realeased the flag and revealed the bust of the President to the public.

The bust will be removed eventually to its pedestal in the court of Honor between those of David Todd, former Govenor of Ohio, and Cornelious N. Bliss, former Secretary of the Interior. On the marble pedestal is the inscription:

"Warren G. Harding. born Corsica, Ohio, November 2, 1865, twenty ninth President of the United States. Elected November 2, 1920."

REFUSED TO FIRE BARN

Then Stranger Cuts Arm Of Young Boy.

Wall Lake, Ia., June 23.—A dangerous man is prowling around the country in the vicinity of Wall Lake.

One afternoon this week he called on the farm home of James Duffy. three miles west of town. No one was at home except Jesse, the thirteen year old son. The stranger asked the boy to set fire to the big barn. but the boy refused. The stranger then cut two small gashes in the boys right arm, remarking that he would mark him if he did not do what he was told to do. Jesse was again commanded and requested to set the barn on fire and he refused. Two more gashes were again cut in the arm, and then the fellow ran away.

The boy quickly ran to the corn fields to notify his brothers. As soon as possible the neighbors were informed of the mans act and a search was made but no news concerning the wherebouts of the man has yet reached Wall Lake.

CAMP MEETING OVER

The camp meeting closed Sunday night after a week of well attended services. The crowd which came Sunday was as large as any that has ever been at the meeting. Many from here took in the meetings each day, and especially on Sunday were the Klemme people prominent there.

CELEBRATION JULY 4th at BAYSIDE AMUSEMENT PARK

Twenty-five piece band all day and evening. Daylight fireworks, Free Acks and everything that goes to make a real celebration. Bring your picnic lunches. Plenty of shade and nice lawns overlooking lake. Tables benches and ample facilities of all kinds. J. 30--1.

To Sail Globe in a Lifeboat

Three Norwegians Plan Interesting Trip That Will Take About Year and a Half.

ALL ARE TRAINED SEAMEN

Boat Will Have No Covering Except Canvas Awning to Spread Over the Bunks When It Rains—Boat to Be Sloop Rigged.

New York.—Norwegians are no longer the leading sea rovers they once were, but their adventurous spirit is not yet extinguished. There is a round tower at Newport, built of rude stones, a lasting monument to some forgotten visitors to these shores. Who built it no one can tell, but surely not aboriginal Americans for it embodies principles of architecture unknown to them. Anthropologists believe it was built by the Norsemen, who, there is evidence to show, found America long before Columbus, as early as the Tenth century. Indeed there is a Norse tradition to that effect.

Adventurous Norwegians.

These considerations are revived by the fact that three young Norwegians now in this city are planning to cross the Atlantic ocean in an open boat and eventually to circumnavigate the globe. They are Capt. Mimer Tonning and Mates Otthar Petterson and Helge Westerling. Tonning was at work on the Panama canal in 1915, but going home was impressed into the Norwegian navy. Petterson was petty officer on another ship in the same service. Westerling has also seen much sea service. They are practically stranded here now, and are laid up at the club of the Norwegian Master and Mates' association, No. 565 Henry street, Brooklyn, where a reporter was told their plans. Tonning acted as spokesman while the other two listened and gave assent.

Their plans are nearly complete. They have secured a 20-foot lifeboat, built by the Atlantic Life Boat company of South Brooklyn. It is a gift from the company, and while it does not differ from the ordinary lifeboat built for ship use, certain changes have been made to adapt it for the specific purposes for which it will be used.

Will Be Sloop Rigged.

It will be sloop rigged, having a 26-foot mainmast and a 12-foot topmast, three feet of which will be above the hounds, thus affording a 32-foot sail hoist. Two sets of sails will be carried, one of light canvas for light and moderate weather, and one of heavy canvas for stormy weather. However, they hope to escape stormy weather, except an occasional squall, by sailing in summer time. The boat will have no covering except a canvas awning to spread over the bunks when it rains. Cooking will be done on an oil stove. They will start with a stock for 14 weeks' provisions in the hope of being able to cross the Atlantic within that time.

They will leave Sandy Hook in the near future and steer for the Scilly or Azore islands. From Gibraltar they will go to Suez, Sumatra, the Philippines, Hawaii, California, Panama, pass through the canal and come up the Atlantic coast to New York. The entire voyage is expected to take from 16 to 18 months.

$199 FOR "SCIENTIFIC" KISS

California Girl Says Psychist Told Her It Would Develop Dormant Faculties.

Los Angeles, Cal.—For illustrating what constitutes a scientific kiss, a fair seeker after advice paid $199, according to testimony in the case of James A. Murdock, who advertises as being the "incomparable psychist and clairvoyant."

Mrs. Sarah Blackburn and her daughter, "Billie," aged seventeen, the latter, to whom, it was testified, had been given the demonstration lesson by Murdock in the science of kissing, appeared against Murdock.

According to Mrs. Blackburn, "Billie" was taken to the "incomparable one" for a treatment. She said Murdock insisted on her being in a room alone with him.

It was at this juncture, said the witness, that scientific kissing was demonstrated, Murdock prefacing the act by a dissertation on the effect of kissing on the brain in developing dormant faculties.

Mrs. Blackburn said she paid Murdock $199.

Married Life Burdensome in Old Age.

Bellingham, Wash.—Charging desertion and nonsupport, Ida H. Smith, eighty years old, appeared in court to defend her suit for divorce against W. F. Smith, eighty-six. The defendant filed a cross complaint charging that his wife had made his life burdensome.

Bear and Rattlesnakes Upset Train Schedule

Elmira, N. Y.—New York Central train crews on the line that runs south from Corning into the coal fields of Pennsylvania are having a new experience. Black bears and rattlesnakes are interfering with the time schedules.

A special coal-laden freight train slowed up when a huge black bear posed on the track in battle formation. It refused to move until the cowcatcher nosed it more or less gently aside.

Two Princes Claim Chateau

Historic Building and Grounds Seized by France During War Is Demanded.

ROYAL HOME TWO CENTURIES

Louis XV Gave It to Marshal Saxe and Napoleon Presented It to Marshal Berthier—Became Possession of Dukes of Parma.

Paris.—Efforts by two princes of the house of Bourbon-Parma to recover possession of the celebrated Chateau Chambord, which was sequestrated by the French government during the war, is one of the most interesting aftermaths of the great conflict.

The chateau is more than 400 years old and is one of the most striking and interesting of all the famous feudal establishments of ancient France.

It was once one of the most magnificent of these great estates and lies in the valley of the Loire close to the town of Blois and has about 15,000 acres, part of which is inclosed by walls extending for 20 miles. The building is about 200 feet square with famous circular towers at the corners and a double spiral staircase leading to the double lantern, which dominates the center tower.

Royal Residence Two Centuries.

It was built about 1526 and for two centuries was a royal residence. Louis XV gave it to Marshal Saxe and Napoleon presented it to Marshal Berthier. Eventually it fell into the possession of the duke of Parma.

At the beginning of the war it was owned by Prince Elias of Bourbon-Parma and was sequestrated because he was serving in the Austrian army as an attache of the Austrian general staff. Prince Elias is a brother of Zita, wife of the former Emperor Charles of Austria, who lately attempted to regain his throne as king of Hungary.

After the war Prince Elias attempted to recover possession of the estate, but the French courts have just disallowed his claim. This, however, does not settle the question of its ownership, for Prince Sixtus, also of Bourbon-Parma, brother of Prince Elias, has put in a claim to the ownership of the chateau.

Princes' Services Refused.

Prince Sixtus does not suffer the disability of Prince Elias, as Sixtus and his brother, Xavier, both offered their services to the French government in the war and being refused on the ground that descendants of the old royal houses could not be permitted to fight for France, they both enlisted in the Belgian army, where they served as stretcherbearers. Their bravery in this service was afterward recognized in a French citation.

Americans will identify Prince Sixtus as the man who received, while the war was still in progress, the famous letter from Emperor Charles of Austria in which he stated that he sympathized with France's aspirations to recover Alsace-Lorraine and that in his opinion Belgium should be restored by Germany.

Prince Sixtus turned the letter over to President Poincaire and its publication by Premier Clemenceau created consternation in Germany. Emperor Charles denied its authenticity.

Queen Mary a Doctor of Law

Queen Mary of England was honored recently by Oxford university when the degree of Doctor of Common Law was conferred upon her. It was the first time that this degree had been conferred upon a woman. In the photograph Queen Mary, in robes, is shown walking through the streets of Oxford with Earl Curzon, the chancellor of Oxford.

EARTH RUBE OF SOLAR SYSTEM

360 Quintillion Miles Off the Sky Broadway.

Scientist Discovers That the Universe Is One Thousand Times Greater Than It Has Been Thought.

Cambridge, Mass.—Dr. Harlow Shapley, the astronomer who recently came to Harvard from Mount Wilson observatory in California, announces that he has made discoveries that reveal the universe to be a thousand times greater than scientists have thought.

By so doing he has relegated the earth to a plane one thousand times less important than it has heretofore occupied. And instead of being in the "center of things," as has been understood heretofore, he estimates it to be something like 360,000,000,000,000,000,000 miles from the center of the universe.

Doctor Shapley is a comparatively young astronomer, yet he has won an authoritative place in the science. He is a graduate of the Missouri State University and of Princeton. He was identified with the Mount Wilson observatory seven years.

By triangulation, taking the distance between sun and earth as a base for measurements, scientists have recorded vast distances, until such lines have been extended hundreds of light years, even to the border line of measurement, the Pleiades.

The same Pleiades are scarcely in the front yard of Doctor Shapley's galaxy, which he has measured and found to be about 300,000 light years from end to end. It is a super-Milky Way.

A light year, the distance a beam of light will travel in one year, is 6,000,000,000,000 miles. It takes but eight minutes for light to come to the earth from the sun, 93,000,000 miles away.

$14,000 FOR "POT OF GOLD"

"Spirits" Wouldn't Work, However, So Aged St. Louis Swindler Goes to Prison.

Chester, Ill.—Joseph Pellinski, sixty-one years old, of St. Louis, started an indeterminate sentence of from one to ten years in the southern Illinois penitentiary here, following his conviction at Alton of swindling Weert Bauer, a retired farmer, out of $14,000 under the pretense he was aiding Bauer to locate a "pot of gold" valued at $70,000 buried on Bauer's farm.

The gold, it was claimed, was to be located through spiritualistic seances conducted by the defendant's wife. It was supposed to have been hidden by a relative of Bauer.

Sale of War Materials Brings Billion.

Washington.—Domestic sales of surplus war materials since the armistice have amounted to approximately a billion dollars, Assistant Secretary Wainwright of the War department informed the senate military committee.

Conditions in Upper Silesia and Turkey Discouraging to the Peace Makers.

GREEKS READY FOR DRIVE

France and Germany Negotiating for an Economic Entente—United States and Japan Approaching a Friendly Settlement of All Their Disputes.

By EDWARD W. PICKARD.

Premier Lloyd George, talking to the Welsh Presbyterian general assembly, admits that he is disappointed because, despite the formation of the League of Nations, some of the peoples of the world insist on fighting, and because the spirit of national hatred, greed and pride is as dominant as ever, notwithstanding the lessons of the late war. He says he is still all for the league, but fears that, unless public opinion in all civilized nations is better instructed, the league will become a breeding ground of intrigues and feuds which might lead to the greatest conflict yet witnessed.

Some small nations that have been liberated, says the prime minister, seem to have been rendered fiercer by being chained so long, and they apparently do not fear the interference of the league nor have they any respect for its decisions. In this Lloyd George undoubtedly was alluding to the Poles, and the situation in Upper Silesia justifies his feeling. The German defense forces there decline to let go of the ground they hold and reject the plan for a neutral zone unless it be created in territory which the Poles control. The insurgent Poles, though they have been retiring before the advance of the British troops, are said to be leaving a well armed force of civilians in their wake. Great Britain is blaming France for "continued failure to co-operate" in the restoration of order in Silesia. It is admitted in London that the work of clearing up the plebiscite zone is at a standstill, and Berlin learns that the interallied commission at Oppeln has decided to cease all military operations until the German defense organizations withdraw from the territory east of the Oder, which they recently occupied. Is it any wonder the usually optimistic Lloyd George feels rather despondent?

Moving further east on the world map, one finds equally unpleasant conditions and prospects, both on the Russian border and in Turkey. With the coming of summer soviet Russia has regained its cockiness. In the councils of the leaders, it is reported, Lenin and others who were inclined to relative conservatism were outvoted and Trotzky and his fellow radicals were given their way. If dispatches from that part of the world are to be believed, their way will lead to another great attempt to invade and sovietize the countries on Russia's western borders, and already huge armies are being massed for the enterprise. These troops are well drilled, often by former German officers, and have ample supplies of arms, ammunition and food. Their morale is said to be fair, owing to the care given them and their families by the government.

In what used to be the Turkish empire, both the Turkish nationalists and the Bolshevists are so active that the allies are becoming alarmed. This is evidenced by the change of their attitude toward the warfare which the Greeks are carrying on against the Turks. King Constantine, who was being left to do the best he could alone, now is receiving some encouragement and indirect aid. The British, for instance, have taken over the Ismid defenses, thus releasing a considerable body of Greek troops to take part in the new offensive which will be launched by the Greeks before long. Also the allies have given the Greeks permission to operate their Brusa front from Gallipoli and to blockade the whole of Asia Minor on the Black sea as far east as Batum. The latter measure has been adopted because of the expectation that the Russians will try to send troops and supplies to the Turks by water. The Bolsheviki have considerable naval forces on the Black sea, and a naval conflict is not unlikely.

The British have notified the Turkish nationalists that if they attempt to capture Constantinople Great Britain will declare war on them.

In the Caucasus region General Budenny and some of his hard-fighting cavalry units are advancing to the assistance of the Turks, passing through Armenia. King Constantine himself has been in Smyrna and made preparations to go into the battle zone.

Kemal Pasha must defeat the Greeks again in order to retain his leadership of the nationalists, according to stories from Turkey. Enver Pasha is his rival and if he can supplant Kemal he will be given full support by the Russian Bolshevists, since he has promised to set up a soviet state in Turkey, a thing which Kemal has refused to do.

Over in Siberia matters are still rather confused. The anti-Bolshevists retain control of Vladivostok, and the soviet Russians are threatening Japan because, they assert, the Japanese troops disarmed the Bolshevists in the city. This Japan explains by asserting that both parties were disarmed because the Japanese commander would tolerate no fighting in the zone of occupation. The Far East republic of Siberia, with headquarters at Chita, has decided to adhere to the soviet government of Russia.

So much for the warlike aspects. Now for the other side. Two nations that have been deadly enemies, and two that many have feared might become such, are moving toward a friendly adjustment of their differences. The first case is that of France and Germany, and though it may be too much to expect that they soon will love each other, at least it appears they are likely soon to resume amicable business relations. This is the result of a conference at Weisbaden between M. Loucheur, French minister of liberated regions, and Dr. Walter Rathenau, German minister of reconstruction. Both these men are exceedingly wealthy industrial magnates and they debated for three days over an economic entente between their countries. They finally reached an agreement, for submission to their respective governments, the main points of which are that Germany undertakes, and France permits, the rebuilding of the destroyed areas in France; and that France undertakes to provide the German industrial system with adequate supplies of iron from the Briey basin now occupied by French troops.

Nearly nine-tenths of the iron deposits of the old German empire are in the Briey basin, and the Germans expect, if they can get the ore from there, that their now idle factories in the Ruhr and elsewhere will be reopened and that they will soon be able to fill the markets of the world with goods of German make offered at low prices. This of course would be most painful to British trade, and it is said the prospect of a rapprochement between France and Germany on the terms stated is viewed with alarm in Great Britain.

Diplomatic settlement of the various questions pending between the United States and Japan, without the necessity of submitting any of them to the council of the League of Nations or any other international body, is near at hand, according to Washington dispatches. Secretary of State Hughes and Ambassador Shidehara have been negotiating to this end, treating the disputes as an integral problem. If an agreement is reached, it is understood, the cable privileges on Yap will be internationalized, though Japan may still control the island under her mandate. The basis for settlement of the immigration issue probably will be that of a strict exclusion of the Japanese laboring class and adequate protection for Japanese property rights already acquired in the United States. It is believed Japan will promise to get out of the province of Shantung soon as practicable. What attitude may be concerning the northern half of Sagha yet known.

The British imperial which is in session in L week, planned to take up first thing the matter of r Anglo-Japanese treaty. P isters Smuts of South Afri of Australia and Massey of land all have declared pa the pact must not be rene it is agreeable to the Uni Premier Meighan of Canada accord with public opinion minion, will oppose any the treaty. ORDINANCE NO. 39

An ordinance defining the method of connecting with the sanitary Sewers in the Incorporated Town of Klemme, Iowa, regulating the use of the same and requirements in connection therewith, and fixing a penalty for a violation hereof.

Be it Ordained by the Town Council of the Incorporated Town of Klemme, Iowa;

Section 1. Before any person, firm or corporation shall make any connection with a sanitary sewer laid anr constructed within the Town of Klemme they shall make a application for and receive a permit therefor from the Mayor of the said Town, said application setting forth all of the use the applicant intends to make of the said sewer, the number of the lot and block, which application shall be accompanied by specifications describing the drainage of the building on blanks furnished for that purpose, showing the kind and size of pipe to be used, the traps, closets and fixtures to be used, which shall be furnished by the owner or his agent and kept on file in the office of the Mayor.

If the publication for the sewer connection is in no way in violation of the sanitary rules and ordinances of the Town nor of the Laws of the State o Iowa, and the fee required herein shall be paid than the Mayor shall issue such permit in the name of the owner of the said lot.

Section 2. The construction and maintainance of all sewers and sewer connections in the said town shall be under the supervision of some competent person to be named or appointed by the Town Council and in case no such person be so appointed or designated, then under the supervision and direction of the Mayor; and it shall be his duty to inspect the sewers and sewer connections from time to time and when cleaning, flushing or other repairs are necessary to employ some suitable person to make such repairs and report the cost thereof to the Council.

Section 3. The Mayor or Sewer inspecter appointed by the Town Council shall prescribe the mode of laying house drains and connecting the same with the sewer system of Said Town, and shall make rules and regulations not inconsistent with any ordinance of the Town defining the kind and quality of the material to be used and the manner of laying and extending the same, and all fixtures connected therewith, which rules and regulations and the specifications therefor, upon the approval of the Town Council shall have the same force and effect as though set forth specifically threin, and all work done in constructing or connecting such sewers shall conform in all respects thereto and all work and material so done and used shall be subject to the inspection of the said Mayor or Sewer Inspector and all faulty and defective work or material which may at any time be discovered shall be corrected to comply with the rules and ordinances of the Town relating thereto.

Section 4. No house drain shall be extended from work already in place, and which has been duly inspected and approved, nor shall any additions or new connections be made therewith. except upon a permit duly granted therefor the same as required for the original construction and shall be made only under the supervision of the Mayor or the Sewer Inspector appointed for that purpose.

Section 5. Each and every house must make direct connection with the main sewer in the street, and no two or more houses will be permitted to make such connection through one pipe, nor carry their drainage in pipes laid beneath or through adjoining property, except by special permission of the Town Council, the Mayor or Sewer Inspector.

Section 6. The main drain of every house or building connecting with the Town Sewer shall be constructed, from a point three (3) feet outside of the wall of the main sewer, of vitrified sewer pipe of the same quality as that used in the Town Sewer sewers and not less than six (6) inches in size. such pipe to be glazed on both sides or of such other material as shall be approved by the Town Council.

Sec. 7. The pipe used in making connections with sewer must be of the best quality of salt glazed sewer pipe with bell and spigot joints, all joints must be connected and laid with oakum and portland cement mortar, one part cement and two parts clean sharp sand; the joints must be carefully wiped and jointed and the pipe left clean and smooth throughout.

Section 8. The main soil pipe in the building and under the foundation wall from a distance of three feet outside thereof shall be of cast iron pipe with joints well caulked and leaded and of the weight known as extra heavy and shall be not less than four (4) inches in diameter and the fall shall not be less than one fourth (1-4) of an inch to the foot and of a uniform grade.

Section 9. Every vertical soil pipe shall extend not less than a foot above the roof and at least one foot above the windows in adjacent buildings and shall be of undiminished size of not less than four inches with outlet uncovered; such soil pipe shall not open near a window or an airshaft, and in no case shall a smaller pipe than four inches in diameter be allowed to project through a roof for ventilation.

Section 10. No sewer pipe trap will be permitted to be placed at the foot of a ventilating shaft or soil pipe.

Section 11. No connection shall be permitted to be made with the sewer at any point other than where the junction piece or Wye has been inserted for that purpose; In case it should be found impossible to make the connection with the sewer in the street at the place fixed therefor then the Council may by a proper resolution, permit a new Wye or place for such connection to be inserted in the street sewer which new connection shall be placed therein by the Sewer Inspector or the Mayor but in no case shall any other person be permitted to insert such new connection in the sewer, or break into the sewer.

Section 12. In case the plumbing or fixtures in any building connecting with the sewer shall become faulty or out of repair, the Sewer Inspector shall call upon the owner or occupant of the building to repair the same and if not so done by such owner or occupant within three days then such Sewer Inspector shall cause such repairs to be made and report the cost thereof to the Council and such cost shall be levied and become a tax against the said property and if not paid shall be certified to the County Auditor and collected as other taxes.

Section 13. Should water, gas or other pipes or drains be encountered in the direct line of a house drain or connection, the question of carrying such sewer drain or connection under. over or around such or similar obstructions, or of doing anything involving a deviation from the proper line or standard grade, shall be determined only by the Sewer Inspector or Mayor acting as such.

Section 14. Whenever it may be found necessary to pass through or in any wise disturb an existing house drain or sewer connection in actual use, such drainage pipe or private sewer shall not be interfered with nor cut through nor connected in any way without the consent of the Sewer Inspector having been previously obtained therefor.

Section 15. All connections between the main sewers and slaughter houses, lard rendering establishments, butcher shops packing houses hotels, resturants, creameries, manufacturing establishments, etc., shall be made through intervening receiving basins, built in brick masonry in whose number, dimensions and form shall be perscribed by the Sewer Inspector by the resolution of the Council.

Section 16. All openings made in the sidewalks or roadways for the purpose of constructing house drains or connections, shall be surrounded and efficently protected at all hours by ample and sufficient barriers, on which red signal lights shall be placed and maintained at night time together with such additional precautions as may be deemed necessary for the protection of the traveling tract for which such connection is public, and the owner of the lot or made shall be liable for all damages resulting from a failure to sufficiently protect such openings.

Section 17. No person shall uncover or excavate around any catch basin, man-hole, flush tank, brick or pipe sewers within the town for any purpose whatever, except upon the written consent or permission of the Sewer Inspector or the Mayor acting as such.

Section 18. The Sewer Inspector or the Mayor acting as such or any person properly employed by such persons shall have free and unobstructed access to any part of any premises where house drains or sewer connection, cess pools or water closets, connected with any brick or pipe sewer are laid for the purpose of examining into the construction, condition and usage of the same, and making necessary alterations and repairs, at any time between the hours of 7 o'clock A. M. and 6 o'clock P. M., and the owner or occupant of such premises shall aid such officer in the performance of such duty and shall correct any fault or inquiry to any such drain, connections or other fixtures connected with the said sewers upon the direction of such Inspector or his agent.

Section 19. There shall be paid to the Mayor for the use of the Town of Klemme, Iowa, the following sums for the granting of any and all permits provided for herein, viz:-

For a permit to connect with the main sewers the sum of Two Dollars, For a permit to construct, alter, change or repair any sewer drain or connection with the said Town Sewer the sum of Two Dollars.

Section 20. Any person violating any provision of this ordinance shall be deemed guilty of a misdemeanor and when convicted thereof shall pay a fine of not less than Five Dollars nor more than One Hundred Dollars.

Section 21. All ordinances or parts of ordinances in conflict herewith are hereby repealed.

Section 22. This ordinance shall be inforce from and after its passage approval and publication in the Klemme Times as provided by law.

Passed, adopted and approved this 20th day of June A. D. 1921.
F. J. Wenck
Mayor.

FLOWER MISSION AT COUNTY HOME

The flower mission department of the W. C. T. U. of Hancock County held a nice service at the county Home Sunday afternoon. Rev. J. V. Wright of Corwith, assisted by the Babtist choir of that place conducted a beautiful service after which Hilda Hanson County flower mission superintendant, assisted by a number of W. C. T. U. ladies distributed flowers and fruit to the inmates of the home.

This was an annual affair that is carried on by the W. C. T. U. and when they see the pleasure it gives to those sad and darkened lives they feel well repaid for the efforts they made to go out in the heat.

A large bouquet of red, white and blue flowers were presented by Mrs. Riehm and Mrs. Hanson in behalf of the Congregational church of Britt.

About fifty were present from Corwith, Garner and Britt and all were favorably impressed by the way Mr. and Mrs. Riehm are conducting the home. — News Tribune.

EPIDEMIC OF OAT RUST

Spreads 50 Miles in Five Days; Buck thorn Hedge Host..

Crown rust of oats appeared in true epidemic form in Plymouth county, five miles east of Hinton, during the first week of June. according to I. E. Melhus of the plant pathology department of the Iowa State College. This outbreak can be traced directly to a 520 rodbuckthorn hedge growing in the vicinity. The adjoining fields of oats had a 90 per cent infection June 4 and by June 9 a trace of crown rust was found as far as 50 miles east of the hedge, 15 miles north, 6 miles south and 12 miles west.

The amount of infection became less as the average distance from the hedge increased. The maximum infection was adjoining the hedge.

A crown rust survey was made from Ames to Denison and then north to Suix City on June 3, but a series epidemic was in progress at Hinton by June 4.

The speed and extent of the spread of this local epidemic depends upon the weather condition during the next two weeks. Damp, foggy weather followed by warm days is most conductive to spread the rust

WHEAT LEAF RUST APPEARS

Serious Attacks Discovered in Southern Part of State.

In recent survey in southern part of Iowa by the plant pathology section of the Agricultural Experiment Station at Iowa State College it was found that, while there was only a trace of black stem rust, there was a serious attack of leaf rust of wheat.

This blight is present to some extent every year, but is not so serious as the stem rust. Leaf rust usually strikes the grain in May when the winter wheat is less than a foot high.

The small round or oval reddish blisters are at first scarce but if the weather is favorable the rust may spread so that by heading time the leaves. leaf sheaths, and stems are badly scarred.

As the leaves bearing the red summer spores are developed in their stead, but usually do not break thru the epidermis as do the spores of stem rust. This rust is unlike stem rust in having no known alternate host corresponding to the barberry. The winter spores do not function and the rust is thot to winter in the summer spare stage. on winter grain or perennial grass.

INFERTILE EGGS KEEPS LONGER

Bring Better Money Than When Fertilized.

Many people who raise poultry either sell or kill their male birds as soon as the hatching season is over. Infertile eggs keep much better and many dealers pay more for them. If eggs are to be preserved for home use it is almost necessary that they be infertile.

Following are some of the recommendations made by poultry men at Iowa State College with regard to summer egg production: Keep the nests clean and provide one nest for every six hens. Gather the eggs twice a day or oftener. Keep the eggs in a cool, dry. well ventilated place and away from kerosene, onions or other oderous material. Protect the eggs from the sun when taking them to the market. Learn to candle eggs. Sell to a buyer who pays more for infertile eggs.

Certified Seed Brings Better Price Than Uncertified.

Thirty - five to 50 cents per bushel more than the regular market was received for certified oats last year, according to J. L. Robinson, secretary of he Iowa Agricultural Experiment association.

The association working in cooperation with the Iowa Agricultural Experiment station at Ames, is to make it possible for the farmers to secure pure strains of seed. In the case of the Iowa 102 and 105 oats last spring, it was almost impossible to secure a pure strain for either. Such a condition is due to improper methods of threshing, storing and handling.

The farmer who wishes to have his seed certified applies to his county agent, who if there are enough other men who want their grain inspected, will arrange for an inspector to come to the county before threshing time. At this time a report is sent to the secretary's office. If the grain is found favorable. an inspector will return after threshing to get a sample from his bin.

Seed which is certified must comply with the following specifications which are laid down by the association at its first annual meeting.

1. The grain must not contain to exceed one-fourth of one per-cent of other varieties of the same species, and must be absolutely free from for eign grains.

2. Must be absolutely free from quack grass, mustard, Canadian thistle, dock and wild oats, and must not contain an excessive amount of other weed seeds.

3. In case of rye, which is cross fertilized, it must not be closer than 80 rods to another rye field.

4. The seed shall have come from the Experiment Station or from certified seed, after the season of 1921.

5. Smut will not prevent the certification of seed. however the ammount must be shown on the label used for bags.

CARE IN SHIPPING HOGS PAYS

Slow and Careful Handling Necessary in Summer.

Enormous numbers of hogs are lost each year due to the improper care during shipping. In the warm weather handle the hogs slowly and carefully in order to avoid overheating them. Always have plenty of drinking water at hand, but take care that no feeding is done immediately before shipping.

Other suggestions for shipping hogs during the hot weather as they are offered by animal husbandry experts are: Bed the car well with sand and wet it thoroughly. Don't use cinders or straw for bedding. Where ice is available, it is well to put a couple of cakes of ice in a car. Don't overload; often money is saved by loading 15,000 pounds in a 36-foot car, instead of the 17,000 pound minimum.

PUSH IOWA STATE MEMORIAL

Drive for Union Building to Come In Novmeber.

Iowa State College alumni are going thru with their million dollar Memorial Union project this coming November. That was the decision of the members of the alumni campaign committee in a meeting at the college last week and later it was accepted in the annual meeting of the Alumni association.

Adverse conditions made advisable a postponement of the campaign planned for this past spring, but now President M. J. Riggs of Toledo, O., and Iowa Chairman Merrit Greene Jr., of Marshalltown, are convinced that there shoulr be no further postponement beyond this coming fall.

The Alumni association reelected President M. J. Rriggs to be its executive for another year. It also relected M. G. Thornburg of Emmetsburg as vice -president, and Mrs. Katherine Goble Gray as recording secretary.

The Iowa Agricultural Experiment station has seeded 600 small plots of clover and alfalfa all with nurse crops to determine what ones will be the best suited for Iowa conditions.

MILK COOLING TANKS PAY

Many Farmers Installing Cooling De .vice.

Wherever any considerable amount of milk is produced, a cooling tank, as is recommended by the dairying department of the Iowa State College, will be found highly profitable and convenient. It has been installed on many farms in Iowa and quickly pays for itself.

These tanks are best built on concrete and are installed between the water pump and livestock watering tank so that water pumped for the livestock may flow through the cooling tank.

The size may be determined by the individual. Forms for the concrete can be made from any old lumber. A concrete mixture of one part of cement, two parts sharp sand and three parts gravel is recommended. Walls of four inch thickness will be sufficient.

The inlet pipe should extend to the bottom of the cooling tank. An overflow pipe should be put in before the concrete hardens. It should be located so as to allow the water to come within four inches of the tops of the milk containers kind of reinforcement materia be used in tank construction.

AVERY CENTER NEWS

The Lloyd Brugman family visited relatives at Ventura Sunday.

Mr. and Mrs. Jay Buchanan are the proud parents of a baby girl born Thursday June 23rd.

Mr. and Mrs. Jas. Trumbull and Florence returned last week from their Minnesota trip.

Mr and Mrs. Wm. Buchanan of Belmond visited at the home of their son Jay Sunday.

Quite a number from our vicinity attended the creamery picnic at Kanawha, Thursday.

Mr. and Mrs. S. E. Eldred were over from Clear Lake Sunday, their daughter Verenda who has been visiting here returned with them.

AVERY TOWNSHIP

Mr. and Mrs. E. Amey were Sunday visitors at the Ted Dutherage home.

Fred Wilkins and family spent Sunday at the home of Pat Lyman's near Clear Lake Iowa.

Gilman Marshall accompanied his brother Herb Marshall to Mason City Sunday.

Mr. and Mrs. Fred Wilkins and family spent Sunday evening with Mr. and Mrs. Wm. Bell and family.

Mrs. Fred Bachman and children and Mr. and Mrs. Robert Roth. were up to Mason City Sunday where they visited with Mr. Bachman.

Mr. and Mrs. Fred Bachman, and Tommy Nelson were over to Mason City Friday, where they went to consult a doctor about Mr. Bachman's foot. Mr. Bachman had to remain in Mason City to have his foot taken care of.

LIBERTY TOWNSHIP NEWS

Mrs. Mary Suckow and daughter Lucille of Unionville Iowa, are visiting relatives and friends in this vicinity.

The farmers are rejoicing over the much needed rain which fell Tuesday evening. On places it hurt the oats and corn considerable.

Most everybody of this vicinity were at the camp grounds Sunday and had the privilege of hearing Dr. Mossiman, president of the Morning Side College speak. He is an interesing speaker.

A barn dance was held at the Franklin home in the northern part of the township last Friday night The male attendance was good but the more gentleman sex were but few in number.

The Hancock County ministers held a picnic at Twin Lakes Wednesday. Rev. Meyer of the Liberty Township church reported a good time. We understand that they did some fishing. We wonder if they had a ball game between themselves.

The Klemme fire team hauled out the hose cart Saturday afternoon and gave the dusty main street a good soaking with the water to settle the dust which had accumulated during the dry spell. It cooled off the air and settled the dust in good shape so that Saturday night when the crowds began to come to town there was no dust flying. The boys also took the hose to the stockyards and soaked that down in good shape as local buyers had the yards filled with hogs and some of them were nearly dying from the heat.

MILLET GOOD IN EMERGENCY

Can Be Planted Until Middle of July In Iowa.

It is not too late for Iowa farmers to plant emergency crops, according to the farm crops department of Iowa State College. Millet is especially adapted to bottem land where corn has been flooded out.

Millet will mature in a shorter season then will corn and other small grains. Authorities say that one big factor in its favor is that it may safely be planted as late as July 15.

Sudan grass is a good non-leguminous emergency hay crop and will surpass millet or oat hay from the standpoint of yield but it is about the same in feeding value. The seed cost is not high but it is not advisable to plant the crop later than June 15 unless there is a considerable amount of moisture to germinate the seed.

NOTICE TO CONTRACTORS

For the Construction of Drainage Disctrict No. 101, Hancock County, Iowa

Notice is hereby given that the Board of Supervisors of Hancock County, will meet at the Court House in Garner, Iowa, on the 15th day of July, A. D. 1921, at one thirty o-'clock to let to the lowest responsible bidder the contract for the work and construction of Drainage District No. 101 of Hancock County, Iowa, said work to be let specifying the work to be done and the time fixed for the commencement and completion of the same, to-wit:

SECTION 1.

Main Line

Length	Size	Av. Depth
200 feet	4' base open ditch 100 cu. yds.	
600 feet	32"	6.00
1500 feet	24"	5.40
1000 feet	18"	5.60
1200 feet	12"	5.20
1000 feet	10"	5.40
300 feet	8"	4.60
1 Bulkhead	15 cubic yds.	
3 Brick Manholes	with iron covers.	
2 Sewer Pipe Inlets	8" with 15" top.	
Lateral 8		
40 feet	18"	3 feet
Lateral 23		
286 feet	18"	4.50
1 Sewer Pipe Inlet	8" with 15"	
Lateral 28—50		
800 feet	8"	4.40
300 feet	8" S. Pipe	4.40
2 Sewer Pipe Inlets	8" with 15" top.	
Lateral 47—55		
42 feet	8"	3.90
1 Sewer Pipe Inlet	8" with 15" top.	

1. All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2. All tile must pass the specifications for drain tile of the American Society for Testing Materials. Tile in sizes 8" to 12" to be 2' long. Tile in sizes 12" to 32" must pass the specifications for Standard Drain Tile. Concrete tile will be allowed only in size 24" to 32".

3. Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to back fill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specifications are on file with the County Auditor.

5. Work to be commenced thirty days from date of letting of Contract. Contract will be completed by May 1, 1922.

All ditches and drains to be constructed in all respects in accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's Office subject only to such changes and alterations as may be made provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1:30 o'clock P. M. of the 15th day of July, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids must specify prices for tile alone, for construction work alone, or for both tile and construction.

The Board will. at their decision, let the work as a whole to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENTS WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof, and shall also file with County Auditor a bond subject to his approval for a sum equal to twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 101, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty four hours after demand. and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By Order of the Board of Supervisors.

Dated at Garner, Iowa, this 21st day of June, 1921.

CHRIS JACOBS,
County Auditor.
(SEAL)

News For The Farmer

ALFALFA CURING IMPORTANT

Half Day In Swath, Day In Windrow Often Enough

In order to get the full value of alfalfa leaves, which form 50 per cent of the value of the hay the crop must be stacked and placed in the barn at the proper time. say the farm crops specialists at the Iowa State College. Experiments have shown that the good drying weather, a half in the swath and a day in the windrow is long enough for the curing process.

There are two reasons, each with an index at which the alfalfa hay should be cut. One index is the appearance of the first bloom and the other is the starting of a new grouth at the crown and at the lower part of the old stems.

STORE BUTTER FOR WINTER

Low Priced June Butter Can Be Kept For Months.

"Even though she does not have cold storage facilities every housewife can store butter now for use in winter months," says M. Mortensen, head of the dairying department of Iowa State College. "A brine method for storing butter gives satisfactory results and should be used now because June butter has better flavor and keeping qualities than that of other months.

By putting butter away by this method it will be possible to have homemade butter during the winter months when there is shortage on the markets. There is usually a surplus in the month of June.

Butter which is to be kept for a long time should be firm when it is made according to Mr. Mortensen. To have it in that condition the cream should be quite cold before churning is started. The butter should be in small granules about the size of wheat kernals when churning is completed..

When the churning is finished the buttermilk should be removed from the churn and well washed from the butter with cold water. Then drain the butter and add the usual amount of salt before working it. After it has been worked sufficiently it is well to separate it into small rolls of one or two pounds each and wrap these in parchment paper or cheesecloth. A stone jar which has been properly washed and scalded will serve as a good container.

A brine of 35 pounds of salt to 100 pounds of water when poured over the butter will insure proper keeping It will be necessary to have a weight to hold the butter one inch below the surface of the brine. A cold cellar is the best place to keep the container. Brine will need to be added as the water evaporates.

TO ERADICATE BARBERRY

Squad of Eight to Work Northwestern Part of State.

Eight students from Iowa State College have arranged to spend the summer making a survey for the common barberry, which acts as a host for the black stem rust of wheat.thru a farm to farm survey, under the direction of the extension plant pathologist of Iowa State College.

The crew will start near the Missouri river in the northern part of the state and work down and east. It is estimated that one third of the state will have been covered by the end of the summer. Members of the party will cooperate with farmers in eradicating the barberry.

Last year a similar group surveyed 16 counties in north-western Iowa and found an average of one bush per mile.

Ceramics Workers Invite Inspection.

Ceramics work in Iowa. which has been considered of no importance, has taken a new hold on the people, according to the men in charge at Iowa State College.

They wish to announce to all that visitors will be welcome to inspect the work being done in this art and that they offer many courses in decoration of vases, candlesticks, bowls, bookracks and paperweights.

PATENTS Watson E. Coleman, Patent Lawyer, Washington, D. C. Advice and book free. Rates reasonable. Highest references. Best services.

HOME TOWN HELPS

STRONG PLEA FOR GARDENS

United States Commissioner of Education Urges That Last Year's Good Work Continue.

Last year more than 2,000,000 boys and girls in cities, large towns and industrial villages in the United States cultivated gardens under school direction and supervision and produced many millions of dollars' worth of vegetables and small fruits to be consumed where produced without cost for transportation and handling and without loss from deterioration on the markets. There were many thousands of boys and girls who produced more than $50 each in what would otherwise have been idle time, and thousands of acres of land that would have lain idle if it had not been cultivated by the boys and girls yielded more than $500 an acre.

The educational value to the children was far greater than the value of the food products. That value included health, physical vigor, habits of industry, knowledge of plant life and of the phenomena and forces of nature, and the beginning of the understanding of the fundamental moral principle that every one should gladly contribute to his own support by his own labor.

"The United States bureau of education will not be able to follow up this work this year as fully as it has for several years past," writes P. P. Claxton, United States commissioner of education, "but I hope the interest of children, teachers, superintendents and school boards will not lag and that the time will soon come when this school-directed home garden work will be recognized as a necessity and an essential part of the education of children in all cities, towns and industrial villages."

FOR BOYCOTT OF BILLBOARD

Speaker Advocates Strenuous Action Against What Is Generally Recognized as a Nuisance.

Declaring the automobile has made the billboard a countrywide problem, E. T. Hartman of Boston, member of the Massachusetts Civic league, addressing a meeting of the American Civic association, said that there is no best law or method for dealing with the problem presented by the defacement of both the city and the country by outdoor advertising.

The public, he said, can bring remedies to bear when it chooses to make the effort. He suggested that one effective method would be to withhold patronage from persons and firms employing this method of publicity, and said this would settle the whole problem in a year.

MAKE FENCE ATTRACTIVE

A few morning glories or cardinal climber vines will cover that bare or unsightly fence and make it attractive.

Memorial for Heroic Dead.

The prince of Wales has brought back with him from the Antipodes a very beautiful conception of a form of memorial for the soldiers who have fallen in the great war.

He approached Ballarat, the great gold mining city in the Australian colony of Victoria by means of a broad avenue, some fifteen miles long, lined on either side by trees, which are flourishing, and that bid ere long to form a sort of foliage domed roof for the entire thoroughfare.

Each tree, planted within the last three or four years, and there are about five thousand of them, commemorates a Ballarat boy who gave his life for the empire at the front in France, on the peninsula of Gallipoli and in Palestine. Each of the trees bears the name of the soldier lad whose supreme sacrifice it is designed to recall to his kith and kin at Ballarat—London Mail.

Fight Well Worth Waging.

It pays the community to make a battle for tree treasures. It is a fight which should employ many different tactics and arms. First, perhaps, should be the selection for city planting of trees that are most nearly immune to the more dangerous pests. Next is good care, and the fostering of birds which do so much to check insect plagues. Finally comes scraping and spraying to get rid of the enemies which, like the oyster shell scale, have broken through the other lines of defense.

A good tree is worth fighting for.

TRUST A YANKEE

By MYRA A. WINGATE.

(©, 1921, by McClure Newspaper Syndicate.)

Dan had been resolute.

"I'm a country boy, Cath," he had said. "The city has men enough. Don't urge me to go. I've a plan for building up a canning business here. Every fellow ought to put something into his own town. The building site is mine already, and by next year I can begin in a small way. Let's do it together."

Here the quarrel had begun. Catherine could not bear that people should say her Dan was lacking in ambition. It had ended by her saying:

"I will never marry you so long as you stay in this town."

Dan had caught her hand when she would have removed the ring.

"Take time to think it over, Cath. I shall take the assistant keeper's place at the light during his vacation. You won't see me for a month."

The girl moved restlessly, as if to shake off troublesome memories, and stepped from the shelter of the rocks out upon the headland, from which was visible the great, brilliant eye in the lighthouse tower, a mile beyond the harbor entrance. Braced against the storm wind, she gazed seaward.

The light—a stationary one—was winking and flashing in a manner to attract notice. After a bewildered moment it came to her that the winks and flashes were a clumsy adaptation of the Morse code, as familiar to her as the printed word, through her daily work as operator.

"SOS," she spelled, "SOS," "SOS."

The wireless distress signal!

She sped down the rocky path to the house, where her uncle, Captain Barrett, retired, sat before the fireplace blissfully anticipating supper.

"There's trouble at the light," she gasped. Possessed of the facts the captain agreed.

"Trouble, sure enough. Guess I'll have to go."

"I'm going, too. I can run the engine," announced Catherine.

Sure that the trouble was illness or accident they stopped on the way to enlist the young doctor's aid. At the shore, men who were discussing the unusual behavior of the light offered help. The captain chose shrewdly.

"Doctor's an able seaman, and Cath's a good engineer. I'll take Jack. He's tough as the toenails o' Moses."

Drenched and weary, they reached the lighthouse at last.

Captain Hatch, head keeper, lay lashed to his bed, his eyes bright with fever, his mutterings incoherent. Leaving the doctor with him, Catherine ran up the winding stairs, Captain Barrett toiling after.

On the first landing, beneath the light, lay Dan—a white and exhausted Dan, only partly dressed, his head clumsily tied up, and one leg broken and helpless, though he had tied that up, too, with a makeshift splint.

The head keeper quieted, the doctor made swift examination and decided not to set the broken limb until morning. While he deftly bandaged the injured head, Dan told his story.

"Captain Hatch was taken sick this noon, with chills," he said. "He couldn't get warm. He lay down and I put hot things—flatirons and stove lids—around him.

"This afternoon he grew feverish, and later went completely out of his head and thought I was trying to get up into the tower to harm the light. He struck me on the head with a flatiron. Then we fought, and I tied him down, so I could leave him, to light the lamp. Coming down the ladder from the lantern to the top-stair landing I got dizzy and fell, breaking my leg. I tied it up as best I could. Didn't dare risk going downstairs, but managed to crawl back up the ladder with a spare tin of oil."

"How'd you make signals?" asked Captain Barrett.

"Throwing my coat over the lantern and jerking it off again. Thought Cath might see it."

"And the flares?"

"Cut off my trouser legs, soaked them and my shirt and sweater in oil, lighted them and threw them up on the roof," explained Dan.

"Haw, haw, haw!" roared Captain Barrett. "Trust a Yankee!"

"You stop!" cried Cathie indignantly. "He's a hero, and you know it!"

"Hero!" snorted Dan. "Clumsy idiot, you mean!"

"Thought you'd gone back on him," teased her guardian.

"I'd marry him this minute if there was anyone to perform the ceremony," said the girl hotly.

"I'm not a J. P. for nothing," returned Captain Barrett. "Brought my little black book with me, too."

Dan caught her hand.

"You will, won't you, Cath?" he begged. "I've the license, you know. You are all the folks I have. Don't leave me."

"I shall need a nurse here," put in the doctor. "Can't move my patients yet."

Catherine's eyes were like stars.

"Read the service, uncle, please," she said quietly.

"Well, by the everlastin' clam!" remarked the captain, as a preliminary.

"You said," reminded Dan, smiling faintly, "that you would never marry me so long as I stayed in Ledgeville."

"And I kept my word," laughed the girl. "Where are your wits, Danny, boy? This island belongs to Rock Harbor, which is a city by virtue of its six thousand inhabitants."

"Trust a Yankee," murmured Dan.

POULTRY

DIFFERENT COLORS OF EGGS

Does Not Affect Nutritive Value, According to Extended Investigations by Experts.

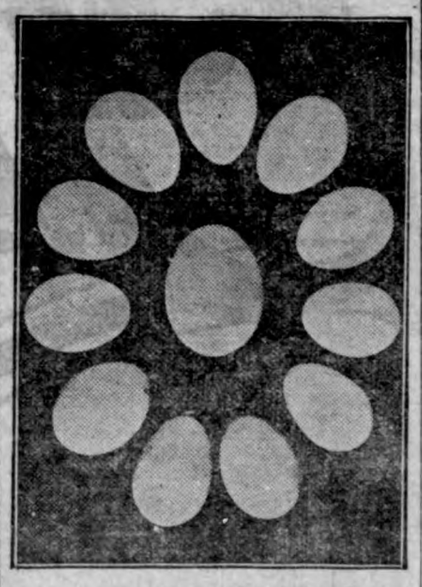
(Prepared by the United States Department of Agriculture.)

"No, I don't want white-shelled eggs. I don't think they are as good as the brown-shelled," one frequently hears a housekeeper remark. Or just as often it is, "I want white-shelled eggs; we don't care for those with brown shells." Each group is confident they are in the right, but extended investigations made at some of the agricultural experiment stations, in which many analyses were made of eggs from different kinds of hens, have shown plainly that there are no unifor n variations in the physical properties and chemical composition of brown-shelled as compared with white-shelled eggs. Such tests justify the statement that the eggs of any given breed of hens, whatever the color of the shells, are, on an average, as nutritious as those of another breed, provided the eggs are of the same size and freshness and the fowls are equally well fed, say specialists of the United States Department of Agriculture.

The color of the shells, whatever its reason, is a feature which has some effect on the market value of eggs of domestic poultry, although not upon their food value, the brown-shelled eggs bringing the higher price, for instance, in the Boston market, and the white-shelled eggs in the New York market. In England the preference is decidedly in favor of the tinted eggs. Such local differences probably originated in the fact that some one breed of hens was once chiefly used in a given region and its type of eggs set the standard there.

The color of the egg content is also a matter of interest with respect to market value and domestic uses. Raw egg white has a more or less greenish tinge, which is apparently influenced somewhat by the character of the feed, though no specific coloring matter has been isolated from it. When the albumen is coagulated by heat in cooking the color varies from white to pale greenish or yellowish tones, hard to define, yet distinct. There is a belief that eggs with shells of the same color should show the same color in the cooked whites and that the cooked albumen of white-shelled eggs is decidedly whiter than that of eggs with tinted shells.

Perhaps few persons carry preferences so far as to refuse an egg because of the color of the white, yet it



Neither Size, Shape Nor Color Enters Into Food Value of an Egg.

is stated on good authority that in high-class hotels and restaurants, where great attention is paid to details, it has been found that the boiled eggs served must match in color.

The egg yolk owes its characteristic yellow color to a pigment whose chemical nature has been carefully studied. The depth of the yellow color apparently depends—in large measure, at least—upon the presence of green feed in the ration, and pale-colored yolks indicate that such feed is deficient. Though frequently the yolk is pale, the color which we commonly regard as a standard is a decided yellow, and so the pale-yolked eggs are often said by housekeepers to be inferior, as a given number of such yolks impart to a cake or custard less of the yellow color regarded as an indication of richness than do eggs of a darker yolk, a belief which chemical analysis does not justify.

Although, as stated above, variations in color do not imply variations in food value, it is not at all unlikely that there are differences in flavor corresponding to the color of the egg yolk, that which is deep yellow having a more pronounced flavor than the pale one. At any rate, as long as preference for deep-colored yolks and pale whites exists the poultry raiser who caters to a fancy market should take such factors into account.

POULTRY NOTES.

An average fast picker will dress from 40 to 50 ducks in a day.

* * *

Good feeding, good stock, no lice, no carelessness, insure success to any poultry keeper.

One of the most important duties at this season is to cull out the youngsters and discard all the runty, puny specimens.

HOW WOMEN AVOID SURGICAL OPERATIONS

Some Are Extremely Necessary, Others May Not Be

Every Woman Should Give Lydia E. Pinkham's Vegetable Compound a Trial First

Chicago, Ill.—"I was in bed with a female trouble and inflammation and had four doctors but none of them did me any good. They all said I would have to have an operation. A druggist's wife told me to take Lydia E. Pinkham's Vegetable Compound and I took 22 bottles, never missing a dose and at the end of that time I was perfectly well. I have never had occasion to take it again as I have been so well. I have a six room flat and do all my work. My two sisters are taking the Compound upon my recommendation and you may publish my letter. It is the gospel truth and I will write to any one who wants a personal letter."—Mrs. E. H. HAYDOCK, 6824 St. Lawrence Ave., Chicago, Ill.

A Vermont woman adds her testimony to the long line of those fortunate women who have been restored to health by Lydia E. Pinkham's Vegetable Compound, after it had been decided an operation was necessary:

Burlington, Vt.—"I suffered with female trouble, and had a number of doctors who said that I would never be any better until I had an operation. I was so bad I could hardly walk across the floor and could not do a thing. My sister-in-law induced me to try Lydia E. Pinkham's Vegetable Compound and it certainly has helped me wonderfully. I keep house and do my work and have a small child. I have recommended Vegetable Compound to a number of my friends and you may publish my testimonial."—Mrs. H. R. SHARON, Apple Tree Point Farm, Burlington, Vt.

In hospitals are many women who are there for surgical operations, and there is nothing a woman dreads more than the thought of an operation, and the long weary months of recovery and restoration to strength if it is successful.

It is very true that female troubles may through neglect reach a stage where an operation is the only resource, but most of the commoner ailments of women are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing ailments first appear take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles. In fact, many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised by attending physicians.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

NOT RESTING, JUST WAITING

Idiot Boy, According to Judge Gary, Very Much Like the Rest of the World.

Judge Gary was talking at a dinner about the world's industrial situation.

"All over the world," he said, "labor is earning more and producing less. In England, for example, there are more coal miners employed than ever, and the production of coal is lower than ever.

"English labor reminds me of the idiot boy.

"A farmer, out of pity, gave an idiot boy a job. Then one afternoon the farmer walked across his farm to see how the boy was doing. He found him lying on the grass under a tree smoking a cigarette.

"'Well, Looney,' he said—the boy was known as Looney in the village—'Well, Looney, what are you doing? Resting?'

"Looney took his cigarette out of his mouth and answered:

"'No, boss, I ain't restin', 'cause I ain't tired. I'm just a-layin' here waitin' for the sun to go down so's I kin quit work.'"

Agreeable, But—

Wifey (to hubby deep in his paper)—Ed! I told you you were wrong on that paint question.

He—So?

She—Yes, and you were also way off on the color of that wall paper.

He—Yes?

She—Ed, if you're going to be so unsociable I'm going to leave you this minute.

Disinterestedness.

"Are you sure that your career has been distinguished by unselfishness?"

"I am," replied Senator Sorghum; "I've worried myself into brain-fag over the people in Europe, not one of whom could come out and vote for me even if I offered to pay his expenses."

Hush money is generally paid on the quiet.

INTRODUCED A COMIC SCENE

Player Unwittingly Interjected Comedy Into Gloomy Tragedy of Shakespeare's Julius Caesar.

When I was in high school we gave an entertainment—"Julius Caesar," in which I had a minor part. Without coat or collar, sleeves rolled up high, and a blanket for a toga I was a Roman citizen. I was also one of the stage managers.

After one scene the curtain stopped about two feet from the floor. I stepped on the stage to right the difficulty. Without warning, the curtain came down in a wreck on my poor defenseless head. I was stunned for a moment. Then I began to realize what a grotesque figure I must be, for I had discarded my toga while shifting scenes, and there I was standing alone on the stage amid the ruins, feeling the bump on the top of my head.

But I smiled in spite of myself, gave a professional bow, and stalked with dignity to the wings. It was several minutes before the audience quieted down so that the play could go on.—Chicago Tribune.

Agricultural Gloom.

"Still thinking of buying a farm?"

"No. I've always prided myself on taking a cheerful view of life."

"What has that to do with your buying a farm?"

"Judging from the kind of talk I hear in rural communities, I wouldn't own a farm more than six months before I'd be a confirmed pessimist."—Birmingham Age-Herald.

Judged Him by His Hair.

At the beginning of the second semester of school, a boy entered the first grade wearing curls. That noon at table my young hopeful in a tone registering disgust said: "That new boy is sure some sissy." Upon my asking him how he knew, he replied: "I know because his hair says so."—Chicago Tribune.

Blunt men usually have sharp tongues.

You Always Get full food value for your money when you eat

Klemme and Vicinity

Mrs. Jack Zieli was up from Goodell Tuesday shopping here.

Emma Wille and Esther Swanson went to Garner Tuesday afternoon.

Mrs. Ahrenkeil was up from Goodell Wednesday.

Mr. Rob Smith, of Meservey was in Klemme Wednesday.

Mr. and Mrs. Gus Church of Goodell were Klemme visitors Monday.

Miss Leona Lau was a passenger to Garner yesterday morning.

Marie Blank visited at Goodell on last Friday and Saturday.

Mrs. R. A. Jorgenson was a visitor at Garner last Friday between trains.

Lew Sampson was a business caller at Garner Saturday Morning.

Aug. Lau was a business caller at Garner Monday morning.

FOUND—Gold cuff link. Call at Times Office.

Donald Gibbs was at Garner Monday morning between trains.

U. G. Smid was a business caller at Garner Tuesday morning.

Mrs. N. L. Palmer returned Monday evening from Burt.

FOUND: Ladies Coat. Call at Times Office.

Henry Church, of Garner, was a Klemme caller Tuesday.

FOR SALE—3 good building lots at a bargain. Inquire of Chas. Ax.

Tell your news to the Times. Phone 12.

U. G. Smid went to Garner Saturday morning to have dental work done.

Mr. Littel, a contractor from Eagle Grove was in Klemme Saturday on business.

A large number of men were out to the diamond Monday night to get a little workout.

Miss Anna Griewe is at home here again as she has resigned her posiion there.

Mr. J. H. Thomas was up from Belmond last Thursday on business here.

WANTED — Cattle to pasture, good feed and water. Ben Knoll, Phone 4415. 1. w

Mr. and Mrs. Chas. Burkett from Goodell were Klemme visitors Monday.

Leslie Witter from Fenton was in Klemme Saturday visiting with Jack Wellemeyer.

Miss Emma Sampson, the popular clerk at the J. N. Day store has been spending a few days in the country.

Mr. and Mrs. Curtiss Luick came over from Clear Lake Monday for a visit with Klemme friends.

Minnie and Marie Blank went to Belmond yesterday noon for a visit with relatives and friends.

Dr. N. Rueber drove to Goldfield Sunday for a visit with relatives and friends.

Mrs. Mary Wellemeyer came up from Charles City Friday for a visit with her son, Art and family.

Mrs. Mary Suckow and daughter Lucile. of Unionville, Iowa, came on Monday for a two weeks visit with Klemme relatives and friends.

Marlin Croner and Clarence Wiles returned from their trip to Chicago yesterday. They made the trip in a car.

Roland Runge, while digging post holes the other day, found 21 Indian arrow heads. The stone points are all in fine condition and were all in the same spot.

Say have you noticed that "beautiful" little park in front of the depot? Looks like an experiment station for raising a variety of weeds don't it?

Several people from here drove to Belmond Sunday to attend the ball game between Belmond and Kanawha. Belmond won by a score of 8 to 3.

FARMERS! Do you need any printed envelopes or letter heads Get them done at the Times Office. We have all modern machinery and electrically equiped.

Mr. Frank Miller of Fort Dodge, was a business caller in Klemme Friday. Mr. Miller was formerly in the bank at Miller but is now in the life insurance business.

Mr. and Mrs. J. B. Spitler left for Clarian Friday where they were called by the serious illness of Mr. Spitler's mother who is 73 years of age. She is suffering from cancer.

Mr. and Mrs. E. F. Salling went to Jewell Sunday morning, to visit relatives. They returned Sunday evening. Mrs. Thorvald and Thora Christensen came back with them to visit in Klemme a few days.

We hav heard several comments from traveling men who visit Klemme regarding the signs which the business men here have put up all over the surrounding country directing the way to Klemme. Travelers say they are very convenient and their first impression is that Klemme is a live town. They are right.

Miss Gustafason, who has been visiting with Mr. and Mrs. Walter Lau for the past two weeks. left last Friday morning for Moline and Rock Island, Illinois, for a few days visit returning to her home in Chicago.

The Royal Neighbors had a surprise party last Tuesday evening for Mrs. Palmer. who is leaving Klemme soon. They served refreshments and later presented her with a gift as a remembrance.

Mrs. Gus Baack received word on Friday that her father was dead. Mr. and Mrs. Baack left Saturday morning in their car for Sheboygan, Wisconsin, where funeral services were to be held.

Henry Lemke purchased the N. L. Palmer residence in the south west part of town and will move here in a week or two. He drives the oil wagon for the Standard Oil Co. and is at present living at Garner as he was unable to find a house here

Mr. and Mrs. J. B. Morrison and children went to Iowa Falls Monday. From that place Mrs. Morrison and two children left for Illinois, to visit friends and relatives. "Jimmy" returned to Klemme Tuesday morning.

George Elder and family drove from Eagle Bend, Minnesota, yesterday, for a visit here with his brother Ralph and family. They will remain until the latter part of the week visiting relatives and friends.

WHAT THEY ARE FIGHTING F

Not for themselves you unders but for others. Jack Demsey to win the fight for the sake o mother. And Carpentier wan win it for the sake of his baby, J queline. It will break Jack's mo heart if he loses. It will blight future of Baby Jacqueline if Car tier loses. How cruel life is! to think what it is going to co break a mother's heart or blig baby's innocent young life.

AVY MOVEMENT OF GRAIN

hirty four car loads of grain shipped from Klemme during month of June. The Farmers ator shipped 16 car loads and F. Lau reports that he shipped ar loads. This is puite a ship- at this time of the year.

FARMERS PICNIC WAS SUCCESS

Nearly all the farmers in this vicinity went to the Farm Bureau Picnic at the camp grounds at Concord on the Fourth. The picnic was a great success and everybody enjoyed the day.

There were several thousand farmers present from all over the county and mauy from othr near by counties.

Games and contests of all kinds were enjoyed by both old and young.

Farmers and their families came to the picnic with well filled baskets of good things to eat, free coffee was erved on the grounds.

Rev. Meyer Falls and Breaks Leg

Rev. A. H. Meyer met with a bad accident on Monday evening. He was preparing to go to bed and had turned out the lights down stairs and started to go up stairs when he fell in the dark breaking both bones in his right leg just above the ankle. It is rather hard to have to be shut up in the house and stay in the bed during this hot weather but he says he will make the best of his forced vacation.

BISMARK. N. D. July 1.—It will be illegal today and hereafter to smoke in a cafe, hotel dinning room or a dinning car on a railroad in North Dakota in which men and women are present. A law making these restrictions passed last winter by the legislature became effective today.

HOG WEIGHS 860 POUNDS

NASHUA, July 1—A hog weighing 860 pounds and six others averaging 500 pounds each were sold by Henry Wright to the J. W. Pierce and sons this week. This beats anything in this line marketed here in sometime.

FOR SALE— Good bicycle at a very reasonable price. See the Times Office.

PARCAUT DEFEATED PREHN AT BIG MAT SHOW FRIDAY

Hans Willard Wrestles toa Draw

Ralph Parcaut, the crack Spencer middleweight wrestler and claimant of the world's championship, easily defeated his long time foe, Paul Prehn. of Mason City when they met at the big wrestling show at Garner last Friday night. Parcaut downed Prehn twice in 34 minutes, the first fall in 12 minutes and 30 seconds with a bar arm and wrist lock; the second fall in 21 minutes and 40 seconds with headlock and wristlock.

Parcaut is far the fastest man and showed that he had it all over Prehn right from the start.

Hans Willard, the Klemme wrestler went to the mat with Stephen Goffe of Woden. They wrestled for thirty minutes and neither could get the other's shoulders to the mat for a counter. Goffe was quite a bit eavier than Willard, but Willard was the most skillful of the two.

There was also another wrestling preliminary and a ten round boxing bout.

Quite a delegation of Klemme fans took in the match.

KNOKE BUYS DRAY LINE

Louie Knoke has bought out the dray line business from C. M. Bredbenner and is now in possession and has been for a couple of weeks.

Louie has been running the business for Clark for some time and is well acquainted with the business. He is a good hustler and will make a good drayman.

Iowa State Ayrshire Holds Record

Second highest in her class in the United States and first in the state of Iowa is the record recently completed by Robinhood Cavalier Lass an Ayrshire, four and one-half years old, owned by Iowa State College. The certificate was received last The cow produced 427 pounds of butterfat and her record is in the four and one half year old class of the Roll of Honor division.

GOLD FOUND ON HERKE AND ANDERSON FARMS

Gold has been discovered on the A. G. Herke farm south of Graettinger and the assayer's report shows that it runs $14.06 per ton. The report stated it contained 64-100ths. of an ounce of Gold and a trace of silver. The assay was made by the Thos.J. Dee Company of Chicago. The sample was mailed by M. Weinholzer, jeweler, of this city. In securing the sample Mr. Herke strained the sand through a course cloth in order to stcure the fine sand. In this operation he may have taken out some of the gold deposited in which case the test would run considerably higher. However $14 per ton is consldered exceptionally good and would leave a wide margin for mining purposes. Mr. Herkt has something over 240 acres in the piece. The sample that was tested was dug up in a corn field. He also secured some samples from the bed of Jack Creek, taken six inches under the bed. These will also be tested. We congratulate Mr. Herke on the discovery made on his farm and we hope he will eventually take out thousands of dollars of the precious metal.

The gravel at the Jorgen Anderson farm tested between $9 and $10 per acre. The assay was made by a gentleman at Des Moines. Mr. Andersons farm adjoins the Rock Island gravel pit. His plact is located about two miles north of Grattinger. If the Gold can be extracted without much difficulty a test of $9 to $10 is considered very good.

Rock Island officials wired Monday that they had found gold in the sample from the Smith farm. They would not give the figures until the assay was completed. The first sample mailed the company was small and the chemist cauld not obtain a satisfactory test. A new sample of 50 pounds was mailed in taken according to directions from the Chicago office. The favorable gold report from the Rock Island company shows that Thos. J. Dee company assay was reliable.—Greattinger Times.

SOILING SUPPLEMENTS PASTURE

Care Must be Taken in Feeding Soiling Crops.

With pastures in better condition than in other years, it will not be necessary to start feeding soiling crops or silage as early as usual, according to the dairy husbandry department of the Iowa State College. This year it is estimated, pasture for dairy cattle will last until about the middle of July.

Silage can be fed either in the barn or in the pasture. The latter method entails the least work and is the most convenient. Both methods ave advantages and disadvantages. When fed in the pasture. some of the feed dries out, some is trampled into the ground and the cattle are more apt to injure each other while eating On the other hand, when feeding is done in the barn it requires more work, but the percent of wastage is cut down and the cows may be sprayed for flies while they are eating.

All of the common soiling crops, with the possible exception of corn, can be conveniently fed in the barn Where the soiling is given on the pas ture it is usually fed only once a day but when fed in doors from one to three feeds may be given. Generally however, feeding more than twice a day will not be advisable where some pasture is available. With a partial soiling system, such as generally used, from 40 to 70 pounds of green feed per cow a day will commonly be consumed in addition to pasture. In the feeding of soilage care should be taken to avoid the inclusion of large amounts of soil with the green feed. Where the soiling has been cut when wet it is advisable to limit the amount fed as wet feed will often produce scours.

WOULD WATCH IT

"Well, Pat," said Bridget, "what kind of a bird have you brought home in a cage?"

"Well, it's a raven, " repiied Pat.

"A raven. And what did you bring home a bird like that for?"

"Well I read in the paper the other night that a raven has been known to live for three hundred years. I don't believe it, so I am goingk to put it to a test." —Pittsburgh Cronicle Telegraph.

THOUGHT THEY WERE FUNNY —MAYOR SAYS NOT

Two young men of Belmond are seriously considered today whether they are quite as funny as they thot. The mayor says they aren't and the boys are beginning to believe that maybe he is right. The way of it was thus:

A Mr Wright a traveling man, on Tuesday night were coming back to Belmond from Cornelia, where they had been to the dance. and when at a point between the Elder bridge and M. & St. L. track saw a tire laying in the road. There were four other men in the car with Wright and one of them started to get out of the car to get the tire. The tire started off in to the weeds. Wright and his companions, with visions of hold-up men—this "lost tire" stunt has been worked that way before— "stepped on her" and came to town after the marshal. They found the night watch, Rierson, and went back. The tire laid in the road again and as Rierson got out of the car the tire started to moveoff and at the same time the two young men began going elsewhere. Rierson got his gun out and commanded them to halt They thought perhaps Holver meant it so they did. One young man was real sassy, while the other saw the error of his ways. Wright ordered them arrested and brought before the Mayor, which was done, it being then 11:00 o'clock at night. The two men said it was all for a joke, but the mayor and Wright pointed out to them that it was a mighty poor one, that the stunt had been used a number of times by highway robbers. and that the law has considerable to say about a joke on the public highway. After a severe lecture and warning they were turned loose.

But they will never know how close they came of being shot.—Belmond Independant.

YOUNGSTERS JUDGING EXPERTS

Boy and Girl Win Prizes at State Shorthorn Picnic.

To win a reputation for an expert judge of purebred cattle when you are only a "freshie" in high hchool and especially when you are a girl is an usual record. But Josephine Garden, of Wapello, has won this reputation.

At the state picnic of breeders of Shorthorn sattle of Iowa State College recently Josephine won the prize in the judging contest for women. She made a score of 195 points out of a possible 200 and was 35 points ahead of her nearest rival. Josephine is the daughter of Jack Garden of the firm of Weaver and Garden, breeders and importers of Shorthorns.

She divided her honors at the picnic with Paul Olsen, who won the first place in the boy's judging contest. He also made a score of 195. Paul who is the son of Carl Olsen of Wall Lake. director of the Iowa Shorthorn Breeders' association and of Iowa Beef Producers' association, is even a little younger than Josephine.

DIG POTATOES EARLY

Left in Ground Hot Weather Injures Quality.

It pays to dig potatoes early. according to experiments carried on by C. V. Holsinger, horticultural extension specialist of Iowa State College. Mr. Holsinger is of the opinion that even tho the tops are quite green, potatoes can be dug and saved for winter use to advantage.

Mr. Holsinger one year harvested a crop of potatoes from two acres of Early Ohios during the first part of July. They were thrown out with a plow and allowed to remain only long enough for them to dry thoroughly before being placed in a dark cellar and spread over the floor to a depth of about 15 inches. They kept well and by fall had shriveled only a little because of lack of humidity.

At another time Mr. Holsinger dug a crop of potatoes on June 21. They were so immature that their skins slipped in handling. After being dried they were stored in stall crates in a dark place. This crop kept perfectly.

If early potatoes are not dug until fall, the warm weather during the summer makes them watery and reduces their quality. Scab will work on the skin of the tubers and grub worms and other pests will feed on them.

GRASSHOPPERS ATTACK CROPS

Poison Bran Mash Best Eradicato., According to Entomology Expert.

The two-striped grasshoper has appeared in great numbers in Mills County, according to a report by the county agent of Iowa State College, and it is feared that it will spread throughout the southwestern corner of the state. Entonomoligists from the college are now making a survey of the counties in this section to determine the spread of the epidemic and the extent of the damage that is being done to crops.

The outbreak, says Dr. F. A. Fenton. entomologist, is apt to be severe if hot dry weather continues. Where the outbreak is most serious, pastures, alfalfa corn and oats fields as well as gardens are being stripped clean by the grasshoppers, which have apparently been breading in pastures. The wheat crop will not be harmed, says Dr. Fenton, since the crop is about to be harvested.

Farmers are warned to be on the lookout for these pests and to treat the infected ground with poisoned bran mesh. Lead arsenate should not be used as the poison in it will not kill the insects. Either paris green or white arsenic (arsenious oxide) should be used. The bait sown broadcast over the infected fields as early as possible in the morning, for it dries out rapidly and is not effective when it has once lost its moisture.

The bait is made as follows: Bran, 20 pounds; paris green one pound; syrup or molasses. one half gallon; water three and one half gallons; and oranges or lemons, six fruits. Make a dry mixture of the bran and poison in a pan or tub the night before. In another pail dilute syrup or molasses with water and then add the finely chopped fruit to this. In te morning, mix the two together until a crumbly mash is fored and apply immediately.

The above formula was tried out in Mills county and within 30 hours as many as 75 dead grasshoppers were counted in on one square yard. Great care should be taken that receptacles containing the poison be left where children, stock or chickens will have accesh to them.

MILK COSTS AVAILABLE

Results of Survey are put Into Bulletin Form

On the basis of feed and labor prices between November 1, 1915. November 1, 1917, it cost $3.15 net per 100 pounds to produce milk on 68 farms near Mason City. On some farms it was as low as $1.80 per 100 pounds, and on some as high as $5.60.

These figures are taken from a new bulletin on "The Cost of Producing Milk", just issued by the Iowa Agricultural Experiment Station and which may be secured by writing to the Bulleton Section at Ames for it. While the survey of milk production costs was made in 1916 and 1917, yet the bulletin figures may be readily adapted to feed and labor prices of the present.

In contrast with what it cost the 58 farms to produce milk during the year of the survey is the price received which averaged about $2.00 per one hundred pounds for the year Only five farms out of 58 produced milk or less than $2.00 per hundred. The bullitin says that "more than nine-tenths of the farmers received less than market prices for feeds," or less than 20 cents an hour for their labor on the dairy herd, or both

It is also significant that shortly following the conclusion of the survey. the milk producers organization succeeded in getting a price of $.15 for milk of a certain standard quality.

NO MORE NEED FOR INSURANCE

The editor of an exchange suggests to his subscribers that in order that they may keep track of the expiration of their subscriptions they date their subscriptions on their birthday. He adds:

"The beauty of this scheme is that you are bound to live for another year. No man ever died who had his subscription paid up. Nine times out of ten when a man dies he owes the editor for subscription. This will beat any old line insurance company.

FOUND: Ladies Coat. Call at Times Office.

Nix on the "Parley-Voo" stuff!

A FRIEND of mine.
WHO COULDN'T speak.
A WORD of French.
WENT TO Paris.
AND THE first time.
HE HAD to get.
A HAIRCUT and shave.
HE PRACTICED an hour.
MAKING SIGNS.
IN THE looking glass.
SO THE French barber.
WOULD UNDERSTAND him.
AND THEN he went in.
AND WIGGLED his fingers.
THROUGH HIS hair.
AND STROKED his chin.
AND THE barber grinned.
AND FINISHED the job.
THEN MY friend thought
HE'D BE polite.
SO HE gave the barber.
AN AMERICAN cigarette.
WHICH THE barber smoked.
AND MY friend pointed.
TO HIS mouth.
AND SAID "Likee voo."
AND THE barber roared.
AND SAID "You BET.
I USED to smoke 'em.
WHEN I worked.
IN INDIANAPOLIS.
AND BELIEVE me.
THEY SATISFY!"

HERE'S a smoke that talks in any language and needs no interpreter. Light up a Chesterfield, draw deep—and more plainly than words your smile will tell the world "They Satisfy". It's the blend that does it—and you can't get "Satisfy" anywhere except in Chesterfields, for that blend *can't be copied!*

Air-Tight Tins of 50

Ask your dealer to show you the new vacuum-sealed tins of 50 Chesterfields. A compact, convenient and absolutely AIR-TIGHT packing—the cigarettes keep fresh indefinitely.

The "Hoot Owls" enjoyed the 4th of July picnic at the L. E. Avery home.

Mr. and Mrs. Ben Kaste and children of Charles City were calling on old friends here Saturday and Sunday.

Mrs. Henrietta Wilkins and children of Klemme visited at the Ed. Bachman and Wilkins homes this week.

The Fourth of July was rather a quiet affair here this year. Some of the local crowd went to Bay Side, Garner and Clarion, while many spent the day at home or at picnics, of which there were several in the community.

LIBERTY TOWNSHIP NEWS

Earl Josten started to work for Roy Schaefer last week.

A good share of the early otas is in the shock.

Miss Ethel Beier is helping Mrs. Will Suckow with her house work again this week.

The W. F. M. S. of the Liberty township church met in the basement of the churc Wednesday afternoon.

The Liberty township church was without a preacher last Sunday night due to a sprinkle of rain and a couple of dark clouds.

C. C. and E. J. Schaefer accompanied their brother George, of Garner to Des Moines last Saturday, where the latter will seek medical aid. C. C. returned Tuesday.

Many people of this locality went to the Farmers picnic at Garner on the Fourth. We would judge that there were between three and four thousand people there.

ffiJohn Tanner had the misfortune to loose two of his best horses last Friday as a result of over heating.

A REAL DEMONSTRATION

Dr. L. N. Jargo, of Algona who has charge of the Federal Government part of the work in the eradication of Tuberculosis from the herds of cattle in this and surrounding counties, is a game sport, though also a quit, unassuming gentleman. For the past two or three weeks he has been working in Polo Alto county and has found a number of herds whtre the percentage of reactors was large. Some of the interested farmers were skeptical of the merits of the tuberculin test, and doubled whether certain animals that had reacted were really affected with the disease. Doctor Jargo therefor offered, in his private capacity, to pay full value for any animal that he had reacted and might be selected for demonstration by the stockman, provided it be killed and thoroughly posted, the work to be done in the presence of the stockmen. His offer was accepted, an animal was selecttd from the Todd Bros. Herd, and day last week was picked for demonstration, at which time than 75 men gathered at the farm. The animal chosen by stockmen was then killtd and and the demonstration proved a ner for the doctor, for the had what is termed generalize berculosis, i. e. lesions were in several parts of the carcass lungs especially being badly di The Pola Alto Farm Bureau $25 of the $50 at which the valued the animal, and a coll to pay the balance was contri by the stockmen present. Dr. Jargo was very much with the results of the demonstr for he had nothing to gain and thing to lose from having mad proposition to the farmers co ned.—Algona Advance.

If your hens are doing what should you will get from 14 eggs from each of them during month of July.

News For The Farmer

MANURE AS A TOP DRESSING

BY G. P. Holden

Nature made our hoils fertile by growing plants and allowing them to rot on the surface.

When plowed under the manure makes the soil fertile but we usually get better results if we follow natur- e's plan and spread manure thin- ly as a top dressing.

We can top dress our meadows and our pastures. There is no better place to apply the manure than on grass land that later is to be put into a cultivated crop.

It is a waste of manure to spread great quantities to the acre or to put it on the land in large chunks or forks full. It is in top dressing that the manure spreader is the greatest help to us.

With the manure spreader we can spread the manure very thinly and cover every square inch of surface. We can get double the results in crops by using a spreader than by hand spreading.

In rainy seasons some of the manure plowed under may leach away before the plant roots get down to it, but when the manure is spread on crops with roots already established and ready to take up the plant food that leaches into the soil. none of the plant food is lost. All of it goes into the making of the crop already on the ground and to increasing the root and stuble growth which later adds humas and vegtable matter to the soil.

The action of plant food in manure is downward. It will get into the roots if spread on top.

We can figure that a ton of fresh manure is worth about $5 when thinly spread as a top dressing by the manure spreader, and only $2.50 when carelessly spread by hand.

GYPSUM NOT LIME SUBSTITUTE

Has Good Effect However On Leguminous Crops.

Contrary to the belief that gypsum will take the place of lime when applied to Iowa soils, the agricultural experiment station at Iowa State College has found that if soil is acid, lime should be aplied regardless of any gypsum treatment.

The application of gypsum has an effect on Iowa soils which is not produced by any other material. It has been found to stimulate the effect from certain available plant foods, such as potassium and phosphorus.

Conclusive data on all advantages of gypsum have been obtained by the stationat Ames but experiments already completed show that the use of gypsum is not harmful to thesoil in any way and when applied to leguminous crops, such as alfalfa and red clover a benificial effect is noticeable. For an experiment on the farm the station suggests that not over 500 pounds per acre be applied and disced in before seeding. In the case of clover which is sowed with oats. an effect will be noticible on both crops.

500 FILMS FOR FREE USE

Iowa State College Furnished Pictures For Educational Purposes

All kinds of "movies", good, bad and indifferent, are shown every day in Iowa, but not very many people know that a considerable number of the motion picture films that are exhibited in the state are furnished by the visual instruction deparment of the Iowa State College.

Some 500 films dealing with questions of agriculture and of the farm home are available through this department of the college and can be obtained from Charles Roach, in in charge of this work. No charge is made for the films.

In Iowa, with its many community buildings, consolidated schools and churchs fitted out with motion picture machines in the matter of presenting these films in simple and many localities and organizations have taken advantage of this opportunity to show educational films.

AUGUST TIME TO REQUEEN

Good Queens Will Repay Beekeeper, Says State Apiarist.

The necessity of good queen bees in Iowa is imperitive and bee men should be making arrangements at once for fall requeening, says F. B. Paddock, state apiarist.

"The spring was so adverse," declares Mr. Paddock "that requeening at that time was very difficult. The best time to requeen is from Aug. 1 to 10. Generally queen breeders have their orders booked months ahead."

Beekeepers in those counties in the state where work is being carried out under the direction of Iowa State College are attending the meetings at the demonstration apiaries and are enthusiastic over the result say Mr. Paddock. The membership in the state beekeepers association has doubled in the last two years.

WASHINGTON NEWS ITEMS

WASHINGTON D. C. July 6 — The Willis-Cambell bill known as the beer bill and preventing the perscribing of beer as a medicine, passed the House Monday by a vote of 251 to 92. The entire Iowa deligation with the exception of Mr. Hull of the second Dist. voted for the passage of the bill.

The road bill passed the House Monday by a vote of 266 to 77. This bill provides for the continuation of federal aid in road building, a system used extensively in Iowa.

The Naval bill with the reduction amendment by the Senate and the Borah Amendment passed the House yesterday by a vote of 332 to 4. The Borah amendment authorizes the President to call a conference of representatives of the foreign powers for the purpose of discussing disarmaments.

The conference report on the Knox Porter resolution in the first thing on the House Calender and it will be undoubtedly passed by a large vote. This resolution declares a state of peace to exist between the United States and Germany and will assist materially in the resumption of trade relations with the Central Powers.

Iars Bladine, internal revenue collector. for the State of Iowa, was in Washington this week on official business and made a friendly call at the office of Mr. Dickinson.

Among the Federal plums recommended by the Iowa Senators this week were: Fred Davis of Sioux City for United States Marshall for the northern district of Iowa, Glen A. Brunson of Algona for State Prohibition Director and W. B. Haynes of Des Moines for Collector of Customs.

Congress is hoping that they will be able to clean up necessary legislation speedily so as to enable the members to leave Washington for a few weeks during the extremely hot weather. One day last week the temperature reached 107 and between 30 and 40 girls in the Government service were overcome with heat.

LIFE AND DEATH FIGHT

Wolf Wins Over Dog. Farmer Kills Wolf

Creston, Iowa, June 30.—Witnessing a fight to the death between his dog and a wolf was the sight afforded R. Groves, who resides southwest of this city.

The dog, a large shepard went with Mr. Groves to drive up the cows and espied the wolf far to the other end of the pasture, and immediately gave chase. Mr. Groves thinking it was another dog,. paid no attention until the sounds of the battle attracted his attention. The wolf instead of running held his ground and in the fight that followed killed the dog. but was so badly injured that Mr. Groves was able to kill him with a club. —Hampton Cronicle.

Mr. Ernest Schuldt and daughter, Genieve, left Saturday for Colesburg for a visit over the Fourth with his sister and family. They returned yesterday.

Mr. and Mrs. F. H. Ridder and Mrs. S. A. Harvey and baby are at a cottage at Clear Lake enjoying an outing for a week or two. They went over Sunday.

Mr. G. H. Ludwig and Mr. and Mrs. Henry Ludwig came from Nevada. Iowa. Friday for a visit with Mr. and Mrs. E. S. D. Kahrs until Sunday.

Hartley Blewitt and wife of Thornton were visiting Klemme friends last Thursday. Hartley is working in a bank there. He was at one time working in the State Savings bank of this place.

Mr. and Mrs. Verner Lewis and baby of Hayfield, Minn., came Saturday evening for an over Sunday visit with the W. F. Pavey and Lew Lewis families. They returned to their home Monday evening.

Carpenters are putting on a new roof on the Kahrs Drug store this week as the old flat roof had a bad habit of leaking every time it rained. The new roof is a pitched roof and will no doubt shed the water.

Mr. and Mrs. White and daughter Mamie of Goodell and Mr. and Mrs. Grover and daughter of Illinois who are visiting the Whites, were visiting with Klemme relatives and friends last Thursday.

Many Klemme people went to the Lake the Fourth to spend the day. A few went to Clarion and some to the celebration at Hampton. They report large crowds at each town.

This vicinity was visited by a fine little shower Tuesday evening. A little shower every evening would be just the thing now as the ground is pretty dry now.

Dorothy and Homer Ridder of Watertown, South Dakota, arrived in Klemme Monday. They will spend the summer here with relatives and friends.

Donald Nissen left Saturday evening for Sioux City where he will again resume his work in a bank after having spent about a month visiting with Klemme relatives.

The R. W. Elder, W. H. Trafford and Ed. G. Ell families are spending a week or ten days outing at a cottage at Clear Lake. They began the vacation Wednesday.

Harold Gruetzmacher went to Cedar Rapids Saturday to spend the Fourth. He returned to Klemme yesterday morning.

Mrs. Dolbert Kessler from Peoria, Illinois came last Friday for a visit at the home of Mr. and Mrs. Cliff Swartz and with other Klemme relatives and friends. for a couple of months.

Mr. and Mrs. Einar Salling, Miss Thora Chritenhen who is visiting at their home, Mrs. Torvald Cristensen and Adolph Lauritzen made up an auto party to Spencer Sunday morning where they visited relatives. On the following day they went to Arnold's Park to celebrate te Fourth. They returned o Klemme late Monday night, except Adolph who went to Estherville for a visit returning to Klemme Tuesday evening.

Editor Joe Bailey of Grandville, Iowa, was a pleasant caller at the Times Office Saturday. Joe's family have been here visiting reatives for a couple of weeks. Mrs. Bailey is a sister of Mrs. Ralph Ludeke and Mrs. Lester Stille. Morriss and Virginia Bailey will remain for a couple of weeks longer before going home.

THE CANNING SEASON—

Red Cherries and Apricots will arrive about July 10th, and later we will have Peaches, Pears and Concord Grapes.

Leave your order with us before the fruit arrives and you will then be sure of getting just what you want.

SUGAR—

The price of sugar has been going down for several weeks and we advise our customers to buy "from hand to mouth" or if you are canning buy a bag at a time. Our prices will always be lowest on sugar.

COFFEE—

We are headquarters for Coffee, and have always been on the "inside." We are selling a splendid peaberry coffee in 25lb lots at 25c per pound. And still some folks pay peddlers 40c and 45c for practically the same grade. It will always pay you to buy your coffee here—We are "next" to the Coffee Business and buy it buy the ton and save you at least 10c per pound the year around.

ABOUT SHOES—It was in a Shoe Store in a town not many miles from Klemme that a customer came, the clerk took down a pair of shoes, customer tried it on, it was easy to see the shoe did not quite suit her, but the clerk waited, didn't make a move to show more kinds. The customer being nearly barefooted had to buy, so she took the only shoe which the clerk had showed her.

Customers are handled different in the Wellemeyer Shoe Dept. When you come in to buy shoes of us we first measure your foot and then throw out on the counter from 25 to 50 pairs that will fit you, with price tag on each. We satisfy our customers as to price, quality and fit. You don't have to ask to see more kinds here, we show you every thing we have got that will fit you and let you actually pick out what you like best.

This is an original method of handleing shoes, we are the first and only store to sell shoes entirely from bins—we call them "Help Yourself Bins."

Our Shoe business is growing, the public far and near are finding out how nice it is to buy from our "Help Yourself Bins."

TRY US NEXT TIME YOU NEED SHOES.

wa Man Makes Sensational Escape From Salt Prison

SCAPES FROM MINE PRISON

a Young Man Spent Five Years in Mexican Salt Mine Prison.

IN DUNGEON FIVE YEARS

ed in Salt Mine Five Years, Attacks Guards And Escapes.

Knoxville, Iowa, —"Mate" Magre, born here in the early eighties en his father was a miner in one the three North Knoxville coal fts, recently escaped from a Mexn salt mine prison after spending ost six years in the terrible unground dungeon.

Maguire was a "soldier of fortune' the Mexican rebel army of Villa. with others of the rebels was capred by the constitutional forces, for five years and eight months held a prisoner in the salt mine During that time he never saw the e of a day, nor a newspaper of kind, and. on release was surised to know that a struggle called world war had been fought and n.

Escaped

Maguire reached Tacoma, Washton, a short time ago after a illing escape from the mines, in ich he had been condemed to life prisonment after his capture by Mexican federals. He has just en a position in the county eneer's office in Tacoma.

Young and adventurous, Maguire ned the troop of men from the ited States who were fighting un Madero. He became second in mand of all troops and was partof the time directly under Villa. But one day Maguire and two er officers went to Chihuahua cause they heard trouble was brew there. They entered the can through the rear entrance. Here y found several of Huerta's offrs carousing. They had nothing do but to surrender to them. They re gagged, tied and taken 65 miles horseback to the headquarters a United States half-breed serv under Huerta. Here at a genl court martial they were sentento life imprisonment in the salt nes of Chihuahua.

Worse Than Death

"It was worse than a death sence to us," said Maguire. "We d heard about awful things at the t mines, where unbelieveable conions were existing. and the work were being just tortured to death "We were dropped some 1,500 feet the ground in a bucket. We t as though we were being buried ve, and when at first I stepped inthe mine, with its few dim cand, the famous lines, 'all hope abann, ye who enter here,' entered my nd. It was just pure and simply l. Rats, gila monsters. scorpions ards, lice and other underground atures were in that surroundings. od consisted of beans and flabby ncakes.

"That we might get a little tobacwe sacrificed part of our meals. medical aid of any sort was availe, and the death rate ran about e prisoner to a day. Their bodies uncovered for weeks sometimes. all the five and two thirds years as in there I never saw a newsper or magazine. In fact, I didn't ow there was such a thing as the rld war.

"But fate at last favored us. The ards we noticed, were on a carousone evening. When they came wn the shaft we ended their carrs with blows from huge stones. e donned their uniforms and made . I went towards the United ates border, which was 139 miles rth, and the other two officers nt down south."

Three of the most dangerous counrfeiters in years were arrested in ouncil Bluffs by the federal secret rvice agents after a chase of four onths over more than twenty states he counterfeiters who are said o ve operated in Des Moines, Chico, Kansas City. St. Louis and a zen other cities are William Stover tover and his wife and James Hazel ood. They are held on $7,000 nds.

KIEMME TO HAVE BALL TEAM

A number of young men went out to the ball diamond Tuesday evening for practice.

The ball club has reorganized with Harold Gruetzmacher as captain of the squad.

Klemme has pretty fair material for a good ball team and with a little "PEP" injected into the aggregation along with plenty of hard practice we believe they will be able to trim up some of the so called "fast" teams in the neighboring towns.

If Klemme is to have a ball team lets all get back of them and show the we are with them and the first home game they play get out a record crowd for them so they can get a little money ahead to do business with. A band and a ball team are both good things for a town.

HOW A MAN CAN BECOME HIS OWN GRANDFATHER

Here is how a California man tells how a man can become his own grandfather:

"I met a young widow with a grown up step-daughter and married the widow. Then my father met our step-daughter and married her. That made my wife the mother in-law of her father-in-law, and made my stepdaughter my step-mother.

Then my step-mother, the step-daughter of my wife. had a son. That boy was of course, was my brother, because he was my father's son, but he was also the son of my wife's stepdaughter, and therefor her grandson which made me grandfather to my brother.

Then my wife had a son. My mother-in-law, the step-sister of my son is also his grandmother, because he is her stepson's child. My father in-law is the brother in-law of my child, because his step-sister is my wife. I am the brother of my own son, who is also the child of my grandmother; my wife is her own child's aunt; my son is my father's nephew. and I am my own grandrather. Can you beat it?"

TO HOLD AGENT CONFERENCES

Economics and Marketing to be Studied at Four District Meetings.

Four district conferences for county agents for the study of marketing and agricultural economics problem are being planned by the agricultural extension department of Iowa State College for July. These conferences will be held at Cedar Rapids, July 18 to 19; Mason City. July 20 to 21; Des Moines, July 26 to 27; and Sioux City, July 28 to 29.

A two day session is planned for each place, with five meetings in each city. Three meetings will be held the first day, including one in the evening and a morning and afternoon session the second day. One session will be devoted to the essentials of cooperation and another to livestock associations. Other important subjects to be taken up at the meetings are grain marketing and public finance.

An additional session relative to matters of farm bureau administration, with reference to finances and program, is being arranged.

The meetings are being called by Murl McDonald, county agent leader for Iowa. Professors J. E. Brindley and E. G. Nourse will have charge of the program pertaining to economics and marketing. Every county agent in Iowa is expected to attend these meetings. in the city nearest to his county.

The Mourning After

WORLD'S GREATEST BELL

The Tzar Kolokol, or Tzar Bell, which now stands in the middle of the square in Moscow and is used as a chapel is the largest bell in the world. Cast in the year 1773, an attempt was made to hang it so that it might be rung but it broke from its suports and fell into the ground making a great hole, into which it sank and lay for over 100 years.

In 1836 it was raised by the Emperor Nicholis. The broken sides forms the doorway to the present day chapel. This bell weighs 440,000 pounds or about 219 tons, is 19 feet 3 inches in height, 3 feet thick and 22 feet 8 inches in diameter. The largest bell in use appears to be one in the great Buddhist monastery near Canton, China. It is 18 feet high and 45 feet around and is cast of solid bronze.

These Birds Were "Shocked"

The other day Eckard Zeidler was shocking grain for Albert Schmidt and in the days work ran onto something rather strange. Eckard found a birds nest with young birds in it in a bundle of grain woven into a tall weed. The birds had built their nest on top of a tall weed which was cut with the grain. went thru the binder and made into a bundle and the nest was not desroyed or the young birds were not spilled out in going through the binder. Eckard set the bundle up in the shock and the birds seemed quite content in their new location and were none the worse for their exciting trip thru the binder.

MIDLAND PACKING PLANT AT SIOUX CITY MAY BE REOPENED IN AUGUST

The Midland Packing Plant at Sioux City is expected to begin operation by August 15th, or within a short period after that time as conditions will permit. The plant, one of the most perfect of its kind has been leased to Wilson and Company, one of the five leading packers in Chicago.

Having a capacity of about 2,000 hogs and about 400 head of cattle daily, the operation of the plant will add much to the prestige of the Sioux City live stock market.

Should the opening be posponed until fall employment will be afforded several thousand men through the fall and winter and at the time when opportunities for work are considerably reduced.

Future conditions of the hog market during 1921 are regarded as uncertain. It is possible that operations in all the Sioux City packing plants may be effected by them. An unofficial statement is to the effect efforts will be made to dispose of this surplus before maximum operations are conducted at Sioux City and other market plants.

Catches Catfish in Old Milk Can.

While fishing at the Wapsie west of town Thursday in company with his parents. Mr. and Mrs. D. C. Coutant, Raymond Wietgrefe caught a 5 pound catfish in a new way.

Raymond was wading in and came upon a sunken and rusty milk can. He lifted it to the surface of the water to get a better look at the inside of it, and was startled to see the large fish he had accidently captured

Besides the catfist the can cantained a large number of fish eggs, a the place had evidently been se by the fish as a place young. —New

CROPS ARE BETTER HERE

We took a ride with Dr. Zinn the other day and went down to Belmond to compare the crops there with the crops here. Crops around Klemme are far better than those south of here. The corn is very dry and some even burnt as the soil is very sandy. Oats appeared to be only fair there compared with Klemme oats.

Farmers around here say that although the oats is not the very best this year that they are expecting a fairly good yield. Corn everywhere here looks good and a bumper crop can be looked for as it has stood the dry weather in fine shape.

MASON CITY LADIES PEEVED AT YE EDITOR

Ye Editor of this little old sheet, made an error last week that will per haps make four Mason City ladies peeved at us. It was all on account of Wellemeyer's half page ad. A part of the ad told about four Mason City ladies coming here to trade at Art's big store and parted with $1.50 Now that is where the joker comes in Our Linotype machine sneezed at that point and put it down as $1.50 when the amount should have been $150.00. It placed the period in the wrong place. But Art has forgiven us for the error as he says since this sale started he has more than made up for it as more Mason City ladies have taken advantage of his big sale prices.

PLENTY OF GOLD

Mrs. Alma Patton of Spencer has leased 40 acres of land near Osgood to an eastern mining concern who have already started washing the gravel taken from the soil. Sixteen tests have been made of the soil and it was found that it averages 21 per cent gold and 6 per cent silver. Mrs Patton owns 280 acres of land bordering on this forty. —Emmetsburg Tribune.

HAS SWEET CORN; WHO CAN BEAT IT

NASHUA, July 13 —Frank Harrison is one of the first in this locality to report that they are now enjoying sweetcorn fresh from their garden beginning last Friday. This is quite a number of days ahead of the early records of other years.

The body of Private Merle Hay of Glidden Ia., one of the first three American soldiers to die in the world war, will arrive in New York on the transport Wheaton, in about six weeks, according to an announcement by Capt. Robert E. Shannon, in charge of graves registeration at Hoboken. The bodies of private Enright and Gresham, who died in the same German raid in which Hay fell will arrive in the same transp Private Hay probably will be b at Glidden. where his mo resides, and the funeral expected to be of state ce. Merle Hay roa to Camp Dodge him.

Skeletons Unearthed At Fertile Of Historical Interest

WODEN YOUNGSTER SUFFERS BAD CUTS

With his legs severly cut by a lawn mower. little Archie Hanna two year old son of Mr. and Mrs. Ole Hanne of Woden is at Mason City hospital while physicians are trying desperately to save his right leg from amputation. The little boy was rushed there Saturday night by automobile from Woden. The accident ocured at 6 o'clock Saturday evening The father was mowing the lawn when the youngster, who was playing with another child ran into the mower.

It was believed Sunday by the physicians that it would be necessary to amputate the right leg but another report today said there are hopes that such action may be avoided. The leg is badly smashed from the blades of the mower while even some of the bones within it are cut.

The left leg, although the flesh is badly cut, has no bone injuries. The lad suffered a heavy loss of blood and is in a weak condition. His father is at his bedside.—Buffalo Center Tribune.

BEES ATTACK MACHINE

Several Swarms Make Home in Thresher

Hancock, Iowa. July 13 — Zena Briggs has a threshing outfit which he started to prepare for the big job of threshing on hand here. He removed the canvas covering and almost instantly lost a swarm of bees.

Investigation showed that not only one but several swarms of bees had made their home in the separator. Briggs took over 600 pounds of honey from the machine and the whole works are so covered with honey and stuck with wax that he fears will stop and clog the machine.

SPOTTED ADDER KILLED IN INDEPENDANCE HOME.

Independance, July 13. — Nap Blondin living in the southeast part of the city had an experience Tuesday evening of this week which will probably not wish to repeat soon. Mr. Blondin was resting on a couch in the dinning room of his home, when he looked around just in time to see a big snake crawl through the open door from the kitchen into the dinning room. Mr. Blondin got busy immediately and proceeded to kill the reptile which showed fight The only thing Mr Blondin could find handy to strike the visitor with was a large bible lying on the table. After he struck the snake with the book he then he stamped on it until he killed it. The snake was one of the spotted adder variety and it measured over three feet in length and was about three inches in diameter.

HOT AND COLD

Almost everywhere I go
These so called torrid days,
Almost everyone I see
Remarks the suns hot rays.
"Aint this weather fierce?" something
"I've never been
And other weather not,"
Tho suffering I kicks I hear,
am not.

Fat men puff and blow and stew,
And skinny ones look limp;
"How I wish were cool again,"
Laments each sweating simp.
Seems to me that everyone
Has some complaint to make.
The torrid weather for
Blamin' ease that he must take.

Wou it be better now,
T of something nice,
Sn ters snow and slush,
as, bills and ice?
Somehow I'm not bothered much
By summer's weather's heat,
And seems to me the ones who kick
The most must have cold feet.

ONE OF THEM

There was a man who did not approve of foreign missions. One Sunday at church a collector approached him and held out the box.

"I never give to missions," whispered the man.

"Then take something out of the bag, sir," whispered the collector, "the money is for the heathen."—Pittsburgh Cronicle Telegraph.

BONES AT FERTILE MAY SHED LIGHT ON EARLY IOWA INDIAN

Two skeletons. a man and a woman, unearthed June 4th in a gravel pit near that little village may lead scientists to the discovery of facts which will illuminate the entire history of the Indian race, according to those who have been investigating the place which is apparently an old burial ground of the red man.

Experts declare that the skeletons have been in the ground at least 100 years. Some place the time at much longer. This would seem to show that there had been some large Indian settlement, or at least a popular camping spot in this vicinity long before the white man come.

E. E. Brown, who dscovered the skeletons, declare that "burial was made in a beautifully rounded knoll, or rather one of a series of knolls and ridges of glacial drift that skirt the south bank of Lime Creek for a distance of several miles and orignally covered with native timber. Judging from numerous flinf arrow points, stone axes, knives, etc., that have been picked up in the vicinity and the natural beauty of the place this must have been a favorate camping ground for the Indian.

"The land where the skeletons were found has been under cultivation for many years, thus obliterating all traces of Indian mounds or other graves, if they ever existed, although there is little doubt that an extensive burial ground of the red man has been discovered.

"The two skeletons found were burried about four and one half feet below the surface in a sitting posture side by side, facing the south and a part of the bones were in good state of preservation. The age of the man at the time of his death was probably about 65 and the woman a little younger.

"It is estimated that the bones have rested beneath the sod at least 100 years, and some authorities put the time at much longer, rather than less. A part of the rude piece of the pottery and one flint arrow point was found in the grave. The man especially was of large stature, but to what tribe or nation they belonged is a little difficult at this time to determine. —Forest City Republican.

YOU CAN'T BEAT 'EM

An Irishman came into the office of the president of the Illinois Central Railway and said:

"Me name's Casey. Oi Worruk out in the yar-rd. Oi'd loik a pass to St. Louis."

"That is no way to ask for a pass, said the president. "You should introduce yourself politely. Come back in an hour and try it again."

At the end of the day back came the Irishman. Doffing his hat he inquired, "Are yez the man I saw before?"

"I am.

"Me name is Patrick Casey, Oi've been working out in the yar-rds."

"Glad to know you, Mr. Casty. What can I do for you?"

"Oi've got a job and a pass to St. Louis on th' Wabash. Yez can go to hell."—Case Eagle.

DIFFERENT VIEW POINTS

"How can any man be a woman hater?" asked Miss Old Girl. "Wom an has kissable lips, lovable eyes, a hugable shape and holdible hands."

"Huh!" grunted Mr. Oldbatch. "And she also has changeable hair, removable hips. adjustable eyebrows, colored lips and transferable complexion." —Cincinnati Enpuirer.

According to the United States bureau of markets there were 6. 840, 000 cases of eggs in cold storage June 1. This is 742,000 cases more than were held on the same date in 1919 and 1,589,000 more than for the five year average.

Clyde S. Holland, recently of the American Fruit Growers Inc., has been added to the staff of the pomology extension section of Iowa State College. Mr. Holland has had considerable experience in the eastern part of the United States both in orchard management and in salesmanship.

ween Garner and Ventura one mile of paving has recently pour ed out by the Henkel Construction Co. The Pikus Construction Co., between Garner and Britt is pouring 500 feet of cement each day as was reported here today.

A WORD THAT KILLED THIRTY MEN
From the New York Herald

Because the word "assault" long has been and is generally misused in the United States to mean rape, Tulsa, Oklahoma endured a riot in which a million dollars of property was destroyed and thirty persons killed.

"Assault" does not mean rape, or anything like rape, though an assault may be part of a crime. It means a menace, as of a blow; if one man closes his fist, raises his arm and makes as if to strike another, he has committed an assault. If he strikes and hits the other man, the blow constitutes the battery; assault and battery have been committed.

There being a certain number of persons in every community to whom the word rape sounded harsh, it became common to use "assault" in its place, just as in certain circles a few years ago women had limbs but no legs, and folks retired when they went to bed.

A negro man in Tulsa stepped on a white girls foot and she upbraided him for his clum siness. The negro answered back. A row resulted. The negro was arrested and a newspaper said he was accused of assulting a white girl. A few lawless fools took the word to mean rape, and started the trouble which, through weakness, stupidity of cowardice on the part of the authorities, culminated in arson, murder and the necessity for the imposition of martial law.

There are many words besides assault which have been abused in the manner in which it has been. In some cases they have been deprived in common acceptance of their original meanings; in other cases new meanings have been attached to them until they convey no distinct signification to the mind This state of affairs results from sloppy thinking, hasty speaking and writing carelessly about facts and exact statement. It is the duty of speakers in politics, in the pulpit and particularly in the schools, and writers of every degree of literary pretension to put their own language on a higher plane of accuracy, and thus to tongue. The tragedy of Tulsa has proved again that words are dangerous things.

—o—

AIRPLANE STILL YOUNG
From the Portland Oregonian

Everybody now knows that a mechanical flight is possible, but it is not so commonly realized that it is only 25 years ago this month that Professor Samuel Pierpont Langley esayed his first flying venture with a theoretical flying machine. We say theoretical because although he flew some 300 feet under the impulse of a single horse power moor it carried no passengers and it left most persons skeptical as to the ultimate future of the invention. The original Langly mach ine weighed only 27 pounds. Its success was overshadowed by the failure of his attempt to launch, in 1903, a plane propelled by a 50 horse power engine and large enough to carry a man. This fell into the Potomac river and the fiasco was hailed with a chorus of derision. The world was not yet ready to beleive that man could find a way to overcome the law of gravity.

This later date serves as an even more potent reminder of the speed with which scientific invention moves to the 20th century. Undoubtedly Langly had then mastered the principles of flying, but few believed him. This was less than 18 years ago. Langly himself died before one of the Curtiss Bros. disintombed the old machine which had failed in 1903 and made it fly. This was Langly's final vindication, though the tragedy of it was that he did not witness it.

The 80 seconds that the Langly toy airplane remained aloft in May, 1896, were a momentous minute and a third in the history of aviation. Changes in construction that have been made since then have vastly improved the stability and the endurance of the flying machine, but they have not altered its general principle. The work of thousands of men has been required, however, to bring flying to the state in which a transcontinental flight is regarded as a commonplace and an air voyage around the world is delayed only by political considerations.

NEED NEW SOCIAL CONSCIENCE

In the baccalaurate address to the graduates of the New York University, surprised his hearers with the declaration that we have been intellectually scrappy and dishevel ed and need a new social conscience and a new sence of responsibility. This is a conclusion held by a large number of persons to which results are added practically every day.

The educator had considerable to say to the graduates about peace and armaments and disarming. While armament limitation and ultimate disarming stands among the foremost problems of the present moment, Dr. Faunce deserves deliberate attention to credid full value to the truth in his statements, which might be classed as criticism. Whether one agrees or disagrees with his conclusion there is a data for reflection in the defiant assertion that peace need not be expected though the armaments and huge navies which must be used to prevent total loss on the investment. No one, unless it be those who cling to the doctrine of human depravity will challenge Dr. Faunces assertion that peace can come only through arming against foes by disarming the foes of their suspician.

Dr. Faunce's blunt declaration that we need never expect peace through the treaties written by men who want war, may be looked upon by some pessimistic. However it has a practical tone which only the most pronounced adventurer in academics will dispute. The complacent mind may be jarred a little by the educators statement that, "As practical people we must realize that peace cannot come through paper programs, and pleasant dreams, or contracts written by men who want to fight." At any rate it is worth thoughtful consideration.

While the emphasis of Dr. Faunce's baccalaureate address is appropiate at this time it is likely to be as unpalatable to some folks as it is timely.

WHERE WILL AMERICA COME IN

There has been effected an "economical entente" between the largest and financially strongest industrial interest of Great Britain and Germany, it is a far cry from the end less hate and death of all trade relations that was so far familiar in England at the crest of the World war's operations. This informed English and German newspapers.

Although this is solely a private enterprise which so far has failed to receive any pledge of governmental support in Germany, the "entente" is understood to have the cooperation of the British Government and may be powerful enough to issue orders to the administration at Berlin. The primary purpose of the "economic entente" according to the news so far given out, it is the exploitation of Russia, but the organization is so vast and embraces such a complete unity that it may be expected to spread its influence over the entire world through Russia's resourses. If American industrial and economical interests have allowed themselves to be shakled by a short sighted policy of fastening ethical considerations upon their foreign trade they have only themselves to blame if they find this British-German enten te has shut them out of European markets.

CAN STILL PLANT BUCKWHEAT
Makes Good Replacement Crop for Early Season Failures

Where early season crops have fail ed or where it has been impossible to plant regular rotation crops on account of the unfavorable weather conditions it is not too late for Iowa farmers to sow buckwheat, according to the farm crops department of the Iowa State Colege.

Buckwheat may be sown during the last weeks of June or the first two weeks of July. Late seeding is recommended by the department because with early seeding there is dan ger of loss from blasting of a large proportion of the blossoms in hot weather.

Seedbeds for the crop should be prepared as thoroughly as for the other grains. The seed may be broadcasted and covered with a harrow or drilled at the rate of from 3 to 4 pecks per acre. The price of seed is not high.

The varieties most often used are Silver Hull and Japanese. Altho Japanese generally gives the largest yield it is thot that many growers prefer the Silver Hull because it offers sparcer growth and has earlier maturity.

Altho the most common use of the crop is for pancake flour it has been fed to live stock with good results. The straw is too coarse to have high feeding value but it decays rapidly when used for manure. Many bee men have found the crop valuable.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

AN AVERAGE JOB.

RE you going to be content with an average job, which can be filled by y girl, or do you want a career? If e latter, you must recognize the imrtance of sound training.
Take two girls. Both determine that nography is the opening they will k. One takes the usual course and ers an office at the ordinary salary, e can do the average thing, and that ll.
The other girl isn't satisfied with ch a future. She takes Spanish and nch, and studies English, both comrcial and cultivated. She studies e requirements of a big position, d works for it. She puts in an extra ar of work before accepting a posion and once at work she continues r studies.
She will be one of the few thoroughequipped women for the position e has in mind. She will get that poion in time. And she will be makg two or three times what her friend at the end of ten years, and have, oreover, the assurance of a permant position and real recognition. Beuse the thoroughly trained person rare, and the firm who secures her on't let her go if it can help itself. A girl can specialize in bank work, technical work, secretarial work or r big business. And this is only in e one line of stenography. There e hundreds of other lines, and in ch the trained and ambitious worker 'll be at a premium. Don't be conit with the average job.

LYRICS OF LIFE

By DOUGLAS MALLOCH

GEE AND HAW.

A FELLAH had a pair of mules
That knew no laws and knew no rules
But geed for haw and hawed for gee
And went contrary gener'ly.
The darnedest mules you ever see.

If both had geed when it was haw,
While that ain't just exactly law,
It would of worked out purty good,
If once the thing was understood
And they done what you thought they would.

But not these two. If old July,
hen you yelled "gee," to gee would try,
ld January, 'tother one,
bservin' what July had done,
ould start to hawin' on the run.

o gee and haw and haw and gee,
ut never simultan'ously,
hey went through life, and kicked more dirt
nd done less work and done more hurt
han two hyenies, I assert.

nd I've seen folks just like them mules,
Who wed, but never read the rules,
Who didn't know you had to wear
he marriage collar fair and square
nd pull together everywhere.

ne can't have haw and one have gee:
o gee or haw you must agree
nd then go forward, gee or haw,
ccordingly, without no jaw—
nd that's good sense, and that's good law.

DAYS

Mother's Cook Book

The wisest pilgrim is the one who goes
Along the highway, hour by hour content
To take the rain or shine the skies have sent;
Who counts his riches in each budded rose;
Each song the thrush through vernal branches throws;
Each marvel of the sunrise; each dusk blent
Of mystery and fragrant sacrament;
Each star that in the heaven burns and glows.

PALATABLE DISHES.

A HANDFUL of green onions, a cupful of cooked rice, a cupful of thick white sauce, a cold hard-cooked egg and a little cheese may make a very palatable luncheon dish. Cook the tender young onions until well done; drain. Butter a small baking dish and put in the rice, cover with the drained onions, add a sprinkling of grated cheese the white sauce and bake until bubbling hot. Serve from the dish. The rice should be well seasoned with butter, or with a chicken broth while it is cooking.

Banana Cream.

Slice three ripe bananas, press through a sieve, add a small box of crushed strawberries, reserving part of the juice; beat together lightly and set on ice to cool. Serve in glass cups with whipped cream to which has been added the reserved strawberry juice. Serve very cold.

During the hot weather the simple and less expensive desserts appeal to the housewife. Frozen dishes, when prepared at home, are always acceptable and cost very little.

Lemon Sherbet.

Take three lemons, two cupfuls of sugar and a quart of rich milk. Mix the sugar and lemon juice, add a grated rind if desired, then stir in the milk. The mixture will curdle but when frozen will be smooth and very palatable. Serve in sherbet glasses.

Nellie Maxwell

(©, 1921, Western Newspaper Union.)

THE ROMANCE OF WORDS

"BLIGHTY."

THE number of slang words and phrases which have slipped into the language by reason of the Babel which resulted when men of many nations gathered in the great melting pot of the allied army is a long one, but one of the most typical is "blighty"—the English colloquial equivalent for "home."

Prior to the commencement of the recent great World war the majority of the British army was stationed in India and much of their slang consisted of words and phrases adapted from the language of the natives. "Belait" is a common Indian name for England, and, as if to add another parent to the ancestral tree of "blighty," the inhabitants of Hindustan speak of "home" as "bhilati." The similarity of the two expressions naturally impressed the British soldier, and it was not long before he corrupted them into "blighty"—using it as a noun when he referred to his native soil and as an adjective when he wanted to express something connected with his return. A "blighty wound," therefore, meant an injury serious enough to necessitate being sent back home to England. While the word failed to gain great popularity among the American soldiers, it appeared with considerable frequency in stories and reports from the front and will doubtless be used far more widely than before.

(Copyright.)

Potentially Genuine.

"Waiter, I ordered chicken soup. What do you call this?"

"That's it, sir—young chicken soup."

"Young chicken soup! What do you mean by that?"

"Well, it's the water we boiled the eggs in, sir."—Boston Transcript.

SPECIALISTS GIVE DIRECTIONS FOR PUTTING DOWN EGG SUPPLY

What Is Needed in Preserving Eggs for Winter Supply.

(Prepared by the United States Department of Agriculture.)

Boys and girls who are members of poultry clubs, or those who are interested in any way in chickens, should learn how to candle and preserve eggs. Candling means the sorting out of bad eggs before a strong light in such a manner that the rays of light come to the eye through the egg so that the contents can be seen and the condition noted.

The shell of a newly laid egg has a soft "glow" or "bloom" which is a sign of perfect freshness. This glow or bloom is destroyed by handling, and in any case disappears after the egg has been exposed to the air for a short time. After that it is difficult to distinguish a fresh egg from an old one by the appearance of the shell, so candling becomes necessary if you would be sure that the egg is good.

Candle Eggs in a Dark Room.

Eggs can be candled best in a dark room, by the use of a bright light inclosed in a box or case having a hole a trifle smaller than an egg directly opposite the light. The egg is held at this hole for examination. An ordinary hand lamp, a lantern, an incandescent bulb, or a flashlight can be used. If you are using a box and a hand lamp the box should have a hole at the top, otherwise the heat from the top of the chimney would set the box on fire. A tester chimney made of tin, such as is used on a lamp for testing eggs in incubators, may be used for candling, in which case you would not need the box, as the eggs are tested by means of a hole in the side of the tin.

A perfectly good, fresh egg shows "full" and "clear" before the light.

A Shoebox and a Lamp Will Do for Candling Eggs.

There is almost no air cell at the large end and the yolk outline is only faintly visible. A fixed air cell of one-eighth to three-sixteenths of an inch in depth indicates a fresh egg, as eggs run generally. A larger air cell with a movable lower line indicates—according to sizes and fluctuations—a stale egg or one becoming weak and watery. Very small dark spots sometimes seen usually are blood clots. Large dark spots, blood rings, and shadows are due to heat and germination, and indicate first stages of decay. An egg that appears very dark or black, except for a large fixed air cell, contains a chick at an advanced stage of incubation.

Fresh eggs, properly preserved, may be kept from six to ten months and be almost as good for household purposes as fresh eggs. Another reason for preserving eggs in water glass, for instance, is the fact that they do not acquire the objectionable "cold-storage taste."

Allow Three Dozen to Gallon.

To preserve 15 dozen eggs in water glass these directions are given by the specialists of the United States Department of Agriculture:

Select a five-gallon earthen crock, clean it thoroughly, scald, and allow it to dry. Heat ten to twelve quarts of water to the boiling point, and allow it to cool. When the water is cool, measure out nine quarts, put into the crock, and add one quart of sodium silicate, commonly called water glass, which can be bought at any drug store. Stir well, so that the solution becomes thoroughly mixed.

The solution thus prepared is ready for the eggs, which may be put in all at once, or from time to time as they are obtainable. Care should be taken in putting them into the jar not to crack or break the shells; also be sure the solution covers the eggs at all times. Put the crock containing the preserved eggs in a cool, dry place, and cover with a tight lid or waxed paper to prevent evaporation.

To preserve a smaller or larger number of eggs, the solution should be mixed and prepared in the same proportions.

Use Only Clean Fresh Eggs.

If best results are to be obtained the eggs should be clean and fresh, and preferably infertile. For this reason it is always best when possible to candle the eggs carefully before preserving them unless they are known to be strictly fresh. If an egg is only slightly soiled a cloth dampened with vinegar may be used to remove stains, but eggs should never be washed with water or soap and water, as water removes the protective coating on the shell and may tend to cause the contents to spoil. Never use badly-soiled or cracked eggs. They may spoil all the others.

Fresh eggs preserved according to these directions usually will keep for from six to ten months, and can be used satisfactorily for cooking and for the table. If, however, preserved eggs are to be boiled, a small hole should be made with a pin in the larger end of the shell before placing them in the water, to allow the air in the egg to escape when heated, and thus prevent cracking.

POOLING FEATURE IS MOST FEASIBLE IDEA

Each Grower Receives Same Price for His Products.

Individual Members Amply Protected From Loss Because of Unfavorable Market Conditions of a Temporary Nature.

(Prepared by the United States Department of Agriculture.)

The pooling of products sold through co-operative organizations is an important feature of co-operative marketing, specialists of the United States Department of Agriculture have found. By pooling is meant averaging the returns received for products sold during a certain period, or for certain shipments, so that each grower having products of the same grade receives the same price. The success of a pooling system depends upon the observance of uniform grading and packing of the products.

This method of operation, it is said, protects the individual member from loss because of unfavorable market conditions of a temporary nature. Some farmers' marketing organizations, especially grain-elevator companies, purchase the members' products outright. Conditions and practices in grain marketing make such a plan feasible, but organizations handling other products usually find it to their advantage to pool shipments and await returns before making payments to the growers.

In this way the association is relieved of speculative risks, the avoidance of which is highly desirable. Co-operative creameries, which prorate to the members monthly, in accordance with the amount of butter fat each has delivered the preceding month, the returns received for products sold less operating expenses, are good examples of pooling.

The length of the pooling period varies with the products handled and the local conditions. Thus there are car lot, daily, weekly, semimonthly, monthly, and seasonal pools.

MATERIAL FOUND IN WHEAT

Specialists Define Terms Used in Federal Standards—Dockage Is Easily Removed.

There are two terms in the federal wheat standards which apply to foreign material, explain specialists of the bureau of markets, United States Department of Agriculture—"dockage" and "foreign material other than dockage." The term dockage is applied to the foreign material which can be removed readily from the wheat by the use of appropriate sieves, cleaning devices, or other practical means suited to separate the foreign material present. Foreign material other than dockage is the foreign material that is not separated in the screening and remains in the dockage-free sample and is a factor in the grading, definite percentages being permitted within each numerical grade. Dockage does not affect the grade.

CUT CLOVER EARLY

Do not delay overmuch in getting off the first crop of clover; often the early cut field will yield a really worthwhile crop in September, and price or no price, clover in the mow is a comforting asset when the winter snows drift over the fields and yards.

FARM LIVE STOCK

CAUSES FOR RUNTY ANIMALS

Replies to Questionnaire Show Inferior Breeding and Poor Feeding Are Responsible.

(Prepared by the United States Department of Agriculture.)

More than 800 replies have been received from practical stock breeders and owners in response to a questionnaire sent out by the United States Department of Agriculture in an effort to determine the cause and possible means of preventing runts in live stock. The large number of replies, department specialists say, indicates the interest which stock breeders feel in this subject. Some of the questions asked in the questionnaire are: "From your experience, in what classes of live stock do the most runts appear (cattle, hogs, sheep, etc.)?" "In what stage of an animal's development does runtiness appear chiefly?" "In your experience what are the most

Modern Example of Poor Breeding and Inferior Care.

practical methods of preventing runts?" "Does it pay to raise runts to market size?" "To what extent would your financial returns from live stock be increased if you had no runts?"

The replies thus far received show that inferior breeding and poor feeding are jointly responsible for nearly two-thirds of the runts among live stock, and indicate that at least 7 per cent of farm live stock is commonly in the runty class. Detailed data on the times when runtiness appears financial losses caused by runty stock, methods of prevention, when it pays and when it does not pay to raise runty stock are now being prepared by the department for distribution to the public.

GET FIGURES ON PUREBREDS

Bureau of Census Completing Tabulation for States Not Yet Shown In Reports.

On account of the great interest which the United States Department of Agriculture finds has been shown in census figures of purebred live stock in ten representative farm states, the bureau of the census is proceeding with plans to complete the tabulation for the remaining states. This work is receiving the hearty co-operation of the United States Department of Agriculture. Live stock specialists of the department regard such figures as very valuable as factors in production problems, and as indicating developments in the improvement of domestic animals in this country.

It is understood that the final census figures pertaining to purebred live stock on farms will be available at the same time the general live stock figures are furnished. It is thought that this will be some time during the coming summer. Breeders and breeders' associations interested in this work have already indicated their appreciation of the value of the figures thus far available. It is the first time in the history of any country that accurate figures on the total number of purebred animals on farms have been compiled.

CARE AND FEEDING OF STOCK

Vermont Live Stock Owner Says Cause of Runts Is Due to Neglect During First Year.

In contributing his experiences on the cause of runty live stock in a recent inquiry conducted by the United States Department of Agriculture, a Vermont farmer urges greater care in the early life of domestic animals. "When people can be educated to the proper care and feeding of stock," he declares, "the runt will be practically wiped out. The reason, perhaps, why there are not so many runts in purebred herds as in others is because the man who cares what kind of stock he keeps cares enough to care for them better." He concludes that one of the principal factors in the cause of runty live stock is the man who has the care of them the first year.

SWINE SAVING PROPENSITIES

Animals Pick Up Scattered Grain in Fields and Use By-Products of the Dairy.

A hog will glean in the grain fields for the scattered wheat, rye, barley, oats, corn, etc., and also uses the by-products of the dairy, skim milk, buttermilk, and house slops, and makes them into pork. Also the fallen fruit in the orchard is converted by them into good pork for the butcher. Also other thrift is shown through various other natural saving propensities of the hog.

A metropolitan newspaper points out that women have been experimenting since the days of Mother Eve, always seeking something more becoming, more practical and sanitary, and something that affords more freedomof movement. The present short skirt is the result of these centuries of experimenting and perpetual evolution.

Everything new attracts attention and comment, until it is accepted as custom. Then is regarded as right and becomes merely an incident of the day. Let the women and their short skirts alone. They are sane sensible and sanitary. Men who are stickers for long skirts should don one themselves and parade to their hearts content. No one will object.

—Hampton Recorder.

NOTICE OF PAYMENT OF COUNTY FUND, ROAD BUILDING AND DRAINAGE WARRANTS

Notice is hereby given that there are now in the hands of the County Treasurer, funds for the payment of County Fund, Road and Drainage warrants. and that said fund will extend to the payment of said warrants which have heretofore been presented for payment and not paid for the want of funds. In the following order, to-wit:

County Fund Warrants

Nos. 5735, 5748, 5722, 5731, 3841, 5842, 5843, 5845. 5840, 5848, 5847 5846, 5782, 5768, 5769, 5759, 5786, 5828. 5756, 5760, 5783, 5784, 5785 5787, 5788, 5831, 5829, 5793, 5849, 5850, 5852, 5851. 5792, 5828, 5752 5853, 5854, 5855, 5856, 5857, 5858. 5740, 5814, 5809, 5859, 5860, 5861, 5745, 5806, 5805, 5839, 5497, 5750, 5811, 5827. 5758, 5863.

Road Building Warrants

Nos. 1278, 1298, 1274, 1309, 1290, 1273, 1300. 1272, 1271, 1310, 1301 1257, 1270, 1318, 1319, 1360, 1370 1358, 1331, 1372. 1335, 1336 1337, 1369, 1344, 1332, 1383, 1322, 1353, 1356. 1362, 1320, 1387, 1365, 1391 1392, 1385, 1363, 1364, 1365, 1366, 1367, 1368, 1328. 1323, 1343, 1340 1348, 1329, 1346, 1330 1325, 1361, 1381, 1378. 1321, 1324, 1376, 1390 1326, 1327, 1386, 1354.

MINOR MUSINGS

Love makes the world go around also seems to make a good many of the inhabitants dizzy.

It is easier to stand a sore loser than a cocky winner.

Almost anybody has plenty of cour age when he starts into a fight, but the kind of courage that counts in the long run is that which, after you have been knocked down and beaten causes you to go into training and and put yourself in condition to whip the man or the influence that whipped you.

One who finds it necessary to advertise his virtues doesn't have any.

A good deal of criticism of bathing suits is heard each summer and yet if there weren't any bathing suits----

Making money shows talent; saving is art.

Nature is kind to women. A homely one never knows she is.

You sometimes hear of a good for nothing boy that became a famous man. but did you ever know of one that did.?

A prize fight may be elevating but when one of the contestants is lifted from his feet by the chin, he doubtless feels elavated.

The reason comparatively few women are successful in business is because so many of them are more interested in being women than they are interested in business.

When things get so bad they could not get worse they do.

The amount of money you have made or lost is only interesting to your creditors.

The proof of the pudding is in your digestion.

A lot of bathing "beauties" are not.

Prosperous times will come again soon and then everybody will be as extravagent as before and will be unprepared for hard times when they come again.

It has come to be, nowadays that a man can wear a silk shirt without being accused of profiteering.

Mosquitoes are the most important part of a camping trip. They make you appreciate what a fine place your home is.

A man who walks may be a person of distinction but one who has a cheap automobile is of the rabble.

There is a great pleasure in an automobile, but it seems to take a lot of work to get it out.

A pleasing personality covers a multitude of sins.

Some say that courtesy killed the cat and others say that it was care but so far as the cat is concerned it makes no difference.

If you never expect others to do as much for you as you are willing to do for others, you will not be disapointed.

FARMERS SEE CROP TEST

200 Attend Farm Crops and Soils Field Day at Iowa State College.

More than 200 farmers who attended the Farm Crops and Soils Field Day at the Iowa State College June 29. spent a day of the extension study of the scores of experiments in soil management and crop production that are being carried on by the Iowa Agricultural experiment station.

The visitors were shown the experimental plots near the college campus in the morning and in the afternoon went to the agronomy farm two miles south of the campus. The tests were discussed and explained by the specialists in charge of the work.

The soils test plots, which showed the results of the soils treatments in five, four and three and two year rotations, pointed out graphically the value of soil management. Among the wheat plots, those receiving manure and phosphates were taller and in much better condition than the check plots which got no treatment. Soils specialists predict that these plots give a yield of 100 to 125 per cent higher than the check plots. Similar results were shown on the plots of other crops.

Hubam, the new annual white sweet clover discovered at the Iowa station attracted a great deal of attention. The plots at the college were handicapped by a severe frost and had to be reseeded. Plants of the original seeding stand about 3 feet high at present and are already in bloom. The farm crop specialists recommend the broadcasting of from 10 to 15 pounds of Hubam to the acre with a pound of oats as a nurse crop. They believe that Hubam will prove a very valuable crop for pasture and green manure.

Sudan grass, visitors were told, makes a good emergency forage crop but has been found to be injurious to the soil.

OAT SMUT BREAKS OUT

Red Rust Appears But no Danger From Black Stem Rust

The oat crop in Iowa will not get thru without more or less trouble this year according to the plant pathologists at Iowa State College. Smut has broken out in the southern and northeastern part of the state.

The situation is not serious but in many fields as much as 20 percent of the stalks have been attacked. The majority of bad cases are due to early sowing. Owners of fields which are infected are urged by the pathologists to avoid the use of seed from such a crop for next year.

In the north central part of Iowa, the red rust stage of leaf rust is developing rapidly and is much more prevalent than it has been in the previous years, but there is no danger from black stem rust, the disease which causes the greatest damage.

Many questions have been received by the plant pathology section of the agricultural experiment station with regard to oats blast, a condition in which the lower part of the head fails to fill. The glumes, the part which later becomes chaff. turn white early in the season and fall away, tending to make the head short.

Oats blast is not parastic disease but is induced by excessively warm weather and adverse soil conditions. The prevelance of oats blast is not a sign that the oat crop will be short, says the plant pathology department.

POTATO BUG OUTBREAK

Worst Attack in Years in Northern Part of State

The most serious outbreak of the Colorado beetle, the ordinary potato bug, which has been found for many years is attacking the potato crop in the northern part of the state, according to the word given out by the horticultural department at Iowa State College.

An examination of a 38-acre field of potatoes showed that from one half to three-fourths of the vines were attacked, which means a damage of from 10 to 15 per cent of the crop.

The pests are being treated with a spray of two to three pounds of lead arsenate to 50 gallons of water or the same formula with paris green substituted for the lead arsenate.

In Mitchell county the potatoes were found to be hit by pip burn, a burning of leaves which is supposed to be caused by the potato leaf hopper. Experiments on the eradication of the pests include a spray of bordeaux mixture and a spray of nicotine sulphate.

TOOT-TOOT!

A sufferer who lives close to a railroad yard in the suburbs wrote the following to a railroad company complaining about the racket made by a swith engine.

"Gentleman: Why is it that your switch enginehas to ding and dong and fizz and spit and bang and bump and pant and grate and grind and puff and bump and chug and hoot and toot and whistle andwheeze and jar and jerk and howl and snarl and thump and boom and crash and yell and screech and snort and snarl and slam and throb and roar and rattle and yell and smoke and smell and shriek like hell all night long?" — Boston Globe.

NEW BUILDINGS FOR AMES

Almost $1,000,000 to Be Spent on Three New Halls and Campus Improvements.

The biggest building program ever outlined at one time for Iowa State College was put under way recently when the state board of education authorized the construction of buildings and other improvements which will cost almost a million dollars.

The major items in the building program call for a new all-college library to cost $475,000, par tof a new agricultural engineering building, additional barns and other minor improvements.

The library, which will be built of stone will be located north of Central building to form the northwest corner of the inner quadrangle of the campus. The physics building will be constructed of brick and will be placed between chemestry building and Science building. The agricultural engineering building, one wing of which will be built at this time, will be erected between chemestry building and the new armory.

R. A. Pearson, president of the college, E. P. Shoentgen, of the state board of education, and W. T. Proudfoot, a Des Moines architect, are at present visiting a number of universities in the east and study plans which can be utilized in the buildings at Iowa State College.

The developement of the physical equiptment of the college has been practically at a standstill since the beginning of the war and the present heavy building program is made necessary by the accumulation of needs which have been neglected dur ing the war by the rapid increase in the enrollment of the college.

Placing Blame.

A vulgar man, in any ill that happens to him, blames others; a novice in philosophy blames himself, and a philosopher blames neither the one nor the other.—Epictetus.

"Home, Sweet Home"- that's the music for me

IT WAS a rotten night.
RAIN, WIND, mud, slush.
AND AFTER a hard day.
IT MADE me sore.
TO GET all dolled up.
JUST TO go calling.
ON A pair of fish.
I NEVER could see.
BUT ORDERS is orders.
FROM FRIEND wife.
AND "GEE," I said.
"THIS IS a bum life."
THEN THE phone rang.
AND THE party was off.
I CLIMBED out quick.
FROM THE soup and fish.
INTO THE easy clothes.
AND SAT by the fire.
TOASTING MY toes.

AND WATCHING my wife.
QUIETLY KNITTING away.
IN THE firelight.
AND I Leard the rain.
BEAT AT the windows.
AND THE winter wind.
HOWL AROUND.
AND I stretched out.
IN THE old arm chair.
TOOK UP a book.
LIT ONE of those cigarettes.
THAT "SATISFY."
AND SAID, "Oh, Man.
IT'S A great old life."

IT'S a great life, all right—sometimes. But in fair weather or foul, you've got a lean-to if you've got Chesterfields—they always "Satisfy." It's all in the way we blend these fine Turkish and Domestic tobaccos. And mind you—the "Satisfy-blend" *can't be copied!*

THE SAUCY CLOUDS.

ONE night as Mr. Moon-man looked over the tops of the trees and mountains he saw a number of fleecy little clouds scudding about.

"O dear!" sighed Mr. Moon-man. "I am afraid I shall have trouble tonight with those saucy little clouds. I was hoping as I came up that they would be in another part of the sky instead of right in the place where I want to shine."

Mr. Moon-man was right; he was to have trouble with the saucy, fleecy little clouds, and just as his bright face peeped over the treetops all the little fleecy clouds scudded right into his face.

Mr. Moon-man ducked and dodged until at last he found a space between

the saucy little clouds to shine upon the earth below, but no sooner had he done so than the little clouds danced and frolicked in front of him until he was quite hidden again.

Mr. Moon-man is a very nice old fellow, so he said very pleasantly: "Go along with you and play in another part of the sky. There is plenty of room without getting right in front of me so the Earth folk can't see my light."

But the saucy little clouds were bent on having fun, and fun they intended to have, and all at poor Mr. Moon-man's discomfort.

He had just found a nice big place to shine through when all those saucy little clouds began to dance right in front of him again. First, they would hide his bright face completely, and then they would scud away and let him shine a minute, only to scud in front of him again.

At last the old man lost his patience and sent a message by a star for the old Sky Witch. "Tell her to hurry," he told the little messenger, "for I have lost a great deal of time now."

Old Sky Witch came hurrying along on her broomstick, her long black cape floating behind her like a big cloud.

"Well, here I am," she said, "what can I do for you?"

"Hurry as fast as ever you can to the four corners of the Earth and tell the winds to come here quickly; or I shall not be able to shine at all tonight," said Mr. Moon-man.

Old Sky Witch did not stop even to ask what was the matter, but off she flew and was soon out of sight, and all the time the saucy little clouds kept on bothering Mr. Moon-man.

He did not have to wait long, for as soon as the winds got the message from the Witch they blew quickly to help Mr. Moon-man out of his trouble."

"Away with you, you little torments!" called the winds, as they blew from north, south, east and west, and scudding away as fast as they could the saucy little clouds were soon in a faroff part of the sky and old Moon-man sent his bright beams on the earth without being disturbed.

"Thank you," said Mr. Moon-man; "sorry to call on you at this time in the night, but those saucy clouds were pestering me beyond endurance."

"Oh, that's all right," answered the winds; "we are always glad to help a friend," and away they blew and left the night all still, but the big Earth was bright with the happy smile of Mr. Moon-man.

How It Started

THE WORD "RUBBER."

THE material which we now know as "rubber" was formerly called elastic gum. One of the earliest uses of this gum had been to erase marks on paper, and the chemist, Priestly, in about 1770, suggested that the material which erased or "rubbed" so effectively should be called "India rubber." His suggestion was adopted, and the name soon became universal.

(Copyright).

Rosamond Schuyler and Jane

By JESSIE DOUGLAS

(©, 1921, by McClure Newspaper Syndicate.)

Mark Travis thrust his hands deep into his pockets and began to pace his room. He had plenty of room to walk, for, besides the cot and the desk in the corner, only a chair impeded his progress. It was an empty room and an empty life, he decided wryly.

"Lonely! It reeks of loneliness!" he said to the listening walls.

As he turned he saw a square of paper lying on his floor. An envelope. A letter. He whisked it up and examined it. It was written in a forthright feminine hand in black ink on gray paper. He ripped it open jaggedly.

"My cousin, Jimmy Cosgrove, has written me that you have come to stay in the city. I should be glad if you would come up to see me; have tea some afternoon, perhaps some Sunday at five? Then we can talk over Jimmy and Chicago, where I lived as a child. Sincerely.

"ROSAMOND SCHUYLER."

Mark Travis read it through twice before he laid it down. He liked the looped black writing and the address engraved in blue on the gray paper.

"Good old Jim hasn't forgotten me," he muttered. "Rosamond Schuyler—charming name—"

He pictured the girl with deep blue eyes and that same earnest look that Jim had.

"How jolly it would be to know someone in New York! To go perhaps to the little Italian restaurant down on Eleventh street that he had discovered and eat macaroni while the blue smoke curled thickly about them and the clatter of plates and voices served as a background to their talk."

Life had rather lost its savor these last three weeks alone here. Places enough to go, and things enough to see, but always alone. No one to laugh with him, nor to make him forget that he was a stranger in a strange city.

He had come almost alone to New York—to call it cold—hard—mercenary—

"I'll go and see this Rosamond Schuyler," he said. "What a pretty name that — Rosamond — she'll be charming—"

He threw his shoulders back next afternoon as he walked up Fifth avenue in a blaze of sunshine. His tweed suit was pretty well worn, but he'd had a shoe shine, and he carried his fair head with an air and swung along, feeling for the first time that he was a part of the life of the city, instead of being just the newest man in Gresham & Minor's.

But when he turned east at Fifty-third street and found that the house was an imposing brownstone one, with dignified curtains of cream that shut off the windows and an air of admitting only the best society, he hesitated.

That was the number all right, but would he go? Perhaps she wouldn't be his kind at all.

But he found himself climbing the steps and ringing the bell as though he were a dummy. Once he had said "Miss Schuyler" to the stony-faced individual who must be her butler, he knew he was in for it.

As he crossed the thick rug and came into the dim, beautiful drawing room he rued the day he had come. He was aware of rugs that his feet melted into and gleaming furniture and color and flowers. He sank down into a great armchair, trying to feel at ease and cursing his stupidity.

Then he saw that there was some one else in the room. A girl silhouetted at the window was playing with the tassel of the curtain; her slim figure in black and delicately outlined.

Mark Travis forgot the beautiful room and the luxury and wealth, for he saw that she was sweet-looking and her lashes were wet with tears.

"I'm Mark Travis," he said, rising and taking the hand she held out to him.

"Oh, yes," her voice fluttered, and he saw she was rather shy and frightened of him. "I—I heard about you."

He heard his own voice talking and then the girl's. She had gray eyes instead of blue and her brows were dark, and had a charming way of lifting. She smiled once and he saw a dimple peep out near her mouth. Then he forgot everything but the desire to take away that unhappy look about her eyes.

"You've just come to New York, haven't you?" she asked, "and will you have one lump or two?" she handled the silver teapot so skillfully and passed him a white cup delicately fragile.

"Have you been lonely?" she questioned; "it's so hard at first—"

And Mark Travis found himself telling her about his work with the old lawyers and how desolate he had felt, while she pushed the heavy carved box of cigarettes toward him and begged, "Won't you smoke; I like the smell so—"

But in a little pause his eyes rested on the beautiful room, the great carved mantel that must have cost thousands of dollars and the long renaissance table with its two lamps. This girl and he were as widely separated as though they lived in different worlds—he couldn't ask her to dine with him at a 60-cent Italian restaurant, nor sit with him in the balcony—nor ride home on the 'bus—he caught himself up with a jerk and realized she had asked him a question.

"Oh, yes, I like New York; that is—"

A rustle and a clatter of high-heeled slippers on the polished floor and he turned to see some one else entering the room.

"Ah, Mr. Travis, Jim wrote me about you—yes," he saw her nod to the other girl in her straight black dress. She gave him a shy, sweet look of farewell as she slipped away.

Rosamond Travis sank down in a chair by the fire.

She was weedy and fair, with too much rouge and a drawling, affected voice.

"Jim's such a funny old thing," she said in a bored voice. "How he stands it back there in Chicago—so slow—I think—"

But Mark Travis after some minutes found that he must go, and he said good-by to the girl smoking by the fire and went out into the rich, spacious hall. Some one was slipping out by the door from another room, and he saw with a quickening heart that it was a slight black-clad figure.

He ran down the steps and caught up to her half way down the block.

"I say," he begged, and she turned him a shy, lighted face. "I thought, why I thought you were Rosamond Schuyler all the time!" he laughed.

She shook her head. "I thought of course you knew—her—I'm only her secretary—"

"Thank God!" he breathed, and then to her astonished eyes he hurried on: "Isn't it jolly out? The stars and all, and Fifth avenue at night is great! Are you going down on a 'bus? Could I—"

He mounted the spiral staircase after her and wondered why he had never felt the mystery and allure of the city before. There was so much to do and to be discovered!

"Are you free in the evenings? Would you care to go out and explore and eat in a little joint I've found?" he begged boyishly.

She turned away, for her eyes were full of tears.

"I thought I was the only lonely person in the city," she said irrelevantly.

"But you haven't told me your name yet?" he begged.

"Janie Taylor," she answered.

As he let himself into the room that had a pleasantly familiar look he thought, "Funny, Jane Taylor's so much prettier a name than Rosamond Schuyler!"

DIARIST PAINTS A PORTRAIT

Unconsciously Reveals His True Self While Setting Down Record of the Daily Events.

No man has ever yet succeeded in painting an honest portrait of himself in an autobiography, however sedulously he may have set to work about it. In spite of his candid purpose he omits necessary touches and adds superfluous ones. At times he cannot help draping his thought, and the least shred of drapery becomes a disguise. It is only the diarist who accomplishes the feat of self-portraiture, and he, without any such end in view, does it unconsciously. A man cannot keep a daily record of his comings and goings and the little items that make up the sum of his life, and not inadvertently betray himself at every turn. He lays bare his heart with a candor not possible to the self-consciousness that inevitably colors premeditated revelation. While Pepys was filling those small octavo pages with his perplexing cipher he never once suspected that he was adding a photographic portrait of himself to the world's gallery. We are more intimately acquainted with Mr. Samuel Pepys, the inner man—his little meannesses and his large generosities—than we are with half the persons we call our dear friends.—"Ponkapog Papers," Thomas Bailey Aldrich.

Explains Moon Superstition.

The notion that the moon is dangerous while one is asleep is so firmly fixed even in the modern mind that very many people would not willingly go to sleep in the moonlight. Yet science has proved the connection to be entirely fallacious.

In an old saga one reads a story which explains the origin of this superstition. It seems that a warrior who was being pursued went to sleep, and that its changing path caused the moon to reveal him to his enemies. Luckily he awoke before they killed him, and he escaped. But the strain was so great that he became mad.

The Unwelcome Guest.

"Have scenes of revelry and mirth been banished from this more or less fair land of ours?"

"Not entirely," replied Mr. Bibbles. "There are still some high jinks going on in residences and apartment houses, but I understand it is hard for an outsider to gain admittance, even when he happens to be a policeman."—Birmingham Age-Herald.

History Reviewed.

Teacher—When Noah had completed the ark and had taken his wife, children, relatives and friends aboard, what became of the wicked people? Why weren't they taken along?

Young Byrnes (broker's son)—I suppose they didn't have any stock in the corporation.

The Will of the People.

"Of course, you have a mind of your own."

"I hope so," replied Senator Sorghum; "at the same time I've got to remember that while I am supposed to make the speeches, my constituents represent the real intellectual authority."

DAIRY HINTS

FACTORS IN PRODUCING

Series of Studies Conducted by Department of Agriculture in Western State.

(Prepared by the United States Department of Agriculture.)

What does it cost to produce This is the question that brought increasing concern to dairyman. In answer to it, the ted States Department of Agri through the dairy division, con a series of studies to give dir reliable information on this These studies were begun in 19 the most recent upon which any have been published was beg 1917, in Skagit county, Washi about 70 miles north of Seattle. report of this study is contain Department Bulletin 919, "Re quirements for Producing Mil Western Washington."

A study of the results given in bulletin shows that at the time of study 56.4 per cent of the total of producing milk at the dairy vestigated was for feed and bed 23.5 per cent for labor; 17.6 per for other costs, and 2.5 per cent depreciation. The requirements

Pasture Plays an Important Part Cost of Producing.

producing 100 pounds of milk in the winter were: Concentrates, pounds; dry roughage, 92.9 pou succulent roughage, 143.3 pou bedding, nine pounds; human la 1.9 hours; horse labor, .01 of an h other costs, $0.576. During the mer, milk could be produced at less cost, there being required a paratively small amount of con trates.

During the two years covered the study, 44.5 per cent of each y income from milk was obtained ing the winter. During the first records were obtained on 17 he having an average size of 31.3 c with an average annual production 7,369 pounds of 3.74 per cent per cow. During the second yea herds, 15 of which had been in first year's work, had an aver of 28.6 cows and produced an a age of 8,323 pounds of 3.59 per c milk per cow. From each 100 c in the herds during the two years freshened during the winter months period, and 42 during summer season, while three cows not calve during the year. Nea one-half of the cows freshen dropped their calves during months from February to May, clusive.

Most of the milk in this section sold for condensing purposes, and delivered by motor truck to large denseries. All the herds selected study were representative of d conditions found in that section.

In western Washington the past plays a very important part in m production, according to the bulle With cool weather throughout most the summer, plenty of moisture, a rich soil, there is abundant past until late in the fall. During the ture season almost 60 per cent of milk for the year was produced, at one-third of the yearly feed, ding, and pasture cost. The ave pasture charge per cow amounted 1.1 acres or $23.04. Such items veterinary fees, medicine, disin tants, and other items, amounted $1.45 per cow per year. It was fo that the number of hours requi to care for a cow did not differ ma rially between the summer and w ter seasons. However, due to the creased flow of milk in summer, time required to produce 100 pou of milk in that season was materia less in summer than in winter.

DEPENDABLE SIRES PAY BE

South Carolina Breeder Gives Me ods of Raising Calves That Will Develop Well.

Methods of raising good calves th will develop well and show no sig of runtiness are given by a Sou Carolina live-stock owner in a stat ment to the United States Departme of Agriculture. The farmer advis

1. Use purebred sires which ha behind them an established record no guesswork.

2. Use purebred milk cows whi are bred for production and whi have proper points, such as deep b der, well-spaced teats, broad flan deep abdomen, etc.

3. Feed only warm milk while calv are young. Gradually begin feedi proper grain after the second mon Do not allow them too much gra Give plenty of pure water, and ne allow exposure to rain or extreme wind.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

IN A STRANGE TOWN.

"I am not a Virginian—but an American."—Patrick Henry.

IT IS always a bad idea to knock the other man's home town. Especially poor policy is it when you are making your living there. Yet there are always young men—and women, too—who seem to take peculiar satisfaction in passing uncomplimentary comments on the city or town of their adoption. They don't seem to remember that the man or woman who is at home in that town is in a position of host and that to make scathing remarks about the town is almost as rude as to make scathing remarks about the house of the man whose guest you are. Especially is this so when the town is small. The stranger in a town like New York or Chicago really harms no one but himself when he continues to pour forth his disgruntlement over the city of his temporary sojourn. No one takes offense. At most they are bored or amused. But when a stranger in a small town assures the natives that it is away behind the times, that the buildings are atrocious, the streets the worst paved in the country, the restaurants and hotels the worst run, the women the plainest and the movies the oldest he is giving real offense, besides, of course, making himself very unpopular.

It really indicates nothing more than a person's own narrowness to "knock" another town in this way. If the man from a large city goes to a small one he should take it for granted that things would be different. If a Northerner goes South he should bear in mind that Southern climates make people more indolent and he should remember that if he remains there long enough he, too, will possess something of that indolence. And if a Southerner goes North he should remember that the natives of the northern cities have really nothing to do with the raw climate and that the very progressiveness which has brought him North to do business robs daily intercourse of some of the charming courtesy that makes Southern life so different.

The real man of the world soon forgets any local prejudices he may have, or rather he is wise and well bred enough to forget them. He realizes that it is through no fault of the natives of the town where he sojourns that he has to remain among them and that theoretically at least he is free to leave the town if he does not like it. Just at present there are a good many shifts in business and industry. The end of the war and demobilization of the soldiers and the closing of certain war industries and the beginning of other peace industries have made it inevitable that a good many young men should find themselves in a new environment. City men find themselves in the country or village, and country and village men find themselves for the first time in the big cities; Easterners find themselves in the West, Westerners find themselves East, Northerners awake to the fact that great opportunities await in the land of cotton and Southerners on disembarking in the northern ports discover that there are opportunities for them there that they have not at home. If you are one of these young men in a new environment show your good sense and good breeding by not knocking the town of your sojourning.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"TO ENJOY POOR HEALTH."

THIS is one of the incorrect phrases which have somehow crept into common usage in the English language, although a moment's thought will show the speaker or writer that it is absurd to say that a person "enjoys" poor health. "To enjoy" means "to experience joy or pleasure in; receive pleasure from the possession or use of or participation in; delight in" (Standard Dictionary). Why, then, should a person say, "I have enjoyed poor health during the past year?" You can enjoy only that which brings you pleasure or profit; and surely ill health brings neither.

Of course, it is quite proper to say, "I have enjoyed good health," since good health, being the greatest of human blessings, is to be appreciated and enjoyed.

A similar error it to be "agreeably" disappointed. If you are disappointed, the experience cannot be agreeable.

"What's in a Name?"

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

By MILDRED MARSHALL

ALICIA.

THIS name is derived from the same root as Alice, and represents an attempt at greater euphony. The curious part of it is that the name, in its original form, is really not that of a woman at all, but of a man. It is derived from the Anglo-Saxon Adelgis of which the feminine form was Adelgisa, but was not frequently given to women. Instead it was sacred to the sons of the house, principally among the nobility. The name itself means noble, in both its masculine and feminine forms.

The name is purely English, having, however, a slight Teutonic flavor. An argument is put forward by some experts that the name is derived from the Frankish Adalhert on Adelchen, meaning "daughter." Alix or Alisa in Lombardy was naturalized in England when Alix la Belle married Henry I.

The name, originally masculine, according to the best authorities, however, represents Adelgis and not Adelgisa, making the proper feminine form Aliza. Some believe that Eliza, generally believed to be a derivative of Elizabeth is this missing form. For proof of Aliza as the representative of Adelgisa, the Liber Vitas of Durham records the changes in Adelgisa from the first noble lady of that name, who laid her gifts upon the altar. By contraction it became Adeliza and Aliza.

The talismanic stone of Alicia is the Alexandrite, a Russian jem. It is found in the emerald mines of that nation, being of a beautiful green shade which changes to columbine red. The Russians believe it brings great good fortune. When the subject of its favorite's dream it signifies hope. Monday is Alicia's lucky day and seven her lucky number. Her flower is the white hawthorne, a beautiful bud.

A LINE O' CHEER

By John Kendrick Bangs.

TOLERANCE.

AS WEEDS are part of nature's plan
So do I think is weedy man.
The deadly nightshade and the rue
Hold deep within some purpose true
That in a world of floral love
I know not of—
And so for them that fail, and err,
The weeds of human character,
I'll judge them not, for deep within
Their outer semblances to sin
May lie some bit of gold that we
Too prone to judgments cannot see.

Public Auction of

Town Lots

I will hold a public auction of good town building lots south of the T. Blank home, on

Saturday July 23

At 2:00 P. M. Sharp

I will sell to the highest bidder the East Half of Block 18, Klemme, Iowa, 8 rods x 16 rods which is equal to four 66 x 132 foot lots facing east. Will sell in separate lots or as a whole,

Fine Building Location

Lots are close to city water connection and sewerage. They are well located for building purposes.

TERMS -- Will be given on date of sale. I resume the right to reject any or all bids.

T. Blank, Owner

F. A. Arnold, Clerk.

MONEY TALKS

Can you measure the time you have worked by your Bank Account?

What some people spend foolishly is making others rich, and somebody is saving a part of what you spend.

You do not in the end deny yourself pleasure when you save. because saving becomes a pleasure, and results in comforts and pleasures that no one can enjoy unless he saved

You are not stingy when you save, but sen sible. Don'd deny yourself a bank account.

State Savings Bank

Best Groceries

WHEN you sit down to a meal you like to know that your food came from a store where reputation counts—a store where best quality goods are really best quality.

This store offers you that advantage. We buy our stock more carefully than our most particular customer.

Staple and Fancy Goods at Low Prices

It pays to buy quality goods, particularly when you can get them at prices as low as ours. A fair trial here means a steady customer every time.

News For The Farmer

BLIGHT ATTACKS ORCHARDS

Spraying Ineffective; Diseased Parts Must Be Cut Out.

Blight is attacking many orchards in the state. according to C. V. Holsinger of the extension department of Iowa State College. The ends of twigs and leaves turn black as if scorched by fire. For this reason the trouble it is also known as twig blight, pear blight and blossom blight. It is a highly contagious, bacterial disease and spraying is not effective.

Blight in young trees can be cut out. The cut should be made six inches or more below the lowest point where the effect of the blight can be seen on the branch. After each cut the knife and the wound should both be disinfected immediately with water solution of corrosive sublimate 1 to 1000. Corrosive sublimate is very poisonous. Prunings should be collected and burned at once.

POULTRY NEED SELF-FEEDERS

Even in Summer They Will Help Egg Production.

"Because the season of the year is here when feed for poultry seems to be plentifull around the farmyards is no reason why the self feeders in the poultry yards shoud be allowed to go empty until fall," says J. L. Gordon, poultry extension specialist at Iowa State College.

While visiting 110 farm flocks in Iowa last year Mr. Gordon found that in practically every case where egg production was high, self feeders were used. Corn and oats are most commonly used in self feeders for poultry. Green feeds in the summer will take the place of tankage to a large extent. A small amount will help however. The following ration is recommended: 200 pounds of ground corn, 100 pounds of oats and from 25 to 50 pounds of tankage.

It has been noticed that where self feeders are employed birds lay in the poultry house, if accomodations there are adequate. or more close to the house.

INTEREST IN NUTRITION GROWS

Interest in the better feeding of school boys and girls is increasing in Iowa.

In the past school year, 1,086 schools in Iowa served hot noon lunches to pupils. That is a large increase over the year previous.

In 35 counties, 657 more schools reported serving lunches than the year previous.

In 44 counties there was a loss in the number reporting, amounting to 352, leaving the net gain for the year at 305.

Nineteen counties report having had nutrition classes for underweight children.

Cho Cho the health clown, was seen and heard by 45,345 children on his short visit to 20 counties. That means 45,345 children were impressed vividly by his presentation of the simple principles of good health.

HENS PAY GOOD DIVIDENDS

200 Flocks in Test Produce 250,000 Eggs in Month; Receipts From Sales $5,385.

Iowa hens made some money for their owners in the month of May, if the records kept on some 200 poultry flocks in 50 different counties of the state may be taken as a criterion. These flocks reported an aggregate egg production of 245,152 eggs. Receipts from the sales amounted to $5,348.87 and the cost of feed aggregated $,1352.83, making a difference of $4,032.04 between these items, not all of which was profit of course.

These figures are from the records kept by flock owners in cooperation with the agricultural extension departmentof Iowa State College. The purpose is to get at the facts about whether the farm and backyard poultry flocks pay instead of guessing about it and also to help flock owners put their poultry management up on a sounder basis. Any owner who wants to cooperate in this record keeping may arrange to do so thru his county agent or by writing to the agricultural extension department at Ames.

The best backyard flock report for May came from Kenneth Deakin of Kossuth county. His 18 Ancondas laid 464 eggs, or 83 percent of a perfect record of one egg per day from each hen. His feed cost for the month was $2.18 and his receipts $40.80. The best farm flock record was made by a mixed flock of 110 fowls on the Kossuth caunty farm. They laid 2.130 eggs, which was 62.5 percent of a perfect record. The feed cost was $4.60 and the receipts, $48.93.

HOME DEVICES DEMONSTRATED

Home Demonstration Agents Attend State Conference.

An old walnut bed, a wicker rocker and a magazine rack took a new lease on life before the eyes of Iowas country home demonstration agents who attended a state conference at Iowa State College last week. Under the hands of experts the old furniture was repaired and polished until it was practically as good as new.

This was but one of the demonstrations of modern home methods and devices that filled the week. In a washing machine exibition 25 machines were shown at work and their merits and disadvantages discussed. A demonstration of electrical devices for the home was conducted by electrcal engineering experts of the college.

Besides the demonstrations. talks on many problems on farm women were on the program. Nutrition, sanitation, house planning and clothing were discussed by specialists of the college and from outside.

225 POUND PIG COSTS $9.57

Test Shows Cost on Basis of Present Prices

What is the cost to raise a 225 pound pig

A test to determine this point. conducted recently by the animal husbandry section of the Iowa Agricultural Experiment station under the direction of John M. Evvard, shows that under the conditions of the test, he total cost was $9.57, or $4.21 for every 100 pounds of gain. This amount represents only the cost of feed and does not take into consideration interest on investment labor or other charges.

The price of the feeds used in the experiment was as follows. corn 50 cents, meat meal tankage $50,wheat middlings $29, and alfalfa pasture $10.75 per acre. Seven gilts with 51 pigs, seven of which died. were used in the test to determine the actual cost of feed.

"The cost of producing a pig will, of course, vary," says Mr. Evvard, "depending upon the factors as the season, feeds used, system of management. price of feeds, methods of feeding, breed and other elements. But generally speaking the cost, under a definate set of conditions, averages about the same one period of years as compared with another.

Change Sheep Pastures Frequently

In order to avoid danger from infection by stomach worms, farmers are advised by animal husbandry department at Iowa State College to change their sheep pastures at least every three weeks. It is better to divide a large pasture up to several small ones than to pasture the whole thing at once.

TO ALL TO WHOM IT MAY CONCERN: The commissioner appointed to locate a road commencing at the Quarter Section corner common to sections one, two, eleven and twelve Twp. 95, Range 23, and passing through the lands owned by Fred E. Gamble, James Carr and Anna McGuire Guerli, and terminating at the northwest corner of Sections one and northeast corner of Section two, Twp. 95 N. R. 23. has reported in favor of the establishment of all objections thereto, or claims for damages, must be filed in the Auditor's office on or before noon of the 5" day of September, A. D. 1921. or such road will be established without reference thereto.

J. 7. 4 w. Chris Jacobs
County Auditor.

THE CANNING SEASON—

Red Cherries and Apricots will arrive arive about July 10th, and later we will have Peaches, Pears and Concord Grapes.

Leave your order with us before the fruit arrives and you will then be sure of getting just what you want.

SUGAR—

The price of sugar has been going down for several weeks and we advise our customers to buy "from hand to mouth" or if you are canning buy a bag at a time. Our price will always be lowest on sugar.

COFFEE—

We are headquarters for Coffee, and have always been on the "inside." We are selling a splendid peaberry coffee in 25lb lots at 25c per pound. And still some folks pay peddlers 40c and 45c for practically the same grade. It will always pay you to buy your coffee here—We are "next" to the Coffee Business and buy it buy the ton and save you at least 10c per pound the year around.

Four thrifty housewives from Mason City autoed to Klemme the day after the Fourth and purchased $150.00 worth of Ready-to-wear. Whenever the roads are good, we have quite a trade from the Larger Cities; they say "Your assortment is not so large but your prices are better than our Big Town."

ABOUT SHOES—It was in a Shoe Store in a town not many miles from Klemme that a customer came, the clerk took down a pair of shoes, customer tried it on, it was easy to see the shoe did not quite suit her, but the clerk waited, didn't make a move to show more kinds. The customer being nearly barefooted had to buy, so she took the only shoe which the clerk had showed her.

Customers are handled different in the Wellemeyer Shoe Dept. When you come in to buy shoes of us we first measure your foot and then throw out on the counter from 25 to 50 pairs that will fit you, with price tag on each. We satisfy our customers as to price, quality and fit. You don't have to ask to see more kinds here, we show you every thing we have got that will fit you and let you actually pick out what you like best. This is an original method of handleing shoes, we are the first and only store to sell shoes entirely from bins—we call them "Help Yourself Bins."

Our Shoe business is growing, the public far and near are finding out how nice it is to buy from our "Help Yourself Bins."

TRY US NEXT TIME YOU NEED SHOES.

ashington Says Good Times Are Here Again

her News Dispatches From The Capital

RN FOR BETTER EXPERIEN- IN BUSINESS CIRCLES

lpfull Attitude of Harding Administration Given Credit.

Washington, July 21 — The feel- is general that industry and bus- ss have turned the corner. Tan- le evidence of this is on every nd. Some of the high lights con- buting to this conservation optim- n are:

The full swing of the harvest sea- n is in the agricultural belt, and e prompt moving of crops to prim- y markets. This is bringing of lions of dollars of actual cash into e agricultural heart of the country ich has been the hardest hit finan- lly. and the stimulating effect is eady seen in all the lines of retail d wholesale business. In addition rangements either have been made are about to be completed, which l give the farmers $125,000,000 new long time credits.

Increasing activities in a very eat number and variety of manu- turing plants and running to ca- city in order to meet fall deliver- .

Reduction of bank loans is almost e half of their high level of last nter.

A general increase in building ac- ities.

General and vary appreciable in- ease in retail business resulting in creased orders for fall deliveries.

Demonstration of the financial sta- ity of the averag man as shown by ports to the Federal Reserve ard. These reports submitted by er 800 banks in more than 100 of e chief cities of the country, show increase in savings deposits over t year of $238,000,000. This con tion was quite contrary to the gen- lly accepted belief that the aver- e man was "going broke" or using all his war time savings.

Decrease in number of business lures and in amount of liabilities.

Increase in freight traffic and de- nd for cars.

Credit belongs to admisistration

Of probably even more consequen- is the fact that back of all these nditions a feeling of confidence d self reliance permeates the bus- ss world in place of the pessimism a few months ago. Business in- rests which have kept in close uch with the situation give the ad- inistration the lions share of the edit.

One of the early policies of Presi- nt Harding was the inaugerationof eries of conferences, looking to siness restoration. These confer- ces included bankers and finan- rs from every section of the ited States. All phases of com- erce and industry were discussed th the utmost freedom of express- and out of these conferences a ne and constructive program was dually involved. The willingness the President and his official ad- ers to consult with men who are thority in the commercial and fin- cial world, before deciding upon y policy. has made a splendid im- ession, not only upon those engag- strictly in commercial and indus- al activities, but upon the country large.

The feeling is general that rding Administration is proceed- g along safe and sane lines. It is empting nothing miraculous or ectacular. It is not above talk- g advice from men of experience a position to give it. It realizes ere is nothing to be gained by indis eet haste merely for the purpose of eating a little temporary political pital.

ROMISE OF PEACE REDEEMED N LITTLE OVER TWO MONTHS

Republican Administration Brings War to Official Close

Washington, July 21—Those who ish to be accurate up to the last tail will be interested in knowing e United States and Germany were ficially at war four years two mon- and twenty-six days. The state of war was brought to a close offic- ially and technically July 2 at 3:10 P. M. (Eastern Standard Time), with the signing of the peace resol- ution by President Harding at the home of Senator Frelinghuysen at Raritan, N. J. where the President and Mrs. Harding were spending the Fourth of July holidays. Two years seven months and twenty one days had elapsed since the signing of the armistice.

With the signature of President Harding was completed one of the pledges made by him and his party during the presidential campaigne, —namely, that, in event and Republ- ican party were placed in the con- trol of both branches of Congress and of the presidency. one of the first acts of the Administration would be to bring about peace with Germany.

European Tension Caused Delay

Congress was convened in special session April 11 and President Hard- ing in his first message to Congress, April 13, urged peace by resolution. The Senate promptly responded by passing such a resolution. About the time the house was ready to act upon the resolution, the differences between Germany and the Allies Council over the amount of reparat- ions Germany should pay and the penalties that should be imposed in event of her failure, became so acute that all Europe seemed on the verge of a renewal of the war. At this point the German government appeal ed to the United States to act as ar- biter, which petition was promply refused in a short but firm note by Secretary Hughes. The tension was so great during this period that it was deemed the part of statesman- ship for the house to defer action on the peace resolution. Had it been passed at that time it might have led both Germany and the Allies to mis- interput the position and inventions of the United States and would have gravely aggravated the already very serious situation in Europe. In con- sequence, nothing further was done regarding the peace resolution un- til the European situation became settled.

Meanwhile the Democrats were raising quite a clamor, alleging in- excusable delay in passing the peace resolution and accusing the Republ- ican Administration of repudiating facts their campaign pledges in this regard. The absurdity of these Dem ocratic claims is exposed by the above facts. Including the period during which the critical situation in Europe made it unadvisable for the United States officially to declare itself at peace with Germany, only a little more than two months elap- sed between the assembling of the special session of Congress and the passage of the resolution and signa- ture by President Harding.

Not a Trival Matter

Responsible governments cannot and do not act in such critical mat- ters with the same haste and trival consideration that the individual ex- ercises in purchasing an ice cream soda or a pair of shoe strings. a fact which Democratic statesmen do not seem to grasp.

Furthemore the records show that the Democratic party was not so anx- ious for a speedy peace as the pro- testations of their leaders in Con- gress would lead the uninformed to believe. Peace coulld have been declared with Germany more than a year ago had it not been for President Wilson. The Republican Congress, in May, 1920, passed a peace resolution similar to the one President Harding has just signed. It was sent to President Wilson, but he vetoed it May 27, 1920.

JOINT INSTALATION

Tuesday evening the I. O. O. F. and Rebekah lodges held joint in- stalation at their hall. Mr. W. F. Pavey Dist. Deputy Grand Master from Klemme and Miss Eleanora Truitt, Deputy Pres. of the Rebekah assembly from Britt were here and conducted the work, their services being much enjoyed by all.

Following the work refreshments were served by a number of Odd Fellows. Not as large a number of members and friends attended the meeting Tuesday evening as usually do but those who were present spent a very pleasing evening. —Kanawha Reporter.

Local Disarmament Advocated

HANCOCK COUNTY NEAR TOP OF LIST IN NEAR EAST RELIEF

The people of Iowa have contrib- uted nearly $300,000.00 during the year ending June 30th. 1921, to the work of Near East Relief, according to the report. just issued from the state office at Des Moines. Of this amount $65,000 worth of corn was donated by Iowa Farmers, which was ground into corn food products and shipped across.

In looking over the list we find that Hancock County holds 8th place in the state of highest contributions, with $6,109.67 representing cash and corn credit. Webster county leads the list with $12,053.81, next in order are Polk, Winneshiek. Linn, Woodbury Keokuk, and Montgomery

This speaks well for Hancock County citizens and the farmers who donated corn. Many of the counties have large cities to draw more mon- ey from but Hancock county has no large cities and did much better than other counties in the state of 99 coun ties.

Hancock is always on the map when it comes to putting across big things. We were unable to get the figures for the towns and townships of the county but we presume Klem- me and surrounding townships held up their end of helping the people in the near east.

No Gold In Iowa

DON'T GET EXCITED OVER GOLD

Doesn't Occur in This State in Pay ing Quantities, Expert Finds

AMES, July 20.—In spite of re- peated reports that gold has been found in various parts of Iowa, there will never be a reproduction in this state of the California gold rush of '48, according to A. K. Friedrick, asociate professor of mining engin- eering at Iowa State College.

Of course there is gold in glacial gravel deposits in many parts of the state, says professor Friedrick, for gold is one of the most widely dis- tributed of medals. But to find gold in paying quantities he says, is quite another matter.

"As most of the gravels in the state are of glacial origin." says pro- fessor Friedrick, "it should not cre- ate any great excitement to find a trace of gold here and there, small pockets might even be quite rich, but the chances of finding a real gold mine are remote.

"Out of nine samples of Iowa gravels that I have recently assayed only two contained gold, and those two were not in paying quantities." In case the gravel contained two-hun dreths of an ounce of gold per ton worth about 30 cents. The other sample contained so little gold that it was impossible for Mr. Friedrick to weigh it on the apparatus he had on hand.

"Two minerals, yellow mica and pyrite, are commonly mistaken for gold," says Professor Friedrick. "Mica is light while gold is very heavy. Pyrite has a whiter appear- ance than gold. A decisive test of pyrite is the fact that it will burn if heated to a red heat. while gold will not."

The bathing girls whose pictures you see so often in the summer, pre- sumably bathe in the winter, too, but you don't see any pictures of them in their winter costumes.

TITONKA HAS ADOPTED MILK ORDINANCE

Should be Inforced in Every Town

Titonka has an up to date ordinan- ce providing for testing dairy herds with tuberin and regulation of the sale of milk within the town limits.

The ordinance further provides that no one shall sell milk or cream in the city without having first ob- tained a licence from the city to do so. The application for a licence must be accompanied by a satisfact- ory certificate from a reliable in- spector showing that the herd is free from all diseases. It also provides that the premises from which the milk is sold shall be kept sanitary. The licence is good for one year.

Such an ordinance should be in effect and inforced in every town as a protection for the public and in- sure getting clean and sanitary milk free from tuberculosis and other dis- eases.

OAT CROP FAIR HERE

Farmers around Klemme report to us that oats will run on the average between 25 to 30 bushels to the acre Of course some oats will perhaps go much better than this figure and some less but reliable farmers state that the above figures are about right here.

Sky High Booze

AIROPLANE BRINGING BOOZE FROM NORTH

Port Arthur Can., and Albert Lea Terminals.. Officials Neglect Duty, Claim

ALBERT LEA, July 20—That an airoplane is connecting Albert Lea with sources of liquor supply in Can- ada is the charge of officials here.

According to reports, an airoplane for the last six weeks has been mak- ing regular trips to Port Aurthur, Can. and back to Albert Lea with cargoes of Booze. It is said that the trips are made three and four times a week, that the airman takes his orders and then leaves for Canada early in the morning and gets back just at twilight with ten cases. He lands at one place and then at an- other near Albert Lea where the stuff is planted.

The violater then flies over the city and lands again where he stat- ions the machine over night and not- ifies patrons where the liquor is lo- cated. It is said that he gets $100 for the trip. He uses 35 gallons of gasoline.

"It is said that the prominent bus- iness man of Albert Lea is promoting the transportation of liquor and is getting a fine rakeoff for his trouble.

Newspapermen have been "hep" to this man's visit from the start but have been requested to keep still so the officials could work. Now nearly everyone in the city knows of the visits of the plane. In fact the kids shout as the airman passes over the city: "There goes the booze plane."

Seizure Starts

WASHINGTON. —Shipments of intoxicating liquors entering the ports o fthe United States or crossing the Canadian or Mexican borders without a prohibition permit are sub- ject to seizure by customs officers under orders effective today.

The orders put in force the rul- ng by Attorney General Daugherty upholding an opinion by former attor- ney General Palmer that trans-shp- ment of liquors from one foreign country to another by way of this country was in violation of prohibi- tion laws.

Klemme Ball Team Wins Firs Game Of The Season

NO "PILLS" SOLD IN KLEMME

So far no tobacco dealer in Klem- me has applied for a licence to sell "fags" coffin nails, or so called pills" Those who desire to smoke the little tobacco filled cylinders will have to look elsewhere for their favorite smoke. No dealer here seems to want to pay the high licence and take chances on selling cigarettes.

The new cigarette law is in full force and the dealer who sells to a minor will be given a stiff fine. The minor who is caught smoking is also up against it and is subject to a $5 fine and five days in the county jail. So it might be well for some of you minors to be a little more carefull in the future or else smoke your little "pills" behind the barn.

BELMOND YOUNG MAN KILLED IN AUTO ACCIDENT

Howard Luick, of Belmond, was fatally injured in an auto wreck near Waverly last week Sunday when the car he was driving smashed into a bridge. His cousin. Donald Brooks and another young man from Waver- ly were with him but they received only slight injuries. Luick's chest was crushed in, his lung mashed, ribs broken. one of which pierced his other lung. He passed away last Tuesday afternoon after untold of agony and suffering. He is a son of Mr. and Mrs. E. W. Luick of Bel- mond and was 21 years of age and graduated last year from the high school.

NORTHERN LUMBER CO. IM- PROVING

The Northern Lumber Co. have had a gang of men at work the past week putting in concrete foundations for their new building. The new building on the east side of their lumber sheds is going up rapidly. When completed they will have all their lumber under one roof and building and none will be exposed to the weather.

LEAKS FOUND IN WATER CONNECTIONS

Some leaks were discovered in the water connections on main street when water seeped up through the street. City dads had the pipes dug up the forepart of the week and the leaks repaired. Some of the pipes were damaged when struck by the sewer digging machine and evidently were not well repaired again.

GIRL IN TEENS PARACHUTES 15,200 FEET

ST. PAUL, Minn.,—"It was so ter- ribly cold; that was the worst of it!"

Miss Phoebe Fairgrave, 18, St. Paul High school girl, had just bro- ken the world's airplane-parachute jumping record for women, dropping safely to earth from an altitude of 15,200 feet.

"It was awful!" added the 96 pound Miss.

"My hands were numb when I picked my way along the machine.

"When I dropped 5000 feet my stomack began to act like I was sea- sick."

The air was so rare when she jumped out of her plane that for the first 5000 feet the parachute shot down without opening.

In her plane were Pilot V. C. Om- lie and Paul Goldborough, official recorder, Minneapolis Aero Club.

In her flying and jumping stunts Miss Fairgrave wears riding breeches a silk shirt, helmet, goggles and basketball shoes with suction soles. She also wore around her waist an inflated automobile tube, in case she should fall in water, as she has not yet learned to swim.

Farmers about 6 miles northeast of Klemme had a good soaking rain Saturday afternoon. All the way from there to Clear Lake a heavy rain fell. They might have divided that rain with Klemme—we needed it too.

Will Play Seven Cairns Bros. Here Monday

LOCALS DEFEATED WODEN ON HOME DIAMOND TUESDAY

Klemme Won From Woden By a Score of 10 to 4.

The local baseball team defeated the "fast" Woden team on the home diamond Tuesday afternoon. The game was called at 5:15. Gruet- macker pitched an excellent game, holding Woden down to only two hits Score by inning

Woden— 0 0 1 0 1 2 0 0 0 —4
Klemme— 5 2 0 0 0 0 0 3 X—10

KLEMME BALL TEAM TO PLAY 7 CAIRNS BROS. NEXT MONDAY P. M.

Everybody should come out to see the Klemme Ball Club and the 7 Cairns Bro. Ball Team next Monday, July 25th when they will stage a real battle at the local diamond. The game will be one of the best here this season as Cairns have a swift outfit and the Klemme team will be streng- thened for the occasion. Be on hand at the local diamond and give the boys your support.

BASEBALL

Klemme "Seconds" and Liberty Township "Bells" played an interes- ting game here Sunday. The score wound up with Klemme in the lead one. 9 to 10 was the way it was chalked up when the battle was clear ed.

Rowan and Goodell crossed sticks Sunday which resulted in the de- feat of Rowan by a score of 3 to 4. "Fat" Kluckhohn played short stop and Howard Doyle occupied the left field for Goodell. The game was fast from start to finish.

August Lau was a business caller at the county seat town Monday morning.

KLEMME HIGH TO PLAY BRITT

The Klemme High School ball team will make a journey to Britt next Sunday where they will play a return game with the Britt High School boys. The game promises to be fast and interesting and the Kle- mme boys want a good crowd of "rooters" from here to help them win the game. Plan to attend this game.

A $500 AN ACRE FARM

A 400 acre farm in Shelby county was sold the other day for an even $200,000, at the rate of $50 an acre. The seller was Joseph Michener of Council Bluffs. The price however was not wholly in the land. The farm has been the home of one of the fine- st herds of Aberdeen-Angus cattle in the world and to accomodate them there are buildings of finest design. The buildings and equiptment have carried an insurance of $41,000 or an amount equivalent to $100 an acre of the $500 paid, but even the remaining $400. or make it $350 an acre for the land is a significant price at the present time.

But the truth is that while there have been many discouragements on the farms, it is not true that land prices have slumped very much from the normal war prices. A few pieces were sold two years ago at speculat- ive prices, but on the whole land val- ues have remained very steady al- though there has been less land sold. Those who have it are not offering it at bargain prices.

WM.SMITH FILLS VACANCY ON COUNCIL

Wm. Smith occupies one of the "city dad" chairs on the council board in Klemme. He was appoin- ted to fill the vacancy caused by the resignation of Tom Blank.

Mr. Smith will no doubt make a good councilman and we believe his appointment will meet with the ap- proval of all the citizens of the com- munity.

Mr. Blank has served on the city board for a long term of years and has always given good and efficient service.

420 Scientists Die in 3 Years

Victims of Starvation Under Persecution of Bolshevik Regime in Russia.

INTELLIGENCE NOW A CRIME

Aged Philosophers Are Left to Fate in Dirty Prisons at Will of the Reds—Many Great Professors Among the Victims.

New York.—Several letters from scientists living under the Bolshevist regime in Russia and other documents describing the conditions under which the Russian scientists are living at present are made public by A. J. Sack, director of the Russian information bureau in the United States, representing in this country the Russian democratic anti-Bolshevist forces. This material came to Mr. Sack through Prof. Boris Sokoloff, a leading member of the party of Socialist-Revolutionists and deputy to the First All-Russian constitutional assembly. Professor Sokoloff is now in Prague, Czechoslovakia.

The statement says that according to official Bolshevist statistics 420 Russian scientists died of starvation during the last three years.

The names of the Russian scientists who wrote these letters were not given, as this, it is said, would expose them to Bolshevist persecution. Describing the conditions under which the scientists are now living in Russia, Professor X. writes:

"These years have been one continuous horror. . . . We were declared by the Bolsheviki to be parasites and drones, and we were deprived even of that miserable food allowance which the workers and the soldiers have been receiving."

Government by Falsehood.

Professor of Philosophy U. writes that he looks upon the tragic situation "with interest calmly, as befits a philosopher. Just as calmly as I consider the fact that in my room the water is freezing and that I am eating oats, instead of bread and meat. All these discomforts of soviet Russia I regard quite calmly.

"But there is one aspect of life under the soviet rule which compels me to despise that rule. This is their boundless falsehood. Every day, on the pages of their silly newspapers, in their speeches, in their books—there are falsehood and deceit everywhere."

Professor W. Writes:

"No, there can be no understanding between me and the Bolsheviki. I am an old, feeble man, hardly able to move, with feet swollen with sores from the cold and hungry winter. Yet they are keeping me in solitary confinement."

Aged Scientist Tortured.

Finally, Assistant Professor X. writes:

"It was hard to watch the sufferings of Evgraph Stephanovitch (Professor Federoff, the crystallographer). Aged, gray, emaciated from hunger, he had grown so weak the last few days that he was unable even to get up from bed. I came to visit him. I brought him a little stale bread, which I had difficulty in obtaining, for I had no money. He grasped the bread eagerly. He took a bite, and then he stopped:

"'You are young, better eat yourself; as for me, it is time for me to die.'

"And vainly did I try to urge him to take some bread and gruel. . . ."

The first issue of the journal, Science and Its Workers, published recently by the Committee for the Improvement of the Condition of Scientists in Petrograd, contains in its introductory article a list of Russian scientists who died of hunger and destitution during the last few months of 1920. This list cites the following names: Prof. V. A. Bernatsky (physicist), V. L. Bernatsky (zoologist), Prof. S. A. Vengerov, Prof. N. A. Gezechus, N. L. Hecker (physicist), Prof. D. I. Dubiago (astronomer), V. A. Molzalevsky (historian), Prof. V. V. Polovizov (botanist), Prof. E. S. Federoff (crystallographer), Prof. P. K. Sternberg (astronomer), and A. A. Shakhmatov (academician).

"If this process of the dying out of scientists," says the journal, "will continue at this rate our country will be entirely deprived of its brain. The life of a scientist in our times is terrible, as regards his physical environment, and is a torture morally."

SHE IS SOME GIRL!

Joan Ehner of San Francisco is called America's 100 per cent perfect five-year-old girl. She is a diver, swimmer, dancer, pianist and linguist, and is here seen doing one of the stunts that keep her in condition.

Under the direction of an American expert, China is building one of the world's largest mints, which will be able to coin 14 tons of silver a day.

Duck Refuges in Marsh Areas

Uncle Sam's Biologists Declare The Wild Fowl Must Have Further Protection.

ARE OUSTED BY DRAINAGE

Results of the Study, During Three Summers, of the Ducks and Canada Geese That Breed in Bear River Region of Utah.

(Prepared by the United States Department of Agriculture.)

Washington.—Although legislative measures for the protection of wild fowl have multiplied, and have added to the restrictions on hunters, these regulations have not been sufficient to maintain these game birds in their former abundance. Regions that once were the summer homes of myriads of wild ducks have been drained and placed under cultivation, and extensive areas where the birds at one time bred are now populous farming communities.

These changes, say biologists of the United States Department of Agriculture, have crowded out the former feathered residents and have served in a corresponding degree to reduce their numbers.

Realization of these facts has led recently to the adoption of other measures to encourage waterfowl. A number of extensive marsh areas have been made permanent refuges under the guardianship of the Department of Agriculture, and many private preserves, some formed by artificial means, have been established where the birds are protected while nesting. In addition, in a number of cases, rigid local restrictions have been placed upon hunters.

Investigating the Ducks.

As a means of co-operating in such efforts to maintain and increase the number of waterfowl, the biological survey of the United States Department of Agriculture has undertaken investigations of the general conditions under which wild ducks live and thrive, coupled with counts of the birds found in areas varying in character. During three summers, field studies were made dealing with wild ducks in the Bear river marshes in Utah, a report of which has just been published by the department in Department Bulletin 936, Wild Ducks and Duck Foods of the Bear River Marshes, Utah.

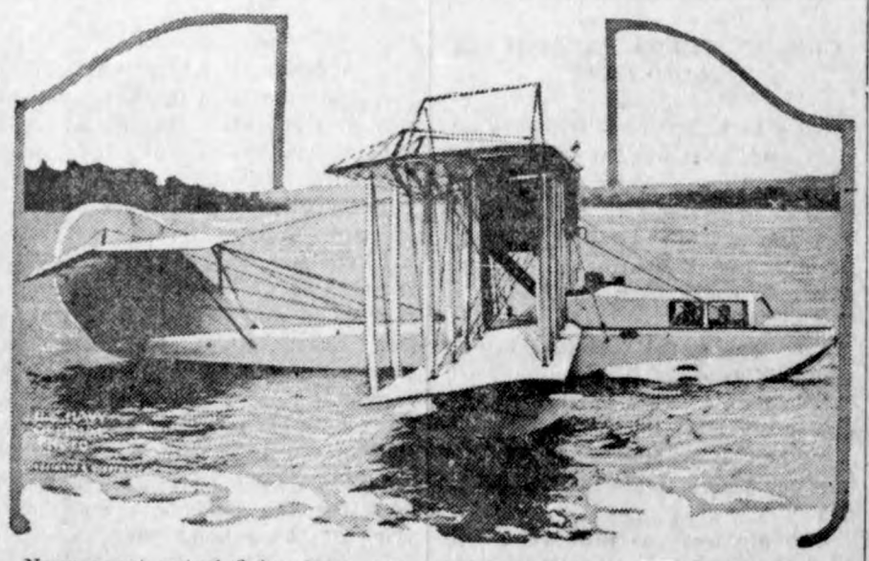
During the three seasons devoted to this work 12 species of ducks and the Canada goose were found breeding in the region included in the Bear river marshes, which cover an extensive area at the northern end of Great Salt Lake. In an enumeration made during May and June, 1916, of the 11 species of breeding ducks 3,560 pairs were counted, and it is believed that this number represents between 60 and 100 per cent of the total number of breeding ducks occurring here that season.

Vast Number in One Region.

Allowing five young reared to maturity as the average for each pair, and considering 1916 as an average season, the bulletin states that, at a conservative estimate, between 25,000 and 30,000 wild ducks, native to the marsh, are to be found there at the close of the breeding season.

It was found that, in addition to the large number of birds reared on the Bear river area, many other ducks came in after the nesting season to remain there until fall. That birds from the Bear river section range widely after leaving these marshes has been shown by records of ducks that have been banded and released there and subsequently were shot elsewhere. Records thus obtained show that birds released near the mouth of Bear river in migration cover the region from Oklahoma to Texas and west to California. The department urges the establishment of a greater number of preserves where wild fowl may breed and rest unmolested and find an ample supply of food.

Navy Plane for Commercial Uses



Navy coast patrol flying boat, converted into a six-seat passenger-carrying flying limousine. This is the first of a series of navy flying boats to be released for commercial purposes.

New York Zoo Has Albino Rattlesnake on Display

New York. — The Zoological park in the Bronx has on exhibition a white rattlesnake found in the Berkshire hills. The snake is about twelve inches long, has pink eyes and is said to be an albino. It is about a year and a half old. At the park it is regarded as a great curiosity since in the last twenty-one years there has been no report of such a white rattler. The snake is transparent when held to the light. Raymond L. Ditmars, curator of reptiles, discovered the snake. He was unable to capture it when it ran into a rock pile. He made another trip and met an amateur snake hunter, Roles Smith of Sheffield, Mass., who promised to see that the snake was captured and fulfilled his promise.

IT MADE EVEN PARISIANS GASP

Extravagant Costume Worn by Mrs. Wilkinson of England.

"Temperance Queen," Who Never Wears Same Gown Twice, Gives the French a Sensation.

Paris.—No longer afraid of being called profiteers, the owners of "war millions" are now bringing them out for the "grand season."

The result is that Paris it witnessing a carnival of flamboyant extravagance unequaled, according to many critics, since the days of Nero.

Mrs. Smith Wilkinson, English "temperance queen," who for three weeks has made Paris sit back and gasp, appeared at the Pre Catalan restaurant one Saturday night with her third husband, who is twenty-four years old, wearing on her head a genuine crown composed of more than a thousand pearls and rhinestones. The crown formerly was worn by the Grand Duchess Xenia of Russia. Mrs. Wilkinson bought the trifle for $800,000.

Suspended beneath her chin was the cluster of famous Shrewsbury pearls, more than 300 years old. They were bought by Mrs. Wilkinson from the English museum so she could wear them in Paris. Her dress was interwoven with more than 300 genuine diamonds, other gems being set in her stockings and shoes.

Altogether, Mrs. Wilkinson estimated her costume to be worth in the neighborhood of $1,500,000. She said:

"French women have been the style setters long enough. I made up my mind I would show them what real sensations meant. I have a different gown for every day in the year. I never wear one twice.'

For threading the ends of iron rods used to hold silos together a cutting die that can be operated by power from an automobile has been invented.

HOME TOWN HELPS

WORTH FAR MORE THAN GOLD

Value of Good Credit Must Never Be Forgotten by the Community or Its Citizens.

The following little story has aroused much interest among Kansas merchants and credit men. It was recently published in the bulletin of the Pittsburgh, Kan., Merchants' association.

"I buy your groceries, your dry goods, your home—everything you use or need.

"I am not money; I am its superior. I buy many times more than all the gold in the world. With me money may be bought.

"I am the very basis upon which the business life of the world has been built, more so in modern times than ever before.

"I am founded upon honesty, and built upon faith in mankind, and woe unto the man or woman who wilfully abuses me.

"I have given men the means to become rich, means which nothing else could place within their reach.

"I am, when rightly used, the greatest means of prosperity and happiness, but when abused, I have brought misery into the lives of men and women.

"I am confidence placed in a man's ability and reliability to meet his future obligations.

"I am greater than industry and capital, for I demand industry and capital of others on the strength of ability and disposition to make my promises good.

"I am good credit."

—From the Nation's Business.

GET AFTER THAT BACK YARD

One Unsightly, Neglected Place Will Spoil the Appearance of Otherwise Well-Kept Street.

Back yards are something big city dwellers long for and small town dwellers long to get rid of. But back yards are a geographical condition; the yearning is about as close as a cityite ever gets to one, while the small townite finds it hard to dispense with for want of something to take its place.

A back yard in some seasons of the year is not exactly an object of beauty. Paintless fences are in a more or less acute state of unrepair, tin cans, old shoes and worn out brooms have somehow eluded the garbage can.

Why not get busy and give the back yard a thorough house-cleaning? The exercise will do you good, and the neighbors will rise up and acclaim you. —Montreal Family Herald.

Oklahoma Club Members Feel at Home.

Even at home, "the little piece of home" taken overseas by the Y. W. C. A. for our boys, comes in handy. Out in Oklahoma in building a clubhouse, Lock Sanders post, No. 59, of the Legion has decided that it will borrow the plans of the Y. W. C. A. hostess house. In camps and overseas it met such a need that now, back in their home town, Hugo, Okla., the boys are building one for themselves. So interested has the whole town become in the scheme that everyone is helping. Citizens are buying boards at one dollar apiece and painters and carpenters are donating a day's work. The plot has been given by the city. The structure will contain an auditorium with a seating capacity of 200, a reading and writing room and an office, all on familiar lines.

To meet the demands, the national board, Y. W. C. A., 600 Lexington avenue, New York city, offers to share with other Legion posts or communities a plan for a delightful clubhouse. Pictures are available.—Exchange.

The Garden Plot.

The range of choice in the location of a city garden must necessarily be somewhat limited. Good drainage, sunshine and a suitable soil should be kept in mind in selecting a site for the garden. Where fowls and stray stock are likely to interfere ample protection must be provided by a good fence—a problem that must be carefully considered especially in the cultivation of vacant lots. If the soil is poor or very heavy, well rotted stable manure will help correct these conditions. Commercial fertilizers may also be used to furnish plant food where the soil lacks in the necessary elements.

Material for Stone House.

The stone house is very adaptable to all those regions where this material can be secured from the excavation of the cellar or from some neighboring road improvement. Sometimes an old stone wall serves as a source of supply. Because of the native character of this material it will always be in harmony with the landscape.

A Bad Night.

"I worked hard for this money," said the lone pedestrian.

"So did I," growled the footpad. "I've been standing around here for two hours in the rain waiting for a boob like you to come along. There's no telling what the missus will say to me when she finds out I've got my feet wet."—Birmingham Age-Herald.

COULD BEAT HANDS SHUCKING HIS CORN

At Least J. A. White Would Bet So, After Being Relieved of Dyspepsia by Tanlac.

"My wife and myself have had stomach trouble," says Mr. J. A. White, residing on the Leestown Pike, R. F. D. No. 6, near Lexington, Ky., "and have both been nervous and run down.

"We could not see anything without suffering afterwards and could not sleep at night. We were regular nervous dyspeptics. We tried many remedies without permanent benefit until we heard of Tanlac. I got this medicine and began using it. We noticed immediate results. We are both greatly improved by Tanlac. We give all credit for the change of health to Tanlac. It is a remarkable medicine.

"I personally feel so good that I told my hands a day or two ago that I could beat any of them shucking corn. I meant it and believe I could have beat 'em all."

Of all the maladies that afflict humanity chronic dyspepsia, such as Mr. and Mrs. White suffered from, is probably the most prevalent, and hours might be consumed in describing the sufferings, mental and bodily, of the victims of chronic dyspepsia.

A morbid, unreal, whimsical and melancholy condition of the mind, aside from the nervous physical suffering, is the usual state of the average dyspeptic, and life seems scarcely worth living.

Tanlac, the celebrated medicine, was designed especially for overcoming this distressing condition and millions of people have taken it with the most astonishing and gratifying results. It seems to go straight to the spot, toning up and invigorating every organ of the body.

Sold by leading druggists everywhere.—Advertisement.

Certainly Not.

THIS IRON FREE WRITE TODAY FOR SPECIAL OFFER

Men and women are making $10 to $20 a day right in their own town selling Imperial Self-Heating Irons all or part of their spare time. Weighs only six lbs., beautifully finished, fully guaranteed. Every home using the old-fashioned stove-heated iron will buy one.

Send for an Imperial Iron for your own use. Test it! Try it! You will realize why it sells so fast to neighbors and friends. Burns 10 hours at 2c cost; always hot, no waiting, no hot stove. So simple a child can use it. Send postcard today for big free offer.

Imperial Brass Mfg. Co., 567 S. Racine Ave., CHICAGO, ILL.

DARLING BABY BRIGHTENS HOME

Children's Laughter a Pleasing Sound

Altoona, Pa.—"I am writing to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. We had six children die almost at birth. From one hour to nineteen days is all they have lived. Before my next one was born I took a dozen bottles of your Vegetable Compound, and I can say that it is the greatest medicine on earth, for this baby is now four months old, and a healthier baby you would not want. I am sending you a picture of her. Everybody says 'That is a very healthy looking baby.' You have my consent to show these few lines to anybody."—Mrs. C. W. BENZ, 131 3rd Avenue, Altoona, Pa.

Mrs. Janssen's experience of interest to childless wives.

Millston, Wis.—"I want to give you a word of praise for your wonderful medicine. We are fond of children, and for a considerable time after we were married I feared I would not have any. I began taking Lydia E. Pinkham's Vegetable Compound, and it strengthened me so I now have a nice, strong, healthy baby girl. I suffered very little at childbirth, and I give all the credit to your medicine, and shall always recommend it highly."—Mrs. H. H. JANSSEN, Millston, Wis.

Mrs. Held of Marinette, Wis., adds her testimonial for Lydia E. Pinkham's Vegetable Compound. She says:

Marinette, Wis.—"I was in a nervous condition and very irregular. My doctor advised an operation. My husband brought me one of your booklets and asked me to try Lydia E. Pinkham's Vegetable Compound. It overcame my weakness so that I now have a healthy baby girl after having been married nine years. I am glad to recommend your medicine, and you may use my letter as a testimonial."—Mrs. H. B. HELD, 330 Jefferson St., Marinette, Wis.

There are many, many such homes that were once childless, and are now blessed with healthy, happy children because Lydia E. Pinkham's Vegetable Compound has restored the mother to a strong and healthy condition, as it acts as a natural restorative for ailments as indicated by backache, irregularities, displacements, weakness and nervousness.

Women everywhere should remember that most of the commoner ailments of women are not the surgical ones—they are not caused by serious displacements or growths, although the symptoms may be the same, and that is why so many apparently serious ailments readily yield to Lydia E. Pinkham's Vegetable Compound, as it acts as a natural restorative. It can be taken with perfect safety and often prevents serious troubles.

Therefore if you know of any woman who is suffering and has been unable to secure relief and is regretfully looking forward to a childless old age, ask her to try Lydia E. Pinkham's Vegetable Compound, as it has brought health and happiness into so many homes once darkened by illness and despair.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Blood Is the Sap of Life; Keep It Pure

You grow by good blood as a tree grows by sap. Rich blood, robust man. Good sap, sturdy tree. Keep the blood healthy and wholesome; poor, impoverished blood cannot nourish the body or remove the waste as nature intended.

When your blood is impure, itching, flaming skin eruptions often break out, and your body gets run down and weak—easy prey for disease. To be safe, keep the circulation wholesome.

For this S.S.S., the famous vegetable blood remedy your druggist keeps, is excellent. Start enriching your blood with S.S.S. today, and write about your condition to Chief Medical Advisor, 838 Swift Laboratory, Atlanta, Ga.

POTATO SORTER ADVOCATED

Will Help in the Selection of Seed, Says Truck Crops Specialist.

"For those who are raising potatoes and the potato sorter will prove useful in weeding out inferior and anproductive stock," says A. T. Erwin, chief of truck crops at the Iowa agricultural experiment station. Two years ogo Mr. Erwin and his assistants carried on an experiment which emphasized the value of the potato sorter in seed improvement. At blossoming time they went over a field and selected and staked out some 200 hills which showed evidence of curley dwarf. These were harvested separately and run over the potato sorter. Less than one per cent of the crop from these hills made first grade potatoes.

WATCH OUT FOR STABLE FLIES

Keep Manure Cleaned Up and Straw Stacks in Good Shape.

Altho there has been no evidence of an outbreak of stable flies in this part of the country this year, there is danger of their making their appearance later in the season if protective measures are not taken.

Regarding this matter the United States Department of Agriculture has the following to say:

"Keep the barnyard manure, especially if contained straw. cleaned up and scattered on the fields to permit the sun and drying to kill the maggots. Stack the straw, don't blow it out in an irregular loose pile. Build vertical sides. Keep middle well filled and tramp well. Clean up around the base of the stacks and scatter remnants. It is a certain that the straw will not be used for feed, spread it at once to be plowed under or if that cannot be done, burn the stacks immediately."

RECORD ENROLLMENT AT AMES

Over 1,200 Students Take Work in Summer Session

With 1,285 students enrolled in more than 255 classes, Iowa State College is conducting the largest summer session in the history of the college.

Students from many states and several foreign countries are in attendance. Most of the work that is offered during the regular school year is available to students during the summer.

Summer session work was offered for the first time at Iowa State College in 1911 when about 50 superintendents and teachers in public attended. In 1912 there were 128 students and from this time the enrollment steadily increased. Last year 763 attended the first summer session. This year enrollment is about 500 greater than that of last year.

KEEP FLOCKS AT SUMMER GAIT

Cull Loafers if Birds Fall Below 50 Percent Production

How can Iowa farm flocks be kept up to a 50 percent egg production during the summer months.?

"Cull them out", is the answer H. A. Bittenbender. head of the poultry husbandry department of the Iowa State College, gives to this question. If the flock consists of a good egg laying strain and is properly managed, the birds should maintain an average production of an egg every other day, he says. If flocks fall below this average, it is probable that some of the hens are not laying or there is disease in the flock.

In either case the loafers should be gotten rid of if the flock is to produce wnat it should.

GIVE PIGS FILL OF CORN

Even on Alfalfa Corn Ration Should Not be Limited.

That the corn nation of weaning pigs on alfalfa pasture should not be limited is indicted by the results secur in experiments conducted by the animal husbandry section of the Iowa agricultural experiment station

Six lots of pigs were taken shortly after weaning time. They weighed in the neigborhood of 55 pounds each and were fed until they weighed 225 pounds. One group was fed in a dry lot as a check. The other groups were fed different amounts of corn and tankage and were allowed to run on alfalfa. Only one of these five groups was self fed "free-choice" style on both tankage and corn.

The free choice group required less corn and tankage per 100 pounds of gain and required a smaller unmber of days- to reach- 225 pounds than did the other groups. The more the corn ration was limited on alfalfa the more tankage was required for 100 pounds of gain. With corn at 55 to 60 cents a bushel and tankage at $60 a ton, tankage is about three times as expensive as corn.

CONFESSION

W. J. Bryan's father once missed several large hams that had been hanging in the barn loft. He suspected that the thief did not live many miles away but he made no direct charge against anyone; in fact he refrained from mentioning his loss to a single soul. A few days later his neighbor called. "Say Judge , said the man. "I heard you had some hams stole the other night."

"Yes," replied the Judge very confidentially, "but don't tell anyone. You and I are the only ones who know about it"

CARE OF REFRIGERATOR PAYS

Should be given Weekly Bath; Keep Icebox Filled.

There are two duties which must be preformed by the housewife to get the maximum service from the icebox, according to the home economics department at Iowa State College.

If the food is to be kept clean and sweet, the refrigerator must be kept free from dirt and spoiling food. Food spilled on the walls or shelves should be removed and a weekly washing with cold water and soda should be administered. An effort should be made to secure clean ice at all times. The drain pipe should be washed with soap suds and scalded at least once a week.

If the icebox is to keep the food cool, some effort must be made to give it a fair chance. Large pieces of ice do not melt as quickly as small ones, and it costs less to keep a refrigerator filled than half filled. Do not leave the door open while you think of what you are going to take out of it. It is an erroneous belief that ice, when wrapped in paper will not melt so quickly as otherwise. The paper on the other hand stops the proper circulation of cold air and impairs the efficiency of ice box.

IOWA ORCHARDS ON DECREASE

50 Percent Less Apple Trees Now Than in 1910; Spraying Gaining Rapidly, However.

What has become of Iowa as a fruit growing state?

According to the census report recently issued, there are only about 42 percent as many fruit bearing tress in the state as there was ten years ago.

The number of apple trees alone has been reduced about 50 per cent. In 1910 there were 5,847,034 tress while in 1920 there were only 2,996, 469. The figures show that there are now only about one third as many young tress not yet bearing as there was 10 years ago.

The falling of the fruit production is marked on the case of every fruit with the exception of strawberries, which have shown a small increase.

In 1920, 61.7 percent of the farms in Iowa reported bearing apple trees while in 1910. 68.5 per-cent reported There are 131,791 farms in Iowa having orchards It is estimated that 10,000 orchards were sprayed this year as compared with 3,000 last year. In this respect orcharding conditions are on the upgrade and the increase in spraying somewhat offsets the disease in the trees.

Since spraying orchards as a rule do not produce enough for consumption in the home, these figures show that Iowa does not produce enough fruit for her own needs. Last year it was estimated that 2,000 carloads of apples were shipped into Iowa from outside points. In addition to the large shipments last year, Iowa produced more apples than in any year for the past four. There is no basis, says the extension department at Iowa State College, for the belief that apples raised in Iowa can not be sold. The difficulty in Iowa is that the apples are not cared for. and therefore cannot compete with those which are shipped in free from insect and disease injury.

EARLY FALL PLOWING IS BEST

Middle of August None Too Soon For Winter Wheat. Say Farm Crop Experts.

For those who are thinking of sowing fall wheat this year early fall plowing is advised as a good practice and as especially valuable for land which is not high in fertility, according to the farm crops and soils department of Iowa State College.

Instead of waiting until the first week of September to fall plow as is often done it is thot that better fall wheat will result if farmers start the plowing at least in the midle of August. It is sugested by the department that if the grain crop is harvested this year with a tractor as power a disc hitched behind the binder will put the ground in excellent condition for plowing. Where a limited amount of power is available this will not be practical, however.

In soil that is very rich, early and deep plowing may result in too rank a growth the folowing season on account of an extra amount of plant food being available. When plowing is done early instead of late there is likely to be less weed growth to draw on the food and water supply, the lose soil will take in more of the rain and the weeds and other growth that are turned under will have a longer time to decay. Where fall wheat is not to be sown. early fall plowing gives the soil more time to settle and become firm so that discing and harrowng in the spring will be more likely to result in a mellow and compact bed.

In order to get harvested small grains out of the way for early fall plowing many farmers stack instead of waiting to thresh from the shock. Otherwise threshing is frequently delayed until early fall plowing is out of the question.

POULTRY NEED CLEAN HOUSES

Wil Not Do Well Under Unsanitary Conditions.

"Don't let the poultry houses become foul and stale during the summer months fo that is the time when poultry parasites are most active and injurious," is the advice of the poultry section of the Iowa extension department.

Sanitation is very essential in the yards, houses and with the equiptment in order to have a flock free from disease, lice and mites. All croppings and trash should be removed from the poultry house and yards. The yards should be plowed deeply and sown to a green crop such as oats. It is well to lime the soil after the plowing is to aid in checking the work of the disease germs that may be present.

Spray thoroly the houses which are badly infested with the mites using a mixture of three parts of kerosene and one part of crude carbolic acid. Standard solution of stock dip or coal tar products will serve satisfactorily also for this purpose.

White washing the poultry house each year checks insect breeding and leaves the building clean. A white wash is suitable for this work can be made by mixing one bushel of unslacked lime which should be slacked in 12 gallons of warm water, two pounds of common salt, one pound of zinc sulphate, which is disolved in two gallons of water and added to the slacked lime. and two gallons of milk. For every gallon of this solution three teaspoonfuls of chlornated lime should be added to make the white wash act as a disinfectant as well as a cleaner.

OVERWORK

When Uncle Zeke was forty-eight
The neighbors used to say,
"He's lookin' pretty bad of late,
He ought to learn to play.
A man toward fifty is past his prime,
He oughtn't to forget
If he keeps at it all the time
Hard work will kill him yet."

When Uncle Zeke was sixty-two
The parson shook his head.
"Ezekiel has too much to do;
He's all worn out." he said
"A man of family has no right
His health to disregard;
I fear he'll pass away some night.
He's working far too hard."

When Uncle Zeke was eighty four,
Still toiling on his farm,
The boys around the country store
Were moved to grave alarm.
Said they: "He ought to drop the plow
An spend his time in bed
He's worked too long already now,
Next you'll see him dead! "

Now Uncle Zeke is ninety-three
And works from rise of sun
Till dusk, then stays around to see
The evening milking done.
He's strong of limb and clear of eye,
No job he'll ever shirk,
And still the neighbors prophesy
He'll die of overwork!

VICTIM OF PECULIAR ACCIDENT

Forest City Republican — Woodrow the little three year old son of Mr. and Mrs. W. C. Hanson of this city suffered a peculiar accident Saturday evening while standing in front of the Robinson Pharmacy. The crowds of Saturday night shoppers, in their hurryng here and there accidently pushed the little fellow through an open window at the sidewalk level, in the Robinson Pharmacy, and in the landing struct a pile of bottles causing a deep gash across his forehead and several other bruises. The injured boy was taken at once to the doctor where it was found the wound necessitated a unmber of stitches, but the little fellow was plucky for all of that and it did not keep him from seeing his favorite "Fatty Arbuckle". The basement window of the pharmacy had been opened to get better circulation on account of the terriffic heat.

The Winners

The men who reach the higher places are not cast down by each reverse; they drape some smiles around their faces and say the luck might be much worse. Of men whose fame is now immortal, a vast percentage started poor; and not for them did fortune chortle. when they set forth, dead broke, obscure. They had hard knocks and kicks and bruises, and they remarked when going lame, "In lifes grim race the faint heart loses, the brave heart scores and wins the game." The faint heart quit as roads grow rougher, and to the skies their wails ascend; the fellows built to strive and suffer press on and reach the journey's end

The faint heart lads are often gifted, and they might win some prizes gay; but in hard luck their hands are lifted and they surrender right away. How many poets angel-throated have missed the fame that might be theirs because their early rhymes were too punk to feed the polar bear? How many painters are forgotten and planted under grassy knolls, because some said their work was rotton, and froze the current of their souls? The faint heart scout, tho wonderous clever, throws down his tools at fortunes frown; the stout heart guy toils on forever, and gets a morgage on the town:— Walt Mason.

The second stage in a series of happenings in Mosalem township, Dubuque county occured when Peter Munster woke up of a morning to find four acres of growing corn cut and whithering in the hot rays of the sun. Indications point to a body of men doing the cutting. How the party managed to cut the entire field without disturbing the family residing nearby is a mystery. No reason for the action has been ascertained.

D. M. KIDS PARADE AGAINST HIGH COST OF ICE CREAM— THEY LOWER PRICE

Saturday the kiddies of Des Moines formed in a vast parade headed by a band in their campaign against the high prices charged for ice cream sundaes, cones and drinks. They were assisted in their campaign by the Des Moines News and Tribune who put on a newspaper campaign exposing the graft in ice cream by Des Moines Dealers.

The campaign was successful and an imediate drop in ice cream and cold drinks was the result.

Ice cream cones in Des Moines are back to a nickle again, soft drinks from 6 to 8 cents and ice cream sundaes from 11 cents up.

Wholesale ice cream dealers have also made big cuts in their prices. Ice cream wholesales at Des Moines now for $1.00 per gallon by some makers. The retail price now to the consumer is now $1.20 per gallon, according to newspaper reports.

The cities have grafted in ice cream all over the country and have held up prices long enough. The prices in the smaller towns have been as low as possible to insure the dealer a fair profit, as they are generally dependant on city dealers for their ice cream supply and also have to pay high express rates to get the cream shipped in.

The best yield of sugar beets in the history of the industry in this state is indicated by conditions now, according to Earl Moore agricultural superintendant for the Northern Sugar corporation, and his assistant, E. T. Hickman, who have completed a tour of inspection of 14,000 acres of beets in the territory surrounding Mason City. Of this acreage 1.300 acres have been blocked and thinned and the remainder will be finished soon.

Mark Twain's Elephant.

Most of us receive white elephants at Christmas, minus trunks and tails, but Mark Twain, the American humorist, actually received an elephant one Yuletide. Just before the festive season a great friend wrote and told him if he was willing to accept an elephant as a token of his regard, it would arrive in due course. Whether Mark looked upon the whole thing as a joke or not one cannot say, but he answered the letter by return mail, thanking his friend for the offer, and agreeing to accept the animal. First, a huge supply of hay was delivered, then an elephant trainer was announced to inspect the premises, to see that there was proper accommodation for the beast, and finally, the animal itself appeared upon the scene. It was a very fine specimen, and, to the casual observer, it might have come straight from India. However, on its new master closely inspecting it, he found his Christmas present was most beautifully modeled of cardboard. An amusing practical joke, but somewhat expensive.

New Airplane.

Builders of the "bat-wing" airplane have designed the new craft to overcome the resistance of struts, wires and fuselage that in the usual type of machine consumes almost three quarters of the engine power. The new design, says Popular Mechanics Magazine, is a great double cambered airfoil that terminates at right and left in the conventional ailerons and that tapers in the rear to a tail that has the usual elevator and rudder.

The aerofoil measures 100 feet from tip to tip and swells in the front to a thickness of seven feet. In that bulge is a cabin 30 feet long, eight feet wide and six feet in height. The new plane is an internally trussed cantilever structure covered with wood veneer so tough that the wing surfaces can be walked upon.

Faulty Diet.

In an investigation of 227 diets supposed to be typically American, Prof. H. C. Sherman of Columbia university has found that only one was deficient in protein, while 37 were lacking in calcium. If each of the low-energy diets was increased to 3,000 calories, none would lack protein, but seven per cent would still have too little calcium. The needed calcium carbonate or phosphate can best be supplied by foods rich in lime. Of these milk has the advantage of increasing the high-grade proteins and providing the essential fat-soluble vitamine.

HELPED TO CREATE NATION

Men of the Pony Express and the Overland Stage Deserve Place on History's Page.

There recently died in Los Angeles, William Gooding, reputed to be the last of the famous pony express riders. The present generation knows little about those pioneer times and the wonderful way news was carried across the continent during the ten years immediately prior to the building of the Union and Southern Pacific lines, which met at Promontory Point, Utah, in 1868. Mail and newspapers took from a month to fifty days to cross the continent prior to the establishment of the pony express, which began its service April 16, 1859, reducing the time to ten days. Relay stations with change of mounts were established at short distances, depending upon the topography of the country, and each rider would ride at top speed from one to the other, change horses in a trice and go on. Human endurance was pressed to the limit.

As an illustration of the speed made, the last message of President Buchanan to congress, in December, 1860, was carried to San Francisco in eight days and two hours. In 1863 the transcontinental telegraph line was completed and all news thereafter went by wire, except such as the papers on the coast clipped from eastern papers which arrived by mail. When the railroads were completed both the pony express and the later overland stage went into the discard, remaining, however, on short tributary routes for a number of years, some for many years. There are many tales told of the daring and nerve of those hardy and courageous drivers of the stages, passing, as they did, fearlessly through hostile Indian country and not infrequently suffering death at the hands of war parties, in spite of the efforts made by the government to give them military protection. These are of the same character of tales which mark the progress of American civilization, from Plymouth Rock to Seal Rocks, in subduing the wilderness and creating a great nation.

Overheard at the Movies.

His wife had a severe headache, and was sadly in need of quiet, so husband said he would take their small daughter to the movies, and for her to retire early.

It was all one to him, as he had not consulted any program, and they entered the first theater in their pathway, an unfortunate selection, for it was one of the sex-problem plays, the principal characters uncongenial and seemingly with good grounds for divorce because of incompatibility.

The little maiden, after a time, caused a titter of laughter among the audience near her by saying in a shrill little treble: "She doesn't seem to like married life, does she, papa?"

The play proceeded and after an apparently violent outburst of temper on the part of the feminine star, the little girl's voice again rent the air with: "Mamma acts just that way sometimes, doesn't she, papa?"

He did not wait to see or hear more, but hastily left while the lights were subdued, and the next time he will select a comedy.—Indianapolis News.

Great Waterspout.

Particulars are published in the Meteorological Magazine of a great waterspout that a correspondent observed south of Cape Comorin on a day when the weather was fine and the sea smooth. The waterspout formed between a russet-gray cloud and the sea nearly five miles from the ship. At first the distance between the base of the cloud and the surface of the sea was 4,600 feet, and the width of the column tapered from 500 feet at its juncture with the cloud to 150 feet at the sea. The vortex appeared to be a tube with tapering sides and a central column. The walls seemed to consist of water moving downward and the central column of water ascending. The phenomenon lasted for 13 minutes; then the walls appeared to ascend into the cloud.

Increasing His Vocabulary

Father recently came into possession of a new automobile and garage talk flew thick and fast between husband and wife with the result that son, called Wesley at the North side school, where he is learning that words are composed of syllables, sometimes became mixed in his school and garage talk.

After showing his mother the knowledge that had been forced on him that day in the way of new words, Wesley came to one with three syllables that was not entirely familiar and called to his mother for help with:

"Mother, how many cylinders in this word?"—Indianapolis News.

Pessimistic.

A minister on the occasion of a marriage was at a loss in trying to discover the bridegroom among the company of young men present. Fixing on a young man with the biggest flower in his button-hole, he asked him quietly:

"Are you the happy man?"

"That remains to be seen," was the solemn answer.

"But are you the man who is to be married?"

"Oh, aye; but that's another matter."

Improvement in Japan.

First-class narrow roads are replacing the old paths in Japan, says the New York Herald. Automobile roads, electric roads and light railways serve many parts of the country in a surprising manner, while rolling stock and handling methods are being improved.

TO ALL TO WHOM IT MAY CONCERN: The commissioner appointed to locate a road commencing at the Quarter Section corner common to sections one, two, eleven and twelve Twp. 95, Range 23, and passing through the lands owned by Fred E. Gamble, James Carr and Anna McGuire Guerli, and terminating at the northwest corner of Sections one and northeast corner of Section two, Twp. 95 N. R. 23. has reported in favor of the establishment of all objections thereto, or claims for damages, must be filed in the Auditor's office on or before noon of the 5" day of September, A. D. 1921. or such road will be established without reference thereto.

New Prices
on Titan and International Tractors
Now Lowest Ever Quoted

EFFECTIVE immediately, we make another big reduction in the prices of Titan and International tractors. These reductions wipe out all former advances and place ***Titan and International tractors at the lowest prices at which they have ever been sold.***

International 8-16
$900

This price is about one-fourth less than the price at which the 8-16 sold prior to March of this year. The new figure is the lowest at which it was ever sold. The new price includes all the necessary equipment—platform, fenders, governor, belt pulley—features which must be paid for extra on some tractors.

Titan 10-20
$900

This is the lowest price ever quoted on the Titan, considering the equipment now included (formerly sold extra). Up to March of this year the price was $1,200—today it is $900. At this figure the Titan 3-plow tractor is the best value in the farm power field.

The **International 15-30** has been reduced to **$1,750**—lower than it has ever been before. The man who needs a 4-plow tractor cannot find a better investment than the 15-30 at this price. (All prices f. o. b. Chicago.)

Considering quality, power, equipment, and the service which follows every machine, ***Titan and International tractors at these new low prices are unquestionably the best buy in the tractor market.***

As these prices have been made regardless of manufacturing costs, we do not guarantee to maintain them.

These prices certainly justify the immediate purchase of a tractor. Put it at the horse-killing work of hot weather plowing, and your fall and winter belt work.

See our tractor dealer for full information on deliveries and terms.

MINOR MUSINGS

The Lord loveth a cheerfull liver.

Not chance is worth anything but a fighting chance.

Tack consists largly in lying happily.

Bathing suits this summer are more daring—also more baring.

The reason there are so many poor people is that so many buy things with the money they hope to get.

Everybody loves a well man because a well man loves everybody else.

If you think that the whole world is crazy, that makes it certain that you are.

A cocky big man is almost insuffer able, but a cocky little one is impossible.

"When lovely woman stoops to folly"—she makes a mere man look like a rowboat racing a steamer.

The appearance of success without backing, brings bankrupcy as often as it brings real success.

After you are dead, the community will flock in and ask: "Is there anything I can do "

The best kind of a business head is the one that co-operates with a good pair of busines hands.

There are inappropiate times for everything, such as praising boiled beef and cabbage to a dyspeptic.

What every married man finds out: A good cook is rather to be chosen than beauty.

Who Remembers

When a woman's clothes were not criticized?

When a meek woman is driven to admit that her husband is "hard to get along with," all the other women know he is a perfect brute.

If your tongue is hasty your progress is slow.

"Good" business is the only kind of good business.

Ford says that "the world is on wheels." And a good many of the wheels just now seem to be in the collective head.

Girls used to spend much time scrubbing their elbows and now they have to spend as much time scrubbing their knees.

In the rare case when a girl is willing to admit she is not beautiful. she knows she is more attractive than girls who are beautiful.

Opportunity is the only knocker that is popular.

Fewer people win gracefully than lose gracefully.

Prosperity often lives just around the corner from despair but you'll often never know she lives there unless you go around the corner.

The secret of a man and woman's trotting in a double harness,, often lies in the kind of harness the woman has.

They're getting fewer, but there still exists the kind of lawyer who thinks every judge and all jurors are deaf.

The world not only does not owe you a living but you probably owe the world for allowing you to live at all.

It's alright to let the dead past bury its dead," but we ought to make sure they're burried so deep the present won't be attemped to dig them out.

The world is filled with failures who think everybody is against them but who failed because they were given certain tasks to perform and went joy riding instead of performing them.

Wilbur E. Sutton.

YES WHAT

Sadie was learning to read. It seemed that the phonic system was going to solve all her difficulties, and she got along swimmingly with the At family and Ing Family and the Ins and the Its and so on. Then she word "rough" one day which was soon followed by "bough," which she accepted as a couriosity. But when she had to take "dough" and then "through" and "cough" as further exceptions, she sighed dispairingly: "Weww. what wath the matter with the man that made the wordth?"

BAND CONCERT WEDNESDAY NIGHT

Klemme Boy Draws Clear Lake Prize

Johnny Baumgartner, son of J. E. Baumgartner, of this city, drew one of the lucky numbers at Bayside Park Sunday which entitled him to one of the $10 gold pieces. He is the third Klemme person to get a $10 prize at the lake resort.

IMPROVING FARM HOME

Erwin Josten has been exceedingly busy this summer and has had a gang of men at work on his home in the country. The house has been entirely remodled and when completed will be modern and in every way and will have all the conveniences of a citty home. The place is fitted with modern plumbing, running hot and cold water. electric lights Edwin is putting in his own lighting system. A new sleeping porch is also the feature of the home. It will be one of the finest country homes in this vicinity wen completed.

INSISTS HE LOANED MIND TO SOMEBODY; SEEKS IT IN BRITT

BRITT,—A man was picked up on the streets Wednesday and gave evidence of having an unsound mind. He was questioned by Marshall Raw and all they could learn was that somebody had borowed his mind and would not return it.The man labored under the impression that he could find the man that borrowed his mind and that he was wondering over the earth searching for him. It could not be definitely determined where his home was or what his name was The Marshall got a bed for the man and after a night's rest, a good supper and breakfast. he was placed on a train and allowed to go his way. It developed later that he had been doing common labor in the neighborhood but as far as the reporter could learn nothng was known of the mans past.

CHAINED TO TREE FOR PUNISHMENT

MOUNT VERNON, July 20 —It has been developed that the two little boys found by Boy Scouts chained to the tree near Edgewood had been tied up in that way by their parents by way of punishment for disobediance. The boys are David Hammond and Floyd Baily. The prisoners were discovered by the boy scouts from Grand Mound about 6 P. M. The scouts reported to the Edgewood authorities and the marshall released the victims and escorted them to the village.

The parents will be tried at Elkader tomarrow morning.

The Hammond family, long residents of that locality, are said to be of low mentality.

The boys had had neither food nor water and were exposed to the sun from 6 a. m. to 6 p. m.

THREE TIMBER COUNTIES OF NORTHEASTERN IOWA

Study of the late census return gives some interesting data concerning Iowa counties. Kossuth leads the list in the number of acres of prairie land that has never been plowed. It is fenced but uncultivated. There are 40,000 acres of such land in that county. When it comes to timber lands northwestern Iowa carries off the honors. More native timber exists in Clayton, Allamakee and Winneshiek counties, than in any other three counties in the state. In Allamakee county for instance, there remains 173.000 acres out of a total acerage of 411,274 acres, and in Winneshiek county there remains 66,000 acres of timber land, as compared to the total acerage of approximately 442,000 acres. And these counties have a tremendous amount of timber land in proportion to cultivated land, in comparison with the average farm community. — New Hampton Gazette.

THE FASHIONS

Lady Duff Gordon said at a luncheon at the Ritz:

"That fashions are graduafly becoming more modest. They are nothing like so shocking as they were last year.

"A young woman went into a very smart shop one day last year and said to the saleswoman:

"I want to buy an afternoon gown of the very latest fashion."

"'Yes' madam,' said the saleswoman. 'And does madam prefer a gown that is altogether too short or one that is altogether to transparent We stock both kinds."

Guaranteed Repair SERVICE

STAGE RIOT IN BURNING PRISON

Pittsburgh Penitentiary Is Scene of Bloody Fight.

RIOTERS ARE SHOT DOWN

Furniture, Kitchen Ware. Guns Knives Used

PITTSBURGH, Pa., July 21. — While flames crackled in the prison buildings and dense clouds of smoke rolled over the scene, 1000 convicts including 30 women fought desperately with guards in the western Pennsylvania penitentiary Monday.

Guards fired point blank into mobs of prisoners who came at them armed with the furniture and other weapons. Scores were reported wounded. Six frame structures within the walls were destroyed by fire.

A policeman on guard at the prison stated that six to eight convicts had been killed. There was no confirmation of this report.

The riot was started in the prison dinning room by 200 convicts just transfered here from the eastern penitentiary. It was reported they demanded rations of cigarettes for the men and face powder for the women.

Whole Prison Involved

Several prisoners rushed at the guards. They ripped furniture to bits and used table legs and chairs as bludgeons. Others grabbed knives, forks and tin plates from the tables. The air was filled with flying missiles.

The fighting spread from the dinning room until the whole prison was involved. Guards on the walls ran up and down, threating with the rifles, the convicts milling around in the yards.

Other guards armed with rifles and revolvers, opened fire on the convicts as they rushed them again and again in an effort to capture the gates and effect a general jail delivery.

The fires were started one after the other in rapid succession, and soon the air was heavy with smoke, in the midst of which the hand to hand fighting raged on.

Hundreds of prisoners, clad in their gray and black striped garments, pawed frantically like caged maniacs at the bars througt the broken windows and screamed and cursed like madmen at the thousands who had gatheree around the prison.

Hundreds of shots were fired in an effort to quiet the convicts but this only increased their furry.

Armed with knives and forks and the tin plates from the dinning room torn into stripes with razor like edges the prisoners stormed the guards and threatened to assume possession of the great gray structure, but they were finally overpowered.

Stray shots were heard here and there thru out the prison, but these were to quiet some groups of men that had been penned in a single cell.

State troopers were in route from Greensburgh barracks to patrol the prison and to prevent a new outbreak. Practically every every available policeman in the city was on guard patrolling the outer walls and holding back the tens of thousands of curious that had gathered.

At frequent intervals blood curdling yells would arise from the prison as the inmates would let loose another vicious howl.

Five doctors were rushed to the penitentiary by John J. McKelvia, city director of city charities at 1:30 p. m. when he received an appeal for help from the physicians inside the prison walls.

AUSTIN MAN EMBEZZLES PACKING CO., FOR HALF MILLION

The latest in the news is the big embezzlement case at Austin. "Cy" Thomson, comptroller of the Hormel Packing Co. is short about a half million dollars of the company's money, according to reports and is now lodged in the Austin Jail. Investigation was made after it was discovered he had deposited a check of $10,000 of the company in his own account.

Thompson is nationally known among live stock men and chicken fanciers as he is the owner of the Oakdale farm at Austin which he made famous by his great plunges in the chicken business and later in the thoro-bred stock business and his wonderull success. It is said his farm and holdings are worth upward of a million dollars and he has signed it over to the company to secure his debts. It is said he gives no reason for taking the company money and appears to be not in the least excited but claims he will make it good.

METHODIST EPISCOPAL CHURCH

There will be no preaching service at this church Sunday morning Sundayschool will be held at the usual hour, eleven o,clock a. m. Union service in the park Sunday evening.

A. E. Buriff, Minister.

NOTICE

That the said thirty days will expire on the 11th day of August A. D. 1921. J-21-28

F. J. Wenck
Mayor

NEW KLONDIKE IS FOUND IN ALASKA

$100 a Ton n Gold Quartz Recently Dscovered; Miners Stampede

ANCHORAGE, Alaska, — Strikes of gold quartz apparently bearing more than one hundred dollars to the ton in a district 30 miles south of here were reported yesterday. Prospectors stampeded to the area of the discovery.

Men returned from there said a dozen big fissures of quartz heavy n gold had been uncovered wthin a region of 12 by 7 miles. The first strike was at Girdwood, on the government railroad. According to the messages received here the original find was followed by numerous others of equal importance.

Mining men here who have made a preliminary investigation of the discovery predicted it would prove epochal.

GREATEST HERO OF WORLD WAR, THREATENED WITH LOSS OF HOME, SPURNS OFFERS OF EASY MONEY

Pall Mall, Tennessee.—"I would far rather loose my farm and go back to work upon it as a common laborer than to commercialize the fame which was only incidental to an act of providence."

These are the words of Alvin C. York, greatest scldier of the world war, who though facing loss of his farm here through crop failures, steadfastly refuses to accept moving picture and vaudiville offers wich would more than pay the $12,000 morgage.

Spurns Theatre Offers.

Spurning theatrical offers when he came back from the war. York took up the hoe on the farm. Shortly after he married a girl of the neighborhood. Life seemed very bright to him and his wife when Alvin York Jr., was born early this year.

But his good fortune was not to last. Crops were a big disappointment, farm products brought exceptionally low prices. Taxes reached new high levels. The morgage for $12.500, is due this fall. A grocery bill is to be paid.

Toils From "Kin to Kant."

York, who is credited with killing 25 Germans single handed in the Argonne Forest, is toiling from "kin to kant" to prevent shattering of his life dream, but it appears now to be a hopeless task.

"Religious faith sustained me in my danger and removed my fear," he says. "I was only a pawn in the hand of province. Any credit that is due for my achievements should go to the Lord. For me to attempt to take any credit personally would be a great wrong.

"But he will see me through!"

A bit of pioneer history of Hancock county from some fifty years ago and a good story of that period through which early settlers passed appears in this issue of the Times in Arthur Wellemeyer's advertisement. It is something unusual and is of good interest to all Turn to Mr. Wellemeyer's space elsewhere and you will learn something of pioneer days.

FIRST METHODIST EPISCOPAL CHURCH

Common services will be conducted by the Dist. Superintendant L. J. Brenner of Sioux City next Sunday morning at ten o'clock.

There will be Sundayschool from 10, to 10,30.

Union service in Park Sunday night at 8 o'clock Rev Brenner will preach.

Preparatory services for Sunday Saturday afternoon at 2 o'clock.

Midway prayer services each Thursday evening.

A. H. Meyer. Pastor

DRANK GALLON OF OIL

A negro floater happened around at the Big Four Oil Co. yesterday and in order to get money for a meal offered to drink a gallon of lubricating oil for 50 cents. The men naturally took him up and were surprised to see him drink it down and then offered to drink another for 50 cents more. The negro then stepped to the back door and by a peculiar ability of his own relieved himself of the oil by spitting it up.—Sheldon Mail.

WOULD QUALIFY HIM

Two powerful colored stevedores who had had some sort of falling out were engaged in unloading a vessel at a St. Lious Dock. Uncomplimentary remarks and warnings of intended violence were exchanged whenever the two passed each other with their trunks.

"You jest keep on pesticatin around wid me," declared one of the men, "an' you is gwine to be able to settle a mighty big question for de sciumtific folks."

"What question dat?" asked the other.

"Kin de dead speak "

NOTICE OF PAYMENT OF COUNTY FUND, ROAD BUILDING AND DRAINAGE WARRANTS

Notice is hereby given that there are now in the hands of the County Treasurer, funds for the payment of County Fund, Road and Drainage warrants. and that said fund will extend to the payment of said warrants which have heretofore been presented for payment and not paid for the want of funds. CATS CONFINED TO "RANGE"

Chicago Man Reports Success in Novel Plan for Keeping Pete From Straying Far Afield.

Another western idea was adapted to city uses the other day when a south-sider, who once rode the range on the Colorado plateaus, staked out his cats to keep them at home. The plan worked fine and now the feline animals get the air every day at the ends of tether ropes.

The cat owner found that every time he opened the cellar door the pets made a break for the open, frequently staying away for days and returning with blackened eyes and scratched hides. He thought of the tether plan, but the first trial was not a success, as the cats slipped the nooses from their necks. He then evolved a semi-hobble plan and tied the heavy string to one of the cat's hind legs, attaching the other end of the string to a stake driven in the back yard.

This system proved effective and now every day three of the cats take their exercise around their tether stakes.—Chicago Journal.

As Times Change.

"The old drinking customs have passed away."

"They have," agreed Uncle Bill Bottletop. "Instead of taking water on the side a man now calls for an antidote."

FARM POULTRY

EXERCISE BEST FOR POULTS

Confining Young Turkeys Does Not Result in Marked Success—Thrive on Free Range.

(Prepared by the United States Department of Agriculture.)

Plenty of exercise is essential if the turkey poults are to thrive, say poultry specialists of the United States Department of Agriculture. At all times, when rain or dampness does not prevent, the poults should be allowed to run in and out of the coop at will. Too much stress cannot be given to the necessity of exercise, and the only way to provide for this is to allow the poults at every possible opportunity to range for feed outside the coop. During a long-continued rainy season it is better to allow them to run out of the coop whenever it is not actually raining, even though the grass is somewhat damp.

By confining the mother hen to the coop she will always be ready to hover

Let the Turkeys Have Open Range.

the poults whenever they run to her, which they will do if they become chilled. The greatest care should be taken to keep the interior of the coop dry, and for this reason it is advisable to choose a sandy slope where the water runs off quickly and where there is also protection from heavy rains. If necessary, the mother-hen can be confined to a roomy coop for a week or more, provided she is properly fed and watered, and the coop moved to fresh ground every day.

If the weather is warm and dry, as frequently happens when the poults are hatched late in the season, no shelter is required, as they do better in the open; but it is advisable to keep them within a fenced inclosure for the first three or four days until they are strong enough to follow the mother. Weather conditions being favorable, the hen and brood can be given free range after the third or fourth day, but care should be taken to keep them out of heavy dews and to protect them from rain for the first two or three weeks. After this early morning dews or light showers followed closely by warm sunshine will do little harm, as the poults soon become warm and dry. If cold, damp weather sets in, however, they will need to be kept in dry quarters, for nothing is more fatal to young poults than wet and cold.

When about six weeks old, the young turkeys are old enough to go to roost. Practically all turkey raisers allow the birds to roost in the open trees or on fences or other roosts especially provided for them. In sections where high winds prevail, it is customary to build the roosts next to barn or shed, where there is some protection. When this is done posts are driven into the ground and poles laid across them four of five feet from the ground. By driving them to the roosting place and feeding them there every evening just before dark, young turkeys can be made to roost wherever desired. For the first few times it is sometimes necessary to keep them under the roost until dark, but they will finally fly up, and after a week or so will no longer have to be driven, but will come up every night to be fed and to roost.

During the summer and early fall turkeys can find an abundance of feed on the average farm. Grasshoppers and other insects, weed and grass seeds, green vegetation, berries, and grain picked up in the fields all go to make up the turkey's daily ration. When this natural feed is plentiful very little need be added until fattening time, except for the purpose of bringing the turkeys every night to roost and to keep them from straying from home. For this purpose one feed of grain every night just before roosting time is sufficient.

POULTRY NOTES.

Oats are as good an all-round feed as can be had but should not be fed exclusively.

* * *

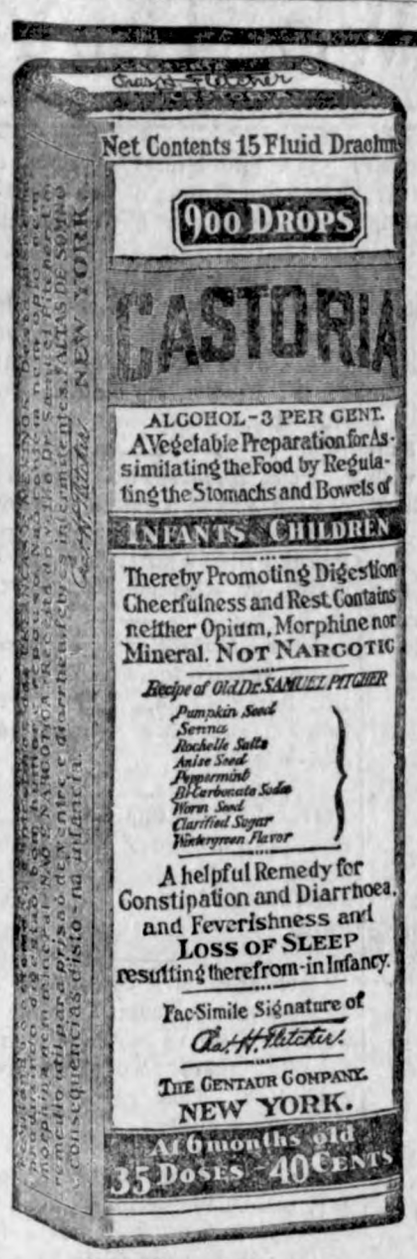
The best tonics you can give your stock are fresh air, exercise and a variety of foods.

* * *

Kerosene the roosts, upper and under side, once a week. Also the nests every couple of weeks.

* * *

Idleness cannot be classed as a disease, but it certainly is a condition that quickly leads to disease and lack of thrift.



Exact Copy of Wrapper.

Children Cry For *Fletcher's* CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease.

Dr. Kilmer's Swamp Root is on sale at all drug stores in bottles of two sizes, medium and large. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Grief knits hearts in close bonds.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Don't pick a quarrel before it's ripe.

GROW HIGHLY PRIZED COTTON

Virgin Islands Produce Long-Staple Variety That Is Almost Extinct in the United States.

Cotton raising has become one of the principal industries of the Virgin islands, Uncle Sam's newest territorial possession, according to Bulletin No. 1, Sea Island Cotton in St. Croix, of the Virgin Islands agricultural experiment station, just issued by the United States Department of Agriculture.

Sea-island cotton, the much-prized, long-staple variety which has been rendered almost extinct in continental United States by the boll weevil, is the basis of the Virgin Islands industry. The area devoted to it, while as yet small, produced an average yield of 1,000 pounds of seed cotton to the acre in 1919 and 1920. One of the plats at the government experiment station produced at the rate of 4,450 pounds of seed cotton.

During the War.

"Please help an unfortunate man," whined the beggar.

"What's the matter with you?" asked the crusty old gentleman.

"I was injured during the war."

"Don't you try to make me believe you are a war hero."

"I didn't say that, sir, and I wouldn't try to impose on a gentleman who's as smart as you are," said the beggar, with an insinuating air. "I was struck by a truck in the fall of 1917."—Birmingham Age-Herald.

The man who sees no good in others is no good.

Western Canada Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying

are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.

W. F. LAU J-14tf

Mr. and Mrs. Will Barz, of Garner were visiting at the home of Mrs. Lena Schroeder here Monday evening.

Mr. and Mrs. Charlie Luick and Ollie Brooks and family, of Clear Lake, were Sunday visitors with Mrs. J. W. Brooks and Laura Brooks of this city.

FOR SALE—Two registered Aberdeen Angus Bulls; also a few cows and yearling heifers, all registered. Grant Ulum, 4 miles east and 4 miles south of Klemme. J7-14-21-28

Miss Minnie Blumer of Jewell, Ia., came Sunday for a month's visit at the home of her sister. Mrs. John Lemke, and other Klemme relatives and friends.

Harold Gruetzmacher went to Ackley, Iowa Saturday to play ball we presume. We also presume he spent Sunday visiting a friend at Iowa Falls.

Mr. and Mrs. Valintine Josten drove over to Mason City for a visit with Mrs. Henry Josten who is in the hospital there recovering from an operation. They report she is getting along nicely.

Mr. Roy Strate and wife. of Garner, was shopping in Klemme Thursday afternoon. Mr. Strate is mail carrier on Garner route four and is well know to many of our farmers on that route.

Preached Here Sunday

Mr. Cladwell. from Clear Lake, who is a Home Missionary and Sundayschool Worker, preached at the First Methodist Church here Sunday. He gave an interesting talk.

Mrs. L. H. Yost, of Donnaly, Minn. and Mr. H. A. Wagner and family of Buffalo Center, drove to Klemme Tuesday for aa visit with the J. N. Day family. The Yost's formerly lived on a farm near Klemme.

Tell your news to the Times. Phone 12.

Grover Cleveland Daly was an over Sunday visitor at the August Lau home. He is engaged in the dredging business and will be on a job at Belle Plaine soon.

$100 in Gold given away every Sunday at Bayside Amusement Park. Come get your share and see the fun. Free picnic grounds, Boating, Bathing. Fishing, better than ever. J23tf

Mr. and Mrs. W. F. Vail. of Des Moines, came Saturday for a few days visit at the C. W. Wiles home. From here they go to Minneapolis for a visit with friends.

FARMERS! Do you need any printed envelopes or letter heads Get them done at the Times Office. We have all modern machinery and electrically equiped.

Chas. Ryden and family of Windon Minn,. drove to Klemme Saturday for a visit at the Joe Johnson home. Mr. Baufman, of Windon, also accompanied them here for a visit with his sister, Mrs. Herb Baily.

C. J. Obrecht and wife from Thornton were shopping in Klemme Saturday. They are "newly weds" but have the judgement of old timers in selecting Klemme as a good place to do their first trading.

Miss Helen Lenz, sister of Mrs. A. H. Meyer of this city, and her friend Miss Marie Knaldtstad, both of Minneapolis Minn., came Friday for a visit at the Rev. A. H. Meyer home. The girls are here spending their summer vacation.

Mr. and Mrs. Lenz and daughter, Ruth, and Mr. and Mrs. Heuer and children of Dowa came up for an over Sunday visit with Rev. and Mrs. A. H. Meyer. Mr. and Mrs. Lenz are parents of Mrs. A. H. Meyer and are in Iowa spending their vacation They live in Wisconsin.

Albert Schmidt holds the record this year for the earliest thresher so far as we know. Albert threshed his barley last Friday. He had forty acres and he threshed out about one thousand bushels. Not so bad and barley is good price this year compared with other grains.

Tom Blank went to Esterville Saturday for a visit wih his son, Ralph and family, and from there he intended to go to the big Rock Island Picnic at Orleans which was held Sunday, we believe, special trains from various points were run to Orleans for the big day put on by the railroad company.

Henry Church of Garner was again a Klemme visitor Monday. "Hank" makes an auful big bluff of trying to make us believe he is a citizen of Garner. He adorns our street about half the time and the other half of his time he spends in going to and from Klemme. Better move back to Kleme Henry and save all the railroad fare.

Gleo B. Sargent, 20 years old of Clinton was gored to death by a bull recently. He was in the hay mow of the barn at the James Likens dairy farm gathering eggs. It is not known whether he jumped or fell,, but he hit the ground in front of the bull which. frightened, charged him. He lived about five minutes after the attack. His mother and sister survive him. He graduated from the Chariton High school this spring.

W. H. Trafford and family spent three or four days of their vacation last week visiting relatives and friends at Blue Earth, Garden City and Vernon Center, Minn. While at Blue Earth they helped Mr. Trafford's grandmother celebrate her 87 th birthday anniversary. At Garden City and Vernon Center they visited the Yahnke families, and their visit also took in three of "Bill's" aunts who were past eighty years of age. From that we conclude that Minnesata is indead a healthy place to live.

PICNIC AT STARNES SUNDAY

The following drove down from Charles City last Sunday and enjoyed a picnic at the home or Mr. and Mrs. Joe Starnes east of town: Mr. and Mrs. Segal, Mr. and Mrs. Bishop and niece Miss Munson, Mr. and Mrs. Zimmer, Mr. and Mrs. Grant Coon, Mrs. Joe Staebler and sons Elwin and Kenneth. Mr. and Mrs. John Weber and daughter Sylva, Mr and Mrs. Henry Meyer and children, Mrs. Nancy Atherton, Charlie Weber and sister Miss Ester, Mr Eberts, Vern Bonsall and Miss Zella Zimmer. Miss Mabel Starnes returned with them to Charles City for a visit. All had a fine time.

REDUCED PRICES ON Moline Universal Tractor

Moline Tractors have taken a big drop and are now selling below pre-war prices.

The new price on the Moline is now as follows--

Moline Universal Tractor Model D complete with six inch extension rims and two bottom 14 inch plow, only

$1196.00

Same outfit with three bottom 14 inch plow is **$1239.00**

When you consider the quality of this machine and the work it will do, there is no other power farming outfit that will compete with it regardless of price.

We afso sell the smaller and cheaper tractor, but advise the Moline.

Henry Lau & Sons

The Family Lot--

The Final Resting Place Of Our Loved Ones

Fifty years ago, in the springtime, a covered wagon with a family of Emigrants camped for the night on what is known as the James Trumble farm, east of Goodell. The wife took sick and died, and they buried this good lady on a pretty knoll nearby, under the protective branches of a beautiful Oak Tree, and marked her grave with a small boulder and planted a spray of "Live-for-ever," which has for these fifty years, grown green each spring to mark the final resting place of this Loved One. Thus the first Cemetary in Hancock County started. During the next few years others were laid to rest here, and Geo Elder, who owned the farm then, was kind enough to protect these graves with a fence.

Other cemetaries were started about this time in different parts of the County. A few bodies lie on the Charles Church farm east of Goodell. Fifteen are at rest in "Hickory Grove" four miles southwest of Goodell. And in Ell Township the Early Settlers buried their dead on a sandy knoll of the Ell farm.

In the Early Days Hancock County was swampy. There were no roads, merely trails. Transportation was so difficult that without embalming it was impossible for the Pioneers to take their dead back home to the family Lot, but they were obliged to bury at once, and in the nearest cemetary.

But now, Hancock County has good roads. We have the automobile hearse, and modern Embalming Methods, which make it possible to carry your Beloved Dead to your own Family Grounds, even though we must cross a state to get there.

The desire to protect the dead is one of the oldest and strongest feelings we have. Ever since the world began men have sought to save the remains of their Loved Ones from violation. The ancient Phoenicians laid their departed in the inmost recesses of caves, each tribe in its separate cave. The Egyptians constructed pyramids to guard the Sepulchres of their Kings and their families. When Jacob, of Bible times, was on his death bed, he asked his children to bury him with his fathers, he said "Take me to Abraham and Sarrah, Isaac and Rebecca, and where I laid Lea." Even Jesus Christ after his death on the cross was placed in the Family Sepulchre, a cave built by Joseph.

Hancock County has twenty-three Cemeteries. Some families have dear ones lying in two or more cemeteries. Of course the early Settlers had to do as they did, but now it is time to gather the Family together into one Family Burying Ground. Select a suitable place in one of our beautiful Cemeteries and be sure to have space enough to accomodate the probable needs of your family for the next fifty years, and then move all of the Family dead to this new location, then you will feel sure that the graves of your dear ones will always be well cared for and never neglected.

The undersigned, a licensed Embalmer, has for several years made a specialty of moving Bodies. I have special equipment and am prepared to render satisfactory service in the bringing together of the Family Dead. I have superintended the disinterment of more than a hundred bodies from private burial grounds and neglected Cemeteries to Family Grounds in well kept Cemeteries.

And when once the Family Grounds is started it will be easy enough to continue, for the Automobile makes it possible to bring your loved ones "Home" for burial regardless where they die.

Yours for Service

Arthur Wellemeyer

arm Southeast Of Klemme Was Destroyed By Fire

ARM SOUTHEAST OF KLEMME URNED TO GROUND TUESDAY NIGHT

All Buildings Except House Are Destroyed

A farm six miles east and two iles south of Klemme was almost ntirely destroyed by fire of unnown origin Tuesday night.

All of the buildings on the farm. ncluding a large barn and other big uildings was entirely destroyed, the ouse only remaining. The house as some distance away from the ther burning buildings and was alo favored by the wind.

No one lived on the farm this ear but it was at one time tenanted y Mr. Dutton. It is said some men ho are dredging in that neighborood used some of the buildings to tore their machinery and it is said hat they lost a Ford Truck and also Dodge Truck in the fire besides ther tools and supplies.

We have not learned whether or ot the buildings were covered with mple insurance.

ARGEST IOWA BARN BURNED TO GROUND NEAR ESTHERVILLE

Estherville witnessed what was ossibly the most spectacular blaze een there for several years when he farm buildings of John Dillon, our miles west of Estherville were ompletely wiped out by fire last eek Friday, which it is said was tarted when an overturned lantern xploded in the hay loft where one f the hired men was doing some repairing on a hay fork.

The fire is of state wide interest or the reason that the barn is conidered o have been the largest in he state of Iowa, at least none any arger is known.

The dimensions of the barn were 10 feet long and 110 feet wide.

The barn was completely filled ith hay at the time of the fire.

Among other buildings which alo burned was a corncrib containing ,000 bushels of corn. The house hich is located some distance from he other buildings did not burn and s the only building which is left tanding on the farm.

The loss is estimated at $30,000 nd only a small part is covered by nsurance.

Up until a few years ago this place as known as the County Orphans' Home.

ISS WEDA OLSON HOME FROM A WINTER'S STAY IN NOME, ALASKA

Miss Weda Olson is home from Nome, Alaska, where she has been eaching in the government school or Eskimos. Miss Olson had 92 upils ranging in ages from the oungest school child to grown men nd women. She found them to be he most lovable and appreciative eople and her work among them o be a pleasure. Many interesting hings are told by Miss Olson of her tay in the north country. The population of Nome varies in summer nd winter. In the latter season the own has a population of about 800 eople, but when the warm weather s ushered in so is a population of bout 1500, as the people leave Nome for the coast towns when the winter sets in. A farewell party was given in honor of Miss Olson upon the boat, and among the guests at this event was Mr. Amundsen, the arctic explorer. She departed from Nome on June 26th, reaching Seattle, Wash., July 4th. Miss Olson brought with her many valuable as well as interesting curios from Eskimo land.—Forest City Republican.

Miss Esther Jante was a Garner visitor Monday.

FORMER KLEMME GIRL A BRIDE

Huntington—Flint

A. C. Flint, a former editor of the Klemme Times and now issuing the Fairfax, South Dakota, Advertiser, sent us a copy of his paper last week containing the following write-up of his daughter's marriage, who is well known here in Klemme:—

"Married—On Sunday afternoon, July 17th, at the home of the bride's parents, Mr. and Mrs. Allen Flint, in Fairfax, Miss Vera May Flint and Mr. Earle F. Huntington, Rev. Peter Ruder officiating.

When we realize the facts set forth in the above paragraph, we begin also to realize that we are growing old. Time flies. It seems only a short time since our eldest was a mere toddler, now she starts out to establish a home of her own.

We have written up lots of other people's weddings, but this is our rfi stattempt at one in the family, and at first thought, we believed it would be easy, as we could say what we pleased, but find it isn't so easy as we imagined. We might say the bride is an angel in disguise, but after living with her for twenty-two years, we know she isn't any such thing, so we won't say it. However, we will say she is a mighty fine girl, and while she is competent to "jazz a few" on the piano and linotype, she can also cook a good meal, and she not only can, but she will.

We know the groom pretty well, too. He is the son of Mr. and Mrs. O. E. Huntington, of Colome, and is well thought of in the community. He can farm or run a lumber yard, plays basketball and base ball, has been operated on for appendicitis, so he should be eligible to travel in the best society.

The newlyweds expect to make their home for the present on a farm near Colome. Of course we wish them the success and happiness we know they deserve."

WOMAN DIES WHEN ENTOMBED IN BUILDING BEING REPAIRED

Patient at Sanitarium Crawled In Cavity Under Floor Which Was Bricked Over

COMPTON, Cal.—The body of Mrs. Eva Maxwell, 38. wife of H. I. Maxwell, wealthy business man of Fresno, was removed from beneath the floors of the Compton Sanatorium, near Los Angeles, where she had been entombed alive. She had been committed to the institution be cause of nervous trouble.

The woman, thought to be demented, had crawled in through an opening in the brick work hile masons ere making repairs.

The opening as bricked up solidly. The young oman, unable to escape or make her calls for assistance heard, died of starvation.

Hospital authorities, ho remained silent about the affair, had been searching for the woman continuously since her disappearance, it was said.

Klemme Boy In Hospital At Mason City

Willis, nine year old son of Mr. and Mrs. Chas. Busch is in the hospital at Mason City, suffering with tetanus, and is very seriously ill.

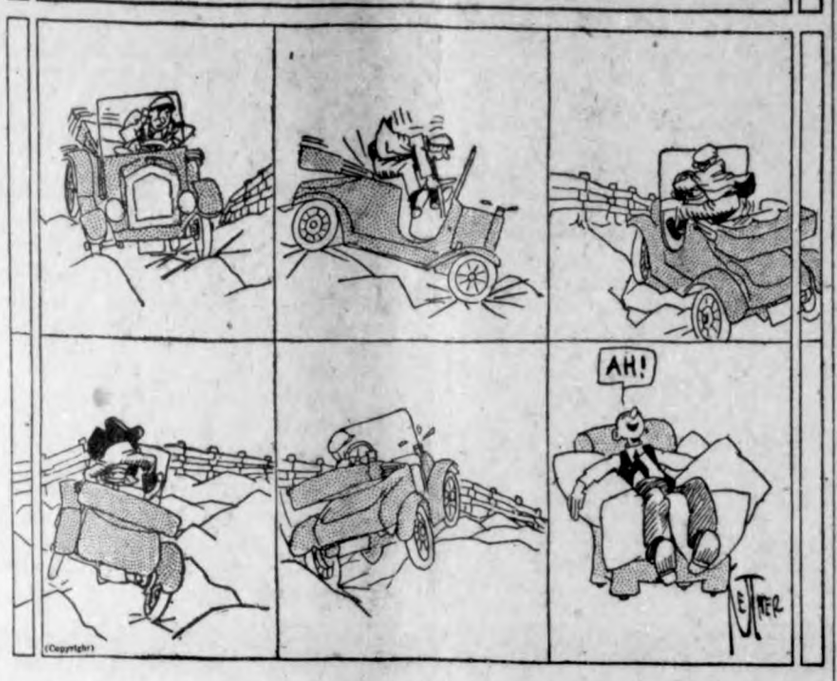
A few weeks ago the boy was up in a tree and when coming down he slipped and run a sliver into his cheek, the wound was given medical attention and seemed to get along alright until a short time ago when blood poisoning developed and hen tetanus. or lock jaw.

It is hoped that the boy will recover although his condition is quite serious at this writing.

GOOD RAIN HERE TUES. NIGHT

This vicinity was visited by a fine rain Tuesday night which fell hard for about an hour and soaked the ground up in good shape. This is the first good rain we have had in Klemme for many weeks. Another rain like the one we had would be real welcome.

The End of a Perfect Day



AX MURDER ECHO AGAIN

This Time Reward of $10.000 Is Offered

Red Oak, Iowa, July 28—Another effort is to be made to revive search for the ax murderer who killed the six members of the family of J. B. Moore and two girl guests nine years ago in Villisca.

Persons interested in keeping alive the case are organizing and leaders say a reward of $10,000 will be offered, the expectation being that so large a reward will attract detective talent that will solve the mysery.

As the county has witnessed a number of trials resulting from the tradegy, costing thousands of dollars and the prosecutors being no nearer a solution now than the day after the murders were committed, it is protesting against further action. The feud which has existed in the county for years as a result of the attempt to fasten the crime upon well known people is being fanned into flame again after it had almost died out and this is causing criticism of the present effort to revive the case.

HOG THAT COST $10,000 DEAD

Poland China Boar Was Purchased In 1919 by Palmyra Man

MEXICO, MO.—Wonder Buster, the highest priced hog ever sold at an auction sale in Missouri, is dead. He was purchased in 1919 by two Palmyra men for $10,200.

Wonder Buster weighed about 1100 pounds and was of the Discher Giant strain of the Poland China family. The hog was 5 years old and died a natural death. He was hailed as one of the greatest sires of his breed in the corn belt.

High School Sunday Game Was A False Report

Last week we stated that the local high school team would play a return game with Britt on Sunday.

That was a false report, as it is not the policy of the high school to engage in Sunday ball. We printed the news in good faith, getting it from a local high school boy, who evidently had his wires crossed as we later heard it was to be a pick up bunch to play a pick up bunch at Britt and only one or two local high school students were scheduled to play.

IOWA HOME BREW INCREASE

University Laboratories Make Frequent Analysis as Aid to Court Proceedings.

Home brew is growing in popularity in Iowa, judging form the increasing number of samples of this anti-Volstead product sent for analysis to the laboratories of the college of pharmacy of the University of Iowa. Dean Wilbur Teeters. head of the college, receives many samples of home brew to test for various courts in which the cases have been brought charging illegal manufacture and sale of liquor.

"Tests show that the average samples of home brew contain from eight to twelve per cent alcohol; and some of it runs as high as twenty per cent," according to Dean Teeters. "The amount of alcohol depends upon the quantity of sugar used."

"For the most part the Iowa folks are making their home brew of rhubarb, sorhgum. and either corn meal or rye. Sometimes raisins are used. Dandelions and clover heads likewise seem to have a large following."

Indian Rites Dying Out.

The Hopi Indians, more than any other tribe, have long-cherished forms, says a correspondent. Still here in the isolation of the gleaming desert and mesa country one may witness still the corn dance, the snake dance and other picturesque ceremonials which the influence of the white man has as yet little changed. Among all of the Pueblo people there has been preserved much of the old Indian culture. This is easily understood when one considers the character of the Pueblos. Dwelling in ancestral villages century after century, avoiding war when possible, and in their remote mesa homes resisting even the disintegrating influence of the white men, these interesting tribes have preserved some magnificent art, poetry and religious sentiments which are now in danger of extinction, just as the white student of Indian life is beginning to appreciate their value.

Growth of Christian Endeavor.

The Christian Endeavor, a young people's society, was originated by Rev. Francis E. Clark, pastor of the Williston Congregational church in Portland, Me. On February 2, 1881, about 50 boys and girls met in the pastor's study and pledged themselves to attend and take some part in a weekly prayer meeting and once a month to hold a consecration meeting. Other duties, social, religious, literary, and of various kinds, were assigned to different members. They met with instant acceptance, and today there are more than 75,000 societies in the United States and Canada and in other lands.

'De Ducks' Got All His Money!

'DE DUCKS' GOT ALL HIS CASH; SAYS FARMER

DUBUQUE, IOWA— "De ducks" got all the farmers money that he had received when e sold his corn recently and trying to explain to a local banker the neccessity of a loan to tide him over a lean period the niceties of market problems as faced by the farmer now, were outlined.

"But" said the banker, "I don't understand why you should want to borraw money when you have just shipped your grain; what did you do with the money?"

"De duks got it," replied the farmer.

"What do you mean by de ducks" asked the banker.

"Well," explained the farmer, "I shipped the car to market and sold it for 52 cents. They deducked freight, that left 31 cents; deduck 1 cent commission, that left 30 cents; deduck elevator charges. and that left 27 cents; deduck husking that left 15 cents; deduck hauling, that left 5 cents; deduck the hired man's wages from that and you are a darn sight better farmer than I am if you can find anything left."

First Iowa War Heroe Burried At Glidden Sunday

BEAUTY SPOT NEAR FOREST CITY TO BE MADE A STATE

Conservation Body Puts O. K. On Project After Figt of 20 Years

FOREST CITY, July 25.—Success has at last attended the efforts of those interested in setting aside Pilot Knob and additional land in that neighborhood for a state park. Last Saturday M. M. Thompson, O. K. Maben, James B. Anderson, O. E. Gunderson and Emory Oleson drove to Des Moines and had an informal interview with several members of the state board of conservation and executive council, and arranged for a formal hearing on Tuesday. when the same gentlemen with the addition of Thorvald Thorson again went to Des Moines, putting the matter in all its aspects before the state of conservation and executive council.

Upon recommendation of the state board of conservation, the executive council by a unanimous vote decided on the acquiring of Pilot Knob and the vicinity for a state park, and a committee was appointed to represent the state, o work wih the local committee in arranging for he purchase of the desired area and closing up affairs in the transaction. While there is still considerable work to be done, the park is now assured, although some additional funds are needed.

Owing to the limited amount of money the state has available for the many desirable spots in Iowa, which should be preserved as parks, as large an area will not be acquired at this time as was first hoped, but under the action of the executive council here will be acquired at this time about 235 acres, which will include Pilot Knob and the most desirable tracts adjoining for park purposes.

The setting aside of this tract for a state park has been in the minds of many local people for practically a generation. Many of those, who have labored for it through the years have passed away, and it is with a great deal of satisfaction to those. who have recently engaged in forwarding the project, to know that their efforts have been successful.

Credit for the establishment of this region into a park, at this time, and the saving of its wild beauty for future generations is largely due to three or four local men, who have been tireless in the effort of the past year for the consumation of the project. They are, M. M. Thompson, E. J. Oleson and E. Gunderson.

Saw First Tobacco Smoke.

It was Christopher Columbus who discovered tobacco, and he did it on his first voyage in 1492, according to a little brochure which George C. Dempsey of Boston, has prepared for distribution among the members of the Algonquin club. Mr. Dempsey's account says: "He was not only the first European to report tobacco, but he saw the natives smoking rolls of it —cigars—to light which they carried burning brands in their hands. Popular impression makes Sir Walter Raleigh, the discoverer. History discloses the fact that the distinguished nobleman was closely and unfortunately identified with the 'fragrant herb, but at the same time shows that he did not begin to play his dramatic part on the world's stage till years after the great admiral had quit it.

"At all events the 'pipe' is inseparable from our vision of Raleigh, but we know Columbus saw 'cigar smoking' years before him. Unfortunate discoverer, indeed, Columbus found a new continent, and another gave it his name. He discovered smoking, and the name of another is linked to the romance of it."

C. C. Schaefer was have his farm home and buildings wired the fore part of the week and will put in an electric farm lighting plant. It is a fine improvement for his farm.

Miss Edith Katter came down from Garner Monday evening for a visit with Miss Mabel Waterman. She returned to Garner Tuesday morning.

Mr. D. D. Ross of Garner was here last Wednesday evening.

MERLE HAY BURIED AT GLIDDEN, IOWA

First Iowa Boy Killed in the World War Laid To Rest Near Old Home

GLIDDEN, July 27.— After three years of harrowing exile. Merle Hay, the third American and the first Iowan to die in France, was buried here Sunday in his native prairie, amid a yellow cornland and setting in which far off Picardy, land of his martyrdom, seemed strangely like a war like myth.

Fittingly his body rests at last in an Aerican cemetery beside a broad transcontinental artery teeming with traffic—the Lincoln highway.

10,000 Pay Homage

Illustrating strikingly how fresh in the American mind is the late war, 10,000 Americans, many of them after journeys of hundreds of miles stood quietly in silent tribute as the flag draped casket containing Private Merle Hay's body was lowered into the heart of his own America.

At 3:00 o'clock the funeral cortege left the American Legion hall for the square. headed by the Argonne Post band of Des Moines. The flag draped hearse was escorted by a rifle corps a detachment of former First Division troops and representatives from half a score of Legion posts from adjoining towns.

The funeral train arrived at the Glidden school house at 3:25 and the oaken casket containing Private Hay's remains was carried to the front of a specially constructed platform.

Sheriff W. E. Robb of Des Moines chaplain of the 42nd Division, who himself buried 768 boys in France killed or died during the war, gave the tribute to the heroism of Merle Hay, during the services in the yard at the school. All Iowa paid homage to Merle Hay. While his body was being lowered into the grave in the grass plot near Glidden, every flag in Iowa was lowered at half mast at the command of Governor Nate Kendall.

Sunday morning while the body lay in state in the Legion hall, surrounded by flowers in bouquets and designs with the wreath of laurel leaves, the personal gift of General Pershing, conspicuously displayed, Mrs. Hay, mother of the hero, in her humble little home on a farm seven miles north of here, was reading of even greater honor paid her boy by the country of France.

France Remembered

The detailed account of the impresive military and religious funeral ceremonies which took place Nov. 4, 1917. on a hill near Bethelmont, France, was sent Merle Hay's mother by the war department of France. General Bordeaux was speaking for France when he asked that the bodies of the three American heroes be permitted to remain in the soil of France as a victory shrine for France.

When General Bordeaux uttered his words of eulogy over the honored grave of Merle Hay in France, the entire 18th French Division, a section of the artillery, a major of the French chief of staff and other French military organizations, stood attention. Minute guns fired final salute. The guns were fired in defiance toward the tenches of the enemy.

All Fance wept.

CAIRNS BROS. DEFEAT LOCAL BALL TOSSERS

Klemme met defeat at the hands of the fast Seven Cairns Bros. ball team on the local diamond Monday afternoon by the score of 9 to 4. However, the game was interesting and was well played. The locals put up a game fight against the show troopers and have showed wonder-improvement since playing the last game. Gruetzmacher pitched for Klemme with Waterman back of the bat.

Plan Greatest Dam in World

Project to Harness the Colorado River Bigger Undertaking Than Panama Canal.

COST WOULD BE $800,000,000

Propose Developing Hydro-Electric Power on Huge Scale for Distribution Over Wide Area of the Southwest.

Los Angeles, Cal.—The "world's greatest electrical project" is the way some engineers describe the Southern California Edison company's plan for impounding the waters of the Colorado river and developing hydro-electric power on a huge scale for distribution over a wide area of the Southwest.

Edwin O. Edgerton, special counsel for the corporation, formerly president of the California state railroad commission, states the project ultimately would involve $800,000,000, or twice as much as was spent on the Panama canal.

4,350,000 Horsepower.

Generation of a peak load of 4,350,000 horsepower and an annual average load of 2,600,000 horsepower from four development projects along the river will be possible by a flow controlled by a 500-foot dam at the head of Glen canyon, Arizona.

There the main dam would create a lake almost 200 miles long, extending up the nearly level basin of the Colorado to the mouth of the Fremont river. From this point, the river descends 2,800 feet in 400 miles.

At Glen canyon dam, according to plans, a uniform flow of 18,000 second feet would pass through turbines and thence through a power canal for 50 miles, to the mouth of the Little Colorado. This would give a net head of 800 feet and would generate 1,240,000 horsepower.

From the Little Colorado to Kanab creek, a net head of 700 feet could be secured in 85 miles, which would generate 1,090,000 horsepower.

Additional Power Secured.

In the 145 miles between Kanab creek and the Arizona boundary line, at Diamond, a net head of 800 feet could be secured by two high dams. The river would deliver to switchboards about 1,240,000 additional horsepower, according to Southern California Edison engineers.

The fourth development would cover the 120-mile stretch between the Arizona boundary and the Cottonwood valley. This would afford a 500-foot head and deliver 780,000 horsepower.

It is contended that among the results of the project would be:

Absolute flood control.

Provision for irrigation of 2,250,000 acres, of which 1,000,000 acres would be above the canyons.

Three hundred miles of the river made navigable.

The area which could be served with power includes Arizona, Nevada and Utah, more than one-half of Colorado and New Mexico, one-fifth of Idaho and Wyoming and three-quarters of California, with possibly large areas in northern Mexico.

Power would be used for the electrification of steam railroads, as well as for commercial, agricultural, mining and municipal uses, thus saving 90,000 barrels of fuel oil a year.

FROM TRIBESMAN TO BISHOP

Rev. T. M. Gardiner Given Charge of Field in Liberia for Episcopal Church.

New York.—From African tribesman to bishop of the Protestant Episcopal church is the career of Rev. Dr. Theophilus Momolu Gardiner, who was consecrated bishop suffragan of Liberia.

The ceremony took place in the Church of the Incarnation on Madison avenue. The venerable Bishop Daniel S. Tuttle of Missouri, who in his eighty-four years has consecrated 85 bishops, officiated, assisted by Bishops Gailor of Tennessee, Manning of New York, Matthews of New Jersey, and Overs of Liberia.

Preferred Music to Ether During Operation

His own music so soothes Oscar J. Kelley of South Boston, Mass., that he preferred it to ether while hospital surgeons were probing for a bullet in his thigh.

When the doctors began to put Kelley under the influence of an anesthetic he objected strenuously. Then he called for his harmonica, jumped upon the operating table and played gayly while the bullet, which had been fired by his stepson during a family quarrel, was removed.

LEOPARD LOOSE ON STEAMER

Big Cat Scares Passengers of the Granite State on Trip Across the Pacific.

San Francisco.—A leopard which escaped from its cage on the forward deck of the Pacific Mail liner Granite State, which arrived here from Calcutta, India, created excitement among the passengers and crew.

The big cat broke loose during a storm and was captured after it had been locked in the officers' messroom and prodded into a cage.

The Granite State carried a large collection of wild animals, valued at more than $200,000, which are to be distributed among American zoos and to motion picture firms.

Find Nation's Oldest "Flat"

Apartment House 1,000 Years Old Is Discovered in New Mexico.

HOUSED NEAR 10,000 PERSONS

Scientists Say It Will Take Five Years to Unearth Remains—Discloses Civilization Comparable With That of Today.

Santa Fe.—Evidence that a race once dwelt in the Chaco canyon, in New Mexico, possessing a degree of civilization comparable with our own has been unearthed by archaeologists working under the direction of the School of American Research of Santa Fe. The discoveries to date—it will be fully five years before the entire find is disclosed—consist of an apartment house containing about 1,000 rooms, together with domestic implements.

Strangely enough, there is no trace of the people—and the scientists say there must have been fully 10,000 of them—in the way of burial ground or skeletons. It is conjectured that the inhabitants left the valley in leisurely fashion, as there are no evidences of flight, when at the very zenith of their development. This exodus is estimated to have taken place fully 1,000 years ago, and, so far as the investigators have been able to learn, the people stepped out of history when the janitor turned the key in the gigantic apartment house they vocated.

As Big as Two City Squares.

The shifting of sands which hid the structure for centuries gave scientists their first clue to the existence of a hitherto unknown race. Excavations disclosed a building equaling in extent about two ordinary city squares and so well constructed as to defy the ravages of time. Its curved front swings in an arc of 700 feet, and the 50,000,000 pieces of stone which form its walls bear every evidence of having been quarried and carefully cut. All that is known now is that the community consisted of approximately 10,000 persons and that they cultivated some 3,000 acres of land.

Construction of the Best.

The walls of the building are re-enforced by heavy timbers just as steel rods are used today for that purpose in concrete construction. Excavation in the inner court revealed an amazing labyrinth of kivas, cists, shafts and variously walled spaces.

The floors and ceilings were constructed by first laying heavy supporting timbers across from wall to wall. Upon these were laid smaller logs, placed closely side by side; over these came thin cedar slabs, next a layer of cedar bark and finally a solidly packed layer of earth. Some of the rooms show a remarkable state of preservation of both masonry and timbers.

Flogged by Judge.

Santa Ana, Cal.—Flogging with a rawhide was the punishment meted out in open court to Juan Torres at his own request when he pleaded guilty to beating his wife. Justice J. B. Cox administered three lashes onto Torres' back, raising three large welts.

Home of Man Who Refuses Title

This old colonial home in West Town, Pa., is the home of Thierry Van Castile Phillips—"Squire" Phillips, since he recently was elected justice of the peace, member of an old and well-to-do American family, descended from the Polish Grand Duke Sakrovolaski Phillipi Moro, who fled to America generations ago. The eldest son of this duke went to England upon the death of his father, who had accumulated millions in the United States, and assumed the title of Grand Duke Moro de Moro, to which he was entitled. His last descendant died recently, and the title, with his fortune, descended to the West Town 'squire. But the 'squire has refused it.

THIS GIRL RESENTS HERO STUFF

"Makes Me Tired," Says Girl Who Balked Burglar.

With Her Father's Revolver She Made Thief Drop His Plunder, but He Outran Her.

Fort Worth, Tex.—Rose Breedlove, a nine-year-old girl at Alba, near Fort Worth, who stopped a burglar with her father's six-shooter after he had gathered up the silverware in the home of her parents, says "hero stuff makes her tired." After one day of it she has declared a strike against having her picture taken, publicity, and explaining to visitors.

One day the family was away from home, leaving Rose playing with her dolls alone in the big house. She saw a burglar enter, and she hid under the covers of her bed, but left a peekhole through which she saw the intruder ransacking the place.

When he gathered up the silverware she could hardly restrain herself. When she saw him walk across a section of the floor just varnished, which her mother had warned her not to step upon, she slipped from her hiding place, got her father's big weapon and went into the dining room and holding the pistol in both hands, ordered the robber to hold up his hands, which he promptly did. After compelling him to replace the plunder, she ordered him into a closet, but instead he slipped through the kitchen door and fled, with Rose in hot pursuit, clad only in her nightie. But the burglar man could run faster and got away.

The family returned a few minutes later to find Rose in the yard still holding the gun and regretting her failure to capture the man.

Pittsburgh, Pa.—Harold Bauer, famous pianist, returned a draft of $1,800 and refused to finish a concert here when children in the audience persisted in annoying him with their restlessness.

NEW DEFENSE FOR HONOLULU

Big Guns to Be Rushed by Rail About Island of Oahu—Plan New Fort.

Honolulu, Hawaii.—Two important announcements of further plans for the defense of Oahu, the island on which Honolulu is situated, were made recently by army headquarters here. One calls for formation of a railway artillery battalion and another contemplates the establishment of a new fort to command the entrance to Pearl harbor, the navy's great base six miles from this city.

Twelve-inch mortars will be used by the railway battalion and the tracks of the Oahu railroad will be utilized to transport them. To strategic points on the island not touched by the railways at present, spur tracks will be laid, so that, in case of emergency, heavy guns may be rushed to any section of the coast line as fast as locomotives can haul them. The railway mortars have a range of 15,000 yards.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

WHAT ABOUT GOSSIP?

Be thou as chaste as ice, as pure as snow, thou shalt not escape calumny.—Shakespeare.

THE trained nurse who is worthy of her profession sticks pretty strictly to the etiquette that makes the ruling that the nurse and the doctor should regard as confidential any information or impression gained of their patients or patients' families as a result of their professional relationships. While the young nurse is in training she usually learns to her grief the embarrassing results of indulging in what seems sometimes like harmless gossip concerning her patients; so that by the time she goes out on cases in private homes she is usually pretty well cured of any natural desire to gossip.

But what about the others who come into our homes who sometimes learn things about us and our affairs that we might not wish to have bandied about the neighborhood? What a blessing it would be if they, too, had been given instruction in a sort of professional etiquette that would seal their tongues! It may not be that there are bits of information that it would really embarrass us to have known, but in the course of telling, many facts become distorted and twisted sometimes past all recognition.

But whether or not you are bound by professional etiquette, if your work takes you into other people's homes or gives you a special insight into other people's lives, remember that common courteousness forbids you to make food for gossip of this information. Remember that many a seamstress and dressmaker has brought real unpopularity on herself because she has gained the reputation of being a gossip.

And remember that it is just as ill-bred to "pump" for the bits of gossip that you crave as it is to spread them.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

ROSALIE.

ROSALIE and Rose appear to be of the same general root, the more euphonious name of Rosalie being a French extraction. A curious point is that the color rose is irrevocably associated with the name Rosalie, as well as Rose.

The history of the name Rosalie is most interesting. It first was given to fair women of France and it was there that St. Dominic arranged a series of devotions by means of telling beads upon a string. These formed the rosarium, or rose garden, or freely translated, delights of devotion. The Rosarium has a day to itself in the Roman calendar and may possibly have named the transatlantic Saint Rose di Luina, which gave rise to Rosita. Switzerland calls her Rosel and France Rosine or Rosette. In England she is Rosanne, sometimes Rosabella, meaning "beautiful rose." From Italy comes Rosina and Rosetta. A more rare, but no less charming interpretation is Rosealba, signifying "white rose."

There are red roses and white roses and yellow roses in nature, yet the real rose is the deep pink and the bearer of the name or any of its derivatives should surround herself with the flowers if she would wish the psychic atmosphere which their quality insures. Her jewel is that rare beautiful gem, the flame-hearted ruby. It denotes pride and haughtiness and appoints Tuesday as the fortunate day for its wearer and three the lucky number.

Clinging to Prose.

"I have observed that you never quote Shakespeare in your speeches."

"No," replied Senator Sorghum; "I have trouble enough keeping my facts and figures straight, without being called down by people who specialize on pointing out misquotations."

Not Strange.

Miss Fuss—Yes, that's a photo of my maiden aunt. Perhaps you saw her name in the papers last week? She frightened away a burglar.

Miss Rood (closely inspecting the portrait)—Did she? Well, I don't wonder at it.—Tit-Bits.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"A CERTAIN PARTY."

"HOW do you know that that is so?" "A certain party told me."

The foregoing conversation was overheard recently. The second speaker should have said: "A certain person told me," not, "a certain party."

This use of the word "party" for "person" is quite common, but it is condemned by all authorities on English grammar as being incorrect. Some, indeed, go so far as to call it vulgar.

It should be remembered, however, that the word "party," meaning an individual, has a proper place in English. We may speak of "a party to a contract," or "the party of the first part," or "the parties to the marriage." Woolley's "Handbook of Composition" gives the following sentence as an example of the correct use of the word: "The parties to the marriage were both young." The following is given as incorrect: "The party who wrote that article must have been a scholar."

A LINE O' CHEER

By John Kendrick Bangs.

NO EMBARGO.

WHEN Charon comes to take me o'er
The River on his Ferry
I hope I'll face that other shore
With spirit blithe and merry.

And take the wholesome things of earth,
Its love and joyous laughter,
And all its glorious gifts of worth
Along to the hereafter.

For that's the wealth that never dies,
And holds the joyous leaven
That man may carry as he plies
The path 'twixt Earth and Heaven.

Consuelo Flowerton

Beautiful Consuelo Flowerton, the popular "movie" star, is no stranger to the theatergoers. Besides doing big parts in some of the screen plays, she is recognized as a prominent member of a well-known theatrical organization.

How It Started

"A-1"

THE expression "A-1" or "A number 1" came from the insurance rating symbols used by the firm of Lloyd's, in London. In their rating of a ship they considered the hull and the rigging separately. "A" meant "Hull in first-class condition;" "1" was the symbol for perfect rigging. The combination of the two, therefore, meant the highest possible rating.

The SANDMAN STORY

GREEDY TIM.

GREEDY TIM was a little squirrel and one day he overheard his mother saying she was going to give a big dinner soon and must begin to get the cakes and pies and things ready at once.

The finest thing that Mrs. Squirrel was to give her guests was a huge nut pie—a pie so big that it would take two of the family to place it on the table.

Greedy Tim dearly loved nut pie, and he watched his mother make it, with great longing for a piece, but

his mother told him it was for the party and that she would bake him a little pie all for himself. This Greedy Tim did not want at all; he wanted a big piece of the company pie.

The night of the party Tim went to bed early, as all little squirrels should do, but he did not go to sleep. Instead he stole down the back stairs and into the pantry and jumped up on the shelf where the big pie stood.

He did not cut the pie; he nibbled at the undercrust until he had a hole made big enough for him to get inside and then he began to eat. He had not eaten very much, though, before he heard a sound—some one was coming—and Tim kept very still inside the pie.

The next thing he knew the pie was being carried by his mother and father to the dining room and he heard all the guests exclaim: "Oh, what a beautiful pie!"

But the next thing he heard made him tremble so he was sure the pie must be shaking, for his father began to sharpen the knife with which he was to cut the wonderful pie.

"You must make it very sharp," he heard his mother say, "because the crust must be cut right through and not broken."

Tim began to tremble more, and then his father put the knife on the top crust and poor Tim could stand no more.

Up he jumped, right through the top crust, and frightened the guests almost out of their senses; but he did not frighten his mother, for no sooner had Tim showed his head than Mrs. Squirrel grabbed him and out into the kitchen she marched poor Tim, trembling more than he had inside the pie.

"So you thought you would eat up my nice nut pie, did you; you greedy boy," she said, as she tingled Tim's legs with a switch.

Tim was not only punished with the switch, but he did not get any of the left-over goodies from the party the next day, as his brothers did, who stayed in bed and slept, as good squirrels should, when the grownups were having a party.

Get Back Your Health

Are you dragging around day after day with a dull backache? Are you stiff and lame mornings—subject to headaches, dizzy spells and sharp, stabbing pains. Then there's surely something wrong. Probably it's kidney weakness! Don't wait for more serious kidney trouble. Get back your health and keep it. For quick relief get plenty of sleep and exercise and use *Doan's Kidney Pills*. They have helped thousands. *Ask your neighbor!*

An Iowa Case

Geo. W. Smith, ex-deputy marshal, 206 Second Ave., Red Oak, Iowa, says: "I was seized with a sharp pain across my back. I had to give up and go home. I remained in bed for four days. I was dizzy and everything swam around. I couldn't pass the kidney secretions freely enough and they pained in passage. I got Doan's Kidney Pills. They quickly relieved me and two boxes cured me. I have never since had a return of the trouble."

The Standard Blood Purifier

Youth's Criticism.

Undoubtedly, when one is fourteen one's mind reaches conclusions unbiased by the opinions of the world at large. To an adult friend the small boy divulged the interesting information that he had read Ibsen's "The Doll's House."

"And what did you think of it?" asked his confidante.

He nodded his head approvingly. "Good!" he said. "Very good! But rather dime-novelish, don't you think?"—New York Sun.

ASPIRIN

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicycacid.

The Gambling Urge.

Sharpe—It is impossible to keep some men from gambling.

Thorne—What causes you to say that?

"They broke up the poker games in our town and put a ban on crap-shooting."

"Well?"

"And the next day I saw a couple of men following a woman and betting odd or even on the number of times she fixed her hair while she walked a block."—Richmond Times-Dispatch.

To Have a Clear Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.

What Happens to 'Em.

An observant Boston matron was speaking in condemnation of the flirt to a young girl of her acquaintance.

"The flirt," said she, "has a good time in the present—a sort of good time, according to her view—but what about the future, my dear? Many a girl is on the shelf today because she kept men on the rack yesterday."

AID BETTER BULL CAMPAIGN

Kansas City Chamber of Commerce Offers $2,000 in Prizes for Replacing Scrub Sires.

(Prepared by the United States Department of Agriculture.)

An illustration of the earnestness with which various states and local organizations have taken up live stock improvement work, especially in connection with purebred sires, is shown by the work in Missouri. The extension service of the Missouri College of Agriculture started a better-bull campaign in January, 1920, and so successful were the results of the work during the year that the Kansas City chamber of commerce appropriated $2,000 to be used in cash prizes this year.

The prizes are to be awarded to the four counties which replace the greatest number of scrubs with purebred bulls, $1,000 being the first prize, $500

The Purebred Dairy Sire When Introduced Into a Scrub or Grade Herd Soon Brings About a Phenomenal Change.

the second, $300 the third, and $200 the fourth. To obtain a prize, however, a county must replace at least 25 scrub bulls.

In an announcement of the contest received by the United States Department of Agriculture, state officials directing the work say they have concentrated on better bulls because they think the greatest good will result from efforts along this line. The announcement states that any county in the state is eligible for entrance in the contest. Awards will be made on the basis of the number of scrub bulls of breeding age replaced by registered bulls. A scrub is defined as one that is not registered or eligible for registry.

Any county which at any time during the year completes its work with 100 per cent purebred registered bulls will be entitled to first prize; but should more than one county show 100 per cent registered bulls the various counties will be entitled to first, second, third, and fourth prizes, respectively, in the order in which they complete the work. The counties competing in the contest are to form organizations, under the leadership of the county agent, to promote the work. All questions arising in the contest will be referred to a better-bull committee of the Missouri College of Agriculture for settlement, and the decision of this committee will be final.

A monthly report showing the name and address of the owner of the scrub bull replaced and breed of the registered bull in which an interest has been purchased will be forwarded on the first day of each month to the state project leader. At the end of the year a final report, certified by the county agent, will be sent in, giving the names and addresses of owners of scrub bulls which have been replaced, together with the breed, name, and registry number of each registered bull in which the contestants purchased an interest.

CHURN NUMBERS ARE USEFUL

Makes It Simple Matter to Separate Different Churnings and Sell According to Score.

The use of churn numbers, so that the receivers of butter can more readily sort out separate churnings, is urged upon creamery men by food-products inspectors of the bureau of markets, United States Department of Agriculture. In a lot of butter recently examined by these inspectors the score varied from 88 to 92. As no churn numbers were shown, the only way the receiver could separate the butter was by examining every tub. If the churn numbers had been shown, it would have been a simple matter to separate the various churnings and sell them according to score

It is not possible to take time to examine every tub, so the butter is sold according to the samples taken and at a discount if the samples vary widely. If there should be just one poor tub in the shipment and the sampler happens upon it, the whole shipment would suffer, while if churn numbers are used only the tubs in that churning would receive the lower score.

ATTENTION TO YOUNG CALVES

Give Only Warm Milk While Young and Begin Feeding Grain After the Second Month.

Feed only warm milk while calves are young. Gradually begin feeding proper grain after the second month. Do not allow them too much grass. Give plenty of pure water, and never allow exposure to rain or extreme cold wind.

POULTRY FLOCKS

GUINEAS NEED LITTLE CARE

Fowls Are Usually Raised in Small Flocks on Large Farm—Pearl Is Most Popular.

(Prepared by the United States Department of Agriculture.)

Many hotels and restaurants in the large cities are eager to secure prime young guineas, and they are often served at banquets and club dinners as a special delicacy. When well cooked, guineas are attractive in appearance, although darker than common fowls. The flesh of young birds is tender and of especially fine flavor, resembling that of wild game. Like all other fowl, old guineas are very likely to be tough and rather dry.

A few of the large poultry raisers, particularly those who are within easy reach of the large Eastern markets, make a practice of raising a hundred or so guineas each year, but the great majority of guineas are raised in small

Male and Female Guinea Fowl Differ Little in Appearance. The Helmet and Wattles of the Male (on Left) Are Larger Than Those of the Female (on Right).

flocks of from 10 to 25 upon farms in the Middle West and in the South.

Domesticated guinea fowl are of three varieties—Pearl, White and Lavender. The Pearl is by far the most popular. It has a purplish-gray plumage regularly dotted or "pearled" with white and is so handsome that frequently the feathers are used for ornamental purposes.

Guinea hens usually begin laying in April or May, those in the South laying earlier than those in the North. A short time before the opening of the laying period the hens with their mates begin searching for suitable nesting places among the weeds and brush along the fences or in the fields. In this search the male takes as active an interest as his mate, and when a suitable location is found both help to dig out the nest and make it into suitable shape.

Each day as the hen goes to the nest to lay the male accompanies her and remains nearby until she comes off. Should anyone approach he shrieks in warning and thus betrays the whereabouts of the nest, which might otherwise be difficult to locate. If several guinea hens are mated with one male they usually all lay in the same nest, but sometimes a hen after mating will wander off by herself to make her own nest. At times a male bird, after helping one hen to make her nest, will then desert her and pair off with another hen to make another nest.

From 20 to 30, and often more, eggs are laid before the guinea hen becomes broody, at which time she can be easily broken of her broodiness by removing the eggs from her nest, when she will soon begin laying again. If not allowed to sit, guinea hens will continue to lay throughout the summer, laying from 40 to 60 and in some cases 100 eggs during the season, say poultry specialists of United States Department of Agriculture.

Ordinary hens are used, commonly, to incubate guinea eggs, but guinea hens, turkey hens, and incubators also can be employed successfully. The usual setting for a guinea hen is about 14 eggs; for a hen of the general purpose breeds, such as a Plymouth Rock, 18 eggs; and for a turkey hen, about 24 eggs. The incubation period for guinea eggs is 28 days, although frequently they start hatching on the 26th day and are all hatched by the end of the 27th day.

If the nest in which the guinea hen becomes broody is safe from any disturbance, she may be trusted with a setting of eggs, and more than likely will hatch out every egg that is fertile, provided all hatch at about the same time. As soon as the guinea chicks begin to leave the nest the hen will leave with them, and any eggs that are late in hatching are ruined unless they are placed in an incubator or under a broody hen before they become chilled.

DUCK NOTES.

An overcrowded pen of ducklings induces feather-pulling.

* * *

At eleven weeks of age ducklings usually start their molt.

* * *

It is just as necessary to avoid overcrowding among ducks as it is with hens.

* * *

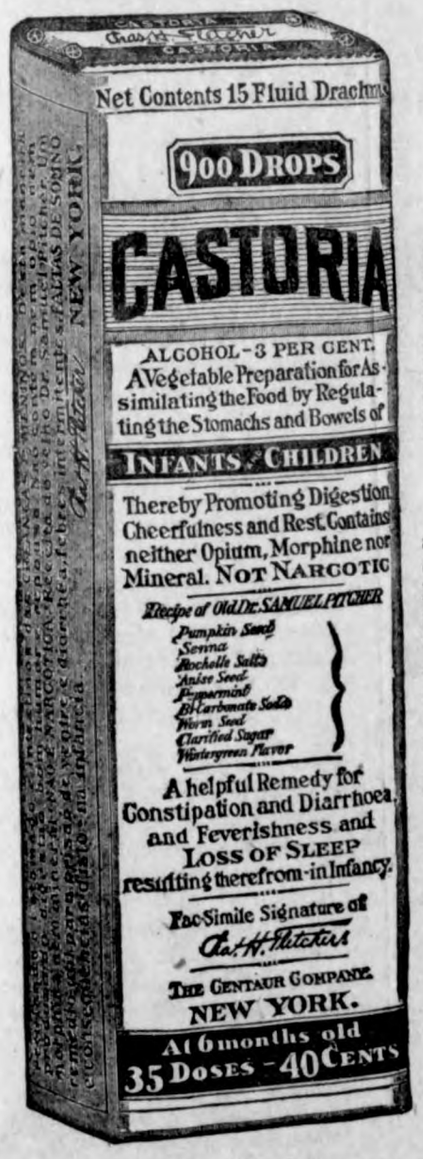
A duck retains her productiveness twice as long as a hen. At six years of age she is as vigorous and productive as a hen three years old.

Shame on Them.

PERHAPS there are a few mothers who do not know the virtues of Fletcher's Castoria. Perhaps there are a few who know that there are imitations on the market, and knowing this demand Fletcher's. It is to ALL motherhood, then, that we call attention to the numerous imitations and counterfeits that may be set before them.

It is to all motherhood everywhere that we ring out the warning to beware of the "Just-as-good". For over thirty years Fletcher's Castoria has been an aid in the upbuilding of our population; an aid in the saving of babies.

And yet there are those who would ask you to try something new. Try this. Try that. Even try the same remedy for the tiny, scarcely breathing, babe that you in all your robust womanhood would use for yourself. Shame on them.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Your Friend, the Physician.

The history of all medicines carries with it the story of battles against popular beliefs: fights against prejudice: even differences of opinion among scientists and men devoting their lives to research work; laboring always for the betterment of mankind. This information is at the hand of all physicians. He is with you at a moment's call be the trouble trifling or great. He is your friend, your household counselor. He is the one to whom you can always look for advice even though it might not be a case of sickness. He is not just a doctor. He is a student to his last and final call. His patients are his family and to lose one is little less than losing one of his own flesh and blood.

Believe him when he tells you—as he will—that Fletcher's Castoria has never harmed the littlest babe, and that it is a good thing to keep in the house. He knows.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

"What is meant by senatorial courtesy?"

"I'll listen to your speeches if you'll listen to mine."—Louisville Courier-Journal.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Jud Tunkins.

Jud Tunkins says maybe the fact that people don't read Dickens and Thackeray as much as they used to is mebbe the fault of the book agents.

BAND CONCERT WEDNESDAY NIGHT

Klemme and Vicinity

The Northrn Lumber yards are being all remodled here and when the work is completed will present quite a different appearance. A new office will also be built.

Mr. and Mrs. E. S. Kahrs drove to Dolliver, Iowa, Sunday for a visit with old friends. They were in business at Dolliver before coming here.

Henry Kiefer and family drove to Webster City last week and returned Saturday. Mr. and Mrs. Paul Grange and daughter returned with them for a copule of days visit.

$100 in Gold given away every Sunday at Bayside Amusement Park. Come get your share and see the fun. Free picnic grounds, Boating, Bathing. Fishing, better than ever. J23tf

Mrs. Joe Wenck and daughter, Maude, Mrs. F. E. Blackstone and daughters Maude and Pauline drove down here from Garner last Friday to call on Klemme friends.

Messrs. Ward and Weighton, of Sioux City were in Klemme Monday on business. These are the men who had the cantract for the disposal plant here.

M.O. Hocum and family left last Friday for Varina. and Newell, Iowa, for a visit with Mart's brothers. The Hocum family returner to Klemme again Tuesday.

Clark Bredbenner and J. B. Morrison drove to Mason City last Friday in Clark's big truck to get a load of goods. Clark can beat the freight rates all right.

Mr. and Mrs. Elmer Wentland of Charles City were over Sunday visitors at the home of Rev. and Mrs. A. H. Meyer. Mrs. Wentland and Mrs. Meyers are sisters.

Miss Esther Jante, the hello girl, spend Sunday with Garner folks. She was accompanied back to Klemme by Mr. and Mrs. Will Heff and Miss Conway of Garner, who brot her back in their car.

Mrs. Mae Thuermer. of Auroro, Indiana, and Miss Emma Stuart, of Leland, Iowa, returned to their homes Monday morning after a two weeks visit at the Asa Gibbs and Mrs Arthur Gibbs homes.

Henry Anderson came from Iowa City Monday to play ball with the Klemme team and also to spend a little time visiting with his folks. He played second base on the Iowa University team this year.

Miss Emma Wille went to Valley Center, Minn., Monday morning for a few days visit with relatives. Her mother, Mrs. Henry Wille has been visiting there for some time and will return to Klemme with her Friday.

Rev. and Mrs. Meyer entertained at a Sunday dinner the following relatives: Mr. and Mrs. Elmer Wentland of Chas. City; Mrs. Meyer's father and mother and sister Ruth of Toma, Wis., and her other sister, Helen Lenz of Minneapolis.

The Reform church had an ice cream social last week on Wednesday evening on the church lawn which was well attended. They had the lawn all lit up with electric lights and had long tables where they served the ice cream and cake.

Rev. Brenner, of Sioux City was here Sunday to conduct communion services at the First Methodist church. In the evening he conducted the services in the city park. A large audience was out for both the services.

Last night the ladies of the Methodist Episcopal church had an ice cream social on the lot east of the Wellemeyer store. Ice cream and cake were served to a hungry crowd and the ladies realized a neat sum for their church work. The lot was well lighted with electric bulbs.

Art Wellemeyer is remodeling the interior of his store in the ladies furnishings department. We have not "doped" it all out yet but when the work is finished we will let our readers know what he is doing. A sign painter was also at work on the outside of the building painting a sign on the glass but at the time of this writing it was no finished so that will give us two items to write about in the next issue of the Times.

Rev. Meyer attended church Sunday. Now that seems like a queer statement regarding a preacher but it is this way: Rev. Meyer has been laid up a few weeks with a broken leg and has been unable to preach at his church or even attend but he made the journey Sunday in his wheel chair. Week days he raves with autos on Main street. We suggested that he put asail on the chair and let the wind push him around, but he made some remark or other that if an editor was around the wind wouldn't need to blow.

SAVINGS CLUB ON BOOM

Dollar-a-Week Plan for Buying Uncle Sam's Securities Gains Big Headway.

The Dollar-a-Week Government Savings club has become the most universal organization in the United States. Its members range from Maine to California and every day brings new strength to it. The Seventh Federal Reserve district was one of the first of the twelve Federal Reserve districts to get off to a flying start in the organization of Dollar-a-Week clubs, and now it ranks high in the list of districts.

The Dollar-a-Week club is taking firm root in industrial plants and stores. Workers group themselves together and make regular purchases every week of the new $1 Treasury Savings Stamps. Membership requirement in a club calls only for the purchase of one of the stamps every week. Four of these $1 Stamps, with a few additional cents, can be exchanged for a $5 Government Savings Stamp, or twenty of them for a $25 Treasury Savings Certificate, which bears the rate of 4 per cent interest compounded quarterly, if held till maturity. These $25 Certificates are short-term, rock-bound, absolutely safe, virtually tax-free, easily redeemable in case of need, and they never depreciate, but always are worth more than was paid for them.

No applicant for membership in a Dollar-a-Week club is ever "blackballed." Every member becomes richer for joining. Any postmaster can "initiate" a new member, and anyone can join at any organization or industry where government savings securities are sold.

In the last year, according to the Savings Division of the U. S. Treasury Department, half a billion dollars has been lost to Americans through fraudulent stock and oil deals. Think of it! If this money had been diverted to government savings securities, it would have gone into the channels of legitimate trade and industry and helped the population as a whole.

The Dollar-a-Week Club, composed of purchasers of Government $1 Savings Stamps is growing apace, until now it extends to all parts of the country It is particularly strong in industrial communities, stores and offices. Members agree to buy one of the Stamps each week. Any Postmaster can "initiate" a member by putting him on the roll.

No umbrella ever manufactured can measure up to Treasury Savings Certificates as a "rainy day" safeguard.

Long Train.

There were 678,211,904 tons of coal mined in the United States in 1918, says a correspondent. If all this coal were put into one train of 50-ton cars, this train would consist of 13,562,238 cars, and it would take 271,284 engines to pull it. This is based on the hauling capacity of the average American engine. This train would be 342,722 miles long, and would encircle the earth over 13 times at the equator.

Watered Stock.

Jimmie (visiting his uncle in the country)—"Oh, Uncle George, your hired man is not honest. He let th' cows drink a whole lot of water just before he milked them."

Bobbed Hair Wins Husbands.

It may be possible girls are bobbing their hair that it won't take them so long to get ready when an automobile goes outside. Many a husband has been lost to a girl because she used too nine hairpins.

NOTICE TO CONTRACTORS

FOR THE CONSTRUCTION OF LATERAL NO. 3 OF DRAINAGE DISTRICT NO . 9, HANCOCK COUNTY, IOWA.

Notice is hereby given that the Board of Supervisors of Hancock County, will meet at the Court House in Garner, Iowa, on the 16th day of August, A. D., 1921, at one thirty o'clck P. M. to let to the lowest responsible bidder the contract for the work and construction of Lateral No. 3 Drainage District No. 9, of Hancock County, Iowa, said work to be let specifying the work to be done and the time fxed for the commencement and completion of the same, to wit:

Length	Size	Av. Cut
2900'	16"	5.8
575'	14"	5.4

Concrete Bulkheads 10 cu. yd.

Alle tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2. All tile must pass the specification for Drain tile of the American Society for Testing Materials.

3. Whenever the tile improvement is laid in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to back fill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specification are on file with the County Auditor.

5. Work to be commenced thirty days from date of letting of Contract. Contract will be completed by Nov. 1st. 1921.

All ditches and drains to be constructed in all respects in accordance with the plat, profile and specification of the District filed by the Engineer in the Auditor's office subject only to such changes and alteration as may be made provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1:30 o'clock P. M. of the 16th day of Aug., 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids must specify prices for tile alone, for construction work alone, or for both tile and construction.

The Board will at their decision, let the work as a whole to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amoun of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENTS WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa. within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof, and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five percent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage Dist. No. 9, together will all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty four hours after demand and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 25th day of July, 1921.

CHRIS JACOBS,
County Auditor.

DRESSMAKER MADE WELL

Followed a Neighbor's Advice and Took Lydia E. Pinkham's Vegetable Compound

Vernon, Tex.—"For three years I suffered untold agony each month with pains in my sides. I found only temporary relief in doctor's medicine or anything else I took until my husband saw an advertisement of Lydia E. Pinkham's Vegetable Compound. I mentioned it to a neighbor and she told me she had taken it with good results and advised me to try it. I was then in bed part of the time and my doctor said I would have to be operated on, but we decided to try the Vegetable Compound and I also used Lydia E. Pinkham's Sanative Wash. I am a dressmaker and am now able to go about my work and do my housework besides. You are welcome to use this letter as a testimonial as I am always glad to speak a word for your medicine."—Mrs. W. M. STEPHENS, 1103 N. Commerce St., Vernon, Texas.

Dressmakers when overworked are prone to such ailments and should profit by Mrs. Stephen's experience.

Write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., about your health. Your letter will be opened, read and answered by a woman and held in strict confidence.

NEWS REVIEW OF CURRENT EVENTS

Japan, Reassured, Is Expected to Enter the Conference at Washington.

MAY BAR SOME QUESTIONS

Britain Offers Southern Ireland Dominion Rule Within Empire—New Crisis Over Upper Silesia—Governor of Illinois Indicted for Alleged Embezzlement.

By EDWARD W. PICKARD.

Japan, self-conscious, rather suspicious and knowing both the strength and the weakness of her position in the Orient, has been withholding her acceptance of President Harding's invitation to the Washington conference in so far as the discussion of Pacific problems is concerned. But repeated conversations between Secretary Hughes and Ambassador Shidehara are serving to dissipate her vague objections and it is believed her complete acceptance will not be much longer delayed. Mr. Hughes made it clear to the ambassador that the sovereignty of Japan can assert itself at the conference as freely as that of any other power, that the United States has no disposition to draw hard and fast lines with regard to the subjects that shall be discussed and that it would be most unfortunate if a hostile or suspicious attitude should develop before the conference begins. It is understood, at this writing, that the mikado's cabinet has virtually agreed that Japan shall enter the conference without restrictions, having faith in the good intentions of the other participants.

The Japanese people, however, and their prominent leaders, are not unanimous in approval of that course, many fearing the conference will be dominated by the Anglo-Saxons and will result in the strangling of Japan's economic and political development in Asia. There is also a tendency, not confined to unofficial circles, to insist that the matter of race equality be made an issue at Washington and that the emigration rights of the Japanese be definitely fixed. It is reported, too, that the cabinet has decided the Japanese representatives shall not enter into discussion of questions affecting the sovereign rights of participating nations or of the Shantung and Yap questions, which it holds were settled by the Paris peace conference. So far as Yap is concerned, it is believed the negotiations between the United States and Japan will have been concluded and a friendly settlement of the dispute reached long before the conference assembles.

The invitation to China to participate in the discussions of Pacific questions has brought on some complications. In the first place it is responsible for much of Japan's suspicion. Then, too, it was directed of course to the Peking government and now Dr. Sun Yat Sen's constitutional government of South China protests, through its representative in Washington, that the Peking government is not qualified to represent the whole of China and the Canton government also should be asked to participate.

Premier Lloyd George, it is announced in London, will attend the conference unless the unforeseen happens. With him, presumably, will be Foreign Secretary Curzon; and it is likely the dominion premiers will be there too, though the British empire will be represented as a unit. Great Britain has abandoned its tentative plan to have a preliminary conference in London on Far Eastern matters.

"President" Eamonn de Valera had another meeting with Premier Lloyd George Thursday, and soon thereafter departed for Ireland carrying the government's final offer of home rule for the island within the empire, practically like that enjoyed by South Africa. This he will submit to the Irish "republicans" whose decision, he has asserted, he will abide by. The plan was first given in detail to the British cabinet and received its almost unanimous approval. Premier Smuts of South Africa again had taken a hand in the settlement and had suggested fiscal alterations which were adopted.

Thus the prospects for Irish peace are fairly good, despite the fact that Ulster and the extreme Unionists remain to be satisfied. Sir James Craig, the Ulster premier, after meeting Lloyd George in London, returned to Belfast to consult his government. He declared Ulster would not yield its right of self-determination, that its separation from southern Ireland was an accomplished fact, and that "it now only remains for Mr. de Valera and the British people to come to terms regarding the area outside of that of which I am prime minister." He emphatically repudiated the Sinn Fein argument that Ulster is in the minority and must bow to the majority in Ireland, admitting the unity of the island and accepting self government, if it gets it, from Ireland as a whole. Up to date De Valera and his colleagues have not abandoned this Sinn Fein position. It remains to be seen which side will yield. For the moment, at least, the attitude of the people of southern Ireland is more peaceful and conciliatory than that of the northern Irish.

Upper Silesia comes to the front again, with prospects of renewed trouble which may result in another outbreak of hostilities and even in a break among the entente allies. Convinced that the situation there was extremely critical, France asked Great Britain and Italy to join her in sending reinforcements to the region. The British foreign office replied belittling the danger and proposing that a meeting of the supreme council be held on July 27. To this Premier Briand responded with a note announcing that France intended to reinforce the Upper Silesian contingent and again asking Great Britain and Italy to follow suit, insisting on the necessity of a committee of experts to hold a meeting immediately to investigate Upper Silesia and to draft a frontier, and announcing that France was not prepared for a supreme council meeting until the experts have reached a decision, and the allies are in a position to enforce the decision as to the Upper Silesian boundary by adequate forces in the disputed territory. Dispatches from Paris said 10,000 troops were to be sent at once to Upper Silesia, with artillery, tanks and planes.

There was a chance that America would be called on to mediate. Our position in rejoining the supreme council was that we would take no part in questions affecting territorial and frontier adjustments unless general peace were threatened. Some diplomats believe that point has been reached. Naturally there is intense satisfaction in German official circles over the prospects of a split among members of the entente.

The advance of the Greeks in Asia Minor has been continuous, the Turk Nationalists retiring before it without putting up many serious fights. Last week King Constantine's forces reached and occupied the important railway junction of Eski-Shehr. This cuts the rail route to Angora, the capital of the Kemalists, but the railways already have been destroyed. Military experts in Constantinople believe the Turks plan to draw on the Greeks until their lines are unduly extended and then try to exhaust them by a series of irregular attacks.

In Albania the Mirdites, a Christian tribe, have proclaimed an independent republic and elected a president. The Albanian government has ordered a general mobilization to repress the rebellion of the Mirdites.

The United States has been sounding the German government on the proposal to negotiate a separate peace in accordance with President Harding's program. The pact, it is understood, will embody such features of the Versailles treaty as are not re-of settlement of war accounts to be virtually identical with those imposed by the allies. It is believed Berlin will see the wisdom of signing such a treaty without great delay.

Meanwhile a movement for the recall of the American troops in Germany has started in the senate. Mr. Borah introduced a resolution calling on the secretary of war for all data as to the size of the army of occupation, the cost of maintaining it and the payments of the German government for its expenses. The senate promptly adopted the resolution without a roll call or a dissenting voice.

The tariff bill, having been passed by the house, is now before the senate but if present plans are followed that body will not act on it finally until legislation to revive taxes has been enacted. This is in accord with the understood wish of the administration. The prospect for considerably lower taxes, however, was dimmed somewhat by the rather startling statements made by A. D. Lasker, new chairman of the shipping board. He asserted that his investigations have revealed the fact that the board operated last fiscal year at a net loss of $380,000,000, and predicted that during the present fiscal year the loss from operations alone will be $150,000,000. Mr. Lasker said the records of the board were in deplorable condition and that if it had been a private business concern the corporation would have been in receiver's hands long ago. He indicated that appropriations of $300,000,000 would be needed for this year, but later he asked congress for only $125,000,000 for the next six months. The formal request for this sum was made through Director of Budget Dawes and with the approval of President Harding.

Prodded to quick action by a preliminary report of the special commission on soldiers' relief, which scored the government for neglect of disabled veterans, the senate on Wednesday passed the Sweet bill without a dissenting vote. An amendment was adopted designed to transfer from the ex-service men to the government the burden of proof in establishing the origin of disabilities. In some other respects the bill as passed by the house was altered. As passed by the senate the measure provides: For the creation of a veterans' bureau, responsible directly to the President, consolidating all soldier relief agencies; for the decentralization of the compensation and insurance machinery now operated by the war risk bureau, and for the liberalization of compensation awards so as to relieve any former soldier suffering from ailments for which the war service was responsible.

Director of the Budget Dawes has informed President Harding that it will be possible to save about $112,512,628 in the government expenditures for the current year. This will be done mainly through curtailing departmental forces and equipment, and the work toward this end already is well under way. The largest estimated saving—$30,342,119—will be in the Treasury department. In the Interior department it will be $19,827,101; war risk bureau, $16,534,523; War department, $15,000,000; Navy department, $10,047,891; postal service, $14,920,421, and so on through the list.

Illinois provides a sensation of considerable magnitude through the indictment of her governor, Len Small, and lieutenant governor, Fred E. Sterling. These officials, together with Verne Curtis, a banker, are accused of fraud, conspiracy and embezzlement of state funds, the alleged crimes being committed, according to the charges, when Small and Sterling held the position of state treasurer. Briefly, it is charged that Small and Sterling made loans of millions of dollars of state funds to Curtis' so-called bank, which had not functioned as a bank since 1908; that Curtis purchased with the money short-time notes of the Chicago packers which netted him about 8 per cent interest; that the state received only 2 per cent on the loans made to Curtis, and that the accused men shared the rest of the profits. Of course, both Small and Sterling protest their entire innocence, the governor laying the whole affair to the schemes of his political enemies, whose fight on him, both before and since his election, has been bitter.

DEMAND FOR TANLAC BREAKS ALL RECORD

Amazing Success Achieved by Celebrated Medicine Not Only Phenomenal, But Unprecedented—Over 20,000,000 Bottles Sold in Years—Foreign Countries Clamor for

Never before, perhaps, in the history of the drug trade the demand for a proprietary medicine ever approached wonderful record that is now being made by Tanlac, the brated medicine which has been accomplishing such remarkable results throughout this country and Canada. As a matter of fact, the marvelous success achieved by this medicine only phenomenal, but unprecedented.

The first bottle of Tanlac to reach the public was sold just a little over six years ago. Its success was immediate and people everywhere were quick to recognize it as a medicine of extraordinary merit. Since that time there have been sold throughout this country and Canada something over Twenty Million (20,000,000) bottles, establishing a record which has probably never been equaled in the history of the drug trade in America.

Fame Is International.

The instant and phenomenal success which Tanlac won when it was first introduced has been extended to practically every large city, small town, village and hamlet in North America. Its fame has become international in its scope and England, Japan, Mexico, Cuba, Hawaii, Alaska, Porto Rico and many European countries are clamoring for it.

From coast to coast and from Great Lakes to the Gulf, Tanlac is known and honored. Millions have taken it with the most gratifying and astonishing results and have pronounced the greatest medicine of all

Tens of thousands of men and women of all ages in all walks of life afflicted with stomach, liver and kidney disorders, some of them of long standing, as well as thousands of weak nervous men and women apparently on the verge of collapse, have testified that they have been fully restored to their normal weight, health and strength by its use.

Restored to Health.

Still others, who seemed fairly well yet who suffered with indigestion, headaches, shortness of breath, dizzy spells, sour, gassy stomachs, coated tongues, foulness of breath, constipation, bad complexion, loss of appetite, sleeplessness at night and other symptoms of dejected, depressed feelings, state that they have been entirely relieved of these distressing symptoms and restored to health and happiness by the use of Tanlac.

Tanlac is sold by leading druggists everywhere.

DIDN'T SEE ANYTHING FUNNY

Sunday School Scholar Couldn't Quite Realize That His Memory Was a Trifle Faulty.

Edward is something less than five years old. For six days a week he is a 100 per cent mischievous and thoroughly rough-and-ready boy. But on Sundays—well, he'd make Booth Tarkington's Edgar take a second prize. On Children's day Edward was given two lines of a scriptural quotation to repeat when his name was called. They were: "Ask and ye shall receive; seek and ye shall find." Sunday morning Edward reported to his mother letter perfect—as they say backstage. An hour later his teacher called the roll.

"Edward."

No answer—Edward's mind was airplaning.

"Edward—your verse—can you repeat it?"

Edward stood up. "Ask—" he began briskly—"ask and you shall receive—and that will be fine!"

Then, as he sat down amidst great laughter on the part of his classmates, he said, half aloud:

"What's the matter with me? I'm not so funny."—Kansas City Star.

COULDN'T BLAME LITTLE JOE

Small Darkey Had a Perfect Defense Against Teacher's Intimation of Disobedience.

At a social gathering of some darkies in a Georgia town two members fell to disputing which had the smarter children. Tom Lee was proclaimed the victor when he came to the front with the following:

"De other day my little boy Joe went to school with his little dawg. De teacher gits mad with mah boy and tells him to go back home as quick as he can and take de dawg an' never bring him back no mo'. Little Joe do jest like de teacher tell him. Bimeby little Joe goes back to de schoolhouse and jest as soon as he sets hisself down a little dawg comes in an' goes right up to where little Joe sets. Den de teacher gits mad again and says: 'Joe, why do you bring back dat dawg when I tell you not to?'

"Den little Joe he stan' up and say, 'Teacher, dis ain't de same dawg; he's anudder one. I got two of him.'"

It Would Seem So.

Our observation is that a couple of modern lovers on a train can be as demonstrative in a prairie country as in a land of tunnels.—Dallas News.

Sense Qualities.

Instead of there being only five senses as we usually think, there are probably as many as 15. Four distinct senses, for example, are located in the skin. These are heat, cold, pain and pressure. What we usually call touch is a combination of these four qualities.

ANYWAY, SCHEME WORKED

Experimenter Secured Sleep, Hardly Knows Just Where Award the Credit.

He couldn't sleep. He had read that if one would put the tips of the fingers of one hand against the tips of the fingers of the other, one would go to sleep immediately and the next thing would be daylight.

He decided not to tell his wife. With the lights out he placed the tips of his fingers together and lay there for several minutes. Then he moved slightly and was quiet again for several minutes. Naturally after a while he began to squirm, but he kept the finger tips together.

The wife, noticing the restlessness and the finger tip performance, inquired irritably:

"Edward, what in the world are you doing?"

"Nothing," he sheepishly replied, and soon was asleep from the effort of holding the finger tips together.

Now he doesn't know whether to give credit to the finger tip or to thanks to his wife for breaking the "spell."

Have You Heard This?

A Sunday school teacher was trying to explain the parable of the tares.

"Can you tell me any person who is like the evil one who sowed the tares?" she asked.

A hand instantly shot up from the foot of the class.

"Well, David," she asked, "what person are you going to say?"

"Please, ma'am," replied David, "my mother."

"Why?" asked the teacher in astonishment.

"Because," answered he, eyeing her patched clothes, "she sews tares."—Roseleaf.

There is plenty of room at the top of the greased pole of success.

he explanation of the hese four distinguished sly it is this, that they as the section hand did, ything that gave them ch education is wasted take no pleasure in it. s surely the explanation

of the astonishing achievements of Madame Curie, the most brilliant feminine "man of science" that we know anything about.

* * *

Great schools and great universities provide no easy or royal road to learning. They give young men a chance to meet others who are interested in the same subjects. They provide the "emulation" which the philosopher Francis Bacon regarded as so important.

But it remains for the individual who has been through the mill of a higher education to pick out for himself the path that he is to tread.

Systems of education are important in the case of the average man, but of slight importance in that of the man of genius or great talent.

Shakespeare and Lincoln were self-taught and they will go on teaching the world as long as their writings remain as models for mankind.

What would the author of the Gettysburg Speech have said if he had been told that reproductions of the Gettysburg Speech would be hung up in the College of Oxford as an example of English prose at its best?

Brunetta—Uh huh!

Blondine—And right away the poor fish looked down at my feet.

THE ROMANCE OF WORDS

"HALL-MARK."

TO SAY that something bears the "hall-mark" has come to mean that it is genuine, unadulterated, above suspicion and the expression is now frequently applied to men, though in the beginning it was affixed only to articles of gold or silver.

Strictly speaking, the hall-mark is the official stamp used by the Goldsmiths' company in England as a proof of the purity of various metals, the name being derived from the jewelers' guild or hall and not from any resemblance to a hallway in the stamp itself. The hall-mark for London is a leopard's head; for Dublin a harp; for Glasgow a tree and a salmon with a ring in its mouth; for Birmingham, an anchor; for Exeter, a castle with two wings; for Sheffield, a crown, etc. In addition to these marks, which indicate the place at which the metal was assayed, there are other symbols showing the purity of the metal. These symbols are expressed in the form of carats for gold and the "sterling" and "standard" marks for silver, the former meaning that there are 11 ounces and 10 pennyweight of pure silver to the troy pound, and the latter that there are 11 ounces and two pennyweight, the standard for British silver coins. The addition of a letter, signifying the year in which the assay was made, completes the "hall-mark" and insures the genuineness of the material used.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

THE SAVINGS ACCOUNT.

NO BUSINESS woman ought to be without a savings account. If you spend all your salary you are tying yourself down, preventing yourself from being free to choose your work.

The first step toward saving is to know just on what you spend your money. Then you can plan what items must be cut down so that the saving is to begin.

Make out what seems to you a fair living expense account. Then study your expenses and see how they differ from that ideal.

Open a bank account. Put your money into a bank and check it out, and you will find it grows. Once a month take out as much of the surplus as you have decided you can spare and put it into a savings bank. As soon as you have gathered enough together to buy a safe bond, get good advice on the subject—your bank will advise you—and buy one.

If you began by saving 25 cents a week you will soon lay aside double that. And that won't satisfy you. You will see how, without cutting out essential things, and these include amusements and social distractions and vacations, you can save on inessential things an amount that would have seemed impossible when you first started. And with it you will buy independence, security, opportunity. Can you buy much better?

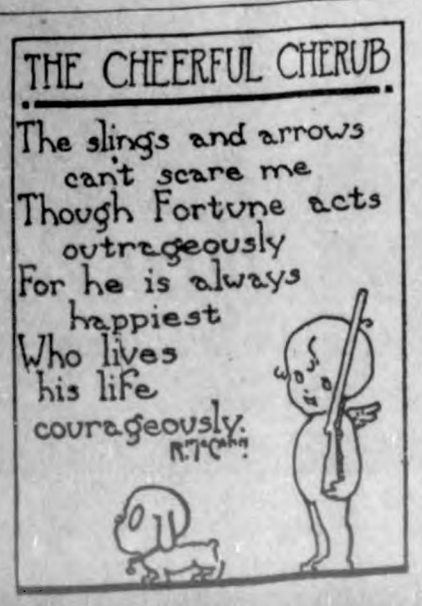
THE CHEERFUL CHERUB



LYRICS OF LIFE

By DOUGLAS MALLOCH

OUR ONLY DOUBT.

HOWEVER far the birds you know
Away from you may wing,
Whatever wintry winds may blow,
You do not doubt the spring;
At night you do not doubt the dawn
Because the day is done—
You know the spring will bring the lawn,
The morning bring the sun.

As old as is experience,
As trite as truth can be,
This lesson known to every sense
And taught by bird and tree—
And yet a tale we must repeat,
Each scholar, singer, priest,
For men who see the sun retreat,
Forget there is an East.

In sorrow's winter men forget,
In trouble's hour of night,
That spring shall come returning yet,
To life the morning light,
They do not doubt the dawn, the day,
The spring, the sun, the sod,
They do not question Nature—they
Doubt only Nature's God.

GROW MORE FOOD FOR FAMILY USE

Necessary to Save Shipping Costs on Water in Face of Lessened Returns.

BEST TO GROW NECESSITIES

Specialized Farming Has Created Peculiar Conditions — Poultry Is Quickest Meat Supply to Produce on Farm.

(Prepared by the United States Department of Agriculture.)

"The American farmer is not going to be able this year to pay freight on water," said a department official. "Water makes up a large part of fresh fruits and vegetables. The answer is that he must grow his own table food. He must also study the possibilities of substitution. This applies to vegetables, fruits, poultry, eggs and dairy products which must be transferred from commercial channels to home consumption if they are to come within the reach of the average farmer's family.

Peculiar Condition Created.

"Specialized farming has created conditions of which comparatively few persons are aware. The grain farmer in many instances buys even his potatoes and green vegetables; the fruit farmer buys his dairy products; and even the man who raises milk for creamery, condensary or cheese factory is likely to send his cream or milk away, feed the skim milk or whey to the calves, and not make his own butter. This year, just as far as possible for him to alter his system in a single season, the department officials advise that he get back to the old plan which was aptly described as 'living at home.' This means not so much remaining on the farm as it does deriving every practicable product for consumption from the farm.

"The average American farmer knows how to raise other crops than those on which he specializes, but it has seemed good business, or at least expedient, to devote his energies to very few or even a single cash crop and buy his necessities, just as is done in other specialized industries. The grain farmer is perfectly capable of raising his own potatoes, his green garden stuff, and melons, tomatoes and other garden fruits, to take the place of orchard fruits which in many parts of the country have been killed by the late freezes. If the farmer has a piece of really good garden ground he can add materially to the variety and wholesomeness of the farm food supply with scarcely any expenditure except for seeds, and seeds, fortunately, are lower this spring than for several years.

Poultry Most Important Meat Supply.

"The same may be said of poultry. With the increased freight rates this year, the general farmer's principal

The Garden Is a Good Source of Home-Grown Food.

meat supply will come out of his poultry yard, either in eggs or in table chickens and other fowls. Poultry is the quickest meat supply to produce, and the farmer will do well to build up a small flock as rapidly as possible. The increased freight rates on butter and eggs, together with the farm money shortage due to the disappointing returns from last year's crops, will make it advisable for many farmers' wives to return to the butter-making arts which they learned as girls from their mothers and which have been largely discontinued as farmers became specialists.

"Fruit is likely to be scarce in large and important farming regions, but its place can largely be taken by vegetable products. Two things are clear. In the first place, the average farmer, as it stands now, cannot afford to pay freight on the water which makes up the larger part of both fresh and canned vegetables and fruits. In the second place, under existing conditions he can raise those things cheaper himself than he can buy them, and he can make many substitutes out of the garden and poultry yard if he sets out to do it. He has the material for the crops, while he is short of money. It is not good business to run in debt except for essentials of production."

The Department of Agriculture will be glad to give information and advice to those who wish to diversify their home-grown food supply.

TEMPORARY PASTURES ARE BEST FOR SHEEP

From 10 to 14 Days Is Long Enough on Same Ground.

Basis of 1 Acre to 25 Animals Is More Satisfactory Than Seeding Larger Areas—Smaller Lots Are Convenient.

(Prepared by the United States Department of Agriculture.)

For health and for economical use of the pasturage it is undesirable to keep sheep on the same ground more than from ten to fourteen days, say specialists of the United States Department of Agriculture, in discussing the question of raising sheep on temporary pastures. The most generally

Sheep Are Valuable Weed Destroyers and Will Keep Fence Rows, Roadways and Waste Places Clean.

useful size of lot is one acre to 25 sheep. This area, on an average, furnished in experiments 14 days' feed.

Arranging the size of lots on the basis of one acre to 25 sheep is more satisfactory than seeding larger areas and using hurdles to permit advance to fresh feed each day. Less labor is necessary, and by going to entirely new ground after ten or twelve days the danger of picking up parasite larvae on ground grazed over earlier is prevented. With a one-acre lot for 25 ewes, or correspondingly larger ones for larger flocks, it is an added advantage if their length is two or three times the breadth.

With a heavy crop of forage that would last longer than was considered safe to hold the flock on the same ground, a short piece of cross fence can readily be put down to divide the pasture into two parts. The smaller lots are also convenient with purebred flocks to provide for the separate pasturing of smaller lots of ram and ewe lambs.

Movable fencing is not likely to be satisfactory for the outside-lot fences unless the whole area to be used lies in a long strip with side fences, when only two end pieces need to be in place at one time for the ground being grazed.

STANDARDS FOR CONTAINERS

Hamper, Round-Stave Basket and Market or Splint Basket Lack in Uniformity.

Three important shipping containers in need of standardization at the present time are the hamper, the round-stave basket, and the market or splint basket, say specialists of the bureau of markets, United States Department of Agriculture. Investigations in all parts of the United States where these packages are used have shown a serious lack of uniformity in capacity, shape and strength which could be corrected by the adoption of standards which have been prepared by the bureau of markets.

These standards have been written into a bill, H. R. 4900 now before congress. Its adoption should go a long way toward eliminating the 15 styles and sizes of round-stave baskets, 25 styles and sizes of splint baskets as well as the 50 styles and sizes of hampers. The bill provides for five sizes of splint baskets, 4, 8, 12, 16 and 24 quarts; five sizes of round-stave baskets ½-bushel, ⅝-bushel, 1-bushel, 1½-bushel and 2-bushel, and six sizes of hampers, 8, 16, 20, 32 and two styles for 48 quarts.

KILL GREEN CABBAGE WORMS

Arsenate of Lead Spray Will Prove Satisfactory to Destroy Various Insects.

The green cabbage worm can be killed with an arsenate of lead spray in which laundry soap has been mixed to make it adhere to the leaves. This treatment will also kill the cabbage looper and other cabbage worms. Nicotine sulphate or kerosene emulsion and soap should be used against the harlequin cabbage bug and plant lice or "aphis."

MANURE PRODUCED ON FARM

Dairy Cows Lead All Other Animals Yielding 8.5 Tons Yearly—Goats Give Least.

Under farm conditions it is estimated that the following amounts of manure may be saved each year from mature animals: Horse, five tons; dairy cows, 8.5 tons; other cattle, four tons; sheep and goats, 0.4 ton, and hogs, 0.6 ton.

Home Town Helps

SELECT TREES WITH CARE

Matter Is of Greatest Importance When They Are Planted Along the Highways.

For many years it has been a custom with most people to plant trees without regard to the ultimate purpose they would serve. Little thought has been given as to the most suitable varieties for planting or that there might be sections along the roadway where it would be of advantage to cut the existing trees, and in this way make the roadside scenery more interesting and attractive. A closer study of the problem, however, shows that there are two distinct types of roadside scenery. The first may be said to be where the trees, shrubs, buildings and other objects that border the highway form the element of the picture, with the roadway as a central feature. Many places along the roadside have no inducements whatever as to special attractiveness, and in fact, the scenery may be of decidedly monotonous character. It is in such a place that one may feel at liberty to plant according to the so-called closed type.

The second type can be used where the wide meadows, fields and distant landscape compose the picture, with the roadside trees as frames. Examples of this type may be found in many sections of the state, where beautiful vistas could be enhanced by the presence of suitable shade trees. In many cases, trees along the highway form screens so as to break up the long stretches of views along openings here and there which make more attractive the roadside scenery.

ECONOMIC VALUE OF BEAUTY

Good Points Made by Governor Lake of Connecticut in Arbor and Bird Day Proclamation.

Governor Lake of Connecticut in his proclamation appointing Arbor and Bird day made some excellent points. He recommended that all citizens, but particularly the teachers and pupils in schools, observe the day and added:

"Let the pupils of our schools be taught that the planting and care of shade trees, the protection of birds and their eggs, is not only an economic measure, but contributes to the beauty of our state and the enjoyment of our homes. I further recommend the formation of town and village improvement associations to encourage tree planting and bird protection and to exercise interested care over matters relating to the scenic beauty of our towns and cities. Well-kept roads, streets and lawns enhance the value of property and promote the general welfare of towns and villages."

Observe especially the last sentence: "Well-kept roads, streets and lawns enhance the value of property and promote the general welfare of towns and villages."

Here is official recognition of the economic value of beauty. Common experience shows that Governor Lake is right. If every community continues its clean-up until every lawn is well kept and every building tidy and painted, won't the tendency be to increase property values?—Exchange.

City Planning in Schools.

"We have city planning courses in all of the schools," D. D. Pinkerton, president of the Kansas City board of education says. "We call them courses in civics. These courses deal with every phase of civil government and especial attention is given to civic beauty.

"Even young children are given instruction in civics. In the lower grades we use a primer which covers all the activities of a city in a comprehensive way. A good example of this type of primer is the one used by Walter Gidinghagen, principal of Humboldt school."

In this primer these are some of the questions asked:

Is your neighborhood supplied with beautiful lawns and flower beds?

Are the alleys and yards kept clean?

Do the children take pride in keeping the school yard clean?

How does the improvement of your property help the neighborhood?

What conditions in your neighborhood might be improved?

Within His Rights.

"Is Mr. Grumpson a confirmed pessimist?"

"I don't think so. I've seen him pet newsboys on the head and give dimes to beggars."

"But how does he conduct himself in a traffic jam?"

"He seethes a little, but not enough to attract the attention of a traffic policeman."—Birmingham Age-Herald.

Under City Management Plan.

Five cities of more than 100,000 population are now being administered under the city management plan—Akron, Dayton, Grand Rapids, Norfolk and Nashville. Cleveland and Kansas City are agitating the question of city management government.

Innovation in Pennsylvania.

Two second-class cities of Pennsylvania, Scranton and Pittsburgh, are empowered by law to adopt a system of separate assessment on land and on improvements, making the heavier burden come on the land.

REDUCED PRICES ON Moline Universal Tractor

Moline Tractors have taken a big drop and are now selling below pre-war prices.

The new price on the Moline is now as follows--

Moline Universal Tractor Model D complete with six inch extension rims and two bottom 14 inch plow, only

$1196.00

Same outfit with three bottom 14 inch plow is **$1239.00**

When you consider the quality of this machine and the work it will do, there is no other power farming outfit that will compete with it regardless of price.

We afso sell the smaller and cheaper tractor, but advise the Moline.

Henry Lau & Sons

Mrs. Clarence Kluckhohn was a passenger to Garner last Friday.

Mrs. Sumner Trumbell of Goodell was a Klemme visitor Friday.

Mrs. Herman Paul returned from the hospital at Des Moines Monday.

Miss Marian Luick came from Belmond Monday for a visit at the home of Mrs. Mille Smith.

Mr. Kaeser of Belmond was here this week doing some sign painting for Art Wellemeyer.

Mr. and Mrs. Will Kirkwood and Mrs. A. Kirkwood drove to Sheffield Sunday for a visit with friends.

Mr. and Mrs. Henry Lewis drove to Ackley, Iowa, Sunday for a visit with friends.

J. T. Griggs left last week Monday for LaCrosse, Wisconsin, and returned Thursday.

Gus Church and wife from Goodell were shopping in Klemme Tuesday.

Miss Sarah Rhodes of Minneapolis came last Tuesday for a visit with Klemme relatives and friends.

Miss Iris Trumbell and Miss Lodie Frohling from Belmond were callers here last Friday.

Mr. and Mrs. Ted Dutheridge are enjoying a visit from their little niece from Chicago.

Mr. and Mrs. Tom McNulty, Jr., and son of Belmond, were Klemme visitors last Wednesday.

M. J. E. Baumgartner went to Waterloo. Iowa, on business Tuesday of this week.

Mrs. Carl Forshee of Mason City was shopping with Klemme merchants last Wednesday.

Mrs. N. G. Moberly, Mrs. Wm. Bell and Fred, Myrtle and Kenneth Bell. drove over to Britt last Friday.

Rev. Ortmeyer, wife and son of Forest City visited at the Henry Griewe home Sunday.

Mrs. Howard Doyle has been on the sick list for the past week or so but we are pleased to state that she is again on he road o recovery.

Mrs. R. A. Jorgenson and son, R. A. Jr., went to Garner yesterday morning for a visit with relatives and friends.

Miss Hanson, of Paton, Iowa, returned to her home Monday morning after a visit at the Pete Merkel home east of Klemme.

Harve Sweigard, the postmaster at Garner and former banker here was a business caller in this city last Thursday.

Mr. and Mrs. John Miles and family and Miss Margaret Borton from Clear Lake were visiting with Mrs. Mille Smith Sunday.

After a month's visit here with her son Wm. and family, Mrs. Trafford was called home by the illness of her daughter.

Rev. and Mrs. A. E. Buriff and daughter went to Clear Lake last Friday to spend their summer vacation at a cottage.

Miss Donna Baumgartner returnhome yesterday moring from a two months visit with friends at Iowa City and other points.

Miss Annetta Schuldt came Monday for a visit with Klemme relatives and friends. She lives at Gladbrook, Iowa.

Chris Jacobs and wife of Garner drove to Klemme Monday evening and from here were accompanied to Goodell by Ye Editor and family.

Thos. McElligott, of Evanston, Ill., was a business caller here one day last week. He is the man who had the sewer contract here.

Mr. Fern Schmalle, of Torrington, Montanna, was calling on the Times staff Monday. Fern is working in a print shop in the western town and is in Garner with his family to spend his summer vacation with his folks and old friends. "Smiles" as we better know him has numerous old friends here.

The Family Lot--

The Final Resting Place Of Our Loved Ones

Fifty years ago, in the springtime, a covered wagon with a family of Emigrants camped for the night on what is known as the James Trumble farm, east of Goodell. The wife took sick and died, and they buried this good lady on a pretty knoll nearby, under the protective branches of a beautiful Oak Tree, and marked her grave with a small boulder and planted a spray of "Live-for-ever," which has for these fifty years, grown green each spring to mark the final resting place of this Loved One. Thus the first Cemetary in Hancock County started. During the next few years others were laid to rest here, and Geo Elder, who owned the farm then, was kind enough to protect these graves with a fence.

Other cemetaries were started about this time in different parts of the County. A few bodies lie on the Charles Church farm east of Goodell. Fifteen are at rest in "Hickory Grove" four miles southwest of Goodell. And in Ell Township the Early Settlers buried their dead on a sandy knoll of the Ell farm.

In the Early Days Hancock County was swampy. There were no roads, merely trails. Transportation was so difficult that without embalming it was impossible for the Pioneers to take their dead back home to the family Lot, but they were obliged to bury at once, and in the nearest cemetary.

But now, Hancock County has good roads. We have the automobile hearse, and modern Embalming Methods, which make it possible to carry your Beloved Dead to your own Family Grounds, even though we must cross a state to get there.

The desire to protect the dead is one of the oldest and strongest feelings we have. Ever since the world began men have sought to save the remains of their Loved Ones from violation. The ancient Phoenicians laid their departed in the inmost recesses of caves, each tribe in its separate cave. The Egyptians constructed pyramids to guard the Sepulchres of their Kings and their families. When Jacob, of Bible times, was on his death bed, he asked his children to bury him with his fathers, he said "Take me to Abraham and Sarrah, Isaac and Rebecca, and where I laid Lea." Even Jesus Christ after his death on the cross was placed in the Family Sepulchre, a cave built by Joseph.

Hancock County has twenty-three Cemeteries. Some families have dear ones lying in two or more cemeteries. Of course the early Settlers had to do as they did, but now it is time to gather the Family together into one Family Burying Ground. Select a suitable place in one of our beautiful Cemeteries and be sure to have space enough to accomodate the probable needs of your family for the next fifty years, and then move all of the Family dead to this new location, then you will feel sure that the graves of your dear ones will always be well cared for and never neglected.

The undersigned, a licensed Embalmer, has for several years made a specialty of moving Bodies. I have special equipment and am prepared to render satisfactory service in the bringing together of the Family Dead. I have superintended the disinterment of more than a hundred bodies from private burial grounds and neglected Cemeteries to Family Grounds in well kept Cemeteries.

And when once the Family Grounds is started it will be easy enough to continue, for the Automobile makes it possible to bring your loved ones "Home" for burial regardless where they die.

Yours for Service

Arthur Weemeyer

Dr. Hesselhaus Locates Here

or some time Klemme has needa dentist., as people needing that s of professional work had to go y from town to have the work e or else go without.

We are pleased to state in this is- of the Times that Dr. Hesselhaus Minneapolis has decided to locate Klemme. He was here several eks ago to look the town over and possibilities for a paying dental ablishment. The town looked l good to him and he secured a m in the office of Drs. Reuber & n.

Dr. J. L. Hesselhaus and wife ar- ed in Klemme Monday. As soon as they can find a house they will begin housekeeping.

Dr. Hesselhaus is installing all new and modern dental instruments and appliances and will have his office fixed up in the most approved and modern way.

Dr. and Mrs. Hesselhaus are both very pleasant young people to meet and we extend them a hearty welcome to our little city.

The Doctor will be prepared in a very short time to do all dental work as soon as he has things arranged. Those needing work along those lines will do well to patronize a home man in the future.

POSTMASTER GENERAL INAUGURATES REFORMS TO SAVE $15,000.000

Instructs Postmasters to Cut All Unnecessary Expenses

Washington, August 3— Postmaster General Hays is functioning 100 per cent in his department to redeem the Republican party's pledges that in event it was placed in charge, there would be more business in government. The Postmaster General has just sent detailed instructions to 10,000 postmasters notifying them of the necessity of cutting their expenditures in every way possible consistant with the maintenance of good service. It is the intenion of Posmaster Hays to reduce the operating expenses of the postal department $15,000,000 a year by the plan which has been worked out and aphis statement to the postmasters of proved by him and his advisers. In the United States Mr. Hays says:

"Attention is called to the acute financial condition of the country and the urgency of meeting the desiro of the president for economy in public expenditures, as far as possible in the postal service."

The Postmaster aims to eliminate extravagance and expensive methods which crept into the postal service during and immediately after the war. To agreater or less extent, the postoffice department participated in all war work, such as he draft, the Liberty Loans, food, fuel and labor conservation and, in short, all war activities which touched the civilian population. This necessitated a vast increase in clerical force and an increase in operating expenses. quite aside from the payroll. The war is over and yet there has been very little curtailment in the extraordinary expenses or in the auxilliary help or overtime.

Postmaster General Hays orders the elimination at once of overtime and also calls upon the postmasters carefully to revise the working schedules of clerks and carriers. To assist in this, there will be an inspection of the routes of every carrier and collector and very possibly a readjustment of routes. In addition a campaign will at once be inaugurated to educate the public to the necessity of intelligent and wholeheart ed co-operation with the postal department. Thisco-operation will consist of early mailing by every one equipment of every residence and a place of business with mail receptiples and on the part of large users of mail, use of pre-cancelled stamps, facing of mail, etc.The Postmaster General believes these reforms can be inauguarated and overhead expenses thereby reduced without impairing the quality of the postal service.

Addressing the postal employees in his communication, Postmaster General Hays says:

"Employees are reminded that Congress has granted them generous increases in salaries. They will be expected to give honest service, full 8 hours, and those who are unable or do not have the inclination to do so are to be separated from the service The department will not require anything unreasonable but it expects and must receive full value in the service for the public funds expended."

TUBERCULAR COW CAUSES FIVE CASES

(Chicago Drovers Journal)

PARIS, Ill.,—The residents of Edgar county are greatly aroused over an outbreak of tuberculosis which has recently occurred in a family in this vicinity, resulting from the use of milk from a reactor cow formerly owned by Robert Goben. The entire herd was tuberculin tested by a federal veterinarian two years ago. One cow reacted. She was tagged, branded and placed under quarantine by the federal veterinarian acting as the representative of the Illinois state department of agriculture. The cow was supposed to have been kept in segregation on his farm under the quarantine laws of the state until such time as she could ne slaughtered.

Because she was in good flesh and appeared healthy, Goben declared she did not have tuberculosis and it was said boasted that he would be glad to have a whole herd just like her. The government ear tag was removed and the cow was given to his farm hand. Robert Kelley, in lieu of money owed Mr. Kelley, it is charged. Kelley states that he took the cow to his home last spring. During the June following one of his girls, 5 years old, complained of a pain in her back. Dr. Martin, a local physician was called and pronounced the case tuberculosis. Since then four other children have developed characteristic symptoms. These children range from two to nine years of age. All have enlarged glands and nearly all have sores on the body. One is in a very serious condition because the spine is affected.

Slaughter Shows Tuberculosis

This cow was slaughtered at the local fertilizing plant yesterday and a post mortem was held by Dr. Brannigan, federal veterinarian, employed by the Edgar County Farm Bureau for the tuberculin testing of herds in this county. He was assisted in the autopsy by Dr. J. W. Martin, the attending physician of the family. The cow proved to have a generalized case and was condemned. The liver was considerably larger than normal and contained masses of tubercles. Tubercular lesions were found in both lobes of lungs and in numerous glands of the body. The udder was also found to be affected with this disease. The examination was made in the presence of Mr. Crosby, county agent; H. R. Smith of the National Live Stock Exchange and Dr. Adams.

There are seven children in the family and all but two contracted the disease. One girl. 11 years old, does not drink milk, and she seems to be perfectly healthy. This is also true of the 6 month old baby which has received no cow's milk.

A pig which had been fed on this milk reacted to the tuberculin test and the family cat was found on post mortem examination to be affected with tuberculosis. Not only this,, but a cow more recently purchased, kept with this condemned cow, has also reacted to the test and will be slaughtered during the next fewdays It is a serious situation and the state's attorney has signified his intention of prosecuting Gobel on a criminal charge.

Newly Weds Twenty-eight Years Ago

We met Pete Merkel on the street yesterday and asked him why he wasn't at work on the farm and he told us he was taking a day off as it was his twenty-eigth wedding anniversary day. Pete told us to keep it out of the paper, but we had it figured out that a man who has been married that long ought to know better than tell secrets to an editor. Pete remarked that he was married on a Saturday and we asked him how that come. He said that the community where he was then located were all Latter Day Advents and as they were then busy threshing and the people of that religion do not work on Saturday. Pete decided to take a day off and get married, which he did, and has never been sorry, even if it was on "niggers' day" as some say. Pete also recalled that at that time he was renting a piece of land for $1.75 an acre and that he had an unusually fine crop of oats which brought him 42 cents a bushel. That was going some as compared to the high rent of today and the low prices.

PREHISTORIC BONES FOUND IN HANCOCK COUNTY

BRITT, Ia.—A few days ago men engaged in tiling on te farm of L. C. Beaumont, two miles north of here, uncovered the bones of a huge buffalo.

Mr. J. A. Treganza, who visited the place and procured some of the bones, has no way of knowing how old the bones are but estimates that they may have been there forty or fify years.

The bones were found in a very low place which has been a bog and practically useless and it is quite possible the animal went into the swamp in search of water and mired down in the soft mud and then died there.

The bones show that the buffalo was of unusually large size.

To Sunny California In A House On Wheels--'49 Fashion

We were talking with Charlie Stiehl yesterday and he informed us that he and his wife expect to leave for California about the first of September. Chas. will build a sort of cabin over his Ford truck and they will make their journey in it overland fashion. They will have everything convenient in the "house on wheels" and will go and stop as they desire and will take plenty of time to see the country. Chas. altold us that Art Kuck would accompanp hem on the trip and it would be Art's duty o supply them with fish and wild game which they could get along the way. We believ that would suit Art just fine. It will be a mighty fine way to see the country and they will no doubt have a big time.

Claim They Are The Early Birds

A member of the "B. S. W." Threshing Company was in our office last Friday and stated that their ring had finished threshing the day before, claiming to be the first outfirst to get through first again this

Four Iowa Men Killed In Train Wreck Past Week

MISSING IOWA MAN TURNS UP IN QUINCY, ILL.

Washington Business Man Found Working on a Farm There

WASHINGTON. Ia.,—Henry Sommers, formerly a resident of the community south of Washington, but who dissappeared early in the spring has been brought back from Quincy, Ill., where he was found working on a farm.

Chester Cherryhomes of Crawfordsville, who was in Quincy, visiting his sister, a student at a business college there, thought he passed Mr. Sommers one day on the street, and later saw him again. His people here were notified, and a brother, accompanied by Sheriff Denison, went to the Illinois city and accompanied Sommers to Washington.

Sommers had been missing from his home here for several months. and relatives have used every means possible to learn of his whereabouts, foul play or self inflicted injury of some kind having been feared. Some time after he left his car was found empty down in Columbus Junction vicinity. The man had been caught in the real estate whirl, as had a number of Washington county people, became discouraged and decided to vamoose.

BANDITS OBTAIN $700 FROM OSAGE POKER GAME

OSAGE, Ia.,—Memories of frontier days were awakened by a daring hold-up of a card game here on Saturday night when two masked men held up six Osage men at the point of automatics and rifled the "pot" and pockets of the devotees of $700.

The men were holding their weekly kensington in a deserted beet worker's shack on the outskirts of Osage at the time of the robbery.

With one man holding a "king full" another a "flush" and a third confident with "four sevens" the table held $200 and the raises were coming fast when the bandits "called all bets."

Their winnings rather dazed the hold-up men as their hands were trembling so they could scarcely gather up the money. They were not recognized.

A BRAVE HOBO AT WESLEY

Wesley News-World.—A hobo walked into the Edward Kunz store on Tuesday and asked Frank Mathies for a handkerchief, and handed him a dollar in payment. The cash register is kept in the grocery department, and while Frank was on the other side making change, the hobo slipped a bolt of blue silk under a coat he was carrying on his arm. As he started to walk out Frank noticed something blue sticking out from under the coat and asked him what he had there. and at the same time grabbed hold of it, with the result of discovering what the tramp had stolen. As it happened there was nobody in the store at the time bu Frank, and the thief got away. The city marshall was out of town and the mayor was in Chicago, and by the time Ollie Kunz was found and the theft reported the tramp could not be found, but Fank saved the silk.

Dick Swalve nearly forgot that he he had a birthday Sunday, but he was very soon reminded of the fact when the automobiles began rolling into his yard Sunday just before noon. Just about all of Dick's nearest relatives gathered there Sunday to help him celebrate. Mr. and Mrs. Ben Swalve, daughter Lena and son Benny of this city were there, and also Mr. and Mrs. Gilbert Schaper and son Ben; Mr. and Mrs. Herman Priebe and sons Albert and Verner; Mr. and Mrs. John Swalve and daughter Minnie; Mr. and Mrs. Wm. Wenz and daughter Esther, Mr. and Mrs. Ben Schwictenberg and the baby, made up the company for the day. Dick was worried about the "smokes" for the crowd but his wife had a box of cigars stowed away for the occasion and so Dick knew she was the one to blame for all the excitement.

FOUR KILLED IN IOWA RAIL COLLISIONS LAST WEEK

THREE DIE IN MASON CITY WRECK FRIDAY

MASON CITY, Ia., Aug. 3—One man was killed outright and two fatally injured in the Rock Island head-on freight collision here Friday.

Engineer Al Moody and Fireman Frank Curran died of their injuries Friday night.

Brakeman Dave Slater was killed in the wreckage of the train and his body was recovered after several hours excavation. It was necessary to cut off his legs and one hand to recover the remains.

Engineer F. McClean and Fireman W. Yangy were severely injured but will recover. They jumped when they saw the collision was coming.

The accident occurred at the Rock Island crossing at Clear Lake Junction and the trains met head on. Both train crews thought they had the right of way. The locomotives were almost demolished but will be rebuilt at the shops at Valley Junction. A great number of box cars were smashed into splinters. One car loaded with Ford cars was so completely wrecked that the cars were made into a junk heap and another car loaded with lumber had the appearance of a heap of tooth picks when the wreck was cleared. Hundreds of feet of track were also torn up.

Railroad Wreck At Perry Claimed One Bystander

PERRY, Ia., Aug. 3.—Ray Paist was killed in a train wreck here Saturday morning.

Paist was walking alongside the train on his way to work when the collision occurred.

None of the train crew or others were injured.

A southbound M. & St. L. passenger ran broadside into a Milwaukee freight at a crossing.

A freight car was smashed and Paist was buried under the wreckage. It took workmen three hours to recover the body which was badly mangled.

Paist was a roundhouse hand for the Milwaukee, was 25 years old and married.

Engineer Brooks and Fireman Hammill of the M. & St. L. passenger jumped when they saw the wreck was inevitable and neither were injured. Two hoboes who were riding the tender also jumped and escaped without injury. The passengers were jolted up some but none injured. The accident happened at 6:18.

CURIOUS RELATION MIXUP FOLLOWS CROSS MARRIAGES

ATLANTIC, Ia.—Ed. C. Pierson and Mrs. Ann M. Moon were married here a few day ago and by so doing he becomes stepfather to his daughter-in-law and his wife becomes stepmother to her son-in-law.

Four years ago Elmer Pierson, son of Ed. C. Pierson, was married to Flossie Moon, daughter of the new Mrs. Pierson.

Ed. C. Pierson was for many years a widower. His present wife lost her husband two years ago. Both Mr. and Mrs. Pierson are pioneers of this community and well known.

HEAVY RAIN FELL HERE MON. Came Just In The Nic Of Time

The first soaking rain since the 26th of May started Monday morning at 4:00 o'clock and fell steady nearly all day, soaking the ground in good shape. The rain came just in the nick of time as the pastures will nearly dried out following the long seige of drought. Corn needed a lot of moisture during the filling period and clover was also badly in need of a good shower. Corn looks fine now and the pastures are again beginning to turn green. From all reports the rain was quite general over this section of the state.

French Cling to Old Ways

Prejudices Hamper Work of Rebuilding Area Devastated by War.

DON'T TAKE TO NEW IDEAS

Hard to Convince Inhabitants That What Was Good Enough for Their Grandfathers Is Not Good Enough for Them.

New York.—Model cities and villages will soon be springing up in the war districts of France provided the inhabitants can be convinced that what was good enough for their grandfathers is not good enough for them. There is the rub. The civic idealists, many of them Americans, who set out with a vision of model towns rising from old ruins are running up against the same quirks of human nature encountered by Sir Christopher Wren, when he tried to rebuild a London beautiful after the great fire of 1666, remarks the Literary Digest.

If left to themselves Jean and Jeanne would rebuild their homes and shops exactly as they were before German artillery reduced them to dust and tender memories. A shopkeeper fears that his customers will not find his shop unless it is the replica of its predecessor. And madam would like to have her spinning wheel set as it was when she stopped spinning in the summer of 1914.

Habits are Strong.

The habits of centuries are strong among the poilus. Nevertheless, the reconstructionists are hopeful. Outlines of plans for model towns to replace those destroyed have been appearing off and on in French and other periodicals for some time, and one of the latest projects will be tried out as an experiment, with the financial backing of an American committee. This plan was prepared under the auspices of the French organization known as La Renaissance des Cites, which is seeking to have spring up on the ruins of northern France communities which shall combine modernity with the charm that is so striking a characteristic of French towns many centuries old.

La Renaissance des Cites has already helped over 200 towns in northern France to prepare reconstruction plans. In addition, it is doing educational work of various kinds in the rest of the communities in the devastated lands—aggregating about 2,400.

In order to further the work of reconstruction, La Renaissance des Cites decided to create a model village. After studying more than 1,500 towns and villages throughout the devastated areas, it finally selected the village of Pinon, on account of its having a population typical of northern France, both from the farming and industrial points of view, and also on account of its being near Paris on direct rail and road routes, which will make it easy of access both to Frenchmen and foreign visitors.

Natives Grumble.

Pinon was completely destroyed in the war. At least one member of practically every family that lived there before the war has returned, to live in some sort of hastily built shack, waiting for the old homes to be rebuilt. At first most of the natives did not favor the idea of having Pinon used as a model village, but after long discussions they decided to let La Renaissance des Cites create one for them. The general plans were drawn up by Charles Abella, a winner of the much coveted Prix de Rome in architecture. An American committee has been formed to get funds from the United States to be expended in the reconstruction of Pinon. This committee has representatives in many large American cities. The committee plans to turn over to the French organization an amount sufficient not only to rebuild one devastated town, but to provide a number of homeless war victims with permanent shelter.

The planners continue with their work, but some of the old natives are reluctant to take up these "newfangled fads."

Fire Caused by Sun Shining in Window

Philadelphia.—A piece of window glass is believed by the firemen to have been responsible for a small fire on the roof of a vacant dwelling. According to the firemen the glass concentrated the sun's rays to such an extent they ignited the roof. The blaze quickly spread to an adjoining house, but was extinguished with trifling loss.

Radio Control of Ships Next

Successful Steering of Iowa From Another Vessel Leads to New Tests.

PLAN TO EQUIP OTHER SHIPS

Battleship Runs Without a Hitch Five Miles From Operator During Bomb Tests—Army and Navy Officers Call It a Scientific Triumph.

Washington.—The performance of the battleship Iowa under radio control during recent aerial bombing tests may lead to revolutionary changes in naval development, officers think. Without a person on board, the Iowa was maneuvered from the battleship Ohio, five miles away, with the utmost precision and there was not a hitch in the mechanism in more than two hours while the Iowa was being bombed.

It was a scientific triumph. The Iowa was a real "Flying Dutchman," a counterpart of that mythical crewless ghost of the seas, as she obeyed the will of Capt. F. L. Chadwick on the Ohio, almost hull down on the horizon. The invisible, magic fingers of the radio reached out across the sea to whirl the Iowa's steering wheel, operate the fuel oil and water supply valves and start and stop the ship.

So perfectly did the control function that the officer on the Ohio maneuvered the Iowa away from the attacking air forces at the moment the bombs were being released, varying the speed of the target vessel at will.

Officers Much Impressed.

Army and navy officers who witnessed the test were much impressed by the possibilities of development of the radio control idea for use in future wars. It was said to be apparent that radio control might eliminate some loss of life in such enterprises as "block ship" operations as when the British undertook at Zeebrugge and Ostend to bottle up German submarines. The "block ship" of the future, it was pointed out, might sail serenely into an enemy harbor without a soul on board and be sunk to obstruct its channel by the electrical explosion of her magazines.

Already the navy is working out plans for shifting control at will from a surface vessel like the Ohio to aircraft, either heavier or lighter than air. The radio control device on the Ohio is so simple, officers say, that little difficulty is anticipated in adapting it for use in an airplane or a dirigible.

When this development is worked out the controlling aircraft will be able to work at an altitude of 10,000 feet and above, safe from any gunfire from below, and steer the controlled vessel anywhere on the sea within fuel radius.

To Equip Other Ships.

A movement is afoot to install radio control on at least one more obsolete battleship and two old destroyers to serve as targets for aerial bombing practice and further experiments with radio control. Extension of experiments to the possibility of applying the radio control idea to aircraft also is under consideration and it is within probabilities that giant crewless bombing planes, loaded with high explosives could be launched against naval vessels, cities and forts with no costly sacrifice of trained officers and men.

The entire radio control idea, a post-war development, in its present application is in its infancy, naval officers believe, and they expect great developments in the efficiency and scope of the control within the next few years.

Women Go to Mexican Trade Meet

At the invitation of the Mexican government and the Federation of Chambers of Commerce of Mexico, these women went to Mexico City to attend the international trade conference. Mrs. Katherine Clemmons Gould (second from left) is president of the Woman's International Chamber of Commerce. Those in the group are, from left to right: Mrs. Agnes Young, Mrs. Gould, Mrs. L. N. King and Mrs. Gertrude De Rojas.

To Make 12-Ton Cheese.

Albany, N. Y.—The state department of farms and markets, working in co-operation with the Dairymen's league, will manufacture the largest single cheese ever made, according to George E. Hogue, commissioner of agriculture. The cheese will be manufactured at Loweville for exhibition at the state fair in September. It will weigh 12 tons and will require 150,000 pounds of milk, or one day's output of 7,500 cows, Mr. Hogue said.

CANARY ENDS USEFUL CAREER

Considered the Most Valuable Employee of Bureau of Mines.

Used to Detect Presence of Carbon Monoxide in Mines—"Baldy" Survived Five Explosions.

Washington.—"Baldy," hero of the mines, is dead. After surviving five explosions, in the last of which he was overcome nine times while engaged in rescue work, he has won his reward. The bureau of mines considered him probably the most valued employee it ever had.

In underground fires or explosions the life of the miner depends almost entirely upon the behavior of these "hero birds." The rescuer ventures into an exploded mine with a flame safety lamp in one hand and a caged canary in the other.

The bird, in the presence of even the smallest amount of carbon monoxide, gasps, ruffles its wings and flutters. If sufficient gases are present the bird drops, seemingly lifeless. The rescue party then steps back to good air and is usually able to revive the bird by quick action.

Such was the work of "Baldy," and when he started to grow old he was finally sent to the Pittsburgh station from the bureau's rescue car, which had been his home for three years. It was intended that he should live the rest of his days in song and contentment.

Then came another explosion and it was necessary to draft "Baldy." Nine times he fluttered unconscious to the bottom of the cage and nine times was revived. The experience was too much, even for a veteran like "Baldy," and he developed fatal pneumonia.

After a rescuer has once used a canary, it is explained, he places a very complete dependence in it. Often when a rescuer has become nervous or has a real or imaginary headache, the sight of the bird, alert on his perch, reassures him.

POSTCARD 14 YEARS ON WAY

Missive Sent From York, Pa., on February 18, 1907, Arrives in Philadelphia.

Philadelphia.—When William H. Fiss, 5549 Walnut street, received a postal card recently which was mailed just ten and a half years before he thought a record for slowness of mail delivery had been established. But David J. Spangler, 1421 North Redfield street, can go him one better, for he received a card posted on February 18, 1907, more than fourteen years ago, by a woman who has been dead for more than twelve years. Spangler's antique exhibit was sent from York, Pa., by his greataunt, arriving in this city on June 23 last. It was addressed to him at 42 Frazer street, the home from which he moved in 1908.

"I guess some persons who are awaiting mail," Mr. Spangler remarks, "will take courage after this.

SEE RECORD CROP

Western Canada Farmers Rejoice Over Bountiful Harvest.

Favorable Weather and Fertile Land Combine to Pour Riches Into the Hands of Agriculturists.

There are those in nearly every state in the Union who have relatives or friends, or someone they have known, who are residents of some of the provinces of Western Canada. They have gone there to carry on the profession and occupation of farming. Their progress has been carefully watched and such news as may come from them or the country that they have taken partial possession of will be read with interest. Important news just now is the condition of the crops. Newspaper correspondents and government representatives are now in a position, after making a careful survey of conditions, to announce that the crop conditions in Manitoba, Saskatchewan and Alberta carry the promise of an early and bountiful harvest and farmers view the outlook with utmost pleasure. Good growing weather has prevailed since seeding and all cereal crops are well advanced. Wheat headed out has long, heavy heads, and big yields are indicated; predictions are being made that the record production per acre in 1915 will be exceeded. Harvesting began in some sections in the early part of August. An interesting feature of the situation is the fact that there are no bad reports from any part of the country from the Red river to the Rocky mountains and from the International boundary to Peace river. There will also be good fruit, vegetable and root crops.

Most remarkable has been the germination of most of the grain. Marquis wheat sown on May 11 was fully headed out on June 30.

Considerable advancement has taken place in the last few years in the growing of corn. Sunflowers are also being grown quite extensively. Both these do wonderfully well. On July 4 the writer was shown a twenty-acre field of corn that had reached a height of upwards of five feet, while a five-acre field of sunflowers close by, was entering for a keen race skyward. Both will doubtless be used for ensilage, to which will be added a splendid crop of alfalfa or sweet clover, which also have proved very successful. Now that corn, sunflowers, sweet clover and alfalfa have taken a liking to the country, it will mean a period of reconstruction in many farming districts, and mixed farming will supersede the period of "grain mining" that, no matter how fertile the soil, no matter how generous it may be in giving forth from its great storehouse of all the properties that have given to Western Canada its well-earned name of the wheat granary of the world, too much may be asked of it; the departure from this into the sphere of more intensive farming, covering many generalities not before indulged in, will add dollars per acre to the value of this productive land. Those who have watched the progress of Western Canada, have been looking for the day when corn and such like can be grown successfully. It has now arrived.

The cattle and dairy industry will be given an impulse that will attract those who have been wedded to this kind of farm life, while none of the interest that may be taken by the grain grower will be lessened. Already there is an influence following the fact that corn and sunflowers can be grown, that is leading to the erection of silos in many parts of the country, all indicating a growing satisfaction as to the great future that lies before it.

Due chiefly to the drop in costs of materials and wages, farmers throughout the prairie provinces are erecting many buildings this year, says the editor and manager of the Prairie Lumberman, who was a visitor to Vancouver a few days ago. A campaign is under way among the retail lumbermen and farmers, urging the erection of 2,000 silos this year, and this is meeting with success, more plans and specifications having been prepared and more structures being under way probably than at any other time in the history of the West.—Advertisement.

Protection Against Radium.

A physician using radium has to insulate himself thoroughly from its effects. Dr. Belcherc of the French Academy of Medicine says they must wear gloves lined with lead, and spectacles containing lead salt; they must handle the radium salts with pincers and sit at the table lined with lead. He is perfecting a lead protector for the heart and lungs, but advises operators to wrap themselves in thin lead sheets.

Jud Tunkins.

Jud Tunkins says nature puts enough scales on a fish to give it more of a bathing suit than some human beings wear.

From Missouri.

"What in the world are you kicking about?" asked the red-headed landlady. "When I took my room you told me there was a single hair mattress on the bed," said the thin boarder. "So I did." "Well, will you please come up to my room and show me the single hair?"

Knows a Lot.

"So your son is home from college?" "Yep." "Has he learned much?" "He certainly has. More than his mother and I have picked up in a lifetime."

DAIRY FACTS

SUCCULENT FEED FOR DAIRY

Modern Machinery for Planting and Cultivating Roots Makes Work Less Laborious.

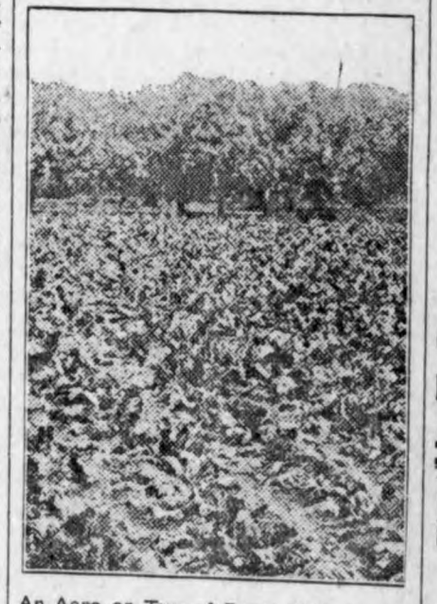
(Prepared by the United States Department of Agriculture.)

With the development of the silo many dairy cow owners have overlooked the value of roots as a succulent feed for cattle. Mangel-wurzel, beets, carrots, and turnips are the principal roots grown for this purpose. They are particularly adapted to the cooler and more moist portions of the country. The principal drawback to their use is the labor of growing, harvesting and storing them. On the other hand, say specialists of the United States Department of Agriculture, root crops have a distinct advantage for small dairies, as it is generally accepted that a silo will not prove economical where less than six animals are being fed. Roots may be stored in a proper cellar, or buried in the ground, and can be taken out in any desired quantity without injury to the remainder.

A surprising amount of roots can be produced on a small acreage. A yield of 25 tons per acre of mangel-wurzels is nothing unusual, while in England, where roots are used almost entirely to supply succulent food, the yield per acre is increased still further by intensive farming.

Other kinds of beets, and also turnips and carrots, may be used. Turnips, however, should be fed after milking rather than before, as they give a bad flavor to the product. Yellow carrots impart a desirable color to the milk. For feeding purposes the mangels will probably be found the most practical beet. Among carrots, the Long Orange is recommended because of its large size and heavy yield. It forms a long, thick root, and is very easily grown. The White Vosges or Belgian is grown exclusively for stock, and is an even heavier yielder. The rutabaga is recommended as a good turnip. The same soils and methods of cultivating are adapted to all three kinds of roots.

The soil should be well enriched, and should be one that warms up quickly in the spring. Most growers regard sandy loam as best adapted to the culture of root crops, this being particularly true of the early spring crop.



An Acre or Two of Roots Will Feed a Small Dairy Herd.

For later crops heavy soils can be employed, and muck soils are widely used for the midsummer and fall crops. Land that is in good physical condition as the result of early and proper handling, well supplied with available plant food and rich in organic matter, is essential to best results. Applications of stable manure at the rate of 20 to 30 tons per acre are advisable, and this may profitably be supplemented by the use of commercial fertilizer containing at least 2 per cent nitrogen, 8 per cent phosphoric acid, and 4 per cent potash.

The seed is sown in rows at least 30 inches apart if horse cultivation is practiced, but under hand cultivation they need not be more than 15 to 18 inches. Ordinarily about 6 pounds of beet seed per acre is required. Seed is ordinarily covered to a depth of ¾ to 1 inch. As beet seed is rather slow in germination, the practice of sowing some quick-sprouting seed along with it is sometimes followed. These plants serve as markers for the rows before the beets are up, so that cultivation may be begun before the beets show above the ground. Radishes are frequently used for this purpose.

Beet seeds come in clusters, and it is inevitable that thinning by hand will be required.

Roots intended for winter storage are allowed to stand in the field until just before heavy autumn frosts occur, when they are pulled and stored in pits or cellars, requiring much the same treatment as potatoes and similar root crops.

From 20 to 35 pounds of sliced or pulped roots, with a proper grain ration and dry foliage, is a day's ration for an ordinary dairy cow. Thus it will be seen that 2½ tons will carry a cow through the usual five-months' winter feeding period. An acre or two of beets, carrots and turnips should be enough to supply any herd which is not large enough to make a silo profitable. With the development of the sugar-beet industry many implements and methods of culture have been devised which reduce the labor required to grow root crops.

The SANDMAN STORY

EE WANTED THANKS.

E day Madam Pig and her children were eating apples under a ree by the roadside when the tree, h was very full of fruit, bent its hs and spoke.

Madam Pig, you seem to enjoy g my fruit," said the tree.

gh!" grunted Madam Pig, and on eating.

o you not think these are the best apples you have ever ?" asked the tree.

gh!" grunted Madam Pig, and on eating.

our children seem to enjoy my also," said the tree.

gh!" grunted Madam Pig, and on eating.

o you not think my apples are a tiful color?" asked the tree.

have not noticed the color," replied Madam Pig, "but I wish you

ld keep quiet so I can enjoy my ."

Well, I must say you are a very olite creature," replied the tree, ing its branches about; "here you e to me for food and I give you you can eat, and your children , and you never even thank me, then you ask me to keep quiet. are a rude creature."

Why should I thank you for what throw away?" said Madam Pig. you kept all those apples on the tree which we have eaten with those you have now your limbs would break. If we had been hungry and you had given us food from your branches, which you wished to keep, then I should thank you, but not for this which you threw on the ground."

"How dare you speak to me like that?" said the tree, shaking with anger and sending down some unripe, hard apples, which sent the piggies and Madam Pig squealing down the road.

Mr. Blackbird, who had been nearby and heard all that had been said, flew into the tree and began to peck at an apple.

"How dare you spoil my unripe fruit," said the tree, "when there are plenty of ripe apples on the ground?"

"I did not care to risk one of your hard apples striking me," replied Mr. Blackbird. "I saw the way you treated Madam Pig, and besides I rather enjoy spoiling fruit."

"Oh, you dreadful creature!" exclaimed the tree, so angry now that it shook all the unripe apples from its branches, which fell on the ground, bruised and worthless.

"There, you see what has happened," said Mr. Blackbird, hopping and chattering with glee. "You have lost all your fruit, and just because you wanted to be thanked for something you had thrown away.

"If you had not been so unjust to Madam Pig perhaps I should have eaten the apples on the ground and you would not have been in such a fit of anger," and away he flew, leaving the tree to think over what he had said.

Betty Compson

One of the most recent acquisitions to "movie" stardom is pretty Betty Compson. She was a bathing girl in film farces when she was chosen to play an important part in a popular picture, her work in that production now being screen history.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

WHEN A MAN WALKS.

He possessed a peculiar talent of producing effect in whatever he said or did. —Tacitus.

THE well-bred man remembers when walking with a woman and the sidewalk is narrow that if other pedestrians approach them, he should step behind his companion while they are passing.

But if escorting a woman in woods or through an overhung country he goes ahead of his companion in order to clear the path for her.

When walking with a woman a man invariably asks whether he may relieve her of any parcels she may be carrying, but if she declines his offer he should not be insistent. A man may have to possess a good deal of discrimination these days to differentiate between some of the enlarged handbags that women carry and a small bit of luggage. However, he should always ask to carry the latter while he would, of course, not ask to carry her handbag.

A man never takes a woman's arm when walking in the street save when she is too old or feeble to walk unaided or when the way is so slippery as to be hazardous. It is regarded as decidedly provincial or "second rate" to do this.

When walking with a woman a man never stops to speak to an acquaintance whom he chances to meet unless the woman takes the lead in so doing.

If a man happens to meet a woman acquaintance, even though he is well acquainted with her, he would not think of stopping to talk with her in the street, but if there was something which they wished to discuss he might ask whether he might walk with her for a little way. He would show the same consideration to his mother or sister in this regard.

If a man overtakes a woman going in the same direction that he is he would never think of accompanying her without asking permission and unless he knew her well enough to be quite sure that she would not have the slightest objection he would not ask for this.

A man does not invariably take the curb side of the sidewalk when accompanying a woman. He does if the road is muddy and therefore that side is less desirable. In city streets he usually takes the side that makes it possible for him to meet pedestrian traffic coming in the other way. That is, he would walk at her left where traffic keeps to the right as it does in American cities.

"What's in a Name?"

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

By MILDRED MARSHALL

ADELE.

ERIVED from the Teutonic Adilo, which also is the root of Adele, the name is one of the most ant known to students. The significance of the name is of the most oic character and it was a favorite h the ruling houses of the various rman principalities as far back as Tenth and Eleventh centuries. The e in its earliest beginnings was much the same in form and even ling as it is today. Adela is probly the widest variation in the course centuries.

The name was widely adopted in nce, as well as in England and ly under different forms from Adada to Adeline.

The jewel associated with persons ring the name Adele is the turoise. The turquoise is held to have peculiar properties of protecting the person wearing it from harm and warning them of approaching danger by breaking. Friday is Adele's most fortunate day and her lucky number is six.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

EACH OTHER, ONE ANOTHER; EITHER, ANY, NEITHER, NONE.

PROPERLY, the term "each other" is to be used of only one pair of persons or things which stand in relation, and the term "one another" only of more than two such persons or things. Thus, we may say: "The two friends presented gifts to each other," but not "to one another;" "all of the nations of the earth should dwell in amity with one another," not "with each other." There are, however, authorities on grammar who hold that the two phrases may be used interchangeably; for example, Lindley Murray says, "Two negatives in English destroy one another."

A similar distinction is made by grammarians between "either" and "any," and between "neither" and "none." "Either" and "neither" apply to two; "any" and "none" to more than two. Thus, do not say, "I have not seen either of the three men;" "neither of the twelve jurors was convinced of the man's guilt."

Record Beet Sugar Output.

Last year the production of beet sugar passed the mark of 1,000,000 tons for the first time since the industry was introduced in the United States.

How It Started

MAGAZINES.

THE first real periodical magazine appeared in France in 1665, the Journal des Savants, a magazine of criticism. Its first number was dated January 5. At a later date fiction and verse began to appear, till the monthly or weekly was as firmly established as the daily newspaper, and many of them sprang up. The first magazine in America was called the American Magazine. It was published in Philadelphia. John Webbe, its founder, brought out the first edition February 13, 1741.

(Copyright.)

A MATTER OF SAFETY

"So you prefer automobile races to horse?"

"Yes. No matter how much you may think you know about automobiles, you are not tempted to back one of 'em to the limit, same as you are a racehorse."

Economy.

The men who invented pickled pigs' feet and ox-tail soup were undoubtedly trying to make ends meet.

Home Town Helps

CUT DOWN LOSSES BY FIRE

Recommendations That Should Be Heeded by Every Dweller in City or Country.

Rod all tall buildings, using standard equipment and see that it is properly installed. Inspect every inch of rodding at least once a year.

Put up "no smoking" signs about barns and outbuildings, and enforce them.

Ventilate the barn, but also see that tight doors and windows are provided against the invasion of sparks and blizzards.

If you have nothing to fight fire with, get something if only a bunch of buckets.

Do not put the well pump too close to the barn—you may need that water to save your property some night.

Get non-freezing pumps.

Know where the ax is, and have two ladders on hand long enough to reach over the eaves of the tallest buildings.

Talk over with the family just what each is to do in case of a fire in home, barn or field.

Keep oils out of the house and barns.

"Stagger" your buildings with reference to the prevailing winds. Do not let a fire in one building wipe out your entire place.

Watch for spontaneous combustion in the barn.

Cut the weeds and do not "bank up" the house with dead herbage.

Keep matches in a metal box away from children, mice and rats.

Never leave an outdoor fire for the night nor leave an indoor fire without safeguarding your home from fire.

Do not stack crops close to buildings and see that your road from pike to house and barns is in good shape.

Conserve your water supply.

CARELESS DRIVER WARNED

Instructions to motorists who disregard signs merely calling attention to steep hills or railroad crossings must be explicit, according to the Travelers' Standard. Any novice should be able to make a safe crossing if he follows the advice set forth by this warning near Ithaca, N. Y.

Grow Flowers With Vegetables.

There is no reason why flowers and vegetables should not be grown together. It is difficult to draw the line, anyway. The dahlia, now one of the most popular flowers, was originally planted with the intention of using the tubers as a potato substitute. The scarlet runner bean, grown by the acre on the farms of England, is most often used in America as a climbing vine around the house; in fact, there are many persons not aware the beans are good to eat.

The ideal garden is one which combines flowers, vegetables and fruit. Such a garden should have a place on every farm and back of every suburban home. Oftentimes the vegetable plot can be surrounded with a border planted on two sides with small fruit like raspberries, currants, gooseberries and grapes, and on the other two sides with annual and perennial flowers.

May Restrain Billboards.

Many people, especially those that go down to the country in motorcars, will welcome the efforts that are being made in Maine to deal more faithfully than ever with the billboard. If an amendment to the state billboard regulations now before the senate is carried, no billboard or advertising sign may in future be erected at any point where it can obstruct the view of a curve or angle. It is a good amendment so far as it goes. A better one would be to abolish the billboard in the country, altogether.—Christian Science Monitor.

Four-Handed Twin-Grand Piano.

A twin-grand piano, the first of its kind ever constructed, was recently demonstrated at an orchestral concert, at Leipzig, Germany. This novel instrument, of which a photograph appears in Popular Mechanics Magazine, is like two grand pianos placed end to end and inclosed in one frame, excepting that it has only one soundboard. Consequently, the keyboards are at opposite ends, and the players face one another. The soundboard is constructed so that there is no intermingling of sound waves.

THE TREE GIRL

By LEE BRADFORD.

(©, 1921, by McClure Newspaper Syndicate.)

Donald stopped at the foot of the long hill, threw himself down under a large apple tree which hung over the road, and wiped his brow.

"Going to rest a minute, dad, before I tackle that mountain," he called to his father, who waved his hand in reply, and continued pushing his bicycle up the ascent.

His sister, Roberta, and their mother had gone to their grandfather's farm in New Hampshire by train. Donald and his father were making the trip "a la bike," as Don expressed it, and enjoyed it immensely.

Don watched his father till he reached the top, leaned his wheel against a tree and sat down in a shady spot. He reached for his hat. Plunk! A very large, red apple dropped into his upturned straw hat. He seized it and sank his teeth into the juicy fruit.

"Gee," he said aloud, "a gift from the gods! Plunk! Another round, red apple dropped in the same spot.

"One for pop," he said, storing it away in his pocket.

He looked up into the tree and encountered a pair of laughing eyes, belonging to a girl in a pink gingham dress, perched on the highest limb.

"Not a gift from the gods, but from a goddess," she corrected, laughing.

Donald returned to his natural manner. "Say, I didn't know girls could climb trees."

"Oh, you don't?" she queried, mockingly. "Well, this girl can."

Just then his father hallooed, and he turned to go reluctantly.

"Good-by, smarty," called the girl.

"Good-by, tomboy," returned the boy.

He thought the incident closed, but during his four years of college the rosy, smiling face of the "Apple Tree Girl," as he called her, was constantly in the background of his mind.

It was the summer after he graduated from college when his father insisted he should take a real vacation, for he had worked his way through college and his summers had been devoted to the making of extra money.

Now he was graduated with honors and had accepted a desirable position.

He was tentatively turning over in his mind the possibility of looking up the white farmhouse on a corner of a certain New Hampshire road, near which he had rested that August day four years ago, en route for grandpa's farm. Of course, the charming goddess of the apple tree must live there. Roberta was expecting a girl friend of hers who was "finished" at the same boarding school as herself, and begged Donald to stay at home a few weeks before he went to his grandfather's.

"Yes, I'll stay," he said ungraciously, "but for pity's sake stop singing her praises from morning till night."

"Oh, Don, look! I just got her picture—"

"Maisie," he continued, scornfully, refusing to look at it, "what a name! Probably it was just plain Mary before she fixed it over."

"Don," said his mother, laughing, "stop teasing your sister." She took the photograph. "She really has a very bright, sweet face."

"Maisie, Maisie, clean gone crazy," sang Don, as he dodged a pillow flung at him by his irate sister.

Three days later Maisie King had arrived and the three met again in their mother's sitting room.

"Gee, mom, I don't like dinner parties; fix me an alibi, will you?" pleaded Don.

"I will not," answered his mother firmly; "it's getting noticeable, your dodging about, trying to avoid Miss King."

"Oh, well, all right; I'll be here," replied Don shortly.

Turning the corner of the house, he came to a sudden halt. A dark-eyed, dark-haired girl was sitting in the hammock, an amused smile in her bright eyes.

"The Apple Tree Girl!" ejaculated Don. He came nearer. "Who are you?" he asked cautiously.

"Why, I'm Maisie, Maisie, clean gone crazy," she answered demurely.

He stared at her, a quick flush flooding his tan.

"Say, I'm no end ashamed of myself, and I owe you an apology. How will you have it?"

"Not at all," she laughed. "I know exactly how you felt. Your sister had your photo at school and talked of you a great deal, and I've really known you for four years now," she added.

The day seemed singularly bright to Don. He seated himself on the ground near her.

"Did you—did you ever mention our apple tree acquaintance?" he asked awkwardly.

"No," she blushed, "I never—happened to mention it to anyone."

"Do you still climb apple trees?" teased Don.

"Oh, I can," she flashed back, then added, "but I haven't climbed much since a certain young man called me a tomboy."

"But I like you that way," insisted Don. "It has made you seem different from the dolls around here."

"Well, I don't think I've really forgotten any of my boyish accomplishments," she laughed.

Two weeks later, when Maisie returned home, she was accompanied by her dance, who only smiled when Roberta sang teasingly after them:

"Maisie, Maisie,
Clean gone crazy!"

POULTRY

NO BEST BREED OF POULTRY

There Are Three Classes Specially Adapted to Production of Eggs and Meat.

(Prepared by the United States Department of Agriculture.)

There is no best breed of poultry. That, at least, is the opinion of men in the United States Department of Agriculture who have been studying the business for years, and have had experience with all varieties of all breeds in America. To go among your friends and ask for advice about the kind of chickens to start with would be about as productive of conflicting views as if you asked for help in buying a motor car or a typewriter. Every man has his likings, and some have good reasons for them, but in the end the beginner will have to be the judge; wherefore the opinion of the department specialists will be about the best guide: Keep only one variety of breed, and select the breed that suits your purpose best. Be sure of one thing—have a standardbred male at the head of the flock. Such a bird will improve the quality of the stock materially. A mongrel male will produce no improvement.

These are the reasons: Standardbred fowls produce uniform products which bring higher prices.

Standardbred stock and eggs sold for breeding purposes, bring higher prices than market quotations.

Standardbred fowls can be exhibited, and thus compete for prizes.

Eggs and stock from mongrel fowls are not sold for breeding purposes.

Mongrel fowls are not exhibited in poultry shows or expositions.

General-purpose breeds are best suited to most farms where the production of both eggs and meat is desired. The four most popular representatives of this class are the Plymouth Rock, Wyandotte, Orpington, and Rhode Island Red.

All these breeds, with the exception of the Orpington, are of American origin. They are characterized by having yellow skin and legs, and lay brown-shelled eggs. The Orpington is of English origin, has a white skin, and also lays brown-shelled eggs. You

A Flock of White Plymouth Rocks—A Good General-Purpose Breed.

can get a detailed description of all fowls of American origin in Farmers' Bulletin 806 on "Standard Varieties of Chickens. I. The American Class," which may be had upon application to the Division of Publications, United States Department of Agriculture.

The Mediterranean or egg breeds are best suited for the production of white-shelled eggs. Representatives of this class are bred largely for eggs rather than for meat. Among the popular breeds are Leghorn, Minorca, Ancona and Andalusian.

An outstanding characteristic of the egg breeds is the fact that they are classed as nonsitters; that is, as a rule they do not become broody and hatch their eggs. When fowls of this class are kept, artificial incubation and brooding usually are employed. Farmers' Bulletin 898, "Standard Varieties of Chickens. II. The Mediterranean Class," tells about this class.

Langshans, Brahmas, Cochins, and Cornish fowls belong in the meat breeds, rather than for eggs, and although classed for meat are sometimes kept as general-purpose fowls. They are all heavier and larger than the egg breeds, or those of the general-purpose class, and lay brown-shelled eggs. Farmers' Bulletin 1052, "Standard Varieties of Chickens. III. Asiatic, English, and French Classes" describes the breeds in this class.

Fowls for breeding purposes should be strong, healthy, vigorous birds. The comb, face, and wattles should be a bright red, eyes bright and fairly prominent, head comparatively broad, short, and not long or crow-shaped; legs set well apart and straight, plumage clean and smooth.

The beginner in poultry will be careful to have a home ready for his flock before he gets it. Farmers' Bulletin 889 contains suggestions, plans, and directions every poultry keeper should have. The Division of Publications will send it upon request.

INFERTILE EGGS KEEP BEST

Are Preferred for All Purposes Except Hatching and Can Be Kept for Longer Period.

Ordinarily all eggs will be infertile after the male has been separated from the flock for two or three weeks. Infertile eggs will keep much longer than eggs that are fertile, and are best for all purposes except hatching

Nissen Memorial to be Dedicated Sunday

George Nissen and family of Iowa Falls drove down here yesterday in their car and will remain until Saturday visiting with his mother, Mrs. Kate Nissen and other relatives. On Sunday they will drive to Milford and Lake Okoboji and will be accompanied by Mrs. Kate Nissen. On Sunday afternoon the Hans Nissen Memorial Building at the Methodist camp grounds at the lake will be dedicated. Rev. Hans Nissen is a son of Mrs. Kate Nissen and a brother of George.

PLEA FOR EAGLES

Trapper Denounces the Bounty Placed on Birds.

Incidentally He Criticizes the Present Tendency to Extirpation of Wild Creatures of Our Country.

Next to the American Indian, the most practical naturalist in the world is the modern packer. He lets nothing get away. After the packer we should place the prospector, hunter or trapper who makes his living among wild creatures and is obliged to know their habits. It chances that there is just in hand a rugged and outspoken letter from one of these latter practical naturalists who never took a degree except in the school of out of doors, says a writer in the Saturday Evening Post. He writes from the heart of Alaska, far down the Yukon river, and makes outspoken comment on the present tendency to the extirpation of wild species by means of bounties and the like.

In his blunt speech he says that as for killing eagles at 50 cents a head he is of the belief it would be better to put the bounty on the men who made the law.

This practical naturalist has counted thirty-six dead caribou calves on the early spring bed grounds near his home. He works where thousands of caribou calves are born each spring, lives among them and watches them. He says there were plenty of eagles about, but that he never saw them eat anything but the calves they found already dead. He says they may kill some weak calves or those about to die, but so far as he has learned in his travels in Alaska and Yukon territory he has never seen any harm the eagle has done, although he has lived in that region for twenty-five years and is familiar with it from the Mackenzie to the Bering sea and from the Arctic ocean to Lynn canal.

"I am not a saloon or roadhouse prospector," he says, "but am in the hills 330 days out of the 365. I am not a naturalist and have not much education, but if I couldn't make better conservation laws than some we have, d—— if I wouldn't quit. I would like to have some of our lawmakers out in the hills for a while and show them that since the killing off of the eagles there is nothing left to do the scavenger work. There is just as much sense in killing the scavengers in the cities."

There are getting to be a good many men in this country who are weary of the sweeping and ghastly results of hysteria and who begin to hope for some horse sense upstairs—a good many who would like to see this country left alone for a while the way Almighty Providence constructed it.

Rough Stuff.

Slapstick Director—Can't you suggest a novel from which we could adopt a comedy?

Comedian—My memory isn't very accurate, but isn't there a book called "Alice Threw the Looking Glass?"—Film Fun.

Patriot.

"Pa, what is a patriot?"

"A patriot, my boy, is a man who continues to love and serve his country whether or not its elections go to suit him."

BAND CONCERT
WEDNESDAY
NIGHT

MAN OF DAUNTLESS SPIRIT

Captain Arthur Phillip, First Governor of New South Wales, Made Light of Difficulties.

History teems with records of great enterprises carried through with courage and strong purpose. The early settlement of Australia provides a good example of this. Capt. Arthur Phillip, the first governor of New South Wales, unobtrusively set sail from the Isle of Wight, on a May morning in 1787, with 11 ships, mostly ill-equipped, and so started, inauspiciously, on his 12,000 miles voyage to the Antipodes.

If was not until eight months later, that is on January 26, 1788, that the expedition landed at Sydney cove, situated inside the world famous Sydney Harbor. The anniversary of this historic landing is punctiliously observed throughout the commonwealth as a public holiday.

Captain Phillip, with every conceivable difficulty to face, including unsuitable settlers, great shortage of food and every kind of equipment, yet weathered the storm. His every report home was couched in a cheery spirit. Most of the seed wheat and other grain had unfortunately become spoiled on the voyage out and things were looking bad. Anticipations of help were centered on the impending arrival of the relief ship which was due early in 1790, but the vessel struck an iceberg near the cape, and the cargo had to go overboard to save the ship, which was then compelled to return to port. This even necessitated the strict rationing of the settlers. In writing home, the governor referred to his desperate situation as "these little difficulties which we have encountered."

Such was the man who initiated the settlement of Australia. His attitude toward the natives demonstrated at once his humanity and statesmanship, for he showed them great kindness and did his best to establish friendly relations between them and his settlers. Ultimately the settlement flourished and formed the nucleus of the commonwealth as it is known today, and thus well has Governor Phillip earned the distinction of being included in the roll of honor of the "Men Who Built the Empire."

Colossal Farms in Argentina.

Our American farms seem diminutive compared with those of Argentina. There the farm of two hundred thousand acres is common. Many are twice that size, and there is a record of at least one three times as large. It is not unusual for a whole day to be consumed on the train in crossing the land of a single proprietor.

The old cowpuncher days of our West are being repeated here. Looking from the window of the train one may often count twenty thousand cattle within an hour. Also he will see thousands of sheep and scores of ostriches. But one thing he will not see—barns. In a land where it is not too cold for animals to be out all the year round, and where there is no need to cut and store hay because hay grows 12 months in the year, barns are unnecessary.

At every station one will see corrals and pens for convenience in loading the cattle cars. Every day trains from all parts of the republic arrive at the great packing plants near Buenos Aires with their burden of restless animals.—Willard Price in the Christian Herald.

Alarm Clock as Egg Urge.

Councilman Lester Lutz is somewhat of a chicken fancier, writes a Berwick (Pa.) correspondent of the New York Tribune. Recently he tried the experiment of placing in his chicken-pen electric lights that would switch on at four o'clock in the morning. He believed it would result in getting more eggs from the hens. That stunt didn't work, because the chickens failed to be aroused, even by the light in the pen, but Lutz thought further than that.

He got an alarm clock and put that in the pen, so it would ring every morning at four o'clock, the same time the lights were switched on.

"Formerly I was getting only six eggs a day from a pen of 20 Leghorns," said Lutz. "Now I am getting 12, 13 and 14 eggs a day from the same hens."

He invites visitors to come to his pen and see the electric lighting system and the alarm clock.

Provincialism.

"What kind of a place is this, anyhow?" said the stranger, as he ordered the porter to get him a berth on the 7:29, and to be sure that it was a lower berth, near the middle of the car.

"We kind of like it," the porter replied taking the stub of a pencil from behind his ear. "Ain't there anything doin' in your line here?"

"Oh, yes—as much as I could expect, I guess; but you're old-fashioned. You're away behind the procession. Right out on Main street there's a candy store that's not run by a Greek."—Exchange.

Powdered Lemon Juice.

One of the newest fruit products is powdered lemon juice. It is pure juice reduced to a perfectly soluble powder. Details of the process used have not been given out, but it is an adaptation of the well-known spray method of reducing milk to powdered form; indeed, the originators of the product are powdered-milk manufacturers, the largest in the world. The process can also be used successfully with orange juice. The originators intend to erect a California factory for the manufacture of the product.

NOTICE TO ALL DOG OWNERS

Get your dog license for 1921 before Sept. 1, 1921. or the marshall will get the dog. Dogs must have a collar with license tag in plain sight. F. J. WENCK, MAYOR.

NOTICE TO CONTRACTORS

FOR THE CONSTRUCTION OF LATERAL NO. 3 OF DRAINAGE DISTRICT NO . 9, HANCOCK COUNTY, IOWA.

Notice is hereby given that the Board of Supervisors of Hancock County, will meet at the Court House in Garner, Iowa, on the 16th day of August, A. D., 1921, at one thirty o'clck P. M. to let to the lowest responsible bidder the contract for the work and construction of Lateral No. 3 Drainage District No. 9, of Hancock County, Iowa, said work to be let specifying the work to be done and the time fxed for the commencement and completion of the same, to wit:

Length	Size	Av. Cut
2900'	16"	5.8
575'	14"	5.4

Concrete Bulkheads 10 cu. yd.

Alle tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2. All tile must pass the specification for Drain tile of the American Society for Testing Materials.

3. Whenever the tile improvement is laid in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to back fill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specification are on file with the County Auditor.

5. Work to be commenced thirty days from date of letting of Contract. Contract will be completed by Nov. 1st. 1921.

All ditches and drains to be constructed in all respects in accordance with the plat, profile and specification of the District filed by the Engineer in the Auditor's office subject only to such changes and alteration as may be made provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1:30 o'clock P. M. of the 16th day of Aug., 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids must specify prices for tile alone, for construction work alone, or for both tile and construction.

The Board will at their decision, let the work as a whole to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amoun of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENTS WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa. within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof, and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five percent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage Dist. No. 9, together will all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty four hours after demand and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 25th day of July, 1921.

CHRIS JACOBS,
J28A4 County Auditor.

Klemme Rebeccas Initiate

Last Thursday evening the Rebecca Lodge of Klemme took in thirteen new members into their organization. The lodge is growing very rapidly and was organized only a short time ago.

The degree team from the Garner lodge came over to assist with the work. The ladies wore their new satin robes of white which made the ceremony very beautiful.

After the initiation and work refreshments were served. All say the evening was a grand success.

JACOBS & SON

SOMETHING TO THINK ABOUT

By F. A. Walker

INTERESTING PLACES.

A METROPOLITAN newspaper recently featured the photographs seen in a trip around the world.

They were as follows: The Great Wall of China, a group of figures outside a Buddhist temple to frighten away evil spirits, the houseboats on the canal at Canton, China, the ancient instruments in the astronomical observatory at Peking, the bank of the Nile near Cairo, where, according to local tradition, the daughter of Pharaoh found the infant Moses in the bulbrushes.

The interests of this traveler were apparently confined largely to the Orient or else he traversed the most of his journey with his eyes shut, a fault common to a good many travelers.

* * *

What are the five most interesting examples of the handiwork of man to be seen in a trip around the world? What are the five things most worth seeing and remembering?

What would interest one would not, perhaps, interest another, and the list which is given below may not appeal to you even though it be an opinion compiled from the experiences of a dozen or more world travelers who discussed the interesting question.

Here are the things which were in general agreed upon as the five things most worth seeing:

* * *

The Taj Mahal at Agra in East India. This is undoubtedly the most wonderful example of architecture in the world. It was built by Shah Jehan to his favorite sultana, Moomtaz-i-Mahul, and the romance of its building, if you will take trouble to look it up in the library, you will find extraordinarily interesting.

The Vatican at Rome. No building in the world houses so many unreplaceable treasures as the Vatican. Its art riches, its wealth of literary treasures exceed in interest and in value any other single collection ever made.

* * *

The Mount Wilson observatory, near Los Angeles, Cal. It is in this observatory that is housed the 100-inch Hooker telescope with pierces further into the unknown of space than any other instrument that human hands have devised. One moment's look through that magnificent instrument would show you a new universe which before it was built had never been seen. It is one of the scientific wonder spots of the world.

Shakespeare's home at Stratford. It was here that the master of all writers retired after he had finished the greatest contribution to literature ever written in any language or by any man. It is an inspiration to stand where he had once stood, to see some of the material things that were once his companions.

The Panama canal. Undoubtedly the greatest example of man's engineering genius since the world began. There may have been greater difficulties to surmount in the building of the pyramids but they are useless things, not so wonderful now as a modern city skyscraper.

* * *

All five of these things are the accomplishments of the brain of man. Added to them the traveler around the world would wish to see those other and greater things that man has never equaled: The falls at Niagara, the Grand canyon, the mighty trees of California, the great tides of Fundy, the caverns at Luray, the mountainous monuments of God in the Alps and the Himilayas, the supreme beauty of Lake Louise or the Bay of Naples.

To the traveler there is given the great privilege of seeing with his own eyes but even if you cannot travel, the beauties and the wonders of the world are not denied you. You can see them through the eyes of others who have seen them and have written down in graphic and truthful language the wonders that they found.

If you are interested in any of the five things of man enumerated above you can find them all interestingly written about in any good library, and of the greater things in nature hundreds of books have been written on each of them.

THE ROMANCE OF WORDS

"BLACKGUARD."

IN OLDEN days the palaces of kings and the palaces of nobles were by no means as well furnished and as clean as they are at the present day, and it was customary when members of royalty or the nobility visited each other that the guest should bring with him all his kitchen utensils, pots, pans and even a certain amount of coal. The scullions and lesser retainers had charge of these goods, rode among them, were smutted by them and received the contemptuous appellation of the "black guard." In time the word came to be understood as meaning any troop or company of ragamuffins, and finally, when its original application had been buried in the lore of centuries, it was applied to a single person as an epithet of opprobrium—as being synonymous with a rogue or rascal who would stop at nothing in order to gain his ends.

It was in the earlier sense, however, that Dryden used the term as a stage-direction in his play "Don Sebastian." "Enter the captain of the rabble with his black guard at his heels," and Fuller likewise spoke of the "devil's black guard" in the Crusades as meaning the number of thieves, debtors and runaway slaves who joined in the Holy war.

NEWS REVIEW OF CURRENT EVENTS

Acceptance by Japan Makes Way Clear for the Conference in Washington

SILESIA CRISIS PASSING

France and Britain Reach Agreement and Germany Is Warned—Harding's Plan for Financial Relief of Railroads, Farmers and Cattle Raisers.

By EDWARD W. PICKARD.

With a mind not yet quite at ease in the matter, Japan has sent word that she will accept President Harding's invitation to the Washington conference to discuss limitation of armaments and questions of the Pacific and the Far East. But this is to be with certain reservations. These are expressed in the closing part of Tokyo's latest note to Washington, which reads:

"The Japanese government have been made aware through the communications and the published statement of the American government and the conversations between the secretary of state and Baron Shidehara that the proposition of the American government to discuss the Pacific and Far Eastern problems is based on the close bearing they may have on the question of limitation of armaments, which is the original and principal aim of the conference, and that, therefore, the main object of discussing these problems is to reach a common understanding in regard to general principles and policies in the Pacific and Far East.

"In order to insure the success of the conference, the Japanese government deem it advisable that the agenda thereof should be arranged in accordance with the main object of the discussions as above defined, and that introduction therein of problems such as are of sole concern to certain particular powers, or such matters as may be regarded accomplished facts, should be scrupulously avoided."

Of course, among what Japan considers "accomplished facts" are the cession of Shantung to Japan and the Yap mandate. But our State department is confident the Japanese can be satisfied in the drawing up of the agenda for the conference, and therefore is now preparing the formal invitations to the powers.

There is a chance that some of the British dominions, which consider themselves full-fledged nations in most respects, will kick up a little trouble because the British empire is to be represented as a unit, with only one vote. Australia already is wailing that she is entitled to a vote as a nation on the Pacific problems. Probably New Zealand, and possibly Canada, feel the same way. Rene Viviani and Albert Sarrault, minister of colonies, are to represent France at the conference; and Premier Briand also may come.

No decided opposition to holding the conference in Washington has developed, but the date of its opening remains to be settled. The United States tentatively mentioned November 11, Armistice day, because it would be sentimentally suitable, but again the British dominions protest. Many of their legislative bodies are in session during the fall months, and as their premiers wish to be present at the conference, they are urging that a later date be selected for its assembling. It may be they can be satisfied by preliminary informal consultations between Pacific powers which will enable them to put their views on record.

Through mutual concessions—France yielding the most—Great Britain and France have reached an understanding on the Upper Silesian question, and the threatened break in the entente will not occur just yet, anyhow. France abandoned her insistence to discuss limitation of armaments and agreed to a meeting of the inter-allied supreme council in Paris August 4. But she insisted the question of strengthening the allied forces in the region must first be settled, and also warned the British that any hostile act against the French troops or the Poles in the disputed area would result in the immediate occupation of the Ruhr basin, regardless of allied action.

Premier Lloyd George, on his part, consented to a meeting of experts to examine into the Silesian problem, and also conciliated the French by giving the German government a sharp rebuff. When France was preparing to send more troops to Silesia, she asked the Germans to supply the transportation. Berlin sent a note to London, asking if the British indorsed this demand. To this Downing street replied curtly that it was an interallied affair and not discussible with outsiders. British Ambassador Lord D'Abernon in Berlin also told the Germans that if the French or Poles were attacked the British would help in the occupation of the Ruhr basin.

For some time there have been rumors that former Emperor Charles was planning another coup to regain the throne of Hungary. Last week Roumania, Jugo-Slavia and Czecho-Slovakia signed a treaty providing for a declaration of war against Hungary if Charles should return. It is officially announced in Madrid that negotiations are under way for giving the ex-emperor and his family asylum in Spain. The consent of the other powers is necessary.

Having destroyed a considerable part of the Turkish nationalist army and advanced so far that even Angora, the nationalist capital, is threatened, the Greeks are restoring their lines of communication and preparing for the second phase of the offensive. General Papoulas, their commander-in-chief on the Smyrna front, says: "We are not going to let up on Mustapha Kemal Pasha until we have so completely dissolved his forces that he will never again be able to put an army in the field." Apparently Kemal realizes that he is being thoroughly whipped, for he has appealed to the government at Constantinople to intervene and stop the warfare. How this can be done is not clear. Kemal's own government is said to be abandoning Angora and transferring its archives to Sivas.

Evidently Kemal has not been receiving the aid he expected from the Russian bolshevists. Lenin and Trotzky and their soviet crew are themselves in hard straits due to the rapid spread of famine and cholera in Russia. They have appealed loudly for help, but the governments they have so long flouted are deaf to their calls. Even the United States, always generous in response to the wails of the suffering, has told the soviet government, through a note from Secretary Hoover, that any relief measures would depend largely on the treatment of the Americans held prisoners by the bolshevists. This was reenforced by a note from the State department formally and curtly demanding the release of those prisoners, and the soviet rulers already had been told there would be no consideration of closer relations with Russia until the Americans were set free.

The distress in Russia is such that Trotzky has been given dictatorial powers to handle the situation, and all government projects except those for relief have been suspended.

The Irish affair is still in status quo. De Valera and the Sinn Fein cabinet have been studying Lloyd George's offer, but have let it be known that it cannot be accepted until the British have released the imprisoned members of Dail Eireann so that parliament can have a full meeting to discuss the plan. The British government is willing to free these men if De Valera will make the request, but the Sinn Feiners feel that for him to do this would be in effect a recognition of the government's right to imprison representatives of Ireland. Lord High Chancellor Birkenhead in a speech in the house of lords, asked that parliament be given a chance to deal with the trouble De Valera and his colleagues may be having in Dublin to reach a decision, and intimated that negotiations may continue several weeks.

A recent rumor concerning Lloyd George's plan is that it provides for two senates in Ireland, one for Ulster and one for the rest of the island, each managing its own affairs but subject to an Irish parliament in Dublin in which the members of the lower house shall be elected on a population representation basis and the upper house shall have equal numbers from the two provinces.

President Harding and Director General Davis of the railroad administration having worked out a plan for the relief of the railroads, the President last week presented it to congress in a message and asked for legislative action. Briefly, he urged that the War Finance corporation be permitted by congress to purchase about $500,000,000 of securities deposited with the railroad administration as evidence of the railroad debts to the government, the railroad administration then to apply the purchase price against debts which the roads have against the government, thus giving the roads funds that they greatly need. "There has been thought to ask congress for additional funds," said Mr. Harding. "No additional expense, no investment is required on the part of the government; there will be no added liability, no added tax burden."

Less definite was the part of the message asking congress to appropriate assistance to farmers and cattle growers. But his plan here, too, rests on additional authority for the War Finance corporation, and later Senator Kenyon introduced the administration bill providing that whenever the corporation is of the opinion that conditions arising out of the war have resulted in an abnormal surplus accumulation of any staple agricultural product, which is normally exported in substantial quantity, and that the ordinary banking facilities are inadequate to carry such products until they can be exported, advances may be made for periods not exceeding one year up to $1,000,000,000.

Either the public health service has been receiving a lot of false information, or the public officials of southern states refuse to admit the truth. Recently Surgeon General Cumming received reports that the South is threatened with an epidemic of pellagra as a resulting semi-famine, and thereupon President Harding called on the public health service and the American Red Cross to investigate at once and devise measures of relief. It was said the low price of cotton, with resulting shortage of money, was to blame. The two agencies got busy at once, and at the same time in spite of the protests of the southern states in all cases the state health officials took issue with the reports of the public health service, most of them declaring vigorously that there was any increase of pellagra and all denying that the situation was serious or that a real famine threatened.

The Illinois scandal, or comedy whichever way you look at it—had an amazing development when Governor Small, indicted for embezzlement of state funds, decided that he was immune to arrest during his term in office and considered the calling out of state troops to protect himself. His lawyers, appearing before Judge Scott of Springfield as "amici curiae," advised the court that the governor was immune, ridiculously basing their assertion on the old maxim that the king can do no wrong." The judge humored their solemn dignity with long and erudite opinion, in which he completely riddled their position, turned their authorities against themselves and made it quite clear that in his view these friends of the governor were offering decidedly unfriendly advice. He ruled that the governor, like any other man, was not immune to arrest and prosecution for crime, and ordered the sheriff to take him into custody after giving him reasonable time to surrender. At this writing Mr. Small is still at large, conferring with his political friends, presumably trying to find some way out of the

MOTHER'S COOK BOOK

by Nellie Maxwell

"Tis looking down that makes one dizzy. —Browning.

Don't worry when you stumble; remember, a worm is about the only thing that can't fall down.

SUMMERY FOODS.

DISHES easy of digestion and those refreshing as well as easy to prepare are those that interest us during the warm days.

Creamed Chicken in Crown of Rice.

For a crown mold holding one pint of material, wash a scant cupful of rice and cook in one quart of chicken broth, in whole or part. Salt, using one-half teaspoonful. When done butter the mold and pack in the rice. Set the mold on several folds of paper in a dish of boiling water and let cool until the filling is ready. Melt one-fourth cupful of butter. In it cook one-fourth of a cupful of flour, one-half teaspoonful each of salt and pepper, a scant pint of liquid, broth or milk, one or both. Fill the center with the creamed chicken and serve at once.

Sardine Hors d'Oeuvre.

Cut Boston brown bread into rounds. Cut out a thin round one-eighth of an inch from the edge. Fill this open space between the two with sardines skinned and boned, seasoned with lemon juice, salt and paprika and Worcestershire sauce mixed together. Salt a slice of hard-cooked egg at the center and a row of capers around the edge.

Coffee and Tapioca Trifle.

Have ready two cupfuls of clear strained coffee and one-half cupful of pearl tapioca. Cook the tapioca with the coffee until well done. When done add one-half cupful of sugar, a pinch of salt, turn into glass cups and finish when cold with whipped sweetened cream.

Green Peppers Stuffed With Mutton.

Cold mutton chopped, some of the gravy or sauce with which it was served may be mixed with it, seasoning well and use as a stuffing for halves or remove the tops; parboil for five minutes; drain and chill, then fill. Bake in a moderate oven basting with broth occasionally.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

THE TRAINED NURSE.

NURSING is going to be a greater opportunity for the right woman than ever before in the history of medicine.

There is going to be better regulation of working hours and an advance in salary. For the demand is exceeding the supply and inducements to take up the profession must necessarily grow more attractive.

If you want to be a nurse it is your duty to take the training, for you are wanted, and your work waits for you.

In some of our states there are no laws making the registration of nurses compulsory. Because of this, untrained or partly trained women compete with the trained nurse for private work. Laws must be passed that will alter these things for the better. The Red Cross is hoping to demonstrate the need of the properly trained nurse so strongly that every community will be led to demand a proper registration law and a certain degree of training for its nurses.

In choosing your training school, be sure that you select a first-class hospital. You will get infinitely better treatment and your diploma will count for far more.

Nursing is hard work, but for the woman with a vocation it is work that she loves. A graduate nurse is a valuable member of the community. Her standing is secure, and she can be sure of a good income. In her professional life she is thrown with men and women of high caliber. If you have any leaning that way, it is worth much effort to get started.

LYRICS OF LIFE

By DOUGLAS MALLOCH

A PLACE TO TIE.

I'VE noticed afloat and a-tramping,
I've seen it on river and land,
The thing that the most
You need is a post
To tie to when night is at hand,
Some sort of an anchor to hold you,
Some hawser that never will fail,
Some place you can tie
Till the storm has gone by,
To help you to ride out the gale.
So many go foolishly drifting
While rapids are roaring below,
Afloat on the tide
Without compass or guide,
Till down to disaster they go;
The need of us all is an anchor,
A painter to tie to the shore,
Some place to make fast
Till the tempest is past
And the waters are rolling no more.
So many afloat on the river,
The turbulent river of life,
Have only their own
Poor resistance alone
To conquer the trouble and strife.
A fellow needs something to tie to,
His trail o'er the sea or the sod,
Some friend that is true
Who will carry him through—
A woman, a pal, or a God.

U., DES MOINES, NO. 32--1921.

MOST DESIRABLE POULTRY FLAVOR

Much Depends on Distribution of Both Flesh and Masses of Fat Over Carcass.

FLESH OF FEMALE IS MILDER

Exercise Toughens Fibers and Connective Tissues and Lessens Amount of Fat—Do Not Feed Fowls Onions or Garlic.

(Prepared by the United States Department of Agriculture.)

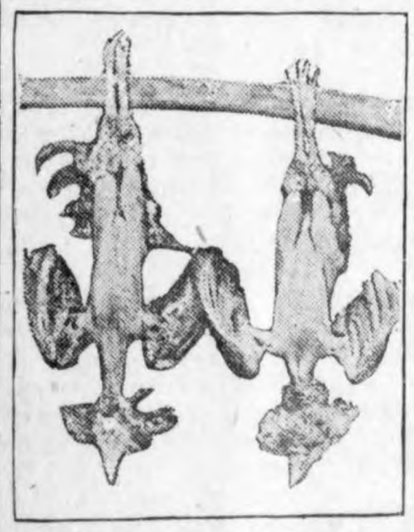
Desirable quality in the flesh of poultry intended for table use depends on the flavor of the flesh; on the texture; on the amount of flesh in proportion to the weight of the bird; and on the distribution of both the flesh and the larger masses of fat over the carcass. Other things being equal, the flesh of the females usually is milder than that of the males, say home economic specialists of the United States Department of Agriculture. Caponizing makes the flavor of cocks more delicate, tends to produce finer and less tough muscle fibers, and increases the size of the masses of meat, especially in the breast.

Effects of Age on Flavor.

Age tends to increase flavor, at first advantageously, but later usually, disadvantageously. Most very young birds have a flavor too mild to be satisfactory for stewing or fricassee, but make splendid eating as broilers or fryers. The delicacy of flavor usually is lost in decidedly old birds. As the bird grows older, the proportion of flesh to bone usually increases, at least up to the period of full maturity. Often the large masses of flesh found on such birds can be utilized more satisfactorily than the smaller ones found on young and scrawny chickens.

Exercise affects the flavor and texture of poultry flesh, as in any kind of meat. It toughens the fibers and the connective tissues, and lessens the amount of fat. It may also affect the distribution of flesh on the carcass increasing the naturally strong, tough muscles rather than the less-used, tender ones. In some birds, notably chickens, the exercise can be controlled. Almost any poultry, however, can safely be penned for a few days before killing.

The difference between the flesh of a plump chicken and of a lean one of similar kind and age is due principally to the fat present. The skill of the fattener, from the consumer's



Caponizing Makes the Flavor of Cocks More Delicate and Increases the Size of the Masses of Meat, Especially in the Breast.

standpoint, lies not only in producing the desirable amount of fat at the least expense for food and care, but also in getting the fat well distributed through the flesh rather than merely in masses within the carcass or under the skin. Such large masses have little value for table purposes, and unless they are carefully saved and used for cooking they are practically wasted. When the amount of flesh is increased by the fat between the fibers the proportion of edible material is increased, and the larger masses of meat make better portions in serving. The quality of the flesh is also improved.

Importance of Special Feeding.

Chickens fattened on a mash of grain and milk acquire a delicate flavor. Special feeding often imparts a very desirable flavor. This is found in canvasback ducks, for example, which are considered at their best when they have fed on wild celery. Celery and chestnuts sometimes are used to give turkey flesh a special flavor. Birds intended for table use should not be allowed to eat onions or wild garlic habitually, because the sulphur compounds in these plants pass over into the flesh and give it a taste objectionable to most persons.

COAL ASHES AS FERTILIZER

Their Use Is Mainly to Loosen Up Soil and Make It More Workable—Most Useful on Clay.

Coal ashes have little value as fertilizer, their use being mainly to loosen the soil and make it more workable. They are most valuable on heavy clay soil, but should be screened to take out coarse material before they are applied, and should be spread evenly over the surface and thoroughly mixed with the soil. Wood ashes have fertilizing value, but should be applied before they become leached.

TWO QUARTS IS GOOD YIELD FOR MILK DOE

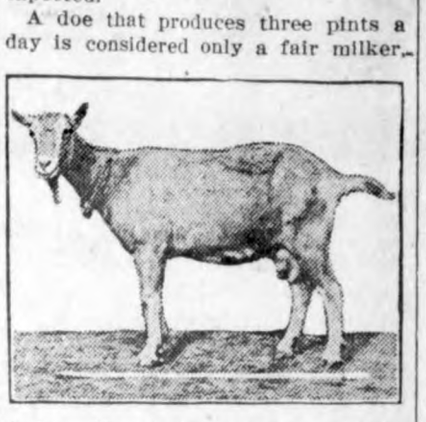
Many Goats Produce Ten Times Their Weight Annually.

Milk Can Be Utilized for Same Purposes as That From Cow, but Less Satisfactory for Making Butter—Best for Infants.

(Prepared by the United States Department of Agriculture.)

About the first question that most people ask concerning milk goats is, "How much milk will they produce?" This is, of course, a very important consideration, as the value of a doe is estimated largely by her milk production. Even if a doe is purebred, she is of little value from the utility standpoint unless she is capable of giving a good quantity of milk. Many persons in purchasing purebred or even grade goats have been disappointed to find that the milk could be measured in pints and not quarts or gallons as expected.

A doe that produces three pints a day is considered only a fair milker,



Swiss Toggenburg Hornless Milk Goat.

while the production of two quarts is good, and the production of three quarts is considered excellent, provided the lactation is maintained for from seven to ten months, say specialists of the United States Department of Agriculture. There is probably no better way to treat this matter than to state that good does should produce from eight to fifteen times their weight in milk in a lactation period. It is stated by German writers that many goats yield ten times their body weight of milk annually, and exceptional animals as much as eighteen times their weight.

Goats' milk can be utilized for the same purposes as cows' milk, although for some it is not nearly so well suited. For general use, such as for drinking, cooking, and in tea or coffee, the milk has proved very satisfactory. The milk of one of the largest herds in the country is evaporated and sold in that form. Goats' milk is less satisfactory than cows' milk for making butter, but large quantities of goats'-milk cheese are manufactured, especially in Europe. Practically all publications dealing with milk goats attribute considerable importance to the use of the milk for infants and invalids.

TO PREVENT POTATO LOSSES

Serious Damage Results From Careless Handling at Harvest Time—Avoid Breaking Skin.

Growers and shippers are responsible for much of the loss that results from shipping diseased potatoes, since a large part of such losses can be controlled, if not entirely prevented, in the field, according to specialists of the bureau of markets of the United States Department of Agriculture.

Serious damage results from careless handling when the potatoes are harvested. Too many persons, it is said, handle potatoes as though they were so many cobblestones, rather than a perishable product. Even the breaking of the protective skin frequently proves serious. Such injury not only damages the appearance and necessitates deep paring of the tuber, but affords ready entrance to infection. Loss of this sort lies in every grower's and shipper's power to control, it is pointed out.

SECURE BEST HARVEST HELP

Rovers are Usually Efficient but They Are Liable to Leave Before Crops Are All In.

Getting help for the harvest rush is a problem which is best faced weeks in advance. Grain, and orchard harvest seasons bring to many sections large numbers of traveling help who start with a crop in the South and work north with the season to the Canadian border. These workers are usually efficient through long experience, but they are likely to feel the urge of the road and leave before the farmer gets his crop all harvested, obliging him to pay a much higher rate to secure the remainder of the crop before it spoils. Wherever efficient local help can be obtained, it is to be preferred to the rovers.

SELECT HARNESS WITH CARE

Be Especially Careful That Reins, Breeching and Various Straps Are Heavy and Strong.

Select harness with care. See that it is well made. Make sure, especially, that the reins, breeching, holdback straps, tugs or traces, belly bands and yoke straps are sufficiently heavy and strong for the work required. A runaway team cannot be controlled with weak reins, nor will weak tugs and straps stand heavy work.

LIVE STOCK

FAILURE OF SWINE TO MATE

It May Be Caused by Improper Functioning of System Brought About by Improper Feed.

(Prepared by the United States Department of Agriculture.)

Failure in the ability or desire of swine to reproduce may be caused by any of several conditions, say specialists of the United States Department of Agriculture. It may result from a disease or injury that seriously affects or destroys the secretory reproductive organs. It may be caused by improper functioning of the system, which in turn is often brought about by unsuitable feed or faulty elimination of waste products, or it may be due to a general lowering of body vitality.

There are also cases of sterility or impotence for which definite causes are difficult to find. Failure to breed quite frequently occurs in boars and sows which have been fitted and kept in high condition for show purposes. In some instances the sow fails to come in heat, or perhaps indicates that she is in heat and is successfully served by the boar without resulting conception. In other cases the boar shows no desire to mate, or acts ineffectively.

The first step in overcoming the trouble is to find a positive cause, when possible, by making a thorough examination. This should include a search for physical defects, the presence of disease, the results of injuries, or lowered vitality from any cause.

When, from such examination, it appears that proper treatment will prove successful, remedies should be administered promptly. But if the cause is obscure, or if there is little likelihood of correcting the defect successfully, it is best to remove the animal from the breeding herd. Boars may be castrated and fitted for slaughter as market hogs. Similarly, sows should be discarded when they become uncertain breeders.

When there is no apparent cause for failure of swine to mate, experts of the United States Department of Agriculture frequently have observed a lazy or sluggish temperament. These hogs generally are of the type known as "hot-bloods." They are fat and show an unwillingness to exercise. The tendency is more common in mature hogs and increases with age, but is frequently found in young stock. Careless and unwise inbreeding practices tend to produce hogs of this type, but inbreeding does not necessarily bring about the condition.

When the lack of sexual vigor is seen in only an occasional animal it

Pigs on Oat and Pea Forage.

may be possible to recognize the fault in blood lines or type. But when failure to mate occurs frequently and when the type is right, the indications are that the system of management is fundamentally wrong.

Upon the appearance of this condition an effort should be made to correct it by a restriction or modification of the diet and an abundance of exercise. The ration must have the fat-producing feeds largely reduced and protein feeds plentifully supplied. Pastures should be provided where possible, but when these are not available then the ration should consist of alfalfa meal, alfalfa, soybean or clover hay to supply protein and vitamines, high-grade tankage, fish meal, linseed meal, or a good grade of white middlings and whole oats—with but small amounts of corn or ground barley, together with a good mineral mixture. In addition an abundance of daily exercise must be given. This will probably have to be forced by driving the boar or sow about the paddocks or pastures daily until the animal is tired.

By maintaining the digestive functions in a proper manner, by causing abundant exercise and by supplying proper nourishment, there will be brought about a proper elimination of the body wastes and a rebuilding of the tissues. This should cause the reproductive organs to function properly and bring about a toning up of the system in such manner that breeding operations will be successfully conducted.

Swine breeders must be alert to the necessity for ruggedness in herd boars in addition to other qualifications. Breeders must refrain also from too great a degree of fineness and smoothness in the selection of their breeding animals, or loss of breeding power will ultimately develop in their herds.

A Lady of Distinction
Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores, followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.

San Francisco Docks.

San Francisco has dock facilities sufficient for the accommodation at one time of 250 vessels of average size.

NOTHING NOVEL ABOUT THAT

Old Joe Had Tried "Electricity" and Found It Was No Cure for Rheumatism.

Old Joe Carter had suffered from rheumatism until, he declared, he had "no patience with it," but he was always eager to hear of possible remedies, and when his sister in Mobile wrote that she knew of a cure that had been tried with great success, and would tell all about it on her next visit, old Joe was all excitement.

"Now, Mary!" he exclaimed to his sister, eagerly, a few minutes after she had reached the house, "you-all tell me 'bout dat cure for rheumatism! I was so anxious I could hardly wait fo' yo' to git heah!"

"Well, Joe," began the sister, "it's electricity and—"

Before she could continue Old Joe interrupted:

"De idea, Mary, of yo' comin' heah suggestin' dat to me! Don't you-all remember dat only last summer I was strucked by lightning, and it didn't do me no good?" — Philadelphia Ledger.

EASY TO KILL RATS and MICE

By Using the Genuine
STEARNS' ELECTRIC PASTE
READY FOR USE—BETTER THAN TRAPS
Directions in 15 languages in every box.

GAVE VILLAGE SECOND NAME

Boy's Rejoinder to Puzzled Tourist Responsible for Distinction Enjoyed by Kentucky Hamlet.

"A village in my state," says a Kentucky representative, "had for many years the unique distinction of possessing two names. It received the second but more popular name in this way:

"A stranger who had lost, or thought he had lost, his way, found himself at a point on the turnpike where two ramshackle cottages, a blacksmith and an incognito postoffice stood. The only human being in sight was the traditional barefooted boy.

"'Boy,' said the stranger, 'can you tell me how far it is to Orangeburg?'

"'Mister,' said the youngster, with admirable sententiousness, 'you're plum sock in it.'

"And Plum Sock it became and remained."—Exchange.

The poor man never troubles himself about the troubles of a millionaire.

Mental butterflying at 2 a. m. A great indoor sport for thoughtless people

One of the surest ways to become physically incapable of doing your best work is to get only snatches of sleep—broken by disturbing dreams.

If your sleep is being disturbed by drinking tea or coffee, you may be sowing the seeds of a nervous breakdown.

Do not wait until your nerves are affected by the drugs, thein and caffeine, in tea or coffee. Protect your strength, vitality and endurance.

Have sound, restful sleep, and wake refreshed and fit for any task.

Postum, the delicious cereal beverage, with its golden-brown richness and coffee-like taste, will let Nature restore your coffee-irritated nerves, and bring you sound, refreshing sleep.

Postum is wholesome and acts in a normal way. It possesses the advantages of a hot drink, without the ill effects of tea or coffee.

Drink Postum for a week or two. See what a difference it will make in you!

"There's a Reason."

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

At all grocers.

Announcement--

I wish to take this opportunity of announncing to the people of Klemme and surrouding territory that I have purchaced the ehtire Garage Business of Mr. Ed. G. Ell and have taken full possession of the same

It will be my policy to conduct the business along the same good line as formerly. I will continue to handle a full line of Ford cars, Tires, Accessories, etc., and will maintain a high class repair department.

I invite all old friends and customers of Mr Ell and also solicit new patronage to call and get acquainted.

Very truly,

O. B. ANDERSON

Fomerly Klemme Auto Co.,

Mr. and Mrs. A. J. Boller were up from Goodell Tuesday of this week.

W. H. Trafford was a business caller at Garner yesterday.

Wilbur Arnold is on the sick list this week.

Arnold Tice is here from Mason City visiting at the Arnold homes.

Miss Mable Larsen, of Mason City is here visiting at the Arnold homes.

R. A. Jorgenson and family spent Sunday with his folks at Garner.

Mrs. A. E. Katter came down from Garner Monday to help her father,

Mr. Jacob Blumer, to celebrate his eighty-fifth birthday.

Mrs. Chamberlain and son of Belmond were Klemme visitors yesterday.

Mr. and Mrs. Howard Forestal of Belmond were Klemme visitors Tues day.

Mr. Fred Rathbon, of Belmond, was a business caller here Wednesday of last week.

Mrs. Mary Wellemeyer of Charles City, Iowa, came last week for a visit with her son Art, and family.

Mr. and Mrs. P. M. Griesemer and M r.and Mrs. John Gruetzmacher drove to Garner last evening.

Don't forget to take in the band concerts every Wednesday night in Klemme. The boys are doing fine.

Mrs. Hod Lawhorn, of Garner was here several days the past week for a visit with Klemme friends.

The Misses Stella Murphy and Esther Thorman of Belmond were shopping in Klemme last Friday.

Now if we have missed any names we will blame Ben. Sr., as he told us the news.

Mr. John Krause of Wood, Iowa, came the past week for a visit with his mother and his brother, Chas.

Mrs. D. E. Brooks and son John called on Mrs. J. W. Brooks here Sunday.

Mrs. Gus Church from Goodell visited with Mrs. J. W. Brooks here Sunday.

Joe Stearnes and family spent Sunday at Belmond visiting relatives and friends.

Mrs. Albert Tanner and children are here from Minesota visiting at the home of Mrs. E. Schwichtenberg.

Mr. and Mrs. C. W. Wiles, Mrs. Walters and Mr. and Mrs. Howard Doyle were Clear Lake visitors last Sunday.

The W. F. Lau family and Mr. P. N. Johnson and Miss Mabel Waterman autoed over to Mason City Sunday.

Mr. and Mrs. J. W. Waterman, Mr. and Mrs. C. G. Waterman and Miss Minnie Lau autoed to Hampton Sunday.

Mrs. Will Lau and Mrs. Olive Liscomb of Garner were visiting with Klemme relatives and friends last Friday.

Charlie Braden received the sad news that his father had passed away and left here Saturday night for his home in Tennessee.

The Wittenberg girls of Fullerton, North Dakota are here visiting with the Griemann's. Stromers, and Huenemann families.

Mrs. Henry Maitland is enjoying a visit from her mother, Mrs. Gardner, of Sycamore, Illinois, who came last week to begin a months visit in this community.

Mr. Arnold Lenz, of Toma, Wis., came yesterday for a visit with his sister, Mrs. A. H. Meyer and his other sisters who are here, Helen and Ruth Lenz.

Mrs. C. F. Busch returned from Mason City yesterday to get a few days rest. She has been staying at the hospital there helping care for her son. Willie. She reports that the boy is gradually improving now.

Miss Mae Warnock was an over Sunday visiter at the Frank Gruetzmacher home here. They took her back to Iowa Falls Sunday evening in their car.

Miss Ialeen Flynn of Belmond and Miss Gertrude Ely of the same place were visiting with Klemme friends one day last week. Miss Ely is a sister of Mrs. Missman of this city.

Rev. Buriff and family returned Friday from their week's vacation spent at Clear Lake. They enjoyed their outing very much and doubtless their vacation ended too soon to suit them.

Miss Iva Trumbell was up from Des Moines last week for a visit at the homes of Klemme relatives and friends. Miss Trumbell is Superintendent of the Congregational Hospital at Des Moines.

An item which we missed last week but still of interest is that Mr. Henry Behrings and family of Austinville, Iowa, were here a week ago last Sunday visiting at the home of Mr. and Mrs. Ben Swalve.

Quite a number from here went to Bayside Sunday to see the ball game between the Chicago Union Giants (colored) and the Mason City Independents. The game resulted in the favor of the Giants.

Miss Norma Barz, of Garner came Wednesday of last week and visited until Friday at the home of Mrs. Lena Schroeder and other relatives here. Her folks drove down and got her Friday evening.

Some naughty boys took the nice settee away from Zip's barber shop Tuesday evening and set it farther up town. They should have set it in front of Ye Editor's place and we would not kick—but Zip might.

Mr. and Mrs. Fletcher Wellemeyer and children from Quincy, Illinois, drove through last week Wednesday for a visit at the Arthur Wellemeyer home. Fletcher is the Superintendent of schools there.

It has been rumored about that the water in Clear Lake was unfit for bathing but Mayor Knutson of that place has issued a statement saying that the waer is pure and is tested frequently.

Relatives of Mrs. John Josten of Clayton county drove up here Saturday evening and remained until Tuesday. They were on their way to the Dakotas to look after their land interests.

Erick Josten is rambling around in Minnesota somewhere this week in his Ford runabout. He left last week for the northern state on a sight seeing trip and will travel and stop wherever and whenever he gets into the mood.

Miss Leoda Smith went to Belmond last Friday evening and from there she went on to Mason City. Miss Leoda is one of the successful teachers in the rural community of Cerro Gordo county and she took some of the work made by her pupils to enter at the Mason City fair.

A big dinner was the main feature of the event, but a big supper was also served. All had a fine time and no doubt Dick was glad that the "Mrs." didn't forget his birthday as we notice that he has gained considerable in weight since the big dinner.

Quite a number from here went over to Clear Lake today to take in the doings put on by the American Legion of that place. They are putting on the 40 and 8 degrees of the Legion and have also lined up a number of other stunts for the day including swiming contests and other sports.

Prof. and Mrs. H. E. Wilson will return to Klemme about the middle of this month and will live in the McGee house. Mrs. McGee and the children are leaving this week for Ree Heights, South Dakota. Prof. Wilson and family have been spending the summer at Cedar Falls where they have a home.

G. P. McCullough has the agency for the Marshall & Co. Dry Cleaners of Mason City, Iowa. A-4-tfc

Clarence Elder is the new "devil" at the times office. He began work Monday is is just getting nicely acquainted with printers' ink. He is setting a fast clip and some day he may bcome a second Ben Franklin.

Mr. Glenn Ferguson, of Dana, came Saturday for an extended it at the Pete Merkel home. G was with the Rainbow Division saw all the active service he to on the other side of the po We venture to say that he will a good boarding place at P home.

Enrico Caruso, the world's g est tenor singer died at Naples ly on Tuesday. He died follo a long illness but was almos covered when it was found th operation was neccessary. He a short time after the operation was a very popular singer in A ca and his loss will be greatly among the music loving peop the nation.

Mr. and Mrs. P. M .Griesemer Mr. and Mrs. John Gruetzma entetained the following com yesterday: Mr. and Mrs. Griesemer from Garner; Mr. Mrs. Arthur Schaefer from Mi kee, Wisconsin; Mrs. Law Schaefer of Garner; and Mr. H and daughter of Milwaukee. people from the latter city dro Klemme in their car.

The Restaurant had a forc men at work this week conne the building up to the sewer laying in the water pipes. Street will be in bad shape fo first one and then another con to the sewer. If all the bus places could connect about the time the work could be done a hurry and all the trenches le down at the same time. As it will perhaps be dug up more o for some time.

Dr. Frank Walsh, of Ames, in Garner yesterday. For the two years Frank has been ins or in the veterinary division of Iowa State College at Ames, will be a member of the faculty coming year. Frank has be married man for two years pa Garner Leader. Frank is well k to many Klemme people as it be remembered he farmed out of town for a few years before to Ames to study "hoss doctor We are glad to hear of his su

Song. Benediction, Rev. Andrewson, of Britt.
3:00 P. M.—Field Sports, by C. H. Thompkins, Chr., Garner.

ARNOLD FAMILY IN AUTO ACCIDENT NEAR JEWELL SUNDAY

Fred Arnold and family had a narrow escape Sunday when their car was struck by another car near Jewell, Iowa, Sunday.

Mr. Arnold and his family were driving south in their Buick Six and were just crossing an intersection of two roads 5 miles south and 1 mile west of Jewell when they were struck by a man driving a large seven passenger Page car, who gave his name as Jasper Overland. of Jewell.

The Page car was traveling at a high rate of speed and should have turned out on the intersection as he had plenty of room. According to traffic regulations Mr. Arnold had the right of way and he was watching a car coming from the west and did not notice the Page coming from the east, which also was partly hidden from view by tall weeds at the cross roads. The Page hit the left rear whell of Arnold's Buick and upset them. The occupants flew thru the top as the car turned over and luckily no one was seriously hurt.

Mr. Arnold's car was almost a complete wreck, as the body was smashed, one wheel gone, windshield broken, fenders broken and in general bad shape. The other car was damaged but slightly.

The driver of the Page car evidently "lost his head" when he saw Arnold crossing the road for he had plenty room and could have turned in back of the Buick as he had about fifteen feet to clear.

GARDENING SUGGESTIONS FOR AUGUST

Several varities of soft turnips may be sown up to the end of the month, particularly the Strap Leaf and the White Globe.

If there is garden space not required for late crops, spade it and sow it with some cover crop, such as rye. It will add fertility to the soil when turned under in the spring and also increases the soil's moisture holding capacity.

Cut away old raspberry and blackberry canes that have fruited and thin out new shoots to three or four to each hill or plant.

Often it pays to thin out heavily laden fruit trees, as apples, and even grape vines. It may seem hard to clipp off undeveloped fruit, but the clipping gives better chance to the remaining fruit and on the whole results in a better field.

KLEMME WINS GAME FROM LAKESIDE SUNDAY

The Klemme ball club played the Lakeside team Sunday at the home diamond and beat them 16 to 0. The Klemme team was entirely too fast for them.

American Ships Now Sail Seven Seas

Twin Bed Staterooms, Private Baths and Nurseries for the Children Give Hints of Luxuries Provided on Ships of the New American Merchant Marine

ANYWHERE in the world on an American ship! Americans no longer need go to sea or ship their goods in foreign bottoms. That, to-day, is the proud message from the National Capital to the American people.

From every port in the country now sail stately and luxurious vessels, under the American flag, carrying passengers and cargo to every country in the globe.

The nation, through the United States Shipping Board, is flinging a new Declaration of Independence to the world, independence of foreign vessels, for American travelers and commerce.

With a proud merchant fleet numbering 3,700 vessels of 19,533,890 deadweight tons (not including small ships), according to official figures compiled to May 1, it is now "up to" the people of the United States to keep that fleet on the seven seas. Of this great total the United States Shipping Board owns and controls 1,720 vessels of 11,139,406 deadweight tons.

"We must take the huge corporation, the largest the world has ever known, and make it an institution of which every American will be proud," declares Albert D. Lasker, chairman of the United States Shipping Board.

"Our Merchant Marine must be sustained if it is to be permanent," declares Rear Admiral W. S. Benson, commissioner of the United States Shipping Board.

Not only in quantity does the American fleet excel, but in quality. Here are some of the features of many American passenger vessels to which the travelling public has been accustomed only on big foreign liners:—public rooms with palatial lounges and music rooms; palm garden verandas and writing rooms; hall rooms, glass enclosed promenades, swimming tanks, twin beds, shower and tub baths.

After forty-six years service in the United States Navy, during which time he saw the American flag, except on ships of war, almost disappear from the ocean, and now chief officer of the greatest single fleet of merchantmen ever constructed, Admiral Benson is asking his countrymen to support their fleet.

"We have the ships," he declares. "The United States Shipping Board is using every endeavor to build up this vast fleet into a profitable enterprise, but we need the cooperation of every American."

"Bad Men" Operating In This County--Hold-up Fashion

TWO BRITT MEN HELD UP ON WAY HOME FROM GARNER

When R. F. Perry and Earl Carl, both of Britt, were returning to their home from Garner, last Thursday night at 1:30 they were stopped by a blockade in the road near the M. and St. L. crossing a mile east of Britt. A masked bandit rushed up and placed a gun up to Mr. Perry's face and told them to throw up their hands, which they did. He searched both men and got about six dollars in change and a gold watch. Mr. Perry asked him to give him a locket that was attached to the watch chain as it was a pesent from is mother. The thief separated it from the chain and gave it back. When satisfied that he had all the money he could get, the thief ordered the men to turn around and go back east. They took a north road and circled the town coming in from the north. The town marshall was notified and went outwith the boys to try and locate the men, but without avail.

BRITT MAN GORED BY VICIOUS BULL

From The News-Tribune.

Saturday evening when Anthony Baker went to the farm lot to drive his Holstein dairy cows in the barn to milk he was attacked by his valuable bull, knocked down and rolled some fifty feet and rendered unconscious. A hired man, Mr. Butts, who was choring close by saw the animal attack his employer and gave an alarm and Mr. Gust Baker, brother of the unfortunate man, was soon in the barn yard with Mr. Butts waging a bitter fight against the infuriated bull. The men succeeded jointly in beating off the animal and when he was driven away it was found the injured man was unconscious. He was assisted to the house and a careful examination showed a bad bruise over the right eye the nose badly bruised and many black and blue marks on his shoulders and body. The bull had trammeled him and marks of his hoofs were plainly visible on Mr. Baker's legs. Luckily no bones were broken, and an eye that was thought to have been knocked out was only covered with the blood from the severe bruise over it. Mr. Baker rallied sufficiently to come to town with his milk Monday morning but was very weak from the loss of blood and had many sore spots that crippled him up considerably.

Mr. Baker says the bull has been vicious ever since he owned him and that they have kept him blind folded the blindfold had come off and was probably the cause of his charging his master. Sunday several men went out and an attempt was made to corral the beast and blind fold him again, but without avail as he was plainly vicious and made several attacks on the men.

Mr. and Mrs. Peter Merkel drove to Paton, Iowa, Sunday for a couple of days visit with relatives, returning Tuesday.

Census Returns Give Interesting Facts On This State

SCHWICHTENBERG—JONESON

Miss Vera Schwichtenberg and Mr. Roy Joneson Married at Goodell Friday Evening

Last Friday evening at 7:00 o'clock at the home of Mr. and Mrs. Henry Griffen at Goodell, occurred the marriage of Miss Vera Schwichtenberg, daughter of Mrs. Emma Schwichtenberg of near Klemme, to Mr. Roy Joneson of Illinois. Rev. Edge, of Belmond officiated.

The wedding was a quiet affair and witnessed only by close friends of the couple, and was a complete surprise to their many young friends who were unaware of the event until some time later.

After the wedding Mrs. Griffen, who is a cousin of the bride, had a big wedding dinner prepared.

Both of the contracting parties are well and favorably known. On Monday morning they left in the groom's car for Illinois where they will begin housekeeping.

eThTimes wishes them success through life's journey.

WHY SHOULDN'T KLEMME HAVE PURE MILK LAW?

A nationwide campaign seems to be on foot to have ordinances passed in all towns and cities to guarantee the deliver of tuberculor-free milk, and milk products. It is claimed that ninety per cent of tuberculosis in human beings is caused, directly from drinking milk from tubercular cows. That fact alone seems all the proof necessary why the town of Klemme, and other towns should pass an ordinance forcing all who sell milk or cream within the city limits to have their cows tested for tuberculosis.

Belmond, Titonka and Garner are or have passed ordinances for pure milk. Most dairy men are in favor of such a law and in these towns mentioned have been instrumental in having the ordinance passed.

It is a law worth while and may be the means of saving human life and no delay should be caused by the town officials in getting this ordinance passed and enforced.

As we understand it there is practically no expense in keeping it up and having the tuberculin test made each year.

A cow may appear perfectly healthy and still be tubercular. This should be guarded against by having a test made as required when this law is enforced.

The best thing is to get busy on this at once and have the law passed and enforced.

LOCAL FAIRS ARE IMPORTANT

With Local Advertising They Help To Build Local Business

AMES, Ia., Aug. 11.—Local fairs and local advertising are both profitable to the purebred livestock men say the animal husbandry specialists at Iowa State College here.

"The local county fair or district fair," says H. H. Kildee of Ames, "helps to put a breeder in touch with his home market and the foundation of all success in the breeding business is to get the right sort of standing in the home market. That phase of the business is too often overlooked."

Local advertising serves much the same purpose as the local show ring. It helps to develop a home market for purebreds and also aids in giving local standing and reputation. Local advertising may be used very effectively in helping to get attention for a local County fair exhibit or other community activities.

The home of Mr. and Mrs. C. G. Waterman was the scene of a family gathering Sunday. Those present were: Mr. and Mrs. C. F. Keraus, and nieces Wilhemina and Caroline Prochaska of Clear Lake; Mr. and M rsT.. F. Mitchell, of Swea City; Mr. and Mrs. Wm. Keraus and sons of this city; and Mr. and Mrs. J. W. Waterman and daughter, Mabel, also of Klemme.

ILLITERACY IN IOWA

Washington, D. C., Aug. 11,—According to the census of 1920 there are 20,680 illiterate persons 10 years of age and over in the state of Iowa, "illiterate" meaning, unable to write. Of this number 5,921 are native whites of native parentage, 2,354 are of foreign or mixed parentage, and 11,004 are of foreign birth. The number of illiterate Negroes is 1,283. In the total population 10 years of age and over the per centage of illiteracy is 1.7, which it is gratifying to note, shows a diminution since 1910, when it was 1.7. In the case of Negroes the percentage declined from 10.3 to 8.4, and in the case of the native white of native parentage from 0.9 to 0.4.

In 1910 Iowa had the distinction of having the smallest percentage of illiteracy of any of the states. Whether it retained this distincion in the census of 1920 will not, of course, be known until the tabulation of all the other states is completed.

There is slighly less illiteracy in the rural districts of the state than in the cities, the percentage being 0.9 for the rural population and 1.4 for the urban.

By counties the percentage of illiteracy ranges from 6.5 in Mills-co. to 0.3 in Pocahontas-co.

CENSUS REPORT ON AGES IN IOWA

Washington, Aug. 11.—According to the census of 1920, 29.8 per cent, or almost three-tenths of the people in the state of Iowa, are either infants or children under 15 yrs of age, 8.9 per cent are young people 15 to 19 years old; 37.6 per cent are men and women in the prime of life, being 20 to 44 years old; while 23.4 per cent, being 45 years of age and over, are well along in middle life if they have not reached old age.

The urban population as compared with the rural shows some rather striking differences in age, the percentage 20 to 44 years of age being 40.9 for the urban population as compared with 35.7 for the rural while the percentage under 15 years of age is 25.3 in the urban population as against 32.6 in the rural. These differences may indicate much larger families of children in the country than in the city, but probably indicat also the fact that country children as they grow up have a tendancy to flock to the cities thereby increasing the active adult populaion of the cities at the expense of the rural districts.

Almost three-fifths of the population, 59.4 per cent, are old enough to vote, being 21 or over; and in this class the men out-number the women in the ratio of 105 to 100. The males of military or fighting age 18 to 44, constitute 40.8 per cent of the male population and 20.8 per per cent of the total population.

CHICKEN THIEVES AT BRITT

Chicken thieves are getting in their work again this season. One night recently they went to the Charles Gault farm two miles south of town and stole nearly all their flock of young chickens. The few left are probably those that sulked away in the dark and the thives failed to notice them. Other chicken thefts have been reported in the country nearby. We believe some sawedoff shot guns in the hands of the farmers would be a good protection against these marauders. If a man comes home to his family with the seat of his pants resembling a milk strainer there is no amount of explainin that will convince the women and children that he is not a thief. The shot would pierce his hide and after his neigbors learned of his plight his conscience would sting ten times harder than the shot stings when it strikes. Usually the women of the farms have the labor and worry of caring for the poultry flocks, and it is a mean man, indeed, who will rob a woman.—Britt News-Tribune.

REALLY A BRILLIANT IDEA

School-teacher Saw at Once the Particular Value of a Certain Somewhat Peculiar Toy.

It looked to her like a big idea. She had discovered one of those elusive, seductive, tantalizing little tops, so popular now, in which the mere spinning of it gives one opportunity to take one, take all, pay three, etc. Being an Indianapolis schoolteacher, she immediately noted it as a novelty.

"Such a clever little thing," she said to the clerk. "I've never seen a top like it before. What are they for?"

"Well, they're a sort of diversion," the saleswoman replied. "Many people use them financially"

"Oh, yes, of course, of course. How many of them have you? I was just teaching the children combinations in numbers—nice for arithmetic, as it were."—Indianapolis News.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores. Advertisement

Highly Commended.

Finds Peruvian Gold on Island

Man Who Befriended Beggar Is Rewarded With Key to Buried Treasure.

ROMANCE IS NOT YET DEAD

Locates After Search of More Than Seven Years Gold Hidden Half Century Ago—Church Despoiled by Four Sailors.

Papeete, Tahiti.—Romance is not yet dead. Tales of buccaneering, murder on the high seas, buried gold on lonely, uninhabited islands and charts and cryptograms of hidden treasure-trove are not all inventions of imaginative minds or legends of a day which is long past.

Such a tale is that of the treasure of the island of Pinaki, whose hiding place, after a patient search of more than seven years, has at last been discovered. And now a schooner from Tahiti has been dispatched to bring away the gold.

Sailors Despoil the Peruvian Church.

A half century ago four sailors, deserters from a coastwise vessel, joined revolutionists in Peru and learned of a vast treasure of jewels, plate and ingots, the property of the church, which had been hidden in Peru to prevent it from falling into the hands of one of the warring factions. Secretly, the sailors searched for the treasure, found it concealed in a church and moved it to another hiding place on the coast.

Going to Panama, the seafarers, at night, boarded a small schooner, murdered the crew and, after putting the treasure aboard, set sail across the Pacific, intending to make some European port later to dispose of their wealth. Recalling that they had no clearance papers and probably could not enter a European port safely, they decided to hide the gold on some uninhabited island and then get it later in a vessel they would charter at Sydney, N. S. W., for trading purposes.

Across their path lay the island of Pinaki, in the Paumotu archipelago of the south seas, and at this uninhabited spot they stopped and hid their loot. One native, who observed them from a neighboring island and rowed across to see what the men from the strange schooners were doing, was killed and his tribal brothers, who crossed later, found only his empty canoe and strange markings on the trees.

Sailing on to Australia, the four scuttled their vessel a few miles from shore and, rowing to land, told of a storm at sea which opened the seams of their ship. Not all believed them, for some residents had seen the ship approaching and had witnessed its mysterious sinking. There were no police, however, in that section, and as the four looked desperate, they were permitted to strike out overland for Sydney unmolested.

Beggar Divulges Hiding Place.

In 1914, years later, a Mr. Howe was accosted on a Sydney street by an aged beggar. Howe gave the man a few shillings and was surprised to hear the man ask his name and address. Some time later Howe received an urgent summons to a Sydney hospital. There he found the beggar, who told of how he and three others had buried their treasure, had sailed on to Australia and had set out overland for Sydney. Blacks had attacked them and killed two of the sailors. The beggar and his surviving companion, Brown, tried for years to get a ship to go for the treasure, but never obtained money enough. Brown finally disappeared, and he, Killrain, had fallen into misfortune and knew his end was near. He gave Howe a map of the island, begged him to believe the story and to search for the treasure. The following day the beggar died.

Since then Howe has been searching for the treasure, and lately announced that he had found it in a shallow lagoon on Pinaki. Lately he chartered a schooner at Papeete to go to lift the gold after making a contract with the colonial government as to his rights in the matter. It is said the treasure is worth several million dollars.

Parrot Saved Friend From Going to Jail

When Mr. and Mrs. Paul Johnson of Chicago went away for a brief vacation, Mrs. Johnson asked Edward Peterson, her brother, to go to the flat and water and feed the canaries and parrot. Peterson lost the key and was climbing in the window when neighbors called the police. The desk sergeant laughed at his explanation, but the boy insisted that if the sergeant would accompany him to the flat he would prove he was all right. So they went back.

"Hello, Polly," said Peterson.

Hello, Ed," replied the bird. "How's the boy? Whatcha got on yer hip?"

The sergeant allowed Peterson his liberty.

Face Famine in Newfoundland

Doctor Grenfell, "Angel of Labrador," Issues Appeal for Relief of Fisherfolk.

DREAD APPROACH OF WINTER

Hunger and Companion Miseries of Poverty Are Acute Because the Fishermen Have Been Unable to Sell Product of Labor.

New York.—Dr. Wilfred T. Grenfell, "angel of Labrador," has joined forces with William Willard Howard, and the Christian Work of New York, in the campaign to relieve destitution in Newfoundland by providing a market for the codfish upon which thousands in that country depend for livelihood.

Hunger and companion miseries of poverty are acute in Newfoundland because the fishermen have been unable to sell the product of their labor. Dr. Grenfell came to New York a few days ago from Labrador whither he had gone after a conference here with Mr. Howard, director of the Newfoundland relief work, and Dr. Frederick Lynch, treasurer of the fund.

Fisherfolk on Verge of Famine.

Dr. Grenfell reported finding deplorable conditions among the families of the fishermen, and the industry of the country in a truly sad state. He says: "I have just received a message from Mr. Ed Grant of Blanc Sablon, Labrador, asking if I can help there, as 'great destitution prevails.' I am afraid that it will be very serious by winter. I sent him a couple of hundred dollars to fit out some few fishermen.

"At Twillingate only one-half of the normal number of fishermen are being fitted out. The savings are being drawn steadily from most of the banks, both in the outports and in St. Johns. I have that on the evidence of the bankers. We are starting the new hospital building at Twillingate. That is a help."

Doctor Grenfell is planning to tour through Newfoundland on his relief mission.

Mr. Howard, discussing the discouraging reports from Labrador, commented:

"Twillingate is the largest and most prosperous place in Newfoundland outside of St. Johns. If Twillingate can fit out only half her fishermen for the season's fishing, it is a black outlook for the rest of the island. Blanc Sablon is an important fishing port at the entrance to the straits of Belle Isle.

Foresees Severe Winter.

"If destitution prevails there now, I hesitate to think what Doctor Grenfell will find as he goes north.

"Much of the destitution could be relieved if one of my ships could leave for the Labrador coast now filled to the deck beams with flour, vegetables, molasses and fishery salt. A dollar of help now would be worth $10 in next winter's inevitable famine.

"Soon the suffering people are hemmed in by ice."

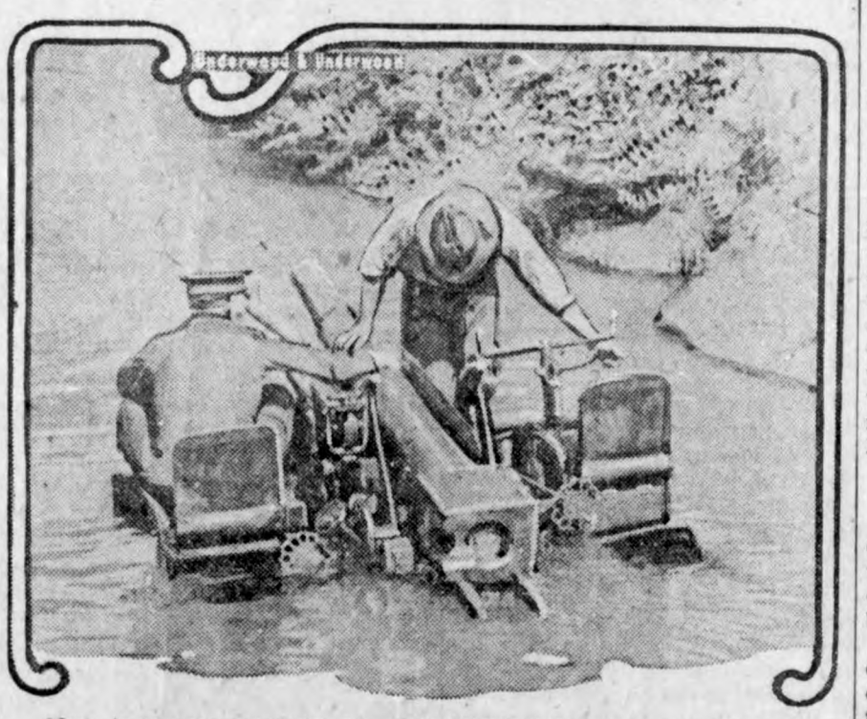
The committee is now engaged in a program of relief which will aid the starving Newfoundlanders and at the same time provide food for families made homeless and suffering in this country on account of the Colorado flood. It is offering the fish for sale for $10 for a 100-pound box, and purchasers who do not want fish for their own use may direct that it be sent to the Colorado refugees. Thus food will go to hungry Americans and the money which pays for it will go to the Newfoundland fishermen.

Halt Firemen at Border.

Vienna.—Frontier restrictions were carried to an extreme when they prevented an Austrian fire brigade from crossing the Italian border to fight a blaze.

Some buildings on the Italian side of the Brenner Pass railway station caught fire and the Austrian town's firemen turned out. Italian gendarmes demanded their vises and having none they were forced to watch the warehouses burn.

Amphibious Gun Mount Tractor



Here is a gun mount tractor, with 3-inch field piece mounted, that can travel under water at a depth of 10 or 12 feet as well as on land. It is being demonstrated for army officers.

CHINESE SMUGGLED INTO U. S.

Combine Slips Yellow Men Into Florida by Way of Cuba.

Few Places Where Schooners Cannot Make Easy Landing on Coastline of Southern State.

Tampa, Fla.—Chinese are being smuggled into the United States on a large scale by way of Cuba and Florida, according to reports from the South. Unless prompt action is taken by authorities at Washington, conditions will soon be as bad in the southern states as they were on the Mexican border, where it took five years to stamp out the smuggling of the yellow men, says Immigration Inspector Whalen of Tampa, Fla., in whose district much of the smuggling has been going on.

"We have learned that within the past few months almost 75,000 Chinese have been landed in Cuba," says Whalen. "According to the statements we got from some of the smuggling parties that we have rounded up, these Chinese remain in Cuba only long enough to make arrangements with the smugglers to be landed on the Florida coast.

"The fact that all the Chinese who have been arrested in this vicinity are plentifully supplied with money and are able to obtain unlimited funds to defray court expenses indicates that there is a well-organized smuggling combine at work."

The latest arrests in the smuggling war were in Charleston, S. C., where four Chinese were picked up, with railroad tickets from Clearwater, Fla., a short distance from Tampa, to Washington, D. C. Six more were arrested the same day at Dunedan, Fla., also near Tampa. These six were taken when they tried to buy railroad tickets to Washington.

The coast of Florida is an ideal place for smuggling operations as there are only a few places along the entire 1,400 miles of coast line where schooners cannot make an easy landing.

DIAMOND 8 YEARS IN GARDEN

Ring Lost by New Jersey Woman Found and Restored by Present Tenant.

Glen Ridge, N. J.—Exactly eight years to the day after she had lost a diamond ring in the garden of her home the lost bit of jewelry was restored to the owner. Subsequent to losing the ring Mrs. Smith removed from 61 Hillside place and her former home was occupied by John Townsend.

For three years Mr. Townsend has been planting the garden, and while hoeing lima beans this week he saw what he thought was a bit of glass shining on the ground. He picked up the object and it proved to be a diamond ring. Meeting Mrs. Smith he mentioned having found the ring. Its loss was explained and the ring was restored to its owner.

WOMEN OF MIDDLE LIFE

A Dangerous Period Through Which Every Woman Must Pass

Practical Suggestions Given by the Women Who Have Passed Through It—Letters Follow

Afton, Tenn.—"I was like many other suffering women I did not know what Lydia E. Pinkham's Vegetable Compound has done for me. During the Change of Life I was in bad health for eight months and had two good doctors treating me but they did me no good. A friend advised me to take Lydia E. Pinkham's Vegetable Compound, which I did and in a short time I felt better. I had all kinds of bad spells, but they all left me. Now when I feel weak and nervous I take the Vegetable Compound and it always does me good. I wish all women would try it during the Change of Life for I know it will do them good. If you think it will induce some one to try the Vegetable Compound you may publish this letter." —Mrs. A. KELLER, Afton, Tenn.

Mrs. Mary Lister of Adrian, Mich., adds her testimony to the value of Lydia E. Pinkham's Vegetable Compound. She says:

"It is with pleasure that I write to you thanking you for what your wonderful medicine has done for me. I was passing through the Change of Life and had a displacement and weakness so that I could not stand on my feet and other annoying symptoms. A friend told me about Lydia E. Pinkham's Vegetable Compound and the first bottle helped me, so I got more. It cured me and I am now doing my housework. Your medicine is certainly a woman's friend and you may use this testimonial as you choose."—Mrs. MARY LISTER, 608 Frank Street, Adrian, Mich.

It is said that middle age is the most trying period in a woman's life, and owing to modern methods of living not one woman in a thousand passes through this perfectly natural change without experiencing very annoying symptoms.

Those smothering spells, the dreadful hot flashes that send the blood rushing to the head until it seems as though it would burst, and the faint feeling that follows, as if the heart were going to stop, those sinking or dizzy spells are all symptoms of a nervous condition, and indicate the need for a special medicine.

Lydia E. Pinkham's Vegetable Compound is a root and herb medicine especially adapted to act upon the feminine system. It acts in such a manner as to build up the weakened nervous system and enables a woman to pass this trying period with the least possible annoying symptoms.

Women everywhere should remember that most of the commoner ailments of women are not the surgical ones—they are not caused by serious displacements or growths, although the symptoms may be the same, and that is why so many apparently serious ailments readily yield to Lydia E. Pinkham's Vegetable Compound, as it acts as a natural restorative and often prevents serious troubles.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Taking a Chance.

Junior was in the habit of coming to the table with a dirty face and, of course, had to be sent away to wash.

One time his mother, nearly losing patience, said: "Junior, why do you persist in coming to the table without washing? You know I always send you away."

"Well," said Junior, meekly, "once you forgot."—Chicago Tribune.

ASPIRIN

Name "Bayer" on Genuine

say BAYER

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

Condition Unchanged.

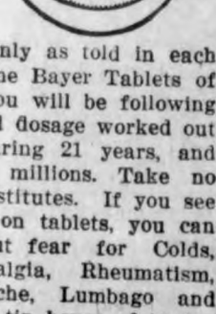
Mrs. Pester—Before we were married you said you were unworthy to lace my shoes, and now I'm giving you the chance to do it you refuse.

Her Husband—Just so. Well, I still feel unworthy.

Don't Go From Bad to Worse!

Are you always weak, miserable and half-sick? Then it's time you found out what is wrong. Kidney weakness causes much suffering from backache lameness, stiffness and rheumatic pains, and if neglected brings danger of serious troubles—dropsy, gravel and Bright's disease. Don't delay. Use *Doan's Kidney Pills*. They have helped thousands and should help you. *Ask your neighbor!*

An Iowa Case



Mrs. Wm. Oberman, N. 3rd St., Bellevue, Iowa, says: "Overwork weakened my kidneys and caused my back to ache. The pains were severe in the small of my back and troubled me. I had a languid feeling and there seemed to be a heavy weight on my shoulders. One box of Doan's Kidney Pills cured me. I have not been bothered with kidney complaint since."

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

SINESS MATTERS.

aterials of action are variable. use we make of them should be —Epictetus.

just as important for a woman ave regard for the rules of rm in the transaction of her s affairs as in matters purely Sometimes a woman who is chably correct in all social , and who is courtesy and reeding personified in her so- lations, is careless of rules of y and good breeding in her s transactions. In a small specially, such duplicity of con- sure to lead to unpopularity. ood is it if a woman is charm- Mrs. Smith, whom she meets club, if she is discourteous to mith's husband, who is cashier bank, or what good can it do punctilious in all her dealings Mrs. Brown if she neglects to at she owes to Mr. Brown, who e grocery store.

ember then that when doing rt of business with any sort of you should begin the transac- tion with a courteous "good morning." If you ask a favor of a tradesman or anyone with whom you do business, do not fail to let him know that you regard it as such.

If you are not going to be able to pay your bills on the first of the month, do the courteous considerate thing about it. Go to the grocer, or butcher, or doctor, or dentist, and tell him that you find it impossible or inconvenient to do so, and ask him for the favor of extended credit. Do not simply neglect payment and then pretend when you do pay that it is simply a matter of carelessness or forgetfulness on your part.

If a tradesman is courteous enough to remember your name in doing business and addresses you by it, do not forget that it is just as considerate if you remember his name likewise.

Remember that it is just as inconsiderate to ask your grocer to make a special trip of his delivery wagon because you have carelessly forgotten to give your order till afternoon, as it is to ask a neighbor to put herself out to do some favor for you. If the grocer does accommodate you, then you should express your appreciation with just as much courtesy as though the transaction was one of a social sort instead of purely business.

rainfall around the Caspian sea 10 inches a year.

Elsie Ferguson

Elsie Ferguson, often called "the aristocrat of the screen," had attained the position of stardom on the stage before she became a "movie" star. Since she was first won over to the films she returned to the stage but once, and then for a brief period.

BRAVE IKEY DUCK.

IKEY was a young duck, that his mother had a great deal of trouble with, because he ran away every time he found a chance, and as Madam Duck had many ducklings besides her son to look after, Ikey found many chances.

"Some day you will meet Mr. Fox," said his mother, "and then it will be too late to be a good duckling, for Mr. Fox carries off all runaway ducklings."

"But I am not afraid of Mr. Fox," said brave Ikey. "I am going to grow up to be a big, brave duck, like Grandpa Drake, so I cannot be afraid of anything."

"Grandpa Drake would not like to meet Mr. Fox," said Madam Duck, "for Mr. Fox carries off to his cave in the woods big and small ducks."

Ikey Duck did not answer, but waddled along after his sisters and his mother until they were hunting in a puddle for things they liked, and Ikey saw another chance to run away.

Down to the duck pond he waddled and away he swam to a part of the pond where he had never before been.

How little Teddy Bear happened to be sitting under a bush by the pond was never known, but there he was, and Ikey Duck, swimming along, saw his shining eyes and open mouth.

"Ah, Mr. Fox!" said Ikey Duck to himself, "I will show that fellow, he can't scare me."

Right up close to the bank went brave Ikey and began to quack at Teddy Bear, and, of course, Teddy did not move.

"He is afraid of me," said Ikey, "I wish mother could see me now. I am sure she would think I am quite able to take care of myself."

And then brave Ikey opened his bill, snapped at little Teddy Bear, and, tugging at one foot, pulled him into the water. Away he went, with Teddy still held by his foot, skimming over the water.

Madam Duck and her children were at the side of the pond when Ikey swam up by the barnyard.

"What have you found!" asked his mother, her eyes wide open with surprise, while the little ducklings ran up the bank in alarm.

"It is Mr. Fox," said Ikey, letting go of Teddy Bear's foot. "He is afraid of me, mother. I told you I was not afraid of him, and, you see, I am not."

Madam Duck did not know at first just what to do or say, and she stepped back to take a good look at a safe distance.

"It isn't Mr. Fox—I am sure of that," she said, "but what it is I do not know. I will get Mr. Dog. He is very wise and knows about everything."

"That is a toy," said Mr. Dog, when he saw Teddy Bear. "It belongs to

the master's children." And with that Mr. Dog picked up Teddy and trotted off to the house.

"He is not afraid of Mr. Fox, either," said brave Ikey, "Mr. Dog and I are very brave fellows."

"I suppose he will have to learn by experience who Mr. Fox really is," quacked poor Madam Duck, shaking her head as Ikey waddled up the bank to tell all the farmyard animals that he had caught Mr. Fox, for, in spite of what Mr. Dog or his mother had said Ikey declared he had caught Mr. Fox.

But when to Cheer I'd turn my prow
I send for Mr. DO-IT-NOW,
And these two Agents serve me well—
Far better than any pen can tell,
For PUT-IT-OFF ne'er does Today
What overnight he can delay,
While DO-IT-NOW goes to the deed
As straight as may be, and with speed,
Whereby Today I have my Cheer,
And to Tomorrow leave the Sneer.

How It Started

"THE WHITE FEATHER."

THIS phrase, which is now generally used to express cowardice or "chicken-heartedness" on the part of him to whom it is applied, originated in the days when gamecock fighting was a fashionable sport and the cocks were carefully bred. A gamecock of pure blood had universally dark plumage; but the cross-strains, which were not fighters, literally "showed the white feaher"—white feathers appearing in their plumage.

The things which must be must be for the best.—Owen Meredith.

GROWING WINTER WHEAT IN NORTH

Hardier Varieties Introduced That Give Better Yields and Mature Earlier.

BETTER DROUGHT RESISTANT

Better Division of Labor Permits Fall Seeding and Earlier Harvesting—Careful Selection of Seed Will Aid Yield.

(Prepared by the United States Department of Agriculture.)

Since the introduction of the hardy varieties of wheat from southeastern Europe there has been a decided northward movement of the winter-wheat area. This movement has been rapid in recent years. The reasons therefor are the generally large yields of winter wheat due, first, to its earlier maturity, thus enabling it to escape hail, hot winds and disease; second, to its greater drought resistance; and third, to the better division of labor, which it allows through fall seeding and earlier harvesting.

The profitable production of wheat in the eastern part of the United States depends to a considerable extent on the choice of the best-adapted varieties. In general, the soft red winter wheats are grown, although soft white winter wheats are popular in the northeastern United States, especially in New York and Pennsylvania. In the extreme western portion of the eastern area, which is limited on the west approximately by the line of 30 inches of rainfall, hard red winter wheats of the Turkey type are grown. Along the line of 30 inches rainfall there is a transition zone in which hard and soft red winter wheats succeed about equally well.

Better Varieties for Many Farms.

Many farmers are doubtless growing poorer varieties of wheat than they might grow if they knew exactly what was adapted to their localities and farms. The United States Department of Agriculture has just issued Farmers' Bulletin 1168, Varieties of Winter Wheat, Adapted to the Eastern United States, which charts localities in which various types of wheat can be grown to advantage, and lists the varieties adapted to each particular locality.

Harvesting Wheat.

The bulletin suggests that there is a large local demand in New England for wheat as a poultry or stock feed, and it should not be difficult for several farmers in almost every neighborhood to sell all the wheat they can raise at a good price to their neighbors. Winter wheat will doubtless produce better average yields, where it can be grown, than spring wheat, if proper cultural methods and suitable varieties are used.

Improve Wheat Yield.

Wheat can be improved in yield and in other desirable characteristics by the selection of good heads or good plants from the general field and growing the seed from each individual head or plant in separate rows. Continued selection will result in constantly improved seed. Another method of purifying a variety and increasing the yield is what may be called mass selection. This consists simply in picking out good heads from the field at large, sowing the selected seed in a small area, and reselecting it the next harvest time. The bulletin may be had on application.

ANALYSIS MADE OF MANURES

Dry Material Contains Large Amount of Nitrogen, Phosphorus and Potassium.

The average of analysis of manures from cattle, horses and mixed, shows that a ton of dry manure contains 38 pounds of nitrogen, 7.6 phosphorus and 30.4 pounds of potassium. A ton of fresh farm manure consists of about three-fourths water but it contains ten pounds of nitrogen, two pounds of phosphorus and eight pounds of potassium.

HOW DISEASE IS INTRODUCED

Unwholesome Foodstuff That Is Decayed or Moldy Should Never Be Given to Fowls.

Disease is often introduced into a flock by unwholesome foodstuff that is decayed or moldy, but good food may be easily spoiled by placing it in dirty troughs or neglected feeding places, especially in hot weather when soft food or milk is given.

WELL-BRED POULTRY AROUSING INTEREST

Poultrymen Help Better Sires-Better Stock Movement.

Nebraska Live Stock Owners Enrolled in Campaign Report Standard-Bred Fowls — Plymouth Rocks and Leghorns Lead.

(Prepared by the United States Department of Agriculture.)

In the absence of census data on the quality of farm poultry, information being received by the United States Department of Agriculture in connection with the Better Sires—Better Stock movement is believed to be of interest to poultrymen. For instance, of 75 livestock owners in Webster

Barred Plymouth Rock.

county, Nebraska, who in one day enrolled in the better sires drive, 65 reported standard-bred fowls. The flocks averaged 94 birds. The principal breeds reported are, in the order stated, Plymouth Rocks, Leghorns, Rhode Island Reds, Orpingtons and Wyandottes. Barred Plymouth Rocks were more numerous than other varieties in the breed. Of the Leghorns the White Leghorns were raised in largest numbers, while of the Wyandottes the white variety was somewhat more popular than the Silver-Laced Wyandottes, which were second. Buff Orpingtons were the only variety of that breed reported.

The facts stated are believed to show interest in the keeping of well-bred poultry, especially since the Better Sires—Better Stock blanks merely call for the number of poultry kept; and in all cases the live-stock owners volunteered the facts about breeds and varieties. It is also noteworthy that, whereas the better-sires drive is aimed chiefly at the improvement of breeding males, in the case of poultry a large majority of females likewise are standard bred.

FARM CHIMNEYS NEED STUDY

They Should Start From Ground and Not Be Placed on Brackets—Make Foundation Solid.

All chimneys for farm buildings should start from the ground. Those placed on brackets are unsafe and often increase the rate of insurance. In a properly designed house of moderate size, one or at most two chimneys, each containing several flues, will serve every purpose. If possible, a flue should be provided for each stove, as much better drafts are thereby obtained, say specialists of the United States Department of Agriculture.

The chimney should have a solid foundation of brick or stone, and if of brick, of course, an extra footing should be laid. The exterior walls should be two bricks thick and the division walls one brick thick. In case the chimney is lined with one of the patent fire-clay linings now on the market one brick will prove of sufficient thickness for the exterior walls.

In case it is necessary to carry a stovepipe any considerable distance inside a partition to reach the chimney, a terra cotta thimble should be used, and where a pipe passes completely through a partition it should be protected with a ventilated thimble.

PLAN TO WEAN CALVES EARLY

Much Time and Annoyance Saved If Youngster Is Taken Away When Quite Young.

The cow owner who neglects to wean his calf because it is too much trouble is making ten times the trouble for himself by letting it nurse its mother. It is surprising how soon a calf can be taught to drink from a bucket, if one is determined enough. And the freedom from bothering with a hungry young bull a few weeks later, charging down, trampling one's feet and insisting upon having his way, is worth a lot.

COVER OR BLANKET FOR COW

Good Way to Keep Flies From Bothering While Milking—Obviates Tail Switching.

To keep flies from bothering while milking, make a cover or blanket for the cow from a large gunny sack, ripped open, and provided with strings for fastening under forelegs, and string across back to hold in place over the rump. If both the cow being milked and the one behind the milker are so protected there will be very little tail switching.

DAIRY POINTS

BUTTER SHIPPED IN SUMMER

Parcel Post Will Prove Entirely Satisfactory if Proper Conditions Are Maintained.

(Prepared by the United States Department of Agriculture.)

Parcel post shipments of butter are likely to be subjected to conditions, especially during the summer, which may cause deterioration and injure the quality of the butter. It is highly desirable, say specialists of the United States Department of Agriculture, that every possible precaution be taken before shipment. Particularly is this true of farm-made butter, because conditions affecting its quality and condition usually cannot be controlled as easily as in creameries. Farm-made butter, however, should be marketed just as satisfactorily as creamery-made butter when it is properly made and prepared for shipment.

It is necessary to maintain proper conditions in the care of the milk and

Several Thicknesses of Old Newspapers Should Be Wrapped Around the Butter Before Inclosing It in the Shipping Package.

cream and the making of butter if a marketable product is to be produced. Too much importance, it is said, cannot be given to maintaining cleanly conditions in the stable and in other places where the milk, cream, or butter are produced or kept, for they absorb odors and spoil very quickly. It is important, too, that these products be kept in a cool place. High temperatures should always be avoided, as they produce a soft, oily condition of the butter which is undesirable.

In manufacturing butter on the farm or in a factory the buttermilk must be removed and washed out, and the proper amount of salt must be incorporated evenly. Frequently parcel post shipments of farm butter are unsatisfactory to customers because proper methods were not used in making it, and the quality and condition of the butter thereby injured before it was shipped. For the satisfaction of customers it is important that a uniform quality of butter be produced.

Methods used in preparing butter for parcel post shipping depend largely upon the local conditions and style of package used. To insure delivery in the best possible state, butter, after being packed, printed and placed in cartons, should be chilled or hardened thoroughly before it is shipped.

One of the most satisfactory ways of preparing butter for shipment is in regular one-pound prints, the standard print measuring 2½ by 2½ by 4⅝ inches. Every pound print should be neatly wrapped in regular butter parchment or paper. A second thickness of such paper has been found to add materially to the carrying possibility of the butter. Waxed paper may be used for the second wrapping. As a further protection to the print, it should be placed in heavy manila paraffin cartons, which may be obtained from folding paper-box companies, either plain or printed as a stock carton or with a special private brand.

Corrugated fiber-board shipping containers of various sizes may be obtained for shipping one-pound prints of butter. These boxes or containers practically insulate the butter and furnish much protection against heat. Further protection may be obtained by wrapping the container in stout wrapping paper. The whole should be tied securely with a strong cord. In tying the twine it should be drawn tightly around the package so as to insure its proper carriage.

Some persons ship butter by parcel post in improvised or home-made containers. Clean, discarded, corrugated paperboard cartons are obtained from the grocer or other merchant at small cost or frequently without any cost at all. It is possible to cut a piece of paper board in such shape and size that when it is folded it will form a satisfactory carton.

LIKE FEEDING COWS IN DARK

Wisconsin Farmer Praises Cow-Testing Association as Guide-Board to Better Dairying.

"When I bought my farm two years ago there was a herd of scrub cows on it," writes a Wisconsin farmer to a field agent of the dairy division, United States Department of Agriculture. "I joined the cow-testing association, and soon found that my scrub cows were a failure, so I disposed of them and bought some purebred and grade Holstein cows. The cow-testing association is a guide-board on the way to better dairying and a big saving in feeds, as one can feed to so much better advantage where the production is known. Trying to feed without records of your cows is like feeding in the dark."

He Nailed Himself Up Firmly.

The man who "painted himself into a corner" when he was renewing the kitchen floor has been excelled in unwariness by a citizen of Oak Harbor, Ohio. We agree with the Chicago Tribune, which tells the story, in thinking that he got himself into a much more distressing predicament than his famous predecessor.

Instead of getting up on the roof that he was making, John stood on a timber in the attic and thrust his head up between two rafters, in order to nail on some boards. Having driven his last nail, he tossed the hammer to the ground, and then discovered that he could not withdraw his head from between them. Imagination shrinks from contemplating what John must have gone through while he was being released.—Youth's Companion.

One Man in Island of Girls.

An ideal "select seminary for young ladies," at least as far as freedom from masculine intereference is concerned, was until recently situated on the island of Papaelise, in the Ellice group, just north of the Fiji islands, according to the Continental Edition of the London Mail. Only one man, a caretaker, lived on the island. But the teacher was the only white person in the vicinity, and the "young ladies" were of chocolate hue.

A school much of the same type as an English boarding school was conducted, according to Miss Jolliffe, who founded the institution. The curriculum, however, was adjusted to the tides, as the students lived on fish they caught themselves, and on coconuts, which are plentiful on the island.

Wonderful Collections of Violins.

What is probably the finest collection of violins in the world, says a correspondent, was left by the late Dwright J. Partello of Washington. It contains only thirty instruments, but four are by Stradivarius, two by Guiseppe Guarnerius, three by Nicolo Amati, and one by Carlo Bergonzi, which a world famous violinist has called the most exquisitely toned instruments in the world. Every one of the violins is a perfect specimen and the whole collection is valued at a quarter million dollars.

Enormous Damage by Rats.

The United States has a rat problem, and some astonishing figures are presented of the annual cost of this pest, says the Nation's Business. India suffers more. For there are large sections of that country where religious scruples prevent the killing of even a rat. Maj. J. C. C. Kunhardt of the Indian medical service has recently published the results of his survey of rat damage in India, and he puts the annual loss at £1,250,000,000, or about one-seventh India's national income.

Motors Drive Out Horses.

The rapidity with which automobiles are superseding horse-drawn vehicles, has been proved by an experiment at a popular point of the state highway, at Burlingame, California, some 16 miles from San Francisco and one of the main arteries leading into the city. Keeping check at a given point from 6 a. m. to 8 p. m., it showed that 11 horse-drawn vehicles against 19,581 motor-driven vehicles passed in the 14 hours. Last year a much greater number of horse-drawn vehicles was shown in a similar experiment.

NIGHT

FEATHERS FIGURE IN PRAYER

To the Indian Their Religious Importance Is of Far More Value Than as Ornaments.

Feathers have an intense religious significance for Indians, and are valued for this far more than for their value as ornmanets. To a Hopi a feather is tantamount to a prayer, and the use of one or two feathers in his prayers is considered sufficient to ensure a favorable reply.

When an Indian desires something urgently he will tie a feather to a stick and conceal it in a shrine which he himself has constructed. This is considered extremely efficacious. Small fluffy feathers dangling from the ceilings of huts by strings are common sights. They represent prayers for trifles. Indians are always careful to keep a stock of prayers or feathers on hand, so that they will not be caught empty-handed when an occasion for prayer arises.

It was a departure from this custom which accounts for the use of feathers in costumes. Squaws of tribes whose habitat was Virginia, wore mantles fringed with feathers, and the Colonial records also tell of coats made of blue feathers sewed so close and thick that the coat looked like satin.

TOO BAD ABOUT HER MEMORY

And Really Opera Goer Should Not Be Expected to Remember Details That Are Trifling.

"You were at the opera last evening?"

"Yes; perfectly delightful time!"

"What did you hear?"

"Hear? Oh—Madge Gray is engaged at last, and the Billy Brews are going to get a divorce, and Bertie Baxby has lost all his money in Wall Street, and Sue Cathro has a baby, and Mrs. Sylee was lunching with another man while her husband was out of town, and—"

"But—you don't understand! What did you see?"

"See? Why, that Kate Kady has turned her old rose gown, and that those wonderful Van Gruber diamonds we read of are only paste, and that the Adleys are hardly on speaking terms, even in public, and—"

"But—but—what was the name of the opera?"

"Name of the opera? Oh—why, I did see it on the program, but really I've forgotten—I've such a poor memory for details; realy it is quite a cross!"

New Type of Boiler.

In a recently developed boiler of a new type the steam is generated by passing heavy currents directly through the water from one electrode to another, according to Popular Mechanics Magazine. A claim of 95 per cent efficiency is made for the apparatus. In structure the boiler is quite simple, being a rugged, vertical cylinder containing the vertically arranged electrodes. Steam pressures of up to 220 pounds are generated with a voltage ranging from the minimum to a maximum of 3,000. The quantity of steam is ingeniously controlled by means of automatic valves which reduce the water level as the demand for steam decreases. Immediately the top electrode is uncovered generation ceases.

Simple, but Effective.

A woman went to her doctor, complained to him of her husband breaking out into violent tempers, and asked if he could recommend a cure.

"The remedy," replied the doctor, "is simple. I have here an excellent water which I give to most of my patients who suffer from the same complaint. Should your husband become violent again, you need only take half a cupful of the water in your mouth and hold it there for a few minutes; the warmer the water becomes in the mouth the more visibly will your husband's wrath melt away. Repeat the dose in very severe cases."

The water was ordinary well water. The result was domestic happiness.

The Republic of Ciuvask.

"Our second stop was at Chebovara," writes a member of an Italian labor mission, traveling down the Volga in Russia—his article appears in la Stampa, Turin, Italy. "Chebovara is a little township, capital of the autonomous though diminutive republic called Ciuvask. The republic consists of 940,000 inhabitants of Tartar and Finnish descent. It is governed by the same laws as Greater Russia, its autonomy being preserved solely for linguistic reasons. However, the people are slowly becoming identified with the Russians."

Oil Valuable in Leprosy.

The use of chaulmoogra oil has been known for some time to have some virtue in the treatment of leprosy, and recently it has been discovered that there are a great many points of similarity between the germs of leprosy and those of tuberculosis. This had led to some government experiments in the direction of combating tuberculosis which will be conducted in Hawaii.

Unknown Iceland.

Iceland lying just south of the Arctic circle, in the latitude of central Alaska, Norway, Sweden and Finland, is little known. The people are a sturdy lot or they would not be there. There is possibly no other people who are so uniformly intelligent and well educated. Its mountains, of which there are an abundance, provide it with a great amount of water-power, which its people are just now about to utilize.

The "Class in the Corner" of the English Methodist church went out to the country home of Otto Pringnitz Friday evening to enjoy a social good time. The evening was spent in playing games of various kinds after which ice cream. cake and watermelons were served to all and a second and third helping was in order which still left plenty of good things to eat. All report that they had a most enjoyable evening.

FARMERS! Do you need any printed envelopes or letter heads Get them done at the Times Office. We have all modern machinery and electrically equiped.

There were seven revenue men in Klemme the fore part of the week. Don't get scared because of the great number as that is the way the birds travel now days—big numbers and quick clean up is their system. The Klemme ball team fell under their axe and had to come thru with 15 iron men for the privilege of playing ball. That is the first we knew that a ball team had to pay a revenue in order to play ball. One of the birds called on us to tell us the latest fashion for printing show tickets.

FOR SALE—A fine reed baby carraige, in excellent shape and as good as new. Inquire at the Times Office. J-14tf.

The Henkel Construction Company, contractors on the North Iowa Pike, east of town, have moved their outfit and are now working from the east end of the job. They quit on this end when about twenty rods from the Nelson corner on the half mile road running north and south. They would have finished to the corner near their plant but the water in the ditch from which they drew teir supply played out. From this time on they will draw their water supply from the head of the lake and will experience no more difficulty from that quarter. They were forced to suspend operations on this end of the pavement Thursday of last week. Leader.

TURN COBS INTO DOLLARS

Engineering Experiment Station At Ames Seeks to Save Enormous Waste Corn Production

Iowa's corn crop yields something like 3,000,000 tons of cobs each year for which no economical use has yet been found. The country at large annually has more than 20,000,000 tons of these cobs, most of them waste, save perhaps in Missouri, where the "Missouri meerschaum" has its origin. It is estimated that only 2 per cent of the toal cobs produced is used for fuel.

If his waste could be made into a profitable by-product of the corn crop, it would mean a chance for added farm profits and because of this possibility. the salvaging of corn cobs is one of the problems on which the Iowa Engineering Experiment Station at Ames is working.

At the laboratories of the experiment station at Ames cobs have been transformed into paper pulp suitable for a srawboard substitute. Thru destructive distillation they have yielded acid tar, wood alcohol and charcoal in greater quantities in weight for weight than wood, and the tar seems to have superior quality. Cobs have also yielded a pitch of value, acetic acid, formic acid and crude pyroligenous acid. A specially important chemical produced from cobs is furrural, which now sells for about $10.00 a pound, because it is not abundantly produced otherwise. Furfural could probably be substituted for alcohol, acetone, and other substances in processes of manufacture, if it were cheaper.

The chemists of the engineering experiment station expect to continue their work wih cobs until they find satisfactory industrial uses for them in some way or other.

SOMETHING TO THINK ABOUT

By F. A. Walker

WASTED ENERGY.

WHAT struck Madame Curie most in America was the electric, nervous energy that she found in the cities.

She made the suggestion: If all this power were used to further one great work, how tremendous the result would be!

There spoke the woman of science.

The true discoverer in the natural world uses imagination as well as observation in finding out things.

Madame Curie and her husband knew that radium existed before they succeeded in releasing it from the material in which it was hid.

Her attitude towards the busy life around her is naturally different from that of the ordinary spectator who only looks at the surface commotion.

* * * *

The difference between the two is like that between a couple of visitors to Niagara Falls.

To one the great rush of waters is nothing in the world but a physical curiosity. He objects to any interference by man with the appearance of the scenery.

To the other the important thing is quite different.

He is thrilled at the thought that through human ingenuity the water has been harnessed and the energy tapped and stored up. This is carried long distances and made to do all sorts of useful work.

* * * *

The triumph of man's mind over nature is as great as the triumph of the vast stream over the rocks through which it forced its way in the course of countless years.

It is only necessary, for instance, to watch the crowds going to work in opposite directions in a great city to get the idea.

To a Francis Bacon, a Benjamin Franklin, or a Madame Curie—taking these as representative of the scientific spirit—the world must look like a place that is largely organized for inefficiency.

* * * *

A large part of the work done by men and women in the course of a day has as little result as the beating of the waves of the sea on the shore.

Whether a machine is good or bad, comparatively perfect or imperfect, depends on the question of waste.

In the physical as in the industrial world, progress depends on the success with which means are adopted to ends.

So the old saying is true: Success depends on trifles and success is no trifle.

LYRICS OF LIFE

By DOUGLAS MALLOCH

GIVING.

HE PUT his name on every list,
He was a true philanthropist—
And yet a mighty lot he missed
In giving of his self:
He gave his gold, but let a few
Good friends disburse the check he drew,
And so one joy he never knew—
He never gave himself.

His money did a lot of good:
It found the needy neighborhood—
And yet he never understood
The thing we have to give,
The thing we need to give to men,
Besides our money now and then,
The thing we have for giving when
Men's lives are hard to live.

Oh, wealth is much, but much the hand
That finds the fallen brother and
Restores him to the solid land
When tossed upon the seas;
Oh, wealth is much, but much the smile
That lifts the other man the while
You give a little of your pile
For his necessities.

So go yourself and do not send:
Be both the giver and the friend;
Be not too rich, too high, to bend
To lift the man you aid —
Seek out the soul that is adrift,
Bring gold to help but love to lift,
And you shall feel, for every gift,
A thousand times repaid.

MOLLIE'S TRIAL

By AGNES G. BROGAN.

(©, 1921, Western Newspaper Union.)

"Now did you see that?" asked Mollie, dismayed, "there go the tops of my hollyhocks."

Her new neighbor's eldest boy could be seen from Mollie's window gleefully dismanteling her tall plants of their flowers, while in the rear a grinning trio admired his boldness.

"Here you," cried Mollie, in as sharp a tone as it was possible for Mollie to use, "keep to your own side of the garden. You ought to be ashamed?"

Almost in tears, Mollie turned to her elder sister, Mrs. Manly. But now, the younger sister found not the championship she expected. Mrs. Manly instead, leaned out of the latticed window with a smile of sudden interest upon her face.

"Who?" she asked eagerly, "is that tall fine looking man? Tell me, Mollie." Her sister stared aggrieved.

"Why that," she replied, "is the doting father of those five irrepressible, boys."

"The father!" exclaimed Mrs. Manly. "And you spoke of the boys as being motherless? What a pity, that there are five."

"I fail to see what his wifeless condition has to do with me," said Mollie crisply.

She had caught her sister's inference.

"The sour faced woman who keeps house for the man and his cherubs, told Chloie that the boys might have been better, if they had not been left motherless."

Mrs. Manly drew in her head, disappointed.

"And he has such a fine face—your new neighbor Mollie," she regretted. "If only he had happened along before he took unto himself a wife. Or at least if he did not now possess those five terrible boys—"

Half impatient, half laughing, Mollie turned to her sister.

"You poor match-making hopeful," she said, "will you never give up your fancies for me? Now, that I have that careless father here in his garden, I shall go down in my severest manner and call him to task. A spinster has some rights of her own, even hollyhock-flowers, and pet cats.

Indulgently smiling, Mary Manly watched her small graceful sister, ascend a small ladder upon her own side of the garden wall, and beckon her neighbor to conference. The neighbor came with alacrity. He appeared almost as joyous as young Danny had, in his guilty pursuit of hollyhock blossoms. The conference lasted sometime, ending peaceably with a floral offering from the opposite side of the fence. The neighbor had evidently given in exchange for Mollie's denuded plants, a rare and blooming one of his own, and as Mollie precariously descended with her burden it was necessary for the neighbor to hasten around to her side of the wall, and assist her.

"His name," Mollie calmly confided, "is John Ainsworthy. He has taken the place for the summer. The Lemon—it seems that the boys dub their crusty housekeeper 'The Lemon'—has no control over their actions; Mr. Ainsworthy will reprimand them." Mollie turned her face away.

"He reminded me of the fact," she said, "that they have no mother."

"It was upon the following morning, that Mrs. Manly again saw her sister ascend the ladder to the garden wall. This time she bore a basket of Chloie's fresh baked cookies, and enjoyed tossing them to the freckled faced urchins, hastily congregated beneath. The boys caught the cookies with triumphant shouts. Their manner of acceptance leaving much to be desired.

"Hit us another, Peachy," cried Danny. Mollie reddened in indignation. "If that is the way you are going to talk to me," she admonished, "not another cookie."

"Ah! say!" exclaimed Pete, the second boy, "Dan means all right, Peachy. That's what we call you when we're alone."

Mollie was shamedly pleased.

"Peachy!" they named her, these strange half-civilized young creatures. And when evening came, more often than not Mollie rode in the new neighbor's car—at the new neighbor's side, with the delighted boys crowded in behind. Mrs. Manly became seriously alarmed. From her sister's first open condemnation of John Ainsworthy and his family Mollie had relapsed into determined silence upon the subject. Mrs. Manly's cleverest efforts could bring from her no word. Mary Manly at last deliberately put her question. Mollie laughed happily.

"I do love John Ainsworthy," she admitted, "and I am—going to marry him.

"The boys," she added, "are some that were brought to John's notice as in need of assistance. They are orphans and recently convalescent. John conceived the idea of bringing them out here for the country air. John is a bachelor, you see, and heretofore had no one to think of save himself. From now on," added Mollie cheerfully, "he will have me." She sighed. "I will miss those boys," she said.

Declined the Honor.

"So you have named a new brand of cigars after me, have you?" said the celebrity.

"I have taken that liberty, sir," replied the manufacturer.

"Well, I wish you would call it something else. I have tried one."

FARM POULTRY

ARRANGEMENT OF DUCK FARM

Should Be Located on Light, Sandy Soil, With Convenient Facilities for Watering.

(Prepared by the United States Department of Agriculture.)

Duck farms are usually located on light, sandy soil, preferably on sloping land, where the droppings will leach freely into the soil, so that the land keeps sweet and clean. The farm should have good shipping facilities to aid both in shipping products and in buying supplies. The arrangement of the buildings should be planned to economize labor and allow for future increase of the equipment.

The incubator cellar should be convenient to the brooder house, the brooder house to the growing house

Young Green Ducks, Ready for Market.

and pens, and these buildings to the killing house. The pens in the houses, the outside yards, and the arrangement of the buildings should be planned so that the ducks may be easily driven from house to house as desired. The feed room or house should be centrally located.

Convenient watering arrangements are essential where large numbers of ducks are kept, as they require a large amount of drinking water, say poultry specialists of the United States Department of Agriculture. While ducks may be kept successfully under very intensive conditions, it is advisable to allow considerable yard space. Double yards, which may be rotated and planted to quick-growing crops, such as oats, wheat and rye, are good for intensive duck farms.

It is advisable to have a pond or stream for the breeding ducks, as they usually give better fertility under these conditions, although on some successful duck farms the ducks are always kept on dry land. The young green ducks on some farms which have a pond are not allowed to go into the water except to bathe and clean their feathers just before marketing. Other growers, however, allow the green ducks free access to ponds or streams until they are marketed.

CHEAP COOP FOR BACK YARD

Inexpensive House Will Prove Entirely Satisfactory Where Small Flock Is Kept.

It is not necessary to spend much money for housing if you are going to keep a small flock of hens in your back yard. Indeed, it is unwise, say poultry specialists of the United States Department of Agriculture. One or two piano cases or a large packing box may often be made into an acceptable home. But whatever you build should be made dry and free from drafts, and have good ventilation. The United States Department of Agriculture has numerous bulletins giving directions for this kind of construction, and any of these are available for the asking, or for a very few cents where a charge is necessary. A card to the division of publications, United States Department of Agriculture, Washington, D. C., will get you what you need.

EGGS PRESERVED WITH LIME

Will Be Found Quite Satisfactory Where Water Glass Is Difficult to Obtain.

If water glass is not obtainable, lime may be used for preserving eggs, say specialists of the United States Department of Agriculture. It is not considered so good as water glass, as in some instances eggs preserved by this method have tasted slightly of lime, although at other times limewater has proved entirely sastifactory.

To preserve with lime, dissolve two pounds of unslaked lime in a small quantity of water, and dilute with five gallons of water that has previously been boiled and cooled. Allow the mixture to stand until the lime settles, then pour off and use the clear liquid. Place clean, fresh eggs in a clean earthenware crock or jar, and pour the clear limewater into the vessel until the eggs are covered. At least two inches of the solution should cover the top layer of eggs.

HOME TOWN HELPS

IN FIGHT FOR CIVIC BEA

Commercial Interests of Kansas Unite for War on Billboards on Boulevards.

The commercial interests of K City have gone on record as e of the "uglies."

The city planning and public i ings committee of the chamber of merce adopted a resolution, tak definite stand against "the ente ment of either filling stations or boards on the city's boulevards homes."

The resolution stated that the ber members are heartily in a with and desire to lend their support to the joint resolution of two houses of the council to the that filling stations and billb should not be permitted to destro effect of Kansas City's boulevard tem.

After a protracted discussio committee declared in favor of a cal option" on the uglies. By t was meant that each neighborhood permitted to decide whether billboa or filling stations should be allowed locate in that vicinity. The resid whose homes are within view, or w in close proximity of the ugly, sh have a voice in denying or permit its location, the committee mem believed.

Billboards in certain localities not objectionable if properly co structed and lighted, in the opinion the committeemen. But their plac not in residence neighborhoods or boulevards, they agreed.

WAR ON INDUSTRIAL UNRES

"Community Service" Idea Is Spreading, for Many Good and Substantial Reasons.

"Community Service, Incorporated shortly will take its place as a definite factor in the industrial life of Illinois.

This announcement comes through Maj. A. A. Sprague, chairman of the executive-financial committee for Illinois. Organization has been complete for Illinois and the plans for the establishment of the work are under way.

The aim of Community Service is to improve living and leisure conditions that through their development a peaceful, settled and contented community atmosphere will prevail and industrial unrest to a great degree be removed.

The work of the organization has passed the experimental stage. It has been found to be a very solid and substantial success in the big industrial communities of Bethlehem and Chester, Pa. The main work of Community Service is the solution of the leisure hour problem. A trained organizer will be sent to various communities to study conditions and make a survey of the social and recreational life, determining what is most needed and most desirable for the occupation of the leisure hours of the community and then assisting them to provide and build up a service system for themselves.

House Painting.

When the home owner's thoughts turn to house painting problems Californians, particularly, begin to wonder what color will be best for the movies. A location director for motion pictures in Hollywood, Cal., says that white houses are almost impossible for use in motion pictures and he hopes the people within the area of the picture industry will use neutral or dark shades when they do their house painting.

"Darker shades are more agreeable to the eye than those of dazzling whiteness," so this movie director says, "and they photograph better, in addition to blending with the natural colors of the landscape."

All-white houses are also hard on the eyes.

Beauty Not Matter of Expense.

Beautiful grounds need not be expensive. The loveliest flowers and plants that ever grew are found in the woods and along the banks of streams, in fence corners, and in fields and shady nooks. They are yours for the digging. What is rarer or prettier than a bed of wild violets and ferns in a shady spot near the house? Plant generously of perennials, so that they will bloom and grow year after year with little time and attention and give stability to your landscape effects.

Willie Had a Reason.

Willie Hopkins is only ten years old, but, strange to tell, he brushes his own hair and washes his ears without parental coercion. It must be admitted that Willie just started this most uncommon practice within the last few days. The young man's mother was dumfounded when she walked into his room and found him plastering down his hair with a brush.

"You're a very good boy," she said. "How did you come to think of brushing your hair and washing your face?"

Willie looked sheepish and then replied: "Mary Brown told me I was good lookin'."—New York Sun.

Don't Keep Auto in Barn.

The barn is a bad place for the automobile. Build a garage.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

TRAVELING WOMAN.

THE traveling man has been an important member of our commercial life these many years, but the traveling woman is newer. However, she has come, and she is making good. The old notion that the work was too hard for her is rapidly dying away. Today traveling is not hard. A woman is no longer thought queer when she travels alone.

If you look forward to taking up this sort of work you need to ask yourself if you are qualified for the work.

You ought to be a good mixer and capable of taking care of yourself. You ought to have charm, the power of interesting people, and be an easy talker. You must make yourself thoroughly familiar with the line of goods you are to sell. Never try to sell something in which you do not believe. It can't be done.

You should begin by taking a course in some good school in salesmanship, with special work in the line you wish to follow, and you should follow this by workinig in a store or wholesale house. Make it clear that you wish to fit yourself to travel, and do not stay with any firm that is not willing to give you a chance to do this.

Once launched, it will depend on yourself as to how far you will go. But if you are a real commercial traveler you will get a lot of fun out of the life, plenty of experience, and you stand to make a lot of money.

SCHOOL DAYS

Realism.

Blake—That man Sphagetallo is certainly a naturalistic singer.

Blair—What do you mean by that?

Blake—Why, last night he sang "Rolling Waves" with such realism that twenty people in the audience had to leave on account of seasickness.

THE ROMANCE OF WORDS

"HURRAH!"

THOUGH apparently of Anglo-Saxon origin because it is an exclamation used principally by English-speaking people, "Hurrah!" is of Teutonic ancestry, being derived from the word hurr, also the basis of the English verb "hurry." It is, in fact, only an amplification of this German word, which made its first appearance in English in the form of "Hurray"—a pronunciation which is probably more popular today than the use of the broad "a" indicative of the "ah" sound.

Examination of the marching songs and martial literature of Germany at the time of the Napoleonic wars shows that "Hurrah!" was frequently used by the Prussian soldiery at that time and even began to seep into the French language in the form of hourra. But the residents of the other side of the Rhine preferred to cling to their "Vive!" an ejaculation which is interwoven with French history for centuries past. The Germans also soon abandoned the exclamation in favor of "Hoch!" but the English took it up and English-speaking people have found in it an extremely satisfactory means of expressing their enthusiasm and approval.

Foreign Talk.

"The hardest working foreigner I ever saw drove past here yesterday in his new car with some visitors."

"Hardest working—how?"

"He was trying to talk to his friends and still keep his hands on the wheel long enough to steer the car."

Happens That Way Sometimes.

The man who sat on his woodpile and told a funny story, expecting the wood to split," remarked the Observer of Events and Things, "evidently did not strike a responsive cord."—Yonkers Statesman.

MOTHER'S COOK BOOK

by Nellie Maxwell

Do not fear Today. And let all worry slide. All things that do not count—let them go, too. Work and help and love Today.

For this Today will never dawn again. —George Matthew Adams.

MIDSUMMER JAMS AND JELLIES.

SOME of these fruits will be out of season but with canned juices one may make delicious jellies:

Apple and Raspberry Jelly.

Cut up apples after washing them and removing the blossom end. Do not pare or core. Just cover with water and bring to a boil, cook until the apples are very tender and can be mashed easily. Drain through a jelly bag. To the apple juice add any amount of raspberry juice as a flavor. Measure the juice and boil hard for twenty minutes, skimming often. Allow three-fourths of the measure of sugar to the juice. Heat the sugar and add to the boiled juice, cook five minutes or until it jells from the spoon. A shaving of orange peel may be added if desired.

Grape Nuggets.

Take wild grapes green and crisp, halve and seed them. Add three-fourths the weight of sugar and boil thirty-five minutes. The product will jelly but the halves of the grapes will be apparent. Seal with paraffin.

Blackberry Jam.

Put one quart of blackberries in a pan with one-fourth of a cupful of water, boil until the berries are soft then add sugar to taste, a grating of orange peel or a bit of stick cinnamon. Cook until well broken, thicken with a tablespoonful of cornstarch mixed with cold water, cook until smooth. This jam will keep but is nice for immediate use. Serve with breakfast cereal and cream.

Mint Jelly.

Prepare apples as above and let drip over night. Measure the juice and add a bunch of mint or a rose geranium leaf, boil hard, skimming frequently, for twenty minutes; add the sugar, using three-fourths measure of sugar and boil five minutes. Pour into glasses and seal with paraffin when cold.

LIVE STOCK FACTS

CAMPAIGN FOR BETTER SIRES

Department of Agriculture Is Aiding Movement by Issuing Number of Publications.

(Prepared by the United States Department of Agriculture.)

In response to many requests for information to be used in starting better-sires movements in various localities, the bureau of animal industry, United States Department of Agriculture, has prepared a list of available publications and other material in the department. It has also furnished data useful to persons interested in legislation for restricting the use of mongrel sires.

Except when the open range is involved, however, or there is need to control inferior sires from running at large, specialists of the bureau prefer a continuance of educational work to legislation. They place emphasis on the fact that the work, although involving certain records and blanks, is strictly educational. To aid in conducting educational campaigns, the department has issued a number of circulars, posters and newspaper articles, as well as much mimeographed material. A booklet entitled "Better Sires—Better Stock," explaining the movement, can be obtained by addressing the United States Department of Agriculture, Washington, D. C. Other material on this subject is:

A Purebred Sire.

Yearbook Separate 816, Harnessing Heredity to Improve the Nation's Live Stock.

Department Bulletin 905, Principles of Live Stock Breeding (semiscientific). Price, 15 cents.

Farmers' Bulletin 1167, Essentials of Animal Breeding.

Enrollment Blank for Better Sires—Better Stock Crusade (on which live stock owners agree to use good purebred sires).

Specific Facts and Figures on Benefits Following Use of Better Sires.

County Live Stock Survey Blank.

Poster, Which Way Is Your Live Stock Going?

Poster, Purebred Sires and Herd Improvement.

Several sets of 72 lantern slides each have also been prepared by the department and a motion picture is now in the making.

MILK HELPS YOUNG ANIMALS

Skim Milk and Other Creamery By-Products Are Useful Feeds for Pigs and Calves.

While whole milk is nature's balanced food and is valuable for young animals, skim milk and other creamery by-products, such as buttermilk and whey, are also useful feeds, say specialists of the United States Department of Agriculture. Skim milk is fed to young pigs in the proportion of about three pounds to one of concentrates, such as cornmeal or shorts. Buttermilk, which has not been diluted too much with water, has nearly the same feeding value as skim milk. It is a better food for swine than for calves because it is apt to cause digestive disturbances when fed to the latter, unless considerable care is used. Whey is used almost exclusively in feeding swine. It is about two-thirds as valuable as skim milk as a food. Accordingly from ten to twelve pounds of whey are equivalent to one pound of grain. Sweet skim milk, when supplemented with other feed such as corn meal or wheat shorts, is very good for young calves. If beef calves are to be fed skim milk, they should be fed in practically the same manner as dairy calves.

HIGHER PRICES FOR HORSES

Farmers Are Advised to Breed More Heavy Draft Animals Wanted for City Hauling.

Heavy draft horses are in greater demand and commanding higher prices than at any time in the last 20 years, according to the proprietor of a Boston trucking concern which maintains 100 horses and 28 auto trucks. In a letter received at University farm he says: "For the short haul the horse has no competitor. We buy at any time and have paid as high as $600 each, but are not getting as good horses as we would like to use. We believe the peak stage of motortruck sales and use has been reached. Farmers should be encouraged to breed better horses."

Improved Lawn Mower.

A lawn mower that will successfully cut the grass on the incline of a terrace and that will not require its operator to pull it up and down, nor run up and down the grass bank himself, is described in Popular Mechanics Magazine. In construction the new device does not differ greatly from the old-style lawn mower. Instead of the stationary handle, the new machine has a pivoted handle set on a toothed quadrant. By lifting a stop pin from between the teeth of the quadrant, and setting it to the desired point, the mower is brought into an angular position relative to the operator, so that he can cut a lengthwise swath on the slope without leaving the ground level.

Wisdom.

"The boss handed me a cut in wages today."

"Did you stand for it?"

"I did. I've three relatives who were laid off altogether."

After Thorough Trial a Detroit, Mich., Man Endorses Pe-ru-na

The following letter written from Detroit, Michigan is no snap judgment expressed on the merits of Pe-ru-na, the well-known catarrh remedy, but rather a mature, sober opinion formed after a full year's trial.

This is the way Mr. Michael Fako of 906 East Palmer Avenue, in the Michigan Metropolis, writes: "After using PE-RU-NA for about one year will say I have found it a very good medicine for catarrh. It has helped me a great deal and I am very well satisfied. I have gained in weight, eat and sleep well, my bowels are regular and better color in my face.

"PE-RU-NA has done wonders and to me is worth its weight in gold. I shall continue to use PE-RU-NA as long as I live and recommend to my friends who are troubled with catarrh."

Nothing can be more convincing than an endorsement of this nature from an actual user. There are many people in every community whose experience, in using Pe-ru-na, has been identical with Mr. Fako's. It is the standby for coughs, colds, catarrh, stomach and bowel disorders and all catarrhal conditions,

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

Metal and Paper Money.

Only gold coins are worth their face value by reason of the gold in them at the world rate of $20.67 an ounce. Silver and other coins do not have metal in them that equals their face value. Their value is depreciated by an over issue of paper currency, as has generally occurred in European countries, and by the demand for American dollars in bills of exchange to pay for American exports which have been greatly in excess of American imports. Under more normal conditions the demand for bills of exchange in America and other countries about balance, and keep most issues of money at a parity.

Busy Bertha.

The dear old lady was traveling in a compartment of an English train and, what with her knitting and watching the scenery and her guide book, she was enjoying herself about as much as old ladies usually do. Then a young soldier, carrying a rifle, came in and sat opposite her. Immediately she stiffened up and presently said, in no unmistakable tones:

"Sir, will you please put the nozzle of your gun out of the window?"—Harper's Magazine.

Why Jimmy Balked.

Mrs. Jones was at a loss at first to understand why her son, Jimmy, aged ten, was unable to endure the society of his Aunt Clara.

"Why, my son," said the mother, finally, "she is always so nice to you—always patting you on the head!"

"Yes," said Jimmy, "with her knuckles."

AMUSED HIS NAVAL HOSTS

Lawmaker Eminently Justified His Reputation as a Man of Some Eccentric Doings.

One of the new members of the house of representatives, who is regarded as a somewhat eccentric person, was a continual source of astonishment aboard a transport on her trip to the bomb-dropping experiments off the Virginia capes. Examining an instrument aboard the vessel, and being informed it was a range finder, he inquired how far it would shoot. Being loaned a telescope to make a better examination of the battleship Iowa, he looked through the big end instead of the little one and then complained he could not see anything. He followed this with a denunciation of a naval policy which permitted the purchase of such useless things.

But the thing that interested some of his colleagues most was the fact that he brought no baggage aboard, not even a toothbrush, so far as anybody could find out.

"Why should I bring any baggage?" he asked. "We're only going to be gone four days aren't we?"—Brooklyn Eagle.

A Moneyed Crowd.

"Sir," exclaimed the artist who had been engaged to entertain the Wadleigh guests, "my contract he call for two songs zis evening. You ask me to sing three. It's one outrage. I sing before zee crowned heads of Europe."

"Oh, that's all right," said Mr. Wadleigh, soothingly. "You are not before the crowned heads of Europe now, but real people. Why, there's enough money represented in this little gathering to make the fortune of the average king look like a collection taken up for a children's outing."—Birmingham Age-Herald.

Insect Carries Bacteria.

It appears that infection-spreading must be added to disastrous voracity in our indictment of the striped cucumber beetle. The United States Department of Agriculture finds that the bacteria of cucumber-leaf wilt are carried in the jaws of this beetle, and in the intestinal tract may survive the insect's hibernation, prepared to attack the first leaf of spring. This is the first time insects have been known to carry bacteria throught the winter.

Physiological.

One Saturday afternoon a woman entered a grocer's shop. After ordering her weekly list of goods the grocer asked her if she would be good enough to take the things with her.

She became indignant.

"Well, ma'am," replied the grocer, "I'm sorry to have to ask you to take them, but I've no one here—my right hand's away with a swollen foot."

Western Canada Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.

For certificate entitling you to reduced railway rates, illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, etc., write

80 Years Old —Was Sick

Now Feels Young After Taking Eatonic for Sour Stomach

"I had sour stomach ever since I had the grip and it bothered me badly Have taken Eatonic only a week and am much better. Am 80 years old," says Mrs. John Hill.

Eatonic quickly relieves sour stomach, indigestion, heartburn, bloating and distress after eating because it takes up and carries out the excess acidity and gases which cause most stomach ailments. If you have "tried everything" and still suffer, do not give up hope. Eatonic has brought relief to tens of thousands like you. A big box costs but a trifle with your druggist's guarantee.

-:- LOCAL NEWS THAT MAY INTEREST YOU -:-

No wonder the fat man chuckled

I SWELLED with pride.
THE FAT man next to me.
WAS READING one.
OF MY cigarette ads.
AND I felt him chuckle.
NOW NO one had ever.
PRAISED THAT ad.
SO I had to ask.
IF HE liked it.
AND HE said, "Sure."
AND LAUGHED some more.
THEN HE said.
"LOOK HERE" and pointed.
AND WHERE I'd written.
"PURE TOBACCO."
THE PRINTER had set.
"PURE TABASCO."
AND THAT'S why the man
THOUGHT MY ad.

WAS HOT stuff.
BUT THEN he said.
"FORGET THE ads.
I NEVER read 'em.
BUT LEMME tell you.
SOMETHING DIFFERENT.
THEY OUGHT to say.
ABOUT THAT cigarette.
AND THAT is this.
THEY SATISFY."
AND DARNED if I don't think
HE REALLY believed.
HE WAS giving me.
SOMETHING NEW!

YOU can blame it on the printer if you don't see "They Satisfy" in a Chesterfield advertisement. But be sure of this—you'll find it in the cigarette every time. Wonderful Turkish and Domestic tobaccos, wonderfully blended—it sounds easy. But you'll find nothing else like Chesterfields. *That blend can't be copied.*

Air-Tight Tins of 50

Ask your dealer to show you the new vacuum-sealed tins of 50 Chesterfields. A compact, convenient and absolutely AIR-TIGHT packing—the cigarettes keep fresh indefinitely.

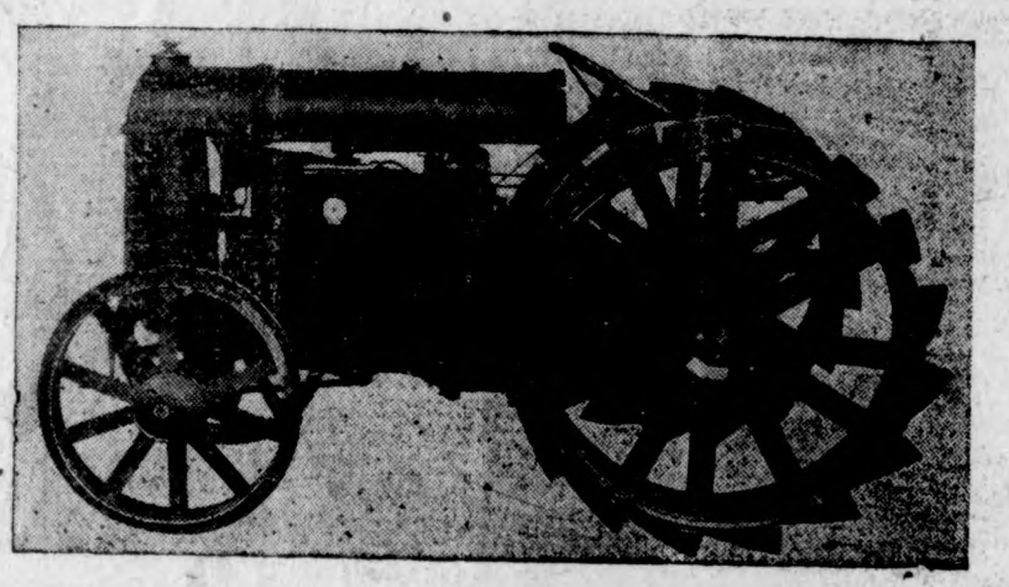
FORDSON



Shorter hours on the farm

The Fordson saves from thirty to fifty per cent of the farmer's time.

Fewer horses on the farm

The Fordson does the work of from four to six horses.

Less farm help

One man with a Fordson can do more work easier and with less expense than two men with horses.

More money for the farmer

A farmer with a Fordson can raise more crops easier and with less expense He therefore makes more money.
